SELF-LOCKING CABLE TIES
Meets Applicable MIL Specs

Double Pawled Head.
Double sided serration with positive locking.
White Nylon — Flexible & Conformable — Flame Retardant — Fungus Inert — Resistant to Solvents, Alkalines and Grease. Operating temperature ranges from -40°F to 185°F.
Various sizes, heavy duty-screw mounting types.
Self adhesive mounting plate available for some ties.

HARDWARE

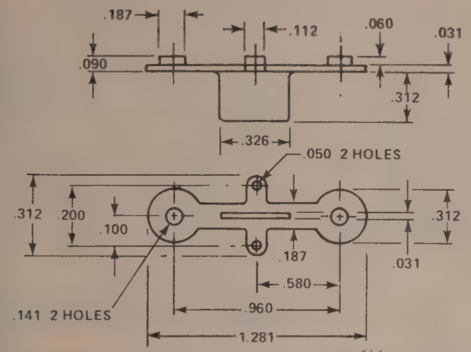
TRANSISTOR MOUNTS, WAFERS & COVERS

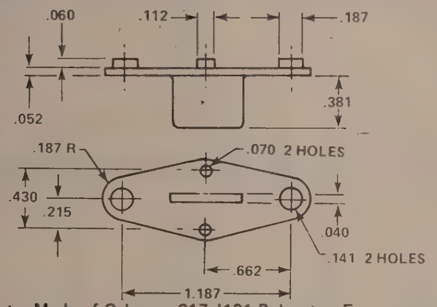
NYLON POWER TRANSISTOR MOUNTS



Replaces six pieces of conventional insulation. Built-in barrier separates and insulates base and emitter pins from each other. Screw insulators require 3/16" clearance holes, pin insulators .113 dia. clearance. Mounting centers for types TO-3 and TO-66 power transistors.

Concord No.	Transistor Type
770-1821	TO-3
770-1822	TO-66

HIGH TEMPERATURE TRANSISTOR MOUNTS



Heavy Duty, Made of Celanese 917 J101 Polyester. For excessive temperature and electrical requirements. Rated for SE-O UL, 400°F Cont.

Concord No.	
770-1830	TO-3
770-1831	TO-66

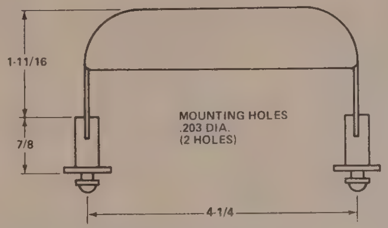
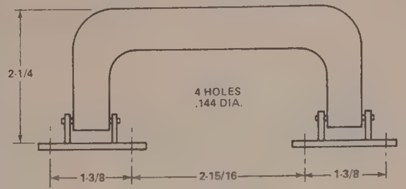
Molded Grip Handles



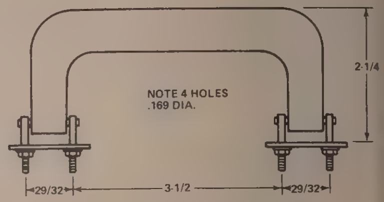
Manufactured of high impact styrene and nickel plated steel. Mounts with 10-32 machine screws — (supplied). Max. panel thickness 1/4", 76 lb. max. load.

Part No.	Color
790-2301	Black
790-2302	Grey



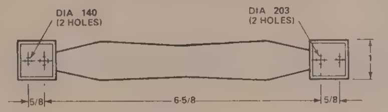
Mounts with rivets or #6 screws — (not supplied). Max. panel thickness — unlimited 60 lb. max. load. Folds flat to case.

Part No.	Color
790-2303	Black
790-2304	Grey



Mounts with integral 8-32 studs and nuts — (supplied). Max. panel thickness 3/8". 60 lb. max. load. Folds flat to case

Part No.	Color
790-2305	Black



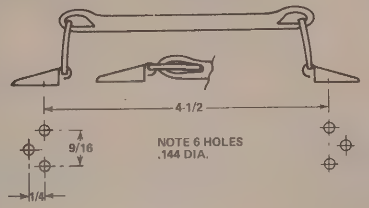
Spring Glide Handles

Manufactured of black genuine leather. Contoured stitched, and chrome plated steel.

Mounts on panels up to 1/4" thick, 120 lb. max. load. Designed to lie flat on case when not in use. Will not rattle under vibration. Attaches with fold tabs on cap against rear bearing.

Washer Plate, Spring and Washer Plate can be Secured with Optional Screws.

Part No.
790-2306

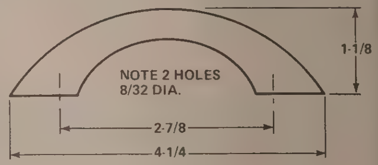


RETRACTO LINK HANDLES

Manufactured of black genuine leather with matching stitching and nickel plated steel.

Mounts on panels up to 1/2" thk., 60 lb. max. load. Lies flat when not in use. Attaches with fold tabs against rear bearing plate which can be secured with #6 screws — (not supplied).

Part No.	"A"	"B"
790-2307	4-1/2	5-3/4
790-2308	5-1/2	6-5/8
790-2309	6-3/4	7-7/8



BAKELITE HANDLE

BLACK MOLDED PHENOLIC

Mounts with 8-32 screws — (not supplied). 40 lb. max. load.

Part No.
790-2260

TEST LEADS

SPECIFICATIONS

Wire — #20 26/34 strands 500 volts .125 O.D.
Extra-flexible, kinkless rubber covered
approximately 48 inches long.
Handles — Butyrate
Solderless Tip — Brass Nickel Plate
Needle — Steel Nickel Plate

Meter Plug Handle — Molded Plastic
Body — Brass Nickel Plate
Banana Plug Spring — Phos. Bronze Nickel Plate
Alligator Clip — Steel Cad Plate
Boot — Vinyl
Lug — Brass Nickel Plate

SUPPLIED IN SETS CONTAINING (1) RED AND (1) BLACK LEAD

Solderless Tip Test Lead

"SAFETY" PROD TEST LEADS

SPECIFICATIONS

SUPPLIED IN SETS CONTAINING (1) RED AND (1) BLACK LEAD

All Test Lead Set Supplied With .080 Combination Phone and Insulation Piercing Tip, With Radial Notch for Wire Buss Layovers.

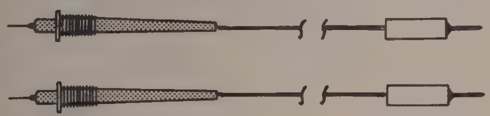
Tip Accepts Screw on Alligator Clips Part Nos. 795-2307 and 795-2308

Safety Prod Handle — KJB Type ABS Plastic (94V-O)
Wire — #20 Awg Rubber Covered 48" Nominal Length
Lug — Brass Nickel Plate
Boot — Vinyl
Alligator Clip — Steel Cad Plate

Banana Plug Spring — Phos. Bronze Nickel Plate
Meter Plug Handle — Molded Plastic
Combination Tip — Brass Nickel Plate
Input Handles — Molded Plastic

795-2300

Combination Tip To Phone Tip Instrument Input



795-2304

Combination Tip To Standard Banana Plug Instrument Input.

YOU PROBABLY WON'T SEE WHAT YOU NEED ON THIS PAGE

We're just showing some of Connector Corp.'s capabilities

Our 2nd Quarter Century: Providing design solutions to help packaging engineers achieve max. unit performance.
5 Plants: Complete in-house mfg./QC from basic raw materials to finished product.
Highly Efficient Cost-Saving Mfg. Techniques: Already tooled on many thousands of items, one of which can be adapted for you or a new one made to your individual requirement.
Production: High volume high speed production to close tolerances.
Market Reputation: A typical long time customer rates C/C: 1) Tops in quality. 2) Excellent in service and performance. 3) Equitable in price. 4) Overall rating 98.5%. Other customers give C/C similar ratings.
Innovative designs . . . engineering service . . . production quality have built C/C's reputation.
Talk to our engineers or our closest representative. They'll work with your engineers to design, develop and/or make the product or innovation you need to meet your changing packaging assembly requirements.

CONNECTOR CORPORATION
6025 N. Keystone Avenue, Chicago, Ill. 60646 (312) 539-3108
SPECIALISTS IN INNOVATIVE AMERICAN MADE CONNECTIONS

SAVE TOOLING COSTS

We have product tooling no one else may have, including tools for many hard-to-find items. By never obsoleting tooling, we've accumulated a huge product tool library, increasing as new products are added. It's a great cost-saving combination of always-new applications for our basic lines plus new products too.

PRODUCTS: Too many to list. Includes numerous types of Multi-Purpose Phono Connectors (male & female, molded & laminated) • Audio Types of Connectors • Tube Sockets including transmitter & high voltage • CRT Socket Assemblies with & without integral spark gaps • Nuvistor Sockets • IC Sockets • Fuse Holders • Battery Hardware: sockets, plugs, snaps, pads, connectors & wire assemblies • Precision Metal Stampings • Transistor Sockets for T03, T05, T06, T066, etc. • Spark Gap Assemblies • Automotive Radio Antenna Connectors • Customized Tube Bases • Laminated Plugs • Receptacles • Molded Plugs • Crystal Sockets • UHF TV Antennae, etc., etc. for many, many military, industrial & commercial market applications. A representative sampling is shown.

COMPLETE-IN-HOUSE MFG/QC in 5 plants from basic raw materials to finished product.
OUR 2nd QUARTER CENTURY helping packaging engineers achieve max. unit performance.
Put our COST-SAVING MFG. TECHNIQUES to work for you. Contact our Engineering Dept. for help in solving your current connections problems.

FEMALE
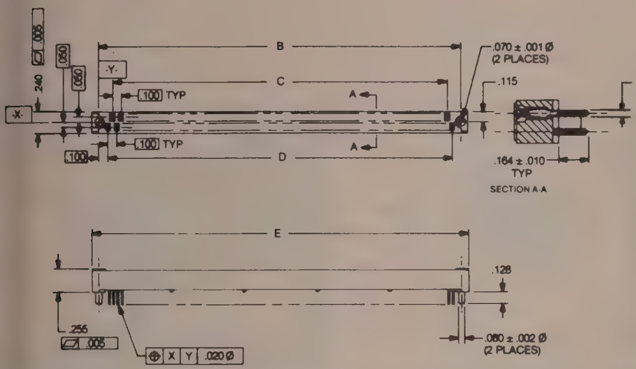
Catalog No. 200609
ON503090

DOD Connectors are designed and manufactured in accordance with Department of Defense Specification MIL-C-55302/6 (Ref ON503090-TAB).

These printed circuit board receptacles are designed to be soldered to a PC motherboard. These receptacles will mate with PC board right angle headers manufactured to DOD Specification MIL-C-55302/4 (Ref ON503091-TAB).



SPECIFICATIONS

Material:

Contact: Phosphor Bronze per QQ-B-750, Copper Alloy 510, Composition A, Spring Temper.

Guide Socket and Rivet: Stainless Steel per ASTM A582, Type 303, Condition A.

Insulator Body: Diallyl Phthalate per MIL-M-14, Type SDG-F, Color - Green.

Finish:

Contact: Gold Plate .000050 min per MIL-G-45204, Type II, Class 1 over Nickel Plate .000050 min per QQ-N-290, Class 2.

Current Ratings: 3 Amperes.

Working Voltage: 300 VAC.

Insulation Resistance: 1000 Megohms.

Environmental Requirements:
- a. Durability: 500 insertion and withdrawal cycles with mating connector (male) contacts per MIL-C-55302 without mechanical or electrical breakdown.
- b. Temperature Cycling: per MIL-STD-1344, Method 1003.
- c. Humidity: per MIL-STD-1344, Method 1002, Type II.
- d. Vibration: per MIL-STD-1344, Method 2005.
- e. Shock: per MIL-STD-1344, Method 2004.
- f. Salt Spray: per MIL-STD-1344, Method 1001.

ALTERNATIVE APPROACH (METAL CHASSIS)

Custom metal PC Headers have the same applications as our Molded Headers except that more size flexibility is afforded at minimum tooling cost. They are more economical for smaller quantity requirements. In addition to the suggested configurations shown below, "U" shaped body is available for greater rigidity and strength.

SPECIFICATIONS

Material:

Mounting Plate: Aluminum Alloy 6061-T6 per QQ-A-200/8 or 6063-T5 per QQ-A-200/9. (Standard configuration shown. Consult FTI/NCD Sales for other sizes available.)

Contacts: Brass per QQ-B-613, Alloy 260, half hard.

Insulators: Polyamide (Nylon) Type I, Composition A per MIL-M-20693.

Contacts and insulators are designed to meet all electrical and mechanical requirements of MIL-C-28754.

Contact blade configuration per MIL-C-28754.

Guide Pins: Stainless Steel, Type 303, Condition A per QQ-S-764.

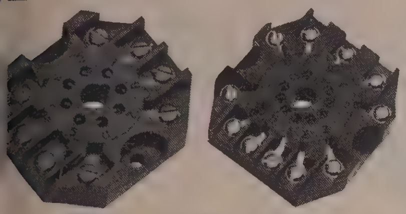
RELAY SOCKETS

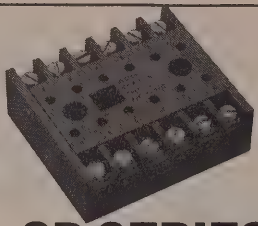


RB SERIES

SPECIFICATIONS:

- Description: 8 and 11 Pin Octal Sockets
- Electrical Rating: 600 Volts, 10 Amps

Part No.	Description	Terminal Type
RB08	DPDT, 8 Pin	Binder Head Screws
RB08-PC	DPDT, 8 Pin	Pressure Clamp Screws
RB11	3PDT, 11 Pin	Binder Head Screws
RB11-PC	3PDT, 11 Pin	Pressure Clamp Screws

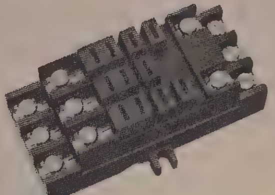


SD SERIES

SPECIFICATIONS:

- Description: 12 and 14 Pin Heavy Duty Sockets
- Electrical Rating: 300 Volts, 10 Amps

Part No.	Description	Terminal Type
SD12	12 Pin	Binder Head Screws
SD12-PC	12 Pin	Pressure Clamp Screws
SD14	14 Pin	Binder Head Screws
SD14-PC	14 Pin	Pressure Clamp Screws



QC SERIES

SPECIFICATIONS:

- Description: 8 and 11 Pin Square Base Sockets
- Electrical Rating: 300 Volts, 10 Amps

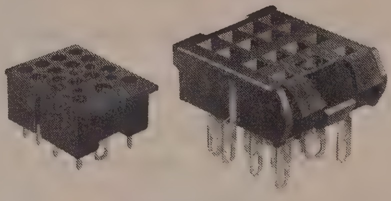
Part No.	Description	Terminal Type
QC08	DPDT, 8 Pin	Binder Head Screws
QC08-PC	DPDT, 8 Pin	Pressure Clamp Screws
QC11	3PDT, 11 Pin	Binder Head Screws
QC11-PC	3PDT, 11 Pin	Pressure Clamp Screws

MS SERIES

SPECIFICATIONS:

- Description: 14 Pin Miniature Socket
- Electrical Rating: 300 Volts, 5 Amps

Part No.	Description	Terminal Type
MS14-PC	DPDT or 4PDT, Miniature	Pressure Clamp Screws



MR SERIES

SPECIFICATIONS:

- Description: 8 and 14 Pin Miniature Sockets
- Electrical Rating: 120 Volts, 5 Amps

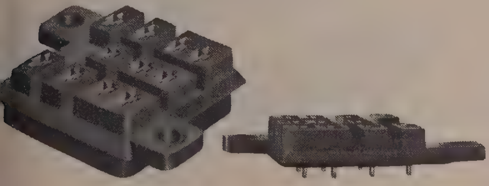
Part No.	Description	Terminal Type
MR14-PCB-2	DPDT, 8 Pin	PC Board
MR14-PCB	4PDT, 14 Pin	PC Board
MR14-SLD-2	DPDT, 8 Pin	Solder
MR14-SLD	4PDT, 14 Pin	Solder

GR SERIES

SPECIFICATIONS:

- Description: 8 Pin Midget Sockets
- Electrical Rating: 300 Volts, 10 Amps

Part No.	Description	Terminal Type
GR108	DPDT, 8 Pin	Binder Head Screws
GR108-PC	DPDT, 8 Pin	Pressure Clamp Screws
GR108-PCB	DPDT, 8 Pin	PC Board
GR108-SLD	DPDT, 8 Pin	Solder



CM SERIES

SPECIFICATIONS:

- Description: 5, 8 and 11 Pin Square Base Sockets
- Electrical Rating: 300 Volts, 10 Amps

Part No.	Description	Terminal Type
CM05-PCB-1S	SPDT, 5 Pin No Mount Ends	PC Board
CM05-PCB	SPDT, 5 Pin	PC Board
CM05-SLD	SPDT, 5 Pin	Solder
CM05-QDC	SPDT, 5 Pin	Quick Disconnect
CM08-PCB-1S	DPDT 8 Pin No Mount Ends	PC Board
CM08-PCB	DPDT, 8 Pin	PC Board
CM08-SLD	DPDT, 8 Pin	Solder
CM08-QDC	DPDT, 8 Pin	Quick Disconnect
CM11-PCB-1S	3PDT 11 Pin No Mount Ends	PC Board
CM11-PCB	3PDT, 11 Pin	PC Board
CM11-SLD	3PDT, 11 Pin	Solder
CM11-QDC	3PDT, 11 Pin	Quick Disconnect

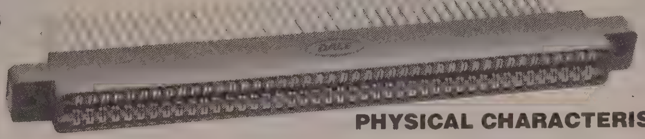
DALE® EDGEBOARD CONNECTORS

[Numbers in brackets indicate millimeters]

SERIES EB4, DUAL READOUT—.100 C-C x .200 GRID [2.54 x 5.08]
SERIES EB6, DUAL READOUT—.125 C-C x .250 GRID [3.17 x 6.35]

**Military, Industrial &
Commercial Grades**



FEATURES

- Designed to meet the requirements of MIL-C-21097/23 (EB4) and MIL-C-21097/24 (EB6).
- Greater design latitude...
  3 body materials: Diallyl phthalate, phenolic, glass-filled polyester.
  3 contact termination styles.
  19 body sizes.
  5 mounting styles.
- Selective gold plating.
- Will accept printed circuit board thickness from .054 [1.37] to .071 [1.80].
- Polarization between contact positions permits polarizing without loss of contact position.
- Bifurcated Cantilever Beam.
- Right angle styles available—see below.

PHYSICAL CHARACTERISTICS

Number of Contacts (EB4): 10, 12, 15, 18, 20, 22, 25, 28, 30, 31, 35, 36, 40, 43, 44, 48, 49, 50 and 60 per side.

Number of Contacts (EB6): 6, 10, 14, 15, 18, 22, 24, 25, 28, 30, 31, 32, 35, 36, 40, 43, 44, 49 and 50 per side.

Contact Terminal Variation:
Type "C"—Dip Solder, .025 [0.63] square terminals, .175 [4.44] nominal terminal length below standoffs.
Type "D"—Dip Solder, .025 [0.63] square terminals, .115 [2.92] nominal terminal length below standoffs.
Type "K"—Wire Wrap, .025 [0.63] square terminals, .570 [14.47] nominal terminal length below standoffs.

Contact Spacing: EB4 = .100 [2.54] center to center.
EB6 = .125 [3.17] center to center.

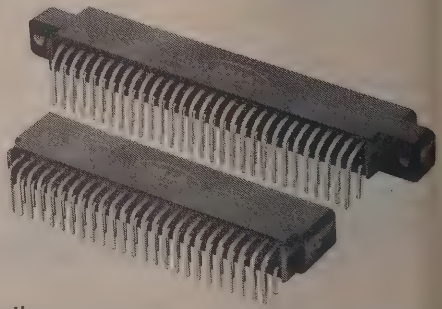
Contact Terminal Row Spacing: EB4 = .200 [5.08] nominal.
EB6 = .250 [6.35] nominal.

Card Slot Depth: .300 [7.62].

Connector Polarization: Between contact polarization key(s) are located to the right of the contact position(s) designated.

DALE® RIGHT ANGLE EDGEBOARD CONNECTORS

SERIES EB4, DUAL READOUT, RIGHT ANGLE—.100 C-C x .150 GRID [2.54 x 3.81] or .100 C-C x .200 GRID [2.54 x 5.08]
SERIES EB6 DUAL READOUT, RIGHT ANGLE—.125 C-C x .150 GRID [3.18 x 3.81] or .125 C-C x .200 GRID [3.18 x 5.08]



FEATURES

- Identical to Series EB4 and EB6 (shown above) but utilize right angle contacts for special mounting situations and are available in 4 mounting styles.
- Military, industrial and commercial grades in a wide choice of body sizes and materials. Termination and mounting styles.

PHYSICAL CHARACTERISTICS

Contact Type: Bifurcated Cantilever Beam.

Number of Contacts (EB4): 10, 12, 15, 18, 20, 22, 25, 28, 30, 31, 35, 36, 40, 43, 44, 48, 49, 50 and 60 per side.

Number of Contacts (EB6): 6, 10, 14, 15, 18, 22, 24, 25, 28, 30, 31, 32, 35, 36, 40, 43, 44, 49 and 50 per side.

Contact Spacing: EB4 = .100 [2.54] center to center
EB6 = .125 [3.17] center to center.

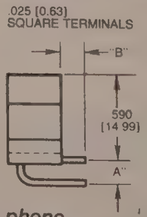
Contact Terminal Row Spacing: .200 [5.08] nominal and .150 [3.81] nominal.

Card Thickness: .054 [1.37] to .071 [1.80].

Card Slot Depth: .300 [7.62].

Connector Polarization: Between contact polarization key(s) are located to the right of the contact position(s) designated.

Contact Terminal Variation:
Type "1R"—Dip Solder, .025 [0.63] square terminals, .120 [3.05] nominal terminal length x .150 [3.81] nominal terminal row spacing.
Type "2R"—Dip Solder, .025 [0.63] square terminals, .120 [3.05] nominal terminal length x .200 [5.08] nominal terminal row spacing.
Type "3R"—Dip Solder, .025 [0.63] square terminals, .180 [4.57] nominal terminal length x .150 [3.81] nominal terminal row spacing.
Type "4R"—Dip Solder, .025 [0.63] square terminals, .180 [4.57] nominal terminal length x .200 [5.08] nominal terminal row spacing.



TYPE	"A"	"B"
1R	.150 [3.81]	.120 [3.05]
2R	.200 [5.08]	.120 [3.05]
3R	.150 [3.81]	.180 [4.57]
4R	.200 [5.08]	.180 [4.57]

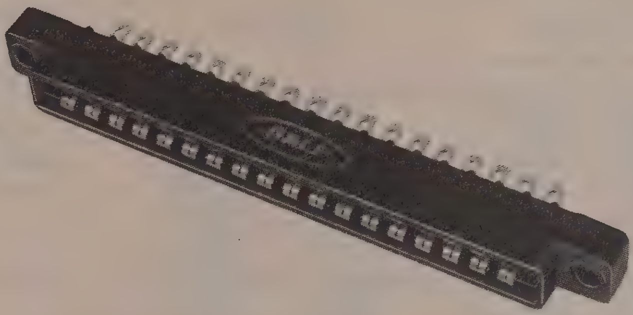
DALE® EDGEBOARD CONNECTORS

[Numbers in brackets indicate millimeters]

SERIES EB 7S, SINGLE READOUT–.156 [3.96] C-C SPACING
SERIES EB 7D, DUAL READOUT–.156 C-C x .140 GRID [3.96 x 3.56]



FEATURES

- Bifurcated bellows contacts assure positive contact under adverse conditions such as vibration or P.C. board irregularities.
- Will accept printed circuit board thickness from .054 [1.37] to .071 [1.80].
- Polarization between contact positions permits polarizing without loss of contact position.
- Selective gold plating.
- Polarizing key is reinforced nylon, may be inserted by hand, requires no adhesive.
- Protected entry, provided by recessed leading edge of contact, permits the card slot to straighten and align the board before electrical contact is made. Prevents damage to contacts.
- Recognized under the Component Program of Underwriters Laboratories Inc. Listed under File E65524, Project 77CH3889.

PHYSICAL CHARACTERISTICS

Contact Type: Bifurcated bellows.

Number of Contacts: **EB 7S** = 6, 10, 12, 15, 18 and 22 per side.
EB 7D = 6, 10, 12, 15, 18, 22, 36 and 43 per side.

Card Thickness: .054 [1.37] to .071 [1.80].

Card Slot Depth: Single Readout = .300″ [7.62].
Dual Readout = .260″ [6.60].

Contact Spacing: .156 [3.96] center to center.

ELECTRICAL CHARACTERISTICS

	EB4*	EB6*	EB7S	EB7D
Current Ratings (Amps)	3	3	5	5
Test Voltage Between Contacts (VRMS) At Sea Level At 70,000 feet [21,336 meters]	650 275	1500 325	1800 450	1800 450
Operating Temperature (°C)	−65 to +150		−55 to +150	
Insulation Resistance	5000 megohms minimum at 500 VDC potential.			
Contact Resistance	30 millivolts maximum at rated current with gold plating			
Humidity	96 hours at 90% relative humidity at 40°C dried at room temperature for 3 hours minimum, insulation resistance was greater than 5000 megohms.			
Durability	After 500 cycles of insertion and withdrawal of a .070 [1.78] thick steel test board, contact resistance less than .030V at 3 amps for EB4, EB6, and 5 amps on EB7S and EB7D. Contacts were gold plated and individual contact pair separation force when measured with a .054 [1.37] thick steel test blade was greater than 1/2 oz.			
Shock	Three 50G shocks in each of 3 mutually perpendicular planes with no loss of continuity.			
Vibration	2 hours in each of 3 mutually perpendicular planes, frequency sweep 10 to 55 cps at .06 double amplitude with no loss of continuity.			

*Includes right angle styles

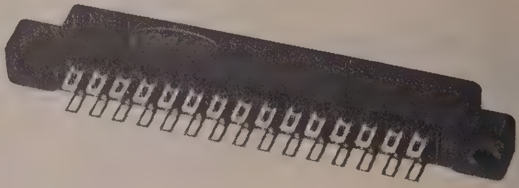
DALE® EDGEBOARD CONNECTORS

[Numbers in brackets indicate millimeters]

SERIES EB8, DUAL READOUT—.156 C-C x .200 GRID [3.96 x 5.08]

Military, Industrial & Commercial Grades



FEATURES

- Designed to meet MIL-C-21097C.
- Great design latitude...
  3 body materials: *Diallyl phthalate, phenolic, Valox™*.
  6 contact termination styles.
  8 body sizes.
  7 mounting styles.
- Selective gold plating.
- Bifurcated bellows contacts provide 2 flexing contact surfaces.
- Will accept printed circuit board thickness from .054 [1.37] to .071 [1.80].
- Polarization between contact positions in all sizes.

PHYSICAL CHARACTERISTICS

Contact Type: Bifurcated bellows.

Number of Contacts: 6, 10, 12, 15, 18, 22, 24 and 25 per side.

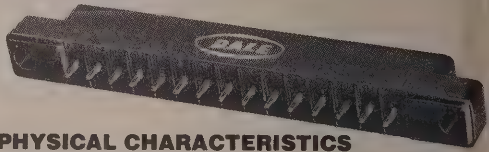
Contact Spacing: .156 [3.96] center to center.

Card Thickness: .054 [1.37] to .071 [1.80].

Card Slot Depth: .330 [8.38].

SERIES EBT 156, SINGLE READOUT—.156[3.96] C-C SPACING

Dip Solder, Eyelet and Wire Wrap™ Termination



FEATURES

- Modified tuning fork contacts reduce wear on printed circuit board contacts without sacrificing contact pressure and wiping action.
- Will accept printed circuit board thickness from .054 [1.37] to .070 [1.78].
- Polarization on or between contacts position permits polarizing without loss of contact position.
- Polarizing key is reinforced nylon, may be inserted by hand, requires no adhesive.
- Protected entry permits the card slot to straighten and align the board before electrical contact is made. Prevents damage to contacts.
- Optional terminal configurations, including eyelet (Type A), dip-solder (Type B, C, D and R) wire wrap (Type E and F).
- Meets or exceeds MIL-C-21097/6.
- Connectors with Type A, B, C, D or R contacts are recognized under the Component Program of Underwriters Laboratories Inc. Listed under File E65524, Project 77CH3889.

PHYSICAL CHARACTERISTICS

Number of Contacts: 6, 10, 12, 15, 18 and 22.

Contact Spacing: .156 [3.96]

Card Thickness: .054 [1.37] to .070 [1.78].

Card Slot Depth: .330 [8.38].

COMPONENT MATERIAL

Body: Glass-filled phenolic per MIL-M-14, Type MFH, black, flame retardant (UL 94V-0).

Contacts: Style(s) A, B, C, D, E and F = Alloy 688. Style "R" (Right Angle) = CA725.

Finish: -1 = Electro Tin Plate
-2 = Gold Flash

Polarizing Key: Glass-filled nylon.

Optional Threaded Mounting Insert: Nickel plated brass. (Type Y)

Optional Floating Mounting Bushing: Cadmium plated brass. (Type Z)

ELECTRICAL CHARACTERISTICS

	EB8	EBT 156

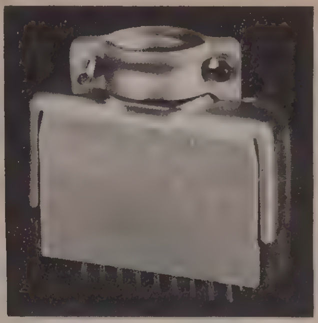
DALE®

MICROMINIATURE RECTANGULAR CONNECTOR

DALE SERIES MM22 and MM24

Rack and Panel with Optional Hoods



FEATURES

- Qualified to MIL-C-28748/7 and /8
- Solder cup contacts
- Dip solder contacts
- Fixed and turnable screwlocks
- Optional closed entry socket contacts

PHYSICAL CHARACTERISTICS

No. of Contacts: 5, 7, 9, 11, 14, 18, 20, 26, 29, 34, 44 or 50*

Contact Gauge:
MM22 Series = 22 AWG
MM24 Series = 24 AWG

Minimum Creepage Path between Contacts: .08 [2.03]

Minimum Air Space between Contacts: .05 [1.27]

ELECTRICAL CHARACTERISTICS

Current Rating: MM22 Series = 5 amps
MM24 Series = 3 amps

Breakdown Voltage: At Sea Level: 2000 VRMS
At 70,000 feet: 500 VRMS

COMPONENT MATERIAL

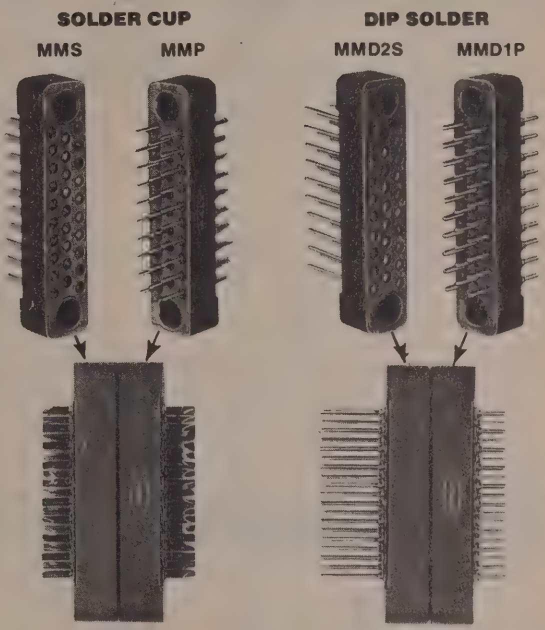
Contact Pin: Phosphor Bronze

Contact Socket: Phosphor Bronze (Beryllium copper available on request.)

Contact Plating: Gold

Screwlocks: Stainless steel, passivated

*Includes special 5-row contact arrangement.



Guides: Brass, gold plated or stainless steel, passivated

Standard Body: Glass-filled diallyl phthalate per MIL-M-14, Type GDI-30F, green.

(T.M.W) TAJIMI CONNECTORS by DSA

RF COAXIAL CONNECTORS

MPX SERIES/TRIAXIAL

MDL MPX121P **MPX123-J** **MPX122-BR** **MPX124-PBR**

New MPX series which was specially developed for TV camera system. Features include water proof and push-pull connection without degrading performance of triaxial cable being used.

SPECIFICATIONS

- **Impedance:** 75Ω
- **Frequency range:** 1.5GHz max
- **VSWR:** 1.2 max
- **Withstand voltage:** AC3500V(rms) center contact to inner conductor AC2000V(rms) inner conductor to outer conductor
- **Insulation resistance:** DC500V 1000MΩ min
- **Contact resistance:** 5mΩ max DC0.1A max

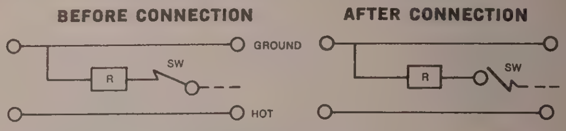
OTHER COAXIAL CONNECTORS

- Sub-miniature coaxial connector (MIL-C-39012, SMA, SMB and SMC types.
- Miniature coaxial connectors (MIL-C-39012, BNC type)

BNC SERIES/MIL-C-39012

Termination Receptacle

Built in resistor eliminates need for external terminator. Internal resistor can be used in or out of circuit.



BNC312-TBR	Bulkhead Receptacle
BNC313-TBR	Isolated Panel mounting
BNC314-TR	Panel Receptacle
BNC315-TR	PCB mounting

BNC223-R

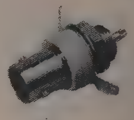
Isolated Panel Mounting Receptacle

Isolated receptacle is insured complete isolation between outer and center conductor.

This receptacle can be used in applications with ground line; must be isolated chassis ground. Metal thread insures a firm connection.

SPECIFICATIONS

- **Insulation resistance:** DC500V 5000MΩ min
- **Withstand voltage:** AC1500V
- **Contact resistance:** 3mΩ max
- **Max panel thickness:** 3mm

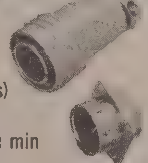


BNC284-BR

CIRCULAR CONNECTORS

PRC03, 04 AND 05 SERIES

are our original push-pull action connection. Miniature quick connect-disconnect high quality multi conductor connector.



SPECIFICATIONS

- **Number of contacts:** 2 to 37
- **Voltage rating:** AC150V to AC600V(rms)
- **Current rating:** 2A to 10A
- **Insulation resistance:** DC500V 1000MΩ min
- **Contact resistance:** 5mΩ max at DC1A

R03 AND R05 SERIES

connectors are designed for subminiature application. High quality small size multi conductor connector and two types are available, thread and bayonet.

R03

SPECIFICATIONS

- **Number of contacts:** 2 to 12
- **Insulation resistance:** DC500V 1000MΩ min
- **Contact resistance:** 5MΩ max at DC1A
- **Voltage rating:** AC150V to AC300V(rms)
- **Current rating:** 2A

DSA-DAI-ICHI SHOJI OF AMERICA, INC. 150 Fifth Avenue, Suite 516, New York, NY 10011, (212) 691-9050.

For 100 years ASMANN has combined German ingenuity and Swiss precision to produce quality products. Now, literally thousands of high-quality popular-sized sockets and connectors are available in stock for immediate shipment. ASMANN sockets and connectors feature Swiss-machined-quality contacts and plastic bodies that meet UL 94-VO specifications.

You don't have to pay a premium for quality anymore.

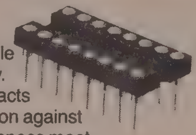
IDC Connectors

Available in 10-60 pins, these quality connectors are available in all popular sizes. Compatible with .050″ flat cable, AWG 28, they provide fast, easy assembly of mass terminations. Locking clips assure positive retention, instant removal. Four-sided shrouded header provides added pin protection.

D-Subminiature Connectors

Offered with 9-50 pins and four terminal versions, these highly reliable connectors feature permanent machined contacts. All contact points are gold plated. Interchangeable with MIL-C-24308 types. Plated steel shell minimizes EMI.

DIP Sockets



Available in 6-64 pins, these low profile sockets offer consistently high quality. Precision machined gold-plated contacts insure continuity and provide protection against capillary action. Shock and vibration specs meet MIL-STD-202.

Additional ASMANN Components

Terminal Strips:	socket & wire wrap terminals; 5-20 pins; tin or gold-plated contacts.
Pin Headers:	dual in-line configuration; IDC compatible.
Carrier Assemblies:	6-40 pins; precision machined gold-plated contacts facilitate pc board assembly.
Test Sockets:	zero insertion force; 7 milliohms resistance after 1,000 insertions.
Transistor Sockets:	TO-5 and TO-3 styles; Teflon® or nylon insulators.

®Registered DuPont trademark

New ASMANN Connectors and Sockets

Now you don't have to pay a premium for premium components.

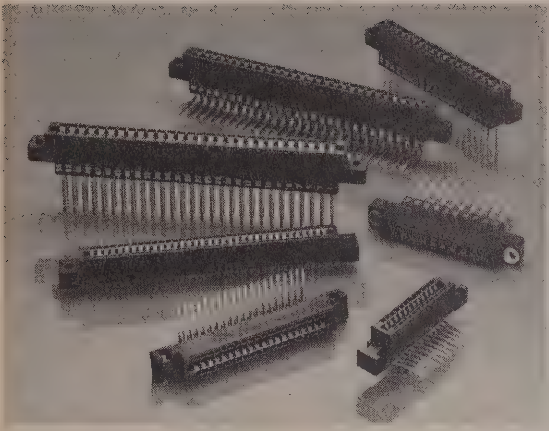
ASMANN Components

c/o ebm Industries, Inc.
525 New Britain Ave., Unionville, CT 06085
(203) 674-0118

eby . . . a "full-line" connector company

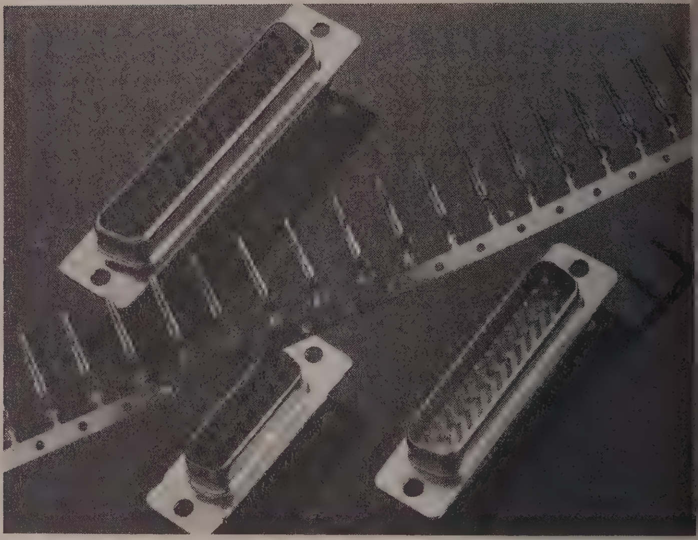


CARD EDGE PRINTED CIRCUIT CONNECTORS

Available in .100, .125, .150 and .156 centers. Straight and right angle tails. Choice of full-gold or selective plating. Various insulating materials available.

BOX CONNECTORS AND HEADERS

Full range in 2 thru 65 dual positions with .100 or .150 centers. Single row version with vertical and horizontal mounting on .100 centers in 2 thru 36 positions. Connectors can be plated with full gold, selective gold or tin. Headers, both straight and right angle, in a variety of sizes and platings.



D-SUBMINIATURE CONNECTORS

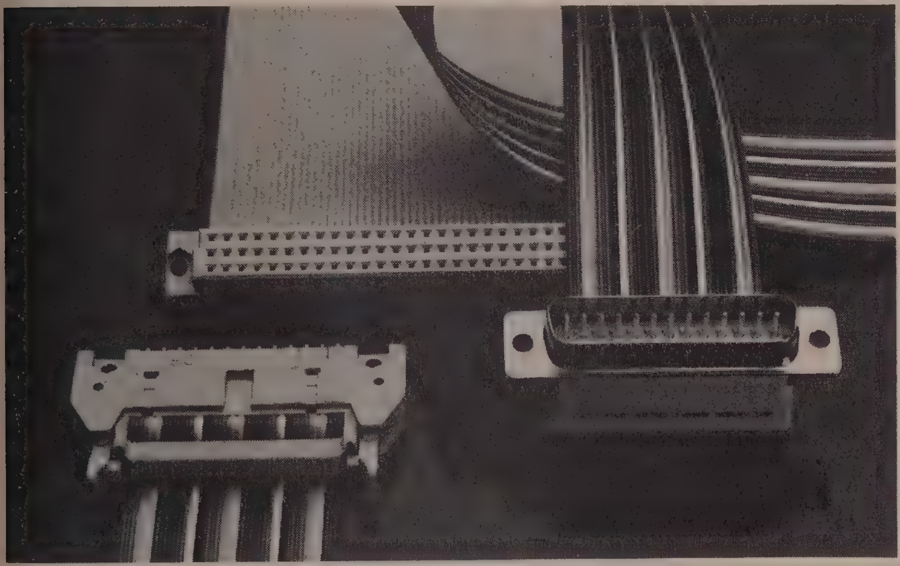
Crimp insertable and original "D" with 9, 15, 25, 37 and 5 pins. Standard mounting configurations. Available in crimp solder cup, printed circuit (straight and right angles) an solderless wrap tails.

TRANSISTOR SOCKETS AND BINDING POSTS

Transistor sockets for TO-3 and TO-66 outlines up to, and including, 50 amps. Binding posts for commercial and military applications that meet MIL-P-55149; waterproof and panel-mounted.

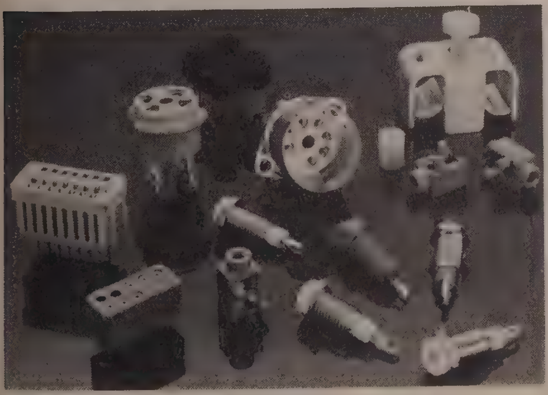
There are very few "full-line" connector companies in the country. Maybe five or six. If you've been searching for a reliable source to fill your broad-based requirements, it's time you discovered the advantages of connecting with Eby.

Eby components are interchangeable with many others and pricing is very competitive. We can duplicate your specs exactly or design innovatively. Test us with an order.



IDC FLAT CABLE CONNECTORS

Shrouded and Unshrouded Headers, Sockets, PCB Transition Sockets, D-Subminiatures, DIN's and DIP's. Full-gold and selective platings. Conform to MIL-C-83503.



SPECIAL PURPOSE CONNECTING DEVICES

Custom connectors. Tube and crystal sockets (commercial and military—MIL-S-12883/01 thru 11). Tip jacks. Relay sockets (rectangular 8 and 10 contact). Bond clamps.

SPECIFICATIONS

CURRENT RATING: 8.5 Amperes
CONTACT RESISTANCE: 6 milliohms, maximum
CONTACT MATERIAL: Phosphor bronze per QQ-B-750, Composition A
CONTACT PLATING: 10-20 microinches gold over 30-150 microinches nickel
INSULATOR MATERIAL: Diallyl Phthalate per MIL-M-14F, Type SDG-F. Also 20, 38, 56, 90 pin available in UL approved Polycarbonate
INSULATION RESISTANCE: 25,000 megohms
DIELECTRIC WITHSTANDING VOLTAGE: 1800 V.A.C. RMS at sea level

The Series 516 is a Rack and Panel connector for cable-to-cable or cable-to-panel applications. It is available in five standard sizes: 20, 38, 56, 90 and 120 positions. The insertable/removable contacts are: Taper Solder Eyelet, P.C. Tab, Wire Wrap and Crimp. All contacts fit plug or receptacle. Polarizing hardware permits 288 polarizing combinations. Guide pins and sockets ensure perfect alignment of mating pairs. Actuating screws ease mating and unmating of connectors. Metal and Polycarbonate covers are available.

MINIGLOSSARY

CONNECTORS

Connector terminology is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

Shape—Circular, cylindrical, and rectangular.

Electrical application—High voltage, RF, microwave, input/output, etc.

Mechanical application—Printed circuit, rack & panel, cable, etc.

Conductor type—Coaxial, flat cable, ribbon cable, flex circuit, etc.

Termination method—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

Contact: The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination*. This is the point where the wires or PC board is attached to the connector.

Contact alignments: Often called *contact float*. Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

Male vs. female: In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

Closed entry: A female contact which prevents entry of a male contact larger than a specific size.

Open entry: A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

Hermaphrodite: Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

Hermetic seal: Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

Waterproof seal: May or may not be truly *waterproof*. May prevent easy entrance of casual water by means of a rubber or other boot.

Printed circuit connector: Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

Edgeboard. May be called *edge* or *card*. The printed circuit (PC) board edge enters the connector.

Two-piece: One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

Readout: Describes the arrangement at the terminating edge of a PC board. May be single or double. A double readout PC board has termination strips on each side not usually interconnected.

Ribbon connectors: A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

Ribbon contact connector: Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

Solderless terminal: Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement*.

Crimp termination: A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

Insulation displacement: Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

Service rating: The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage*. Can be confused with the term used to describe how many times a connector may be mated and separated.

Withstanding voltage: Also called *test voltage*. The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

ELECTROVERT INC. HIGH DENSITY METRIC

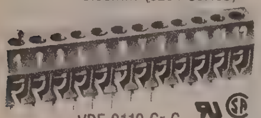
399 Executive Blvd., Elmsford, N.Y. 10523
Telephone: (914) 592-7322 ## Telex: 646-186 # Rectifier EMFD.

Electrovert Inc. manufactures a full line of wire/cable markers, and harnessing accessories, including Z type Sleeve markers; C type Clip-On Markers; Electro-Duct PVC Wiring Duct; VK-Flexible Wiring Duct; Electro-Ty® Cable Ties and Mounting Bases; Cradleclip® Harnessing Systems; Adjustable P-Clips; Spiroband Harnessing Systems; Strapping; Grommet Strip; and Hiatt Coaxial Telephone Cable Clips. Contact your Regional office or authorized distributor for details.

WIBA® TERMINAL STRIPS

PCB Terminal Strips

Pin Spacing: 5+10mm (8180 series)
5mm (8181 series)
5.08mm (8281 series)



VDE 0110 Gr.C (8181 and 8281); Gr.A (8180)

300V, 15 Amp; No. 14 AWG max
A series of fully enclosed strips molded of polyamid for pc board or panel connections. Available in up to 24 poles for 5 mm and 5.08 mm pin spacing; In up to 12 poles for 10 mm pin spacings. This is the most compact strip available. For example, 12-pole measures only 62 mm (2.4" long).

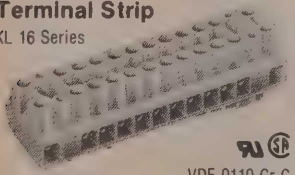
Porcelain Strip

VDE 0110 Gr.C

300V, 80 Amp; No. 6 AWG max
For high temperature applications including burn-in testing devices for solid state circuitry, appliances, ovens, and areas with a high degree of atmospheric contamination. Available with or without fixing holes and wire guards. Fixing holes can be provided with melamine insulation.

Compact Terminal Strip

KL 16 Series

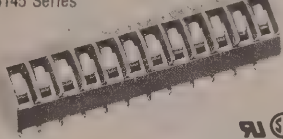


VDE 0110 Gr.C

250V, 20 Amp; No. 12 AWG max
A very compact strip for applications where space is critical. Molded of flame retardant polypropylene with nickel plated brass connectors. Available up to 20 poles consecutively numbered. As an indication of the compactness the 12-pole type measures only 3 inches (76.2 mm).

PCB Terminal Strip With 45° Angled Entry

8145 Series



300V, 15 Amp; No. 14 AWG max
A new terminal strip for printed circuits with a 45° angled, pressure screw entry. Available with pin spacings of 5 and 10 mm. Overall height above board surface is less than ½ inch. Molded of break resistant Polyamid 6.6, the 5 mm spacing strip is available in any number of poles from 2 to 24; the 10 mm from 2 to 12.

Disconnect 2-Piece Terminal Strip For PCB's

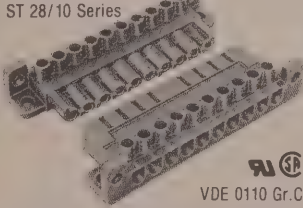
8112 Series

VDE 0110 GR.C

300V, 10 Amps, No. 14 AWG max
A new series available in 2 to 20 poles. A complete terminal is made of two parts: a plug with pressure screw connections, and a receptacle with 0.05" dia. (1.3 mm) solder pins for soldering into PC board. Solder pins available at right angle or horizontal position. Wire guard protects fine wire conductors.

Plug and Socket Connectors

ST 28/10 Series

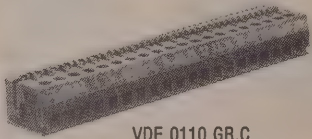


VDE 0110 Gr.C

A versatile 10-pole unit which can be mounted in any number of ways, including assembly rail. Connectors are silver-plated brass. Poles number 1 to 10. Coding pins for 28 coding schemes to ensure use of plug with appropriate socket.

PCB Edge Connectors

LPST Series

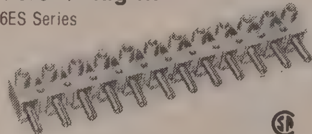


VDE 0110 GR.C

No. 16 AWG max
New, compact series for PC boards measuring 1.4 to 1.8 mm thick, including contact surfaces. Available with pressure connectors in any number of poles from 2 to 20 (each with or without solder lugs). Molded of fiberglass reinforced polycarbonate. Silver plated, phosphore bronze contact springs are spaced 5 mm apart.

Flexible Terminal Strip Screw/Plug-In

6ES Series

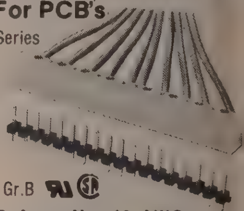


VDE 0110 GR.C

300V, 20 Amp; No. 12 AWG max
Polyamid strip in any number of poles from 1-10 and 12. Mates with 6E Series. Flexible, easily cut. Available with spacers for 600V applications. UL Recognition Pending.

Disconnect 2-Piece Terminal Strip For PCB's

8140 SS Series

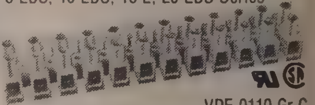


VDE 0110 Gr.B

250V, 10 Amp; No. 16 AWG max (field/factory wiring)
250V, 10 Amp; No. 14 AWG max (factory wiring)
Provides for quick connect or disconnect of wiring to PCB by means of a pin strip. The 8140 SS incorporates open housing design for easy circuit testing; (5 & 10 mm spacing, 2 to 20 poles); the 8141 SS closed body design and silver plated bushings (5 mm spacing, 2 to 20 poles).

Flexible Terminal Strip Screw/Screw

6 EDS, 16 EDS, 16 E, 20 EDS Series



VDE 0110 Gr.C

+6 EDS-300V, 10 Amp; No. 16 AWG
+10EDS-300V, 20 Amp; No. 12 AWG
+16E-300V, 40 Amp; No. 8 AWG
+20EDS-300V, 55 Amp; No. 6 AWG

Polyamid strip in any number of poles from 1-10 and 12. Flexible, easily cut. For 600V use with spacers.

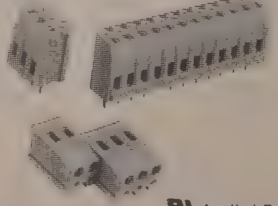
+Higher ratings on units without wireguard.

COMPACT MODULAR BLOCKS FOR PCB's

Easily interlocked to form any number of pole configurations, reducing inventory and simplifying ordering. Incorporates the versatility and features of the modular concept. All metal parts are recessed in the break resistant, polyamid insulating body, providing circuit protection and dead front safety.

Terminal for 0.197" (5.00 mm) spacing

8190 Series

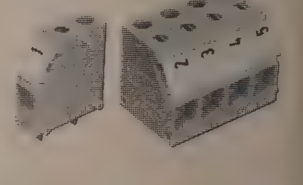


Applied For
VDE 0110 Gr.C

300 V, 20 Amp; No. 14 AWG max
Available in 2, 3, 8 and 12 poles. Molded of break resistant Polyamid 6.6 to withstand continuous service temperatures up to 212°F (100°C). Captive terminal block connectors and screws are steel, zinc-plated and chromated. Solder pin (E-Cu, tin-plated) is .9 × .8 mm (0.04 × 0.03"). Built-in socket for test plug. Available with or without molded-in markings.

Terminal for 0.275" (7 mm) spacing

8375 Series



VDE 0110 Gr.C

600 V, 36 Amp; No. 12 AWG max
Each block has 2 solder pins (E-Cu, tin-plated) which provide maximum retention when soldered to the PCB. Captive terminal block connectors and screws are steel, zinc-plated and chromated. Built-in socket for test plug. Accommodates up to 3 characters for marking, as well as the Wiba® Rapid Marking System.

MULTIPOLE CONNECTORS FOR HEAVY DUTY APPLICATIONS

Available in a wide variety of hood and housing combinations with either screw, solder or crimp type terminations, these environmentally protected connectors provide rapid and secure connections between remote equipment and their respective controls. The positive locking latch is zinc plated or stainless steel. Neoprene gasket seal resists aging and oil. Meets IP Code 55 (DIN) 40050, in locked position. UL Applied For.

500-600V, 16 Amp (other versions available, consult Electrovert)

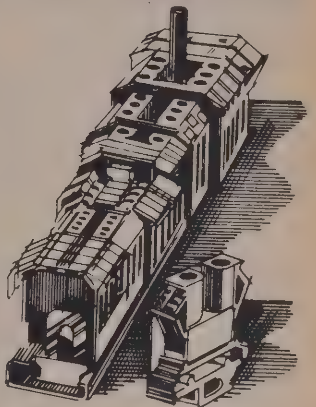
WIBA® MODULAR BLOCKS



Versatile and space saving, all blocks mount on standard assembly rails and can be customed assembled by Electrovert to meet customer specifications. More than 75 different types of blocks are available, each offering dead front safety, excellent resistance to corrosion and vibration, rapid marking and a complete line of accessories for custom requirements.

The WKU Series . . . features a unique universal base providing secure attachment to *both* assymetrical rail TS 32 (DIN 46277) and symmetrical rail TS35 (DIN 46277 and EN 50022).

The WK Series . . . mounts to either rail TS32 or rail TS35, but not both. Funneled wire entrance and 4 digit marking area on each side of block are unique to the series.

The 9700B Series . . . features high creepage and clearance ratings. Insulating body is polyamid 6.6, and connectors are nickel plated brass. Designed exclusively for assymetrical rail.

The 9200 Series . . . a miniature block with its own specially designed rail specifically designed for low voltage applications, small equipment, and/or where space limitations exist.

The 9060 Series . . . features test terminals and fuse terminals with insulating bodies made of melamine type 150. For assymetrical rail only.

And More . . . including the RFK Series of high capacity blocks, and the 9040, 9050, and 9550 Series of melamine blocks which are all UL Recognized, CSA Certified, and VDE Rated 0110 Gr.C.

Note: Consult Electrovert for other terminal versions, including solder lug, slide on connector, built-in-component, and spring loaded.

600V Terminals

9700 B Series

WKU Series

A series of blocks molded of polyamid and designed to meet most general circuit requirements for pressure connector terminals. Available in a wide variety of sizes for different AWG and amperage requirements.

Diode/Fuse: a series of blocks built to incorporate various components to meet specific circuit design requirements. Supplied with silicon diode 1N 4007. Can also serve as a fuse terminal (5 × 20 mm) equipped with LED. Other components available on request. Wiring diagrams printed on top side of all terminal blocks.

2-Tier Double Deck: screw terminal connectors are arranged in a 2-tier design. As a result, twice as many wires can be attached in a given width. Molded of polyamid, this unique block measures less than ¼" in width.

Melamine Insulating: several different series (9050, 9040, 9550, 9210) of pressure connector terminal blocks molded of melamine, all VDE rated 0110 Gr.C and CSA Listed.

Solder Lug: available in a variety of types with different combinations of solder lug and pressure connectors. Insulating body is polyamid and solder lugs hot dip tinned brass.

Disconnect/Test: a series of blocks for opening and closing the circuit without disturbing permanent wiring. Disconnect plug is captive at all times, and contacts can't be damaged or the plug misplaced. Supplied with socket type pressure connector screws which allow the use of test plugs. A barrier separates each plug so that only one at a time can be either raised or lowered. Rated VDE 0110 Gr.C.

Slide-On Connectors: for use with ¼" slide-on connectors. Very compact. Available in two types, with either 4 or 3 connectors.

Built-In Circuit Component: a new double-deck type terminal block with 4 pressure connectors to serve 2 distinct circuits. These circuits can be internally connected in a variety of ways and/or the block can incorporate various components (diodes, resistors, capacitors, etc.) to meet specific circuit design requirements.

High Capacity (to 500 mcm): melamine insulating body. Available in three types with various combinations of lug and pressure connectors. Particularly suitable for main connections where terminations for cables and/or busbars are required.

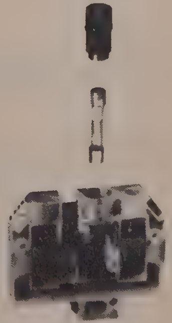
Compact: a series specifically designed for all assemblies where a great number of connections have to be made within a small amount of space.

Ground Connector: ground terminal supplied in universal color coding of green/yellow.

Pressure Terminals and Wire Wrap Connection: available with 2 orientations of wrap connector pin—one for horizontal and the other for vertical mounted blocks.

Micro Pressure Connector molded of polyamid with the 10 Amp version also available in polypropylene. Connectors are nickel plated brass, and suitable for solid or stranded wires.

Modular Fuse
Neon or incandescent failure indicating lamp comes into operation if the circuit is interrupted by a destroyed fuse.



WK10

Insulating body available in melamine (9060 Series) or polyamid (WK10 Series).

Spring Loaded: block is supplied with open clamping space. Clamping action (release of spring) is made with screwdriver. A simple turn of 90° releases the spring and clamps the conductor. Re-opening of clamping space is also by screwdriver. With slight pressure and turn of 90° the spring is loaded again. This combines the usual operation of a conventional terminal with spring contact techniques.

Adjustable Compensating: resistance terminal designed to allow for difference between actual external resistance and resistance for which an instrument is calibrated.

Section B-B

Elfab's bold new concept in card-edge fingers will open your eyes to a new world of production economy. This form, fit and function alternative to plated gold fingers gives solid, metal-to-metal, inlaid gold contact, with reduced insertion force and less gold wear — and significant savings on your PCB production line.

Finger-Pac eliminates gold plating on the PCB. Saves time, saves labor, saves gold. And *that saves money!*

- **Finger-Pac** saves gold. Inlaid wrought gold is only 30 μin thick — for the same durability as 50-μin plated gold.
- **Finger-Pac** affords true "step-and-repeat" processing of multiple boards on large sheets of laminate, without masking.
- **Finger-Pac** is easily repairable. Each individual finger may be replaced, if required, in minutes. In some situations it may even be used as a replacement repair for damaged plated-gold fingers.
- **Finger-Pac** saves wear on mating connectors. Uniform low insertion and withdrawal forces and smooth plastic leading edge help preserve gold surfaces.
- **Finger-Pac** mates with standard card-edge connectors designed for plated gold fingers, with no change in the system. Any PCB may be adapted to Finger-Pac with little or no alteration.
- **Finger-Pac** can save expensive scrapping of gold on defective cards, for it may be installed *after* they are tested.

Part Number

(Available in 0.100, 0.125 and 0.156 spacing)

FPA	0100	XX	069	CD396	CG2
Finger-Pac Assembly	No. of Contact Pairs 0.100, 69 max 0.125, 55 max 0.156, 44 max	Standard	Contact Spacing 0100 = 0.100 0125 = 0.125 0156 = 0.156	Length, card edge to tip	Card-Guide Notch 0 = none 1 = one end 2 = both ends

Specifications:

Insulator — Glass-filled Zytel nylon resin, UL rated 94VO.
Contact — Base material cupro-nickel alloy 725 80/95 KSI.
Plating — Gold inlay — 30 μin 18K gold/silver alloy over 50/150 μin nickel.

Notes:

1. Optional pinning holes accept press-fit strain-relief pins for applicable military applications.
2. Connectors supplied with carrier strip attached. Strip is notched for breakoff after connector soldering.
3. Optional relief required for mating with connectors using end-card guides.
4. One tooling hole is recommended which serves to locate the connector to PCB. For applications where a tooling hole cannot be provided, consult factory for alternative recommendations.

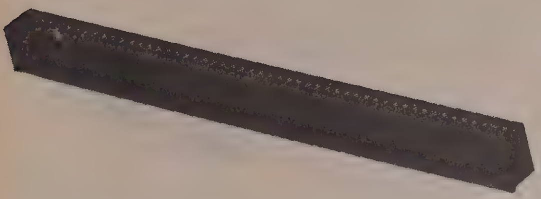
NEW INTERCONNECT SYSTEMS FROM ELFAB



Press-Pac™ card-edge connector

Press-Pac is designed to let you assemble your own backpanels with no special tooling required. Insert one or 100 Press-Pacs using a simple flat plate press. Our compliant-pin connector system is completely compatible and interchangeable with whatever connectors you're using now, regardless of size, spacing or configuration, from prototype through production. ELFAB offers both select-loading and select-plating of Press-Pac contacts, to even further reduce the overall connector cost. Additionally, Press-Pac contacts are individually replaceable in the field, using repair kits supplied by ELFAB.

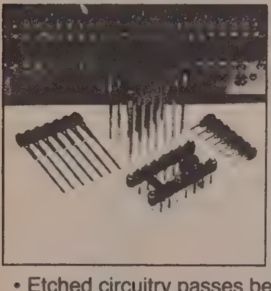
Specifications

Insulator Housing: ZYTEL FR-50 nylon resins
Contacts: Phosphor-Bronze per QQ-B-750, Composition A, full hard plated with 50-150 μ inch nickel and gold flash with 30 μ inch gold in contact-engagement
Current Rating: 5 AMPS maximum
Contact Resistance: 6 milliohms @ 5 AMPS
Insertion Force: 8 oz. maximum per contact pair
Withdrawal Force: 1.0 oz. minimum per contact pair
Push-out Force: 8 lbs. minimum to remove contact from board
Insulator Retention: 1.0 lb. per contact pair
Normal Force: 3 oz. minimum per contact
Durability: 250 cycles minimum



Soc-Pac™ press-fit IC sockets

Soc-Pac SIP and DIP IC sockets permit significant increases in circuit density, improve ventilation of ICs, and allow reduction or elimination of external wiring. Plus lower contact resistance due to greater area contact.

- Etched circuitry passes between pins, eliminating one or more Wire-Wraps, reducing overall height of the board.
- Separate contacts, socket assemblies, and socket boards built to your specifications are available in solderable and press-fit configurations.
- Press-fit sockets and contacts available with up to three-wrap tails, for .062", .125" and .155" boards—including multilayer, Multi-Pac® and Pwr-Pac®.
- Oriented contact springs are beryllium-copper alloy 25, with 30 μin gold over nickel. Standard pin is nickel-plated overall, with optional selective-area platings of gold and tin available.

Specifications

Insulator body: Black, glass-filled polyester, UL94VO. 125°C operating temperature.
Contact: Half-hard brass with 50-150 μin nickel plate. Selective gold or tin plating
Contact spring: Beryllium-copper with 30 μin gold over nickel.
Electrical: Current rating 3 amperes. Contact resistance 10 mΩ maximum.

Press-Fit D-sub connectors

Now ELFAB offers all-plastic D-subminiature connectors—which are completely interchangeable with standard metal D-Subs—as a vital cost alternative to metal.

Our select-plating techniques, as well as our automated assembly procedures, make Elfab Plastic D-Subs—available in 9-, 15-, 25- and 37-pin configurations—your smartest cost decision.
(Also available with metal shells.)

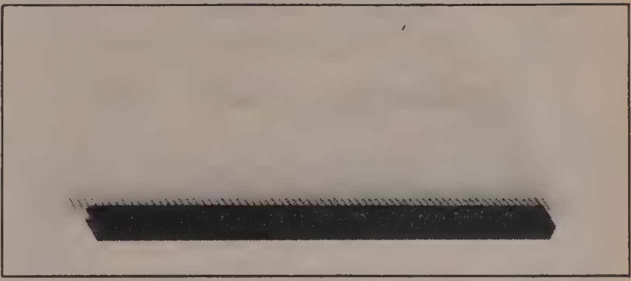
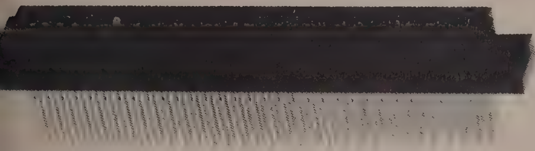
NEW INTERCONNECT SYSTEMS FROM ELFAB

NEW! Box-Pac™ Surface Mount box connector

Now ELFAB brings you true surface mount interconnection with wo-row and four-row Box-Pac box connectors. Box-Pac reflow olders onto your PC boards without through-holes. Box-Pac is mounted co-planar to the board. Contact ELFAB for complete details regarding application, specifications and pricing.



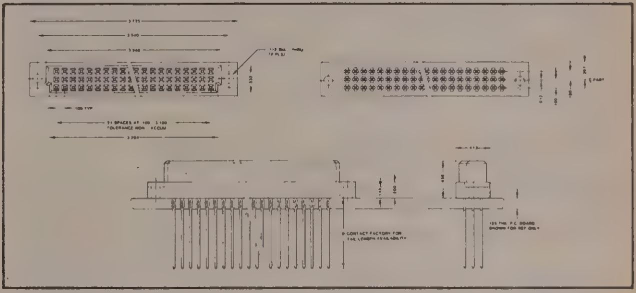


Press-Pac™ Standard Din (Female)

ELFAB's Press-Pac™ DIN connector is designed specifically for he customer needing a fast, cost-effective means of assembling ackpanels utilizing DIN connectors. It is completely compatible nd interchangeable with any DIN currently in use.

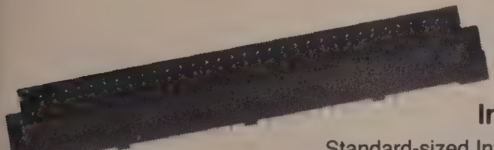
Press-Pac DIN can be inserted using a flat-plate press on the op of the connector housing in one simple motion, with no pecial tooling required. Thus, great numbers of Press-Pac DINs may be inserted into boards simultaneously, using larger-apacity presses.

Additionally, individual Press-Pac DIN contacts may be replaced n the field, utilizing repair kits available from ELFAB.



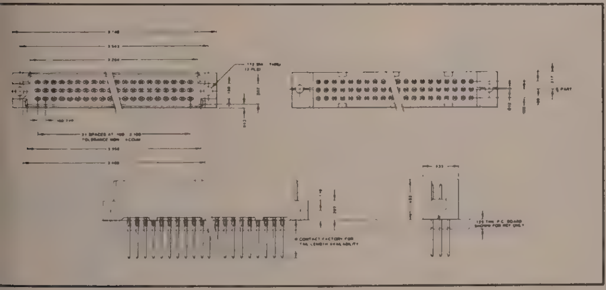
Specifications

Insulator Housing: Glass-filled ZYTEL FR-50 Nylon
Contacts: Phosphor-Bronze per QQ-B-750, Composition A, full hard plated with 50-150 μ inch nickel and gold flash with 30 μ inch gold in contact-engagement area.
Current Rating: 5 AMPS maximum
Contact Resistance: 6 milliohms maximum
Insertion Force: 2 oz. maximum
Withdrawal Force: 1 oz. minimum
Push-out Force: 8 lbs. minimum
Insulator Retention: .5 lb. per contact minimum
Normal Force: 3 oz. minimum
Durability: 500 cycles minimum



Inverse DIN System

Standard-sized Inverse DIN system offers ELFAB's press-fit compliant-pin male connector for backplace mounting, and right- angle female connector for reflow soldering to the daughter card. Contact ELFAB for detailed standard selective-plating options.



pecifications

nsulator Housing: Glass-filled elanex® thermoplastic polyester
ontacts: Phosphor-Bronze per QQ--750, Composition A, Full hard plated ith 50-150 μ inch nickel and gold flash ith 30 μ inch gold in contact-ngagement area.
Current Rating: 5 AMPS maximum

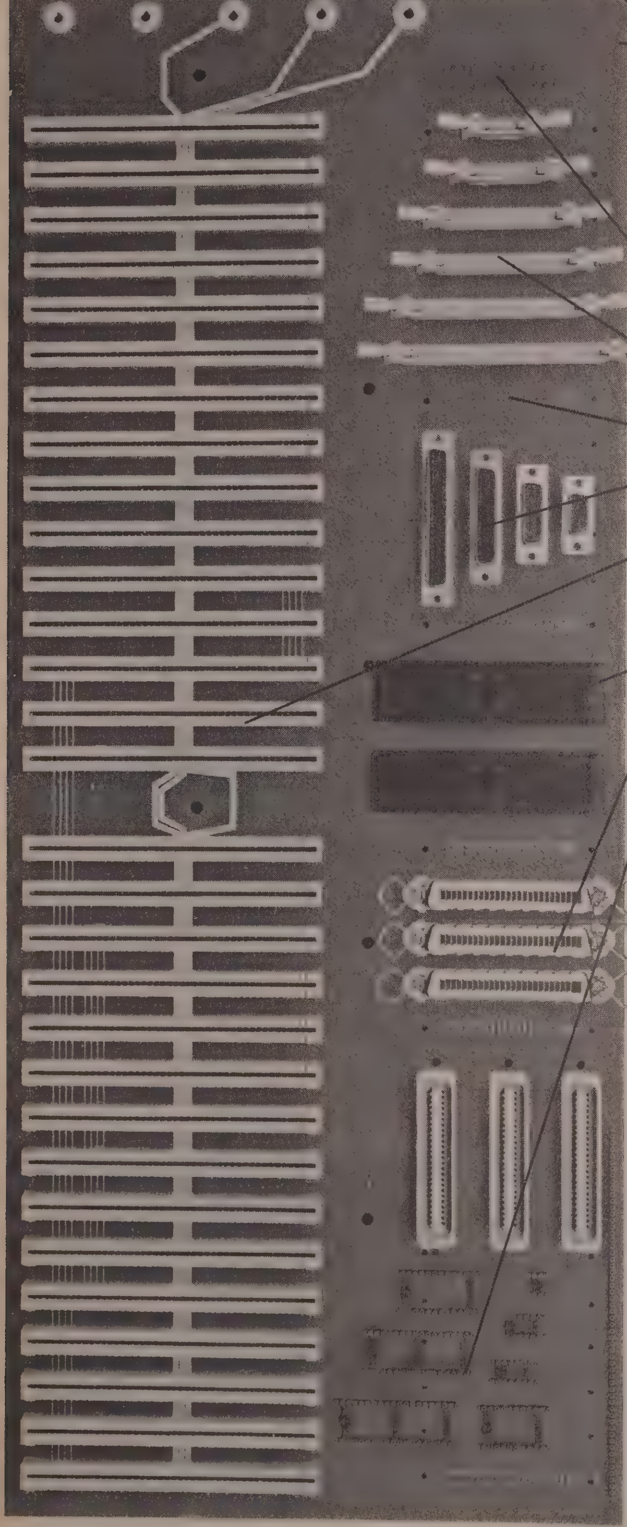
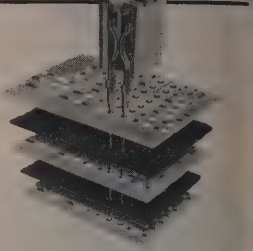
ELFAB interconnection innovators

Elfab Corporation • P.O. Box 810555 • Dallas, Texas 75381-0555 214-233-3033 • 800-527-0753 • TWX 910-860-5460

Press-fit, with a list of options.

I/O's, I.C.'s, Edgecards, everything. Without solder.





- Your choice of single board, multi-board "sandwich" with up to 8 layers of circuitry or conventional multilayer systems. Hybrid systems (shown at right) can have copper sheets between any or all circuit layers for high current capacity. Systems that combine etched circuits with wire wrap take full advantage of the economies of press-fit.
- .031" x .062" I/O pins mate with many industry standard connectors.
- Ribbon cable headers in 10 to 60 pin counts. Latch-lock style shown.
- .025" straight posts for feed-thru I/O applications.
- Popular metal shell or plastic D subminiatures from 9 to 37 pin count.
- Modular edge card housings are cut from strips to match desired pin counts. Available in several different card guide styles with seven grid spacings to handle virtually any system.
- Housings mateable with the Cannon DL Series ZIF connector.
- 25 pair telephone and telecommunications I/O's. Male or female receptables.
- DIP and SIP sockets in popular pin counts that feature oriented contact clips with four points of I.C. contact and oriented tails that will accept mating connectors. Two and three wrap tails with exclusive contact select plating for greater cost savings.

Only Elfab offers all this without solder. Backpanel systems can now do more and cost less thanks to the inherent economy of press-fit. Of course the greatest economy of all is reliability. Reliability you get with the Elfab solid pin gas tight interface (nearly 3 billion contacts are now in use without a single reported interface failure).

FISCHER AMERICA, INC.

Precision, Swiss Made, Circular Connectors

Why Fischer?
Design, reliability and consistent quality make Fischer superior to similar type connectors.

These precision connectors are in use by Tektronix, Hewlett Packard, Texas Instruments, Phillips, Bosch and many more quality conscious companies around the world.

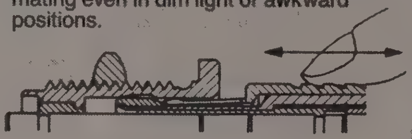
Prices are extremely competitive with manufacturers of similar types of connectors.

Delivery times are outstanding. Scheduled delivery on production orders can be arranged.

Applications
Audio, Video, Medical, R.F., Military, Aerospace, Industrial, Broadcast and Scientific.

Types
50 & 75 ohm coax, triax, waterproof, gas tight, vacuum, high radiation, thermocouple, P.C. mount, low resistance, light weight plastic, compound connectors, high temperature, high voltage, and hermetically sealed.

Automatic Locking
Superior locking/unlocking arrangement with metal half shells means easy mating even in dim light or awkward positions.



Materials
Brass, stainless steel, plastics, etc.

Insulation
PTFE (Teflon ©Dupont), ceramic, PBTP, High temperature plastics, etc.

Contacts
Machined, not stamped. Brass per QQ-B-626 or QQ-B-750 or Beryllium Bronze.

Plating
1 micron gold to MIL-G-45204C, type II over 5 microns nickel to QQ-N-290, class II.

Finish
Extremely rugged yet attractive connectors available with bright gold, satin or polished chrome finish. Other finishes may be specified. Protective rubber boots and plugs are also available.

Contact resistance
Less than 3 milliohms.

Radiation resistance
To 10^8 Rads, higher with ceramic insulators.

High temperatures
To 400°C with ceramic insulators.

Compatibility
Certain series intermate with Lemo and Kings connectors.

Other features
Space-saving design for dense panels. Simple one piece cable collet clamp for unshielded cables. Easily assembled 2 piece collet for shielded cable.

Custom & specials
When quantities warrant, connectors can be made to customer specifications. Often, existing parts can be modified at low cost for special applications.

Delivery
Small quantities are usually in factory stock. Production quantities: 4-8 weeks on standard items.

Other products
Delay lines from 0.5 nS to 64 nS.

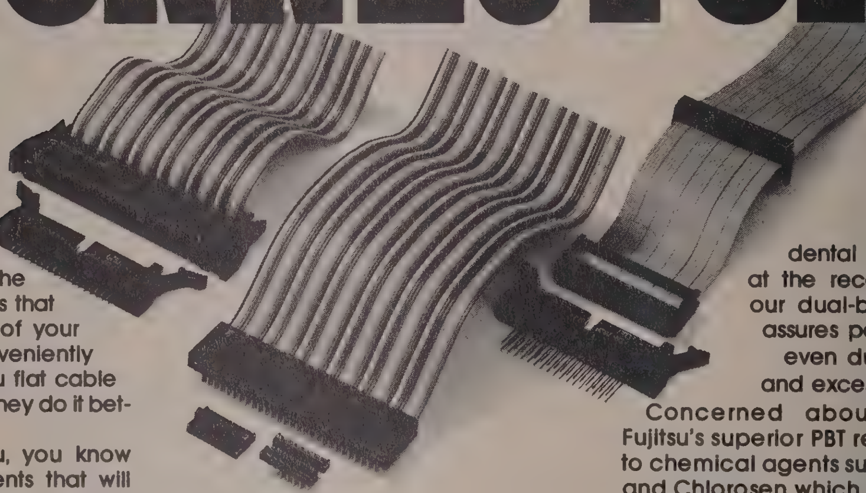
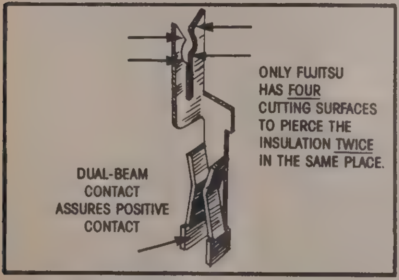
FUJITSU: FLAT CABLE CONNECTORS



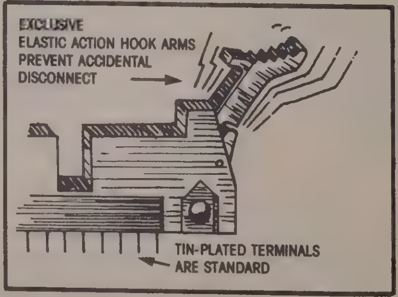
Flat cable connectors are easy enough to find. The trick is finding connectors that can handle every one of your needs consistently, conveniently and economically. Fujitsu flat cable connectors do it all. And they do it better than most.

When you buy Fujitsu, you know you're getting components that will always fit your usage because our connectors are compatible with 3M and other major brands. You won't be getting hit-or-miss construction, either. Thanks to Fujitsu's standardized automated manufacturing. Each piece must meet our rigid quality control standards before it is shipped.



ONLY FUJITSU HAS FOUR CUTTING SURFACES TO PIERCE THE INSULATION TWICE IN THE SAME PLACE.
DUAL-BEAM CONTACT ASSURES POSITIVE CONTACT

Assembling Fujitsu connectors is a snap, too, because of their simplified design. Like u-contacts that pierce the insulation twice at the same place to provide a gas-tight metal surface that is electrically reliable. And can withstand excessive pulling forces. And when you order Fujitsu flat cable connectors, you know you will always get tin-plated terminals that improve solderability and prevent gold contamination of the solder bath. Can your source say that?



EXCLUSIVE
ELASTIC ACTION HOOK ARMS PREVENT ACCIDENTAL DISCONNECT
TIN-PLATED TERMINALS ARE STANDARD

A Fujitsu exclusive is the ingenious elastic hook arm that prevents accidental disconnection at the receptacle. And our dual-beam contact assures positive contact even during vibration and excessive handling.

Concerned about cleaning? Fujitsu's superior PBT resin stands up to chemical agents such as Trickren and Chlorosen which can't be used on cheaper, conventional thermoplastics.

Fujitsu considers it a point of pride, as well as good business, to cater to your company's needs before, during and after the sale is made. Our warehouse is stocked to supply your company with samples of our fine products. And Fujitsu can match *any* source's lead time for processing and shipping ... at a competitive price.

The FCN-700 series offers vertical, right angle and wire wrap plugs *and* open or closed covers for both end-cable and through-cable applications.

Considering all these points, you'd be smart to come to the source with the best connections. Where quality, reliability and service are part of our product. Fujitsu.

For more information on our superior components, call or write us today.

FUJITSU

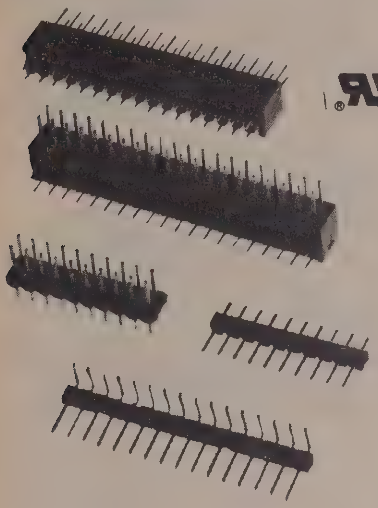
BLOCK HEADERS

FCN-722P, 724P, 725P



- High-density installation on PC board
- 2.54mm grid contact/terminal spacing
- ☐ 0.64mm contact
- Selective plating (gold-plated contact and solder-plated terminal)
- Many variations (10 to 60 pins, O/L/S/W type wire-wrap/straight/right-angle)
- UL recognized (E71597)
- Solvent-resistant resin (PBT)

ENGINEERING DATA

Temperature Range: −55°C to +105°C

Current Rating: 3A DC

Contact Resistance (when mated with RECEPTACLE): 20mΩ max. at 6V DC, 0.3A

Insulation Resistance: 1000MΩ min. at 500V DC

Dielectric Withstanding Voltage: 500V AC for 1 minute

Wire Size — Discrete Wire For Wire-Wrap: AWG #26 (φ0.41mm) to #30 (φ0.26mm)

Thickness of PC Board (Standard): 1.6mm (1/16 inch)

Materials — Contacts: Phosphor-bronze
Pagos plating (gold over palladium over nickel)
Insulators: PBT (UL 94V-0)

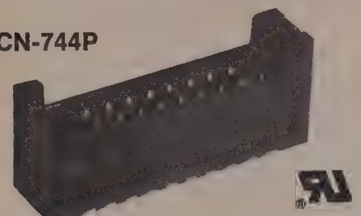
MINI HEADERS

FCN-744P



- Low-profile installation on PC board
- 2.54mm grid contact/terminal spacing
- □ 0.64mm contact
- □ 0.5mm terminals
- UL recognized (E71597)
- Solvent-resistant resin (PBT)

ENGINEERING DATA

Temperature Range: −55°C to +105°C

Current Rating: 3A DC

Contact Resistance (when mated with MINI SOCKET): 20mΩ max. at 6V DC, 0.3A

Insulation Resistance: 1000MΩ min. at 500V DC

Dielectric Withstanding Voltage: 500V AC for 1 minute

Thickness of PC Board (Standard): 1.6mm (1/16 inch)

Materials — Contacts: Phosphor-bronze
Pagos plating (gold over palladium over nickel)
Insulators: PBT (UL 94V-0)

FUJITSU

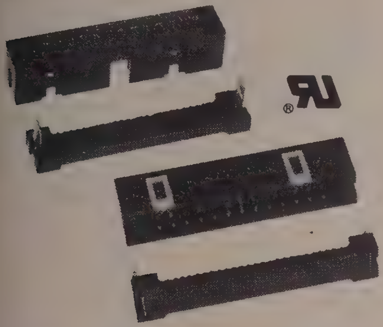
I.D.C. PLUG CONNECTORS

FCN-707P

Fujitsu I.D.C. plug connectors are added in Fujitsu flat-cable connectors and can be used as T-tap from a cable buss or splice connectors.



- Mass-termination with flat cable
- 2.54mm grid contact spacing
- ☐ 0.64mm contact
- Extensive applications. (T-tap, splice connector, I/O interface)
- Many variations (10 - 60 pins, with and without mounting ears)
- Strain relief tab to facilitate unmating
- UL recognized (E71597)

ENGINEERING DATA

Temperature Range: −55°C to +105°C

Current Rating: 1A DC

Contact Resistance (with SOCKET): 20mΩ max. at 6V DC, 0.3A

Insulation Resistance: 1000MΩ min. at 500V DC

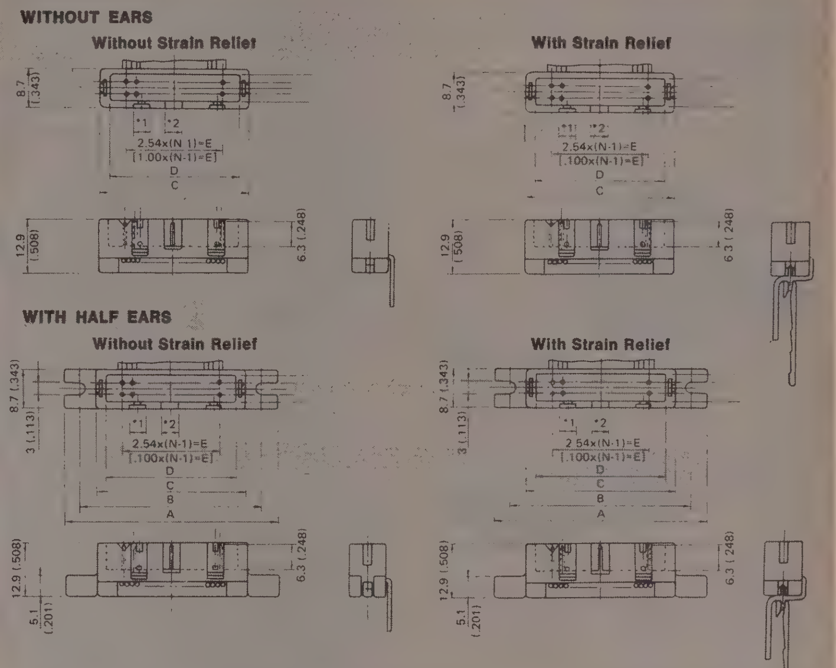
Insertion Force (with SOCKET): 3.5kg max. (10 pins) to 21kg max. (60 pins)

Withdrawal Force (with SOCKET): 0.25kg min. (10 pins) to 2.5kg min. (60 pins)

Wire Size (Flat cable for I.D.C.): 1.27mm (0.050 inch) spacing, AWG #28 (stranded) or #30 (solid)

Materials: Pagos plating (gold over palladium over nickel.)

DIMENSIONS



NOTES: 1. 10 and 14 contact plugs do not have slot *1.
2. 10 contact plug does not have slot *2.

Unit: mm(inch)

FUJITSU

RECEPTACLE CONNECTORS

FCN-723J

- Crimp and removable contact for discrete and twist-pair cable
- 2.54mm grid contact spacing
- High-reliability box-protect (anti-deformation) contact
- Housing-lock mechanism (contact requires no locking-lance)
- Double-cantilever contact
- Bottom-entry contact
- Cover lockable with L/M hook HEADERS
- UL recognized (E71597)
- Many variations (3 to 72 pins, W/S type)

ENGINEERING DATA

Temperature Range: −55°C to +105°C

Current Rating: 3A DC

Contact Resistance (when mated with BLOCK HEADER): 20mΩ max. at 6V DC, 0.3A

Insulation Resistance: 1000MΩ min. at 500V DC

Dielectric Withstanding Voltage: 500V AC for 1 minute

Insertion Force (with BLOCK HEADER): 2.5kg max. (10 pins) to 15kg max. (60 pins)

Withdrawal Force (with BLOCK HEADER): 0.3 kg min. (10 pins) to 1.8kg min. (60 pins)

Wire Size — Discrete wire for crimp: AWG #24 (0.24mm² [.000372 in²]) to #32 (0.032mm² [.0000495 in²])

Materials — Contacts: Phosphor-bronze Pagos plating (gold over palladium over nickel)
Insulators: Nylon (UL 94V-2)

FUJITSU

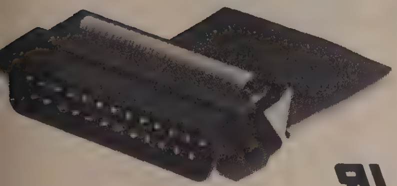
FLAT CABLE CONNECTORS

FCN-770, D TYPE



FCN-770 D-type connectors are added to the amily of Fujitsu Flat Cable Connectors. Matng with military standard D-type connectors, lug, socket connector and cover are availble.

- Mass termination is easy and efficient to 1.27mm pitch flat cables.
- Mates with military standard D-type connectors
- Features Fujitsu's newly designed U-contacts for high reliability
- Heavy-duty molded shell structure
- UL recognized (94 V-O) insulation materials

ENGINEERING DATA

Temperature Range: −55°C to +105°C

Current Rating: 1A DC

Voltage Rating: 250V AC

Contact Resistance: 20mΩ max.

nsulation Resistance: 1000MΩ min. at 500V DC

Dielectric Withstanding Voltage: 500V AC for 1 minute

nsertion Force: 10kg max.

Withdrawal Force: 0.75kg min.

lat Cable: 1.27mm (.050 inch) spacing AWG #28 (stranded) or #30 (solid)

Materials
Contacts: Phosphor-bronze Pagos plating (gold over palladium over nickel)

ASSEMBLING TOOLS

FCN-700 SERIES CONNECTORS should be cable-assembled with the special tools shown in the Table. In the description below, FCN-700 connectors are used as representative examples for flat cable assembling. For all other connectors (except FCN-720 crimp connectors) the same hand press and cable cutter are used and the sequential handling of cable assembling is similar. A special locator plate must be used, however.

As for crimping tools, 2 types are available: Hand crimping tool and automatic crimping tool.

Termination Hardware

Grayhill INC

Test Clips

Designed for panel mounting on test equipment or for breadboarding to allow rapid connections without manual opening and closing of jaws. Hex nut under clip allows for tension adjustment of individual clip. Applicable to part numbers 2-0, 2-4, 2-20, 2-24, 2-41, and 2-42.

PC CARD EDGE CONNECTORS

"UL Recognized and CSA Certified"

DESIGN FEATURES

Holmberg's card edge connector series are double readout, configured with optional wire-wrap and square or round dip-solder tails and are suitable for either hand or automatic termination in backplane or discrete applications. Individual connectors are functionally and dimensionally interchangeable with any industry standard PC connector regardless of manufacturer and conform to the applicable design requirements of MIL-C-21097. All popular sizes from 6 to 65 positions are available.

PROVEN CONTACT DESIGN

Highly reliable contacts are utilized to ensure optimum normal contact force over the full range of PC board thicknesses. A uniquely contoured mating surface on each contact further increases reliability by concentrating the normal force in the real contact area while maintaining circuit continuity under all stipulated test and operating conditions. Individual contacts are replaceable if accidentally damaged during handling or installation for most series.

PROVEN INSULATOR DESIGN

Designed to meet or exceed UL flammability requirements, connector bodies are molded in UL 94V-0 thermoplastic material and are offered in several mounting styles. Solder standoffs are provided to facilitate cleaning and preclude solder wicking; all styles incorporate polarizing keyways between the contacts and a generous lead-in chamber for ease of PC card entry.

PROVEN PERFORMANCE

Utilizing only proven and the most cost-effective designs and materials, Holmberg connectors guarantee performance which meets or exceeds industry standard requirements, at the same time, providing an exemplary level of operational reliability at attractive and competitive prices.

DESIGN OPTIONS

A variety of plating, mounting, termination and identification options are offered to meet specific user requirements.

PERFORMANCE CHARACTERISTICS

Operating voltage:	600VDC (sea level)
Current rating:	3 - 5 Amperes*
Operating temperature:	-55°C to +125°C
Contact resistance:	10 milliohms
Insulation resistance:	5000 megohms minimum
Contact retention:	4 lbs. minimum - Dip Solder, 8 lbs. minimum - wire wrap.
Durability:	up to 500 insertions and withdrawals without degradation of performance, dependent upon contact plating thickness selected
Insertion/withdrawal force:	2 to 8 oz. average contact pair using .0620 steel test blade.
Temperature cycling:	MIL-STD-202, method 107B
Moisture resistance:	Humidity per MIL-STD-202, method 103
Vibration:	MIL-STD-202, method 204A
Thermal shock:	MIL-STD-202, method 107

Note: Specifications are subject to change without notice-consult factory for available modifications and verification of design details.

Note: Wire-wrap is a registered trademark of Gardner-Denver, specifications are subject to change without notice - consult factory for available modifications and verification of design details.

All dimensions shown in inches.

MATERIALS

Insulator body:	Glass filled thermoplastic, UL rating 94V-O, color - black
Spring contact:	Hi-Strength Copper Alloy
Polarizing Key:	Nylon, color-white

D SUBMINIATURE CONNECTORS

PRODUCT DESCRIPTION

Holmberg's H2, H3 and H4 Series D Subminiature connectors are all plastic or metal-shielded for printed circuit board applications in the telecommunications, data processing, instrumentation, industrial control and other industries where low cost and high performance are required. They are fully intermatable with all D Subminiature connectors - including crimp, solder and insulation displacement types.

The connector housing is molded in black glass-filled polyester, UL rated 94 V-O. Contacts are high strength copper alloy and are selectively plated- gold-over-nickel in the contact area with solder plating on the tails. This assures contact reliability, superior solderability and long shelf life at a lower cost.

The metal shielded connector is designed specifically for mating with EMI-RFI qualified cables, the H4 metal shell connectors incorporate a grounding bulkhead mount, or can be supplied with a grounding strap for grounding to the topside, underside or both, of PC boards. The bright tin-plated steel metal shell provides a cost-effective medium for grounding -- which can also be accomplished through the mounting hardware.

Available in 9, 15, 25 and 37 positions, the unique design of the Holmberg D Subminiature connectors ensures excellent contact retention and precisely located, rigid contact tails for easy assembly.

DESIGN FEATURES

LARGE LEAD-IN PROVIDES EASY MATING. Allows male plug to be off true position as much as + .040" and still mate. Corner radii around "D" outline also aids pin alignment. SMOOTH LEAD ON TIP OF PINS. Allows easy mating and low insertion force with mating receptacle.

RIGID TAILS NEED NO SUPPORT. Right angle tails have channel cross-section for exceptional strength and rigidity. They are precisely positioned for easy mounting. Since no plastic inserts or spacers are required for alignment or support, nothing obstructs cleaning during soldering.

60/40 TIN/LEAD SELECTIVE PLATING ON THE TAIL ENHANCES SOLDERABILITY. Nickel-plated tail surface above the board forms effective solder mask. Large cross-section of the above board tail portion provides good heat sink to further control solder application.

SELECTIVE GOLD PLATING. A unique double-stamping process permits precise placement of valuable gold only where needed.

METAL SHELL provides electrical ground path continuity and magnetic shielding, from the mating receptacle metal shell through the grounding bumps on the male shell. The steel shell with bright tin-plating also provides for grounding through the factory installed mounting hardware.

HARDWARE KIT

Part No. 98039 (RA)
Part No. 98044 (ST)

Consists of: 2 #4-40 screw-threaded inserts
2 Flat washers
2 Lock washers
2 Retaining nuts

Packaged in a polyethylene bag.

PERFORMANCE CHARACTERISTICS

Operating voltage:	600VDC (sea level)
Current rating:	5 Amperes
Operating temperature:	-55°C to +125°C
Contact resistance:	10 milliohms max. @ rated current
Insulation resistance:	5000 megohms minimum
Dielectric withstanding voltage	1000 VAC minimum
Durability:	up to 500 insertions and withdrawals without degradation of performance, dependent upon contact plating thickness selecte

MATERIALS

Insulator body:	Glass filled polyester, UL rating 94V-0, color-black
Contact:	High yield strength brass alloy per Spec QQ-B-750.
Metal Shell:	Steel, bright tin plate.

UL Recognized and CSA Certified

MOUNTING STYLE B SIDE VIEW

STYLE D

Unique Style D configuration has molded-in plastic standoff with factory-installed zinc-plated brass hex-headed, #4-40 threaded insert. Specifically designed for RS 232 cable assemblies. Insert is threaded all the way through. Hexagonal shape positively locks insert in place to provide 8 in-lb torque retention and eliminate rotation. Style D is functionally equivalent to Style B and Style G inserts. Available with Style 2 board mounting holes only.

MOUNTING STYLE D SIDE VIEW

STYLES C & T

Style C mounting provides a flush, molded-in, #4-40 threaded insert of zinc-plated brass. The insert has rows of knurling that capture it in the plastic, preventing rotation or push-out. It has extremely high torque retention (minimum 10 in-lb).

Style T2 is the same as mounting style C2 except it uses self-locking stainless steel inserts with black dry-film lubricant. They are designed to prevent the jack-screw from loosening and eliminates lockwashers and nuts.

H2 SERIES

9, 15, 25 AND 37 POSITIONS
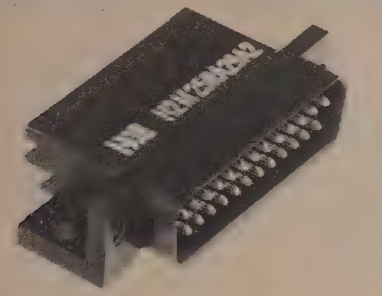
ALL PLASTIC RIGHT ANGLE
MALE PINS FOR
PRINTED CIRCUIT BOARD MOUNTING



MOUNTING STYLES

STYLE A

This configuration is the basic connector with mounting holes only. It comes with no permanent hardware, but a separate hardware kit (part number 98039) is available. Style A is a new design which is produced in a cammed mold, eliminating top and bottom grooves around board-mounting holes. This style is easier to rivet to the board because the rivet head is completely supported by solid plastic. It is also recommended for installations having board traces running under the connector — since there are no sharp edges to damage traces.

STYLE B

This configuration includes a #4-40 threaded standoff which provides 8 in-lb torque retention, for mating to RS 232 cable assemblies. One-piece construction of the factory-installed insert eliminates need for separate hardware.

H4 SERIES

9, 15, 25 AND 37 POSITIONS

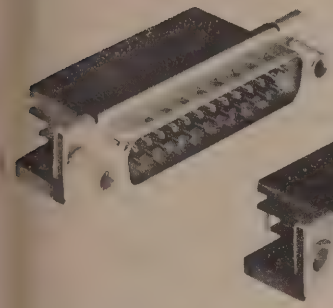
METAL SHELL RIGHT ANGLE
MALE PINS FOR PRINTED CIRCUIT BOARD MOUNTING



MOUNTING STYLES

STYLE A

This configuration is the basic connector with mounting holes only. It comes with no permanent hardware, but a separate hardware kit (part number 98039) is available. For grounding to the P.C. board there are outside and inside grounding straps available, factory installed (see part number description for ordering). Grounding straps are .012 thick, phosphor bronze, bright tin plate.

METAL SHELL
P.C. BOARD

STYLE B

Style B designates a round standoff which has #4-40 threads. This provides 8 in-lb torque retention, for mating to R.S. 232 cable assemblies. One-piece construction of the factory installed insert eliminates need for separate hardware. Also, outside or inside grounding straps are available, factory installed, for grounding to the P.C. board (see part number description for ordering).

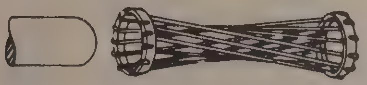
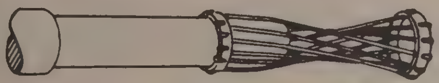
Hypertac®

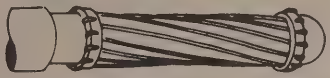
LOW INSERTION FORCE CONNECTORS



Wire sleeve before insertion of pin.



Pin partially inserted into sleeve.



Pin completely inserted into sleeve.

Hypertac® (HYPERboloid conTACt) is an advanced design that satisfies performance requirements previously considered impossible. Radically different in concept (principle is shown in the drawing), it is used in connectors having the highest performance requirements. The distinguishing feature of the Hypertac® socket is the hyperboloid-shaped sleeve formed by wires strung at an angle to the socket's axis. When the pin is inserted into this sleeve, the wires stretch to accommodate it. In so doing they wrap themselves around the pin providing a number of linear contact paths. This superior mating principle offers many advantages:

Lower Contact Resistance: Contact resistance is largely a function of contact area and surface condition. The multiple line contacts in the Hypertac® provide far greater contact area than other contacts of comparable size. The positive wiping action of the wires insures a clean and polished contact surface. Tests have shown Hypertacs® have about ½ the resistance of conventional contact designs.

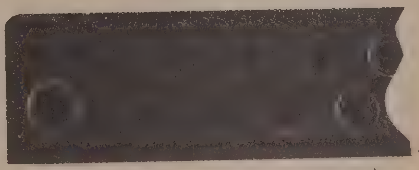
Higher Current Ratings: The design parameters of the Hypertac® (e.g., the number, diameter, and angle of the wires) may be modified for any requirement. For example, the number of wires (no less than 5) can be increased so the contact area is distributed over a larger surface of the mating pin. Thus, the high current carried by each wire because of its intimate line contact, can be multiplied many times. At the same time the lower resistance reduces heat buildup. Therefore, Hypertacs® are able to handle far greater currents in smaller contact assemblies without the detrimental effects of high temperature.

Lower Insertion-Extraction Forces: Complete encirclement of the pin, along with greater contact area, make high contact forces unnecessary. The spring rate and resultant stress are therefore very low. The smooth insertion-extraction force is so low that even our 400 pin connectors can be easily disconnected without jack screws.

Less Wear and Longer Life: Reduced contact pressure also means a lower rate of wear. The taut wires having a small deflection relative to their span insure constant pressure, voltage drop and current ratings. Hypertacs® have a life of over 100,000 insertion-extraction cycles with almost no degradation in performance. Test pins with 50 micro inches gold plating had no base metal exposed after 8000 cycles (MIL-STD requires only 500 cycles for the same plating thickness).

Greater Reliability: The contact redundancy of multiple wires wrapped around the pin insures the ultimate in contact integrity. Elasticity of the wires also enables the socket to accommodate bent or misaligned pins.

Exceptional Electrical Continuity Under Shock and Vibration: The low mass and resultant low inertia of the wires relative to their resilience enables them to follow the most abrupt or extreme excursions of the pin without loss of contact. Tests conducted over the entire frequency range showed no discontinuity even when measured as low as 8 nano seconds at 50g rms. Moreover, the contact area is not limited to a single plane. It extends 360° around the pin and is uniform over its entire length. The three dimensional symmetry of design guarantees electrical continuity regardless of the direction or intensity of external or inertial forces.



Higher Uniformity: Machined rather than stamped parts, simple contact surfaces and selective plating before assembly avoids the possibility of shadow effects, gradients or trapped residues which could affect performance. Excellent physical and performance uniformity is thereby assured within each unit as well as perfect repeatability from unit to unit.

Requirements for connectors are such, that no matter how many details are incorporated in a brochure or catalog, we cannot include all types and variations. We would be pleased to consider your particular requirements; simply furnish all pertinent data to our Customer Service Department.

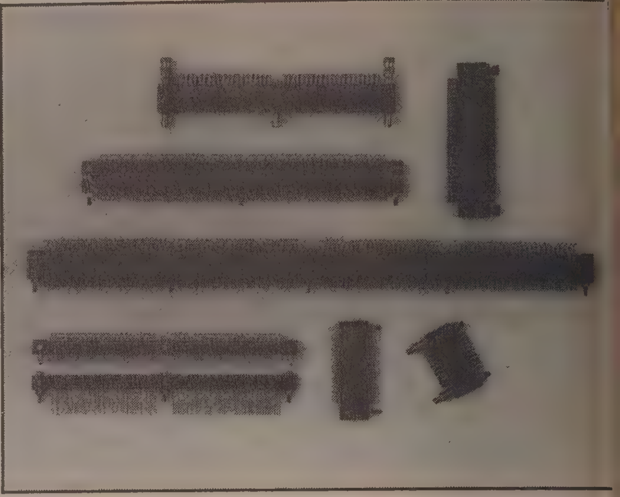
SUBMINIATURE 2-PIECE P.C. BOARD CONNECTORS

Low Insertion Force with Removable Contacts

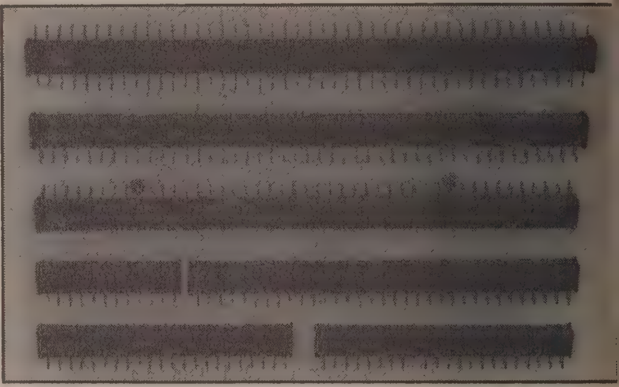
- 1.27mm .100 row spacing [KA section of catalog]. 17,29,41,53,62,65,72,80,84,96,98,120,128,160 or 320 contacts.
- Rated Current: 3 Amps/contact.
- Breakdown Voltage: 1,200 Volts.
- Temperature Range: −55° +125°C (−65° +260°F).
- Various mounting styles and locking hardware available.
- Various tail styles available: wire wrap®, crimp, solder cup, straight p.c. solder, right angle p.c solder and others.
- KA Series has more than 15,000 possible combinations.



SUBMINIATURE LOW PROFILE 2-PIECE P.C. BOARD CONNECTORS

Low Insertion Force

- 2.54mm x 2.54mm (.100″ x .100″) center spacing [KG section of catalog].
- Rated Current: 2.5 Amps/contact.
- Breakdown Voltage: 1,200 Volts.
- Temperature Range: −55° +105°C (−65° +220°F).
- Various tail styles available: crimp, solder cup, straight p.c. solder and right angle p.c. solder.
- Various mounting styles available: p.c. board parallel sandwich [as thin a profile as 6.1mm (.240″)], p.c. board to cable, chassis to chassis, low profile daughter board to mother board and others.



MODULAR CONNECTORS

Low Insertion Force

These do-it-yourself connectors, on the building block principle, offer a wide variety of combinations to meet any design requirement. Combinations to 255 contacts per connector are possible [L section of catalog].

Building Blocks:

- 2, 3, 5 or 17 contacts.
- Rated Current: 5 thru 50 Amps/contact.
- Breakdown Voltage: 2,000 thru 12,000 Volts.
- Temperature Range: −55° +125°C (−65° +260°F).
- Types: signal, power, coax, high voltage or shielded cable.

Frames:

- 4 thru 30 building block units.
- 8 thru 255 contacts.
- Also available with keys, hoods, cable clamps, float mountings or jack screws.

L Series has over 40,000 possible combinations.

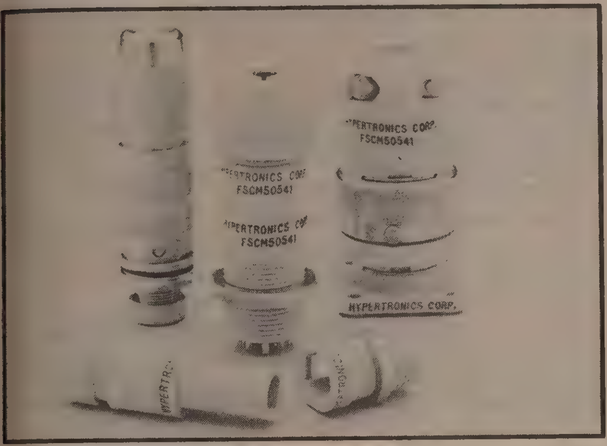
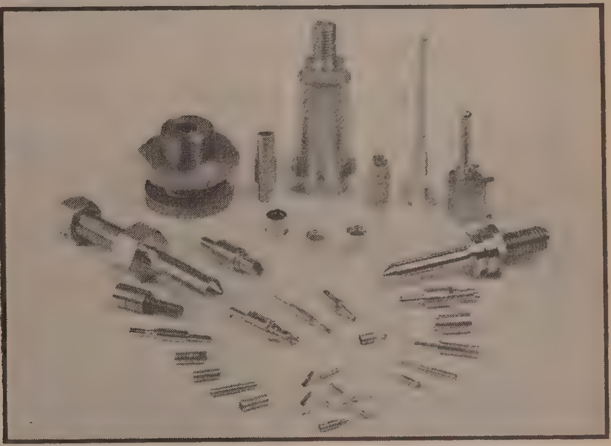
MINIATURE QUICK-DISCONNECT CIRCULAR CONNECTORS



Low Insertion Force

- This series features fast, secure and easy-to-use coupling action [D section of catalog].
- 3 thru 7 contacts.
- Rated Current: 3 thru 12 Amps/contact.
- Breakdown Voltage: 2,000 thru 3,750 Volts.
- Temperature Range: −40° +85°C (−40° +185°F).
- These connectors are also available in a high temperature plastic suitable for sterilization [−°40 +125°C (−40° +260°F)].

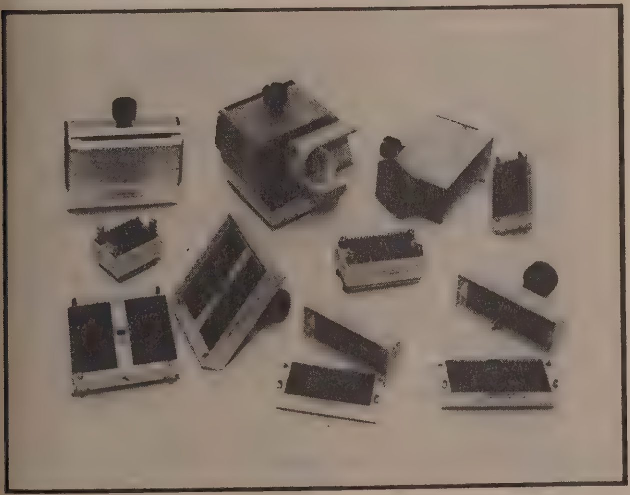
INDIVIDUAL SUBMINIATURE AND POWER CONTACTS



Low Insertion Force

- 2.5 to 200 Amp current ratings.
- Printed circuit board and custom insulator mountings.
- Insertion force as low as .5 oz.
- Contact materials include stainless steel, brass, etc. with gold, silver, etc. plating.
- Low inductances for direct board mounting of hybrids.
- Tails styles include crimp, solder and p.c.

MINI-MODULAR HIGH DENSITY CONNECTORS



Low Insertion Force

Like the modular series above, this mini-modular series also allows you to build your own connector quickly and inexpensively without special tooling. However, with the mini-modular series, much higher density and pin counts are possible. Virtually any design requirement can be met by assembling signal and power contacts in various combination [N section of catalog].

Building Blocks:

- 10 contacts @ 5 Amps/contact;
  5 contacts @ 9 Amps/contact.
- Breakdown Voltage: 1,500 Volts; 2,250 Volts.
- Temperature Range: −55° +105°C (−65° +220°F).
- Types: signal and power.

Frames:

- 7 thru 35 building block units.
- 25 thru 700 contacts.
- Also available with keys, hoods, cable clamps, float mountings or jack screws.

N Series has over 40,000 possible combinations.

Teflon† Insulated * Press-Type * Terminals and Test Jacks

TEFLON†

(TFE-FLUOROCARBON) per MIL-P-19468 has outstanding mechanical and electrical properties over a wide range of frequencies and temperatures (−100°C to +250°C), extreme chemical inertness, high heat resistance, zero water absorption and complete anti-hesiveness which make it a superior insulation.

TERMINALS

MATERIAL: Half-hard Brass per QQ-B-626, CDA360.
FINISH: Standard plating is Gold per MIL-G-45204. Other finishes supplied on request.

INSTALLATION TOOLS

Tools are available for all HIRAM JONES components. Specify Part Number and prefix "S." Example: S-602 Assembly Tool.

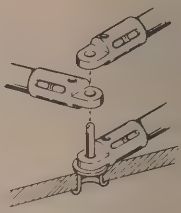
WIRE TERMINATION SYSTEM



Design Features

SOLDER-WICKING BARRIER

The design of HIRAM JONES 9W Wire Termination Systems provides a solder-wicking barrier, assuring flexibility of the wire and thus minimizing wire failures due to fatigue.

Wires are inserted in the 9W Crimp Terminals and crimped in place. Full engagement of the wire is determined by means of the inspection hole provided in each crimp terminal. The 9W Crimp Terminals are then attached to their mating Terminal Posts and soldered in place.

The entire termination is made without application of solder to the wire itself. It is, therefore, impossible for solder to "wick" up the wire.

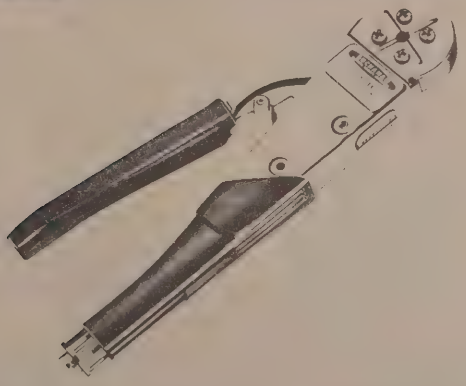
EQUIPMENT SERVICEABILITY

HIRAM JONES 9W Wire Termination System provides all the advantages of a hard wired system without the disadvantages of foreshortening of the service loop when disconnection and reconnection is required. The ease with which connections are made is a feature which is particularly advantageous in systems where connectors are undesirable, yet assemblies or sub-assemblies must be disconnected from time to time for service or replacement. To disconnect HIRAM JONES 9W Crimp Terminals, simply heat and lift off the mating terminal post. Reconnect by resoldering the 9W Crimp Terminals to the terminal post. Neither the mechanical nor electrical joint is affected by repeated removal and resoldering.

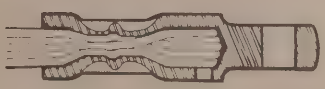
Increased Production Efficiency

By permitting pre-assembly of wires by unskilled operators, HIRAM JONES 9W Wire Termination Systems reduce production costs. Wires may be cut to length, stripped, and the 9W Crimp Terminals crimped in place. Final assembly consists of simply laying the pre-assembled Crimp Terminal on its mating terminal post and soldering in place.

MINIATURE MICROCRIMP TOOL



CROSS-SECTION OCTADENT CONFIGURATION



The 9W Miniature Microcrimp Tool (Buchanan No. 612118) is cycle-controlled to assure crimping to the selected depth. Once the crimping operation is started, the tool cannot be opened without completing its cycle.

9W LOCATORS — Specially designed locators are available for each of HIRAM JONES 9W Crimp Terminals. The use of one 9W Miniature Microcrimp Tool and the custom-designed 9W Locators is recommended to guarantee the precise crimp depth setting for each Crimp Terminal. When ordering, specify part number — i.e., 9W-206 Locator.

OCTADENT CRIMP — The 9W Miniature Microcrimp Tool produces an octadent configuration which provides uniform displacement of wire and crimp terminal material. The wire strands and the crimp terminal material are formed together in a solid mass with little or no reduction of the mil area of the wire strands.

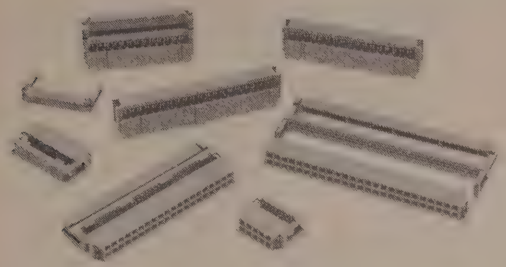
H&T Hi-Tec 4000 Sockets

DESCRIPTION

Hi-Tec IDC sockets provide positive, reliable connection between 0.050″ (1.27) pitch ribbon cable and PCB mounted headers or 0.025″ (0.635) round or square pins on 0.1″× 0.1″ (2.54 × 2.54) grid, without pre-stripping the cable.



FEATURES

★ Dual cantilevered contacts
★ Open end and cable stop covers
★ Strain relief optional
★ Centre key polarising optional
★ Pre-assembled body & cover
★ Selectively plated
★ Ribbed cover for positive cable location
★ Contact recessess in cover
★ Pull tabs available
★ Tin/lead plated I.D. fork
★ U.L. Recognized

Compatible with:-

★ MIL-C-83503
★ BS 9525 F0026
★ BS 9525 F0023
★ DIN 41651

H&T Hi-Tec 4100 Fully Shrouded Headers

DESCRIPTION

Hi-Tec fully shrouded headers provide the most positive and reliable method to connect IDC sockets to PCB's with maximum polarisation and pin protection.

FEATURES

★ 4 walled construction
★ Built in polarising keys
★ Centre slot accepts centre key polarising
★ Horizontal and vertical mounting
★ 2 optional lock/ejectors
★ 3 pin lengths for 0.062″, 0.093″ & 0.125″ PCB's
★ Wire wrap tails available
★ Selectively plated
★ Choice of gold thickness
★ Tin/lead plated solder tails
★ U.L. Recognized

Compatible with:-

★ MIL-C-83503
★ BS 9525 F0026
★ BS 9525 F0023
★ DIN 41651

Hi-Tec 4140 & 4150 Box Headers

DESCRIPTION

Hi-Tec Low Profile Box Headers provide a positive, reliable connection between IDC sockets and PCB's with maximum savings in board space and height.

FEATURES

- ★ 4 walled box construction
- ★ Low height profile
- ★ Optional built in polarising keys
- ★ Maximum connection density
- ★ Fully polarised

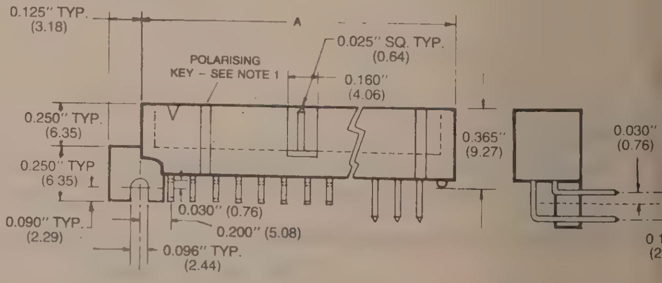
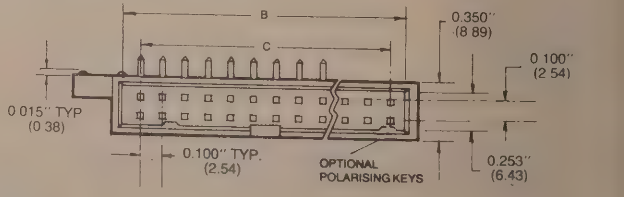
For other plating options please consult factory.

DIMENSIONS





H&T Hi-Tec 4160 Strip Headers

DESCRIPTION

Hi-Tec single and dual row strip headers provide low cost, space-saving connections between IDC sockets and PCB's.

FEATURES

- ★ Ultra low profile
- ★ Low cost plating
- ★ Straight or right angled pins
- ★ Minimal board space
- ★ Stackable, maintaining pitch
- ★ Other pin lengths available – consult factory
- ★ 1 – 40 pins (single row)
- ★ 2 – 80 pins (double row)
- ★ Can be snapped in multiples on 0.1″ (2.54) centers

H&T Hi-Tec 4200 Dual-in-Line Plugs

DESCRIPTION

Hi-Tec Dual-in-Line Plugs provide rapid termination for ribbon cable to PCB's either directly or via IC sockets without pre-stripping cable.

FEATURES

- ★ Strong pluggable pins
- ★ 2 pin lengths for 0.062″ to 0.125″ PCB's
- ★ Optional strain relief
- ★ Cover latched for strength
- ★ Choice of plating options
- ★ Low profile
- ★ MIL-C-83503 compatible
- ★ Pull tabs available (see page 2)
- ★ Ribbed cover aids cable location
- ★ Contact recesses in cover
- ★ U.L. Recognized

H&T Hi-Tec 4500 D-Subminiature Connectors

DESCRIPTION

The Hi-Tec D-subminiature plug and socket provide insulation displacement connection between 0.050″ (1.27) ribbon cables and industry standard D-connectors.

FEATURES

- ★ Rugged, all plastic construction
- ★ Accept standard ribbon cables
- ★ Intermateable with other D-connectors
- ★ 2 stage latch on cover
- ★ Pre-assembled
- ★ Strain relief standard
- ★ Mounting hardware available
- ★ Range of backshells available

IEH

YOUR LOW FORCE, QPL'D CONNECTOR SOURCE FOR 55302

FAMILY OF OVER 54 SIZES

Family of over 54 sizes including — 10 - 14 - 20 - 24 - 26 - 30 - 36 - 40 - 44 - 50 - 54 - 56 - 60 - 66 - 70 - 90 - 92 - 100 - 120 - 122 - 160 - 208.

Low force connectors utilizing Hypertac contacts are available from IEH in accordance with the following slash sheets of Military Specification 55302 /56 /57 /58 /59 /60 /61 /62 /64 /138 /139 /21 /22

Low force data:

Insertion: 0.11 lbs. x No. of contacts maximum

Extraction: 0.08 lbs. x No. of contacts minimum

Example — 160 Pin Hypertac
Max. insertion force = 17.6 lbs.
Min. extraction force = 12.8 lbs.

All our connectors are form, fit, and function, intermateable and interchangeable to the industry's most popular types.

Off shelf delivery nationally from Conco Electronics, Powell Electronics, & Time Electronics.

Please review our IEH Hypertac* low insertion force connector benefits:

1. An insertion and extraction force of less than one ounce per contact.
2. A high reliability closed entry socket which allows a minimum of 10,000 connector life cycles with no loss of mechanical or electrical integrity.
3. A multiplicity of pin to socket contact points (a **minimum** of 15 points, not a **maximum** of 2 or 3 points) due to a 360 "wraparound."
4. Unsurpassed shock and vibration characteristics.
5. Low contact resistance due to a greater than average contact area.
6. Lowest inductance for newly developing high speed circuits.
7. Elimination of heavy duty injectors extractors from your printed circuit cards — saves manufacturing time, money, and weight.
8. No more broken printed circuit board connectors — makes happier customers and assembly personnel.
9. Mil-C-55302 Approval.
10. A family of low force connectors (5 to 320 contacts with many variations).
11. Support from an electronics manufacturer with over 40 years of experience in the industry.
12. Cost savings methods of precious metals selective plating.
13. Excellent factory delivery and competitive pricing.
14. Off the shelf delivery from our national distributor network.

MIL-C-55302 QPL CONNECTORS
Low force connectors, utilizing Hypertac® contacts, are available from IEH in accordance with the following Slash Sheets of Military Specification MIL-C-55302.

M55302/56
M55302/57
M55302/58
M55302/59

If your needs require low force connectors with the added advantage of extended life cycles consider Hypertac® and IEH for future programs.

IEH, now producing the most modern state of the art High Density Low Force Hypertac® Connectors for the prime military electronics market place worldwide has created a careful blending of progressive management, creative and dedicated employees with modern equipment resulting in a highly successful product line of interconnecting devices.

IEH has demonstrated the experience and technical competence necessary for leadership in the manufacture and marketing of advanced connector designs and systems.

We hope you will consider us the next time you are planning purchases of electrical/electronic interconnections.

Our facilities, service, availability and lowest possible industry pricing combine with an honest interest to be a helpful and valuable supplier.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

FOR SURE

if it's an Illinois Lock

Illinois Lock has a full line of switch locks design-engineered to handle the critical security needs of today's sophisticated "high-tech" marketplace. They have the same high quality in performance and reliability that has gained Illinois Lock worldwide recognition for over a half a century.

Our wide variety of switch locks range from high security antistatic locks with up to 20 KVDC protection for computer, medical, scientific applications to space saving switch locks for your tight security applications. Select locks feature single, double, or triple-bitted keying; master keying, grandmaster keying . . . with hundreds to thousands of key changes available. You will find an Illinois Lock to meet your most demanding security needs.

Call today! Our sales and engineering departments are ready to provide expert assistance in design and specification for your positive security needs.

LECTRO-QUIP®
SWITCH LOCKS FOR ADVANCED ELECTRONICS & COMMUNICATIONS

A LQ-9 "CLICK-SWITCH" ROTARY SWITCH LOCK

Specially Designed For LIMITED SPACE APPLICATIONS

Specifications: Maintaining Contact Style—one or two pole, and up to 5 positions.
Lock and Mechanism Available: Model D5161 Illinois® type "D8-eight positive action tumblers operated by double-bitted key; 500 primary changes, master keying. Type "D6" offers 60 primary changes.

B LQ-3 ROTARY SLIDE-TYPE SWITCH LOCKS

Specifications: Bracket mounted lock and switch, available with 1 or 2 pole and positive mechanical indexing.
Lock and Mechanism Available: D6152 Duo® Type M—14 brass tumblers, triple-bitted key; offers 13,950 primary key changes, can be master and grandmaster keyed, obtain two key pulls at 0°, 180°.
D5151 Illinois®, Type D—8 tumblers, double-bitted key; 250 primary key changes, master keyed, obtain two key pulls at 0°, 180°.
Model D4152 Illinois®, Type E—8 tumblers, double-bitted key; design permits multiple key pulls up to 10 positions (36° increments).

C LQ-6/LQ-10 ROTARY WAFER TYPE SWITCH LOCKS

Specifications: Bracket mounted lock and switch. UL listed wafer switch, available with multiple poles and stacked decks. Positive detent at each index position. Spring return feature available.
Lock and Mechanism Available: LQ-10 - D5162-110 Illinois® "D8" eight tumblers, double-bitted key; 250 primary changes; D5162-100 Illinois® "D6"—6 tumblers, double-bitted key, 60 primary changes.
LQ-6 - D6152 Duo®, Type M—14 brass tumblers, triple-bitted key; 13,950 primary changes, master and grandmaster keyed, obtain 4 key pulls at 0°, 90°, 180°, 270°. D5152 Illinois® Type D—8 tumblers, double-bitted key; 250 primary changes, master keyed; obtain 4 key pulls at 0°, 90°, 180°, 270°. D4152 Illinois®, Type E—8 tumblers; double-bitted key; design permits key pulls up to 8 positions (45° increments).

D LQ-1/LQ-11 SWITCH LOCKS

Specifications: Maintaining switch; single pole single throw (SPST), 90° turn to operate. Screw or spade type terminals available.
Lock and Mechanism Available: DUO® "M"—14 brass tumblers, 13,950 key changes available, master and grandmaster keying capability.

ILLINOIS® "D10"—10 tumblers, 930 key changes, master keying.

ILLINOIS® "D8"—8 tumblers, 250 key changes, master keying. Plug and barrel are of "Zamak 3" zinc die cast material. Contacts and terminals are solid brass. Silver or gold plated contacts available for low voltage applications.

FOR SURE
if it's an Illinois Lock

E LQ-5/LQ-7 ANTI-STATIC SWITCH LOCKS

. . . with up to 20 KVDC protection!

Specifications: Anti-static available in two styles: Momentary Contact Style—1 or 2 pole, 2 position, 45° key turn to operate, spring return; Maintaining Contact Style—1 or 2 pole, up to 5 positions. Available shortly with maintaining and momentary contact incorporated within one key switch.
Lock and Mechanism Available: LQ5 HIGH SECURITY—D6157/D6156 DUO® "B"—14 brass tumblers, triple-bitted key; 13,950 primary changes, master and grandmaster keyed. D5157/D5156 in "D10" with 10 tumblers, double bitted key, 950 changes; "D8" has 8 tumblers, double-bitted key, 250 primary changes, master keyed.

LQ7 features D4156/D4157 Illinois® Type "E"—8 tumblers, double bitted key, 250 primary key changes. D3156/D3157 Illinois® Type "G"—5 tumblers, single-bitted key, 659 primary key changes, master keyed.

F LQ-8 Excalibur™

Specifications: Maintaining contact style, single pole two position. Available with standard wire leads: 6″ long, 16 gauge or with solder terminals.
Lock and Mechanism Available: D8163/D8164 "Excalibur" Type 7 pin tubular mechanism, in excess of 750,000 primary key changes available. "Zamak 3" zinc die cast barrel. Spindle and pin tumblers are solid brass, keys bright nickel-plated steel. Contacts and terminals are copper. Silver or gold plated contacts available.

G LQ-12 Excalibur™ "CLICK-SWITCH" SPACE SAVER SWITCH LOCK

Specifications: Maintaining Contact Style—1 or 2 pole, up to 5 positions and 5 key pulls.
Lock and Mechanism Available: Model D8161 "Excalibur" Type 7 pin tubular mechanism, offers in excess of 750,000 primary changes. "Zamak 3" zinc die cast barrel. Spindle and pin tumblers are solid brass, keys are bright nickel-plated steel. Switch housing is nylon "Zytel 101" UL rated 94V-2; terminals are solderable faston type, silver-plated copper alloy. Available with gold-plated contacts.

H LQ-13 Excalibur™ ANTI-STATIC SWITCH LOCK

Up to 20 KVDC protection!

Specifications: Anti-static Maintaining Contact Style—1 or 2 pole, up to 5 positions and 5 key pulls.
Lock and Mechanism Available: Model D8156 "Excalibur" Type 7 pin tubular mechanism, offers in excess of 750,000 primary changes.

"Zamak 3" zinc die cast barrel. Spindle and pin tumblers are solid brass, keys are bright nickel-plated steel. Switch housing is nylon "Zytel 101" UL rated 94V-2; terminals are solderable faston type, silver-plated copper alloy. Available with gold-plated contacts.

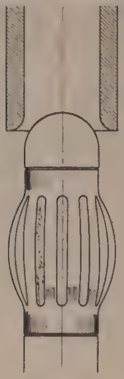
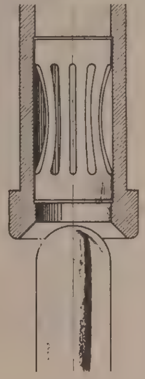
Low Loss Interconnects

INTERLOK
ONE OF THE **PURDY** GROUP OF COMPANIES

770 AIRPORT BOULEVARD, BURLINGAME, CALIFORNIA 94010 • TEL (415) 348-5625 • TWX 910-374-235



Convex fitted on plug



Concave inserted in socket

MC-® multilam bands are made of beryllium copper, hardened and gold plated. They are placed in a precision groove to provide a firm, but smooth connection.

General Information

INTERLOK's line of low loss plugs, sockets, and test leads utiliz multilam band technology to provide a superior electrical an mechanical connection. Some of the advantages of multilam band include low contact resistance (at least a factor of 10 lower tha conventional contacts), high mechanical strength, high current capa city (35A for 4 mm plugs), long life, positive, shock-, impact-, an vibration-proof connection (no wobbly contacts), and high corro sion resistance.

INTERLOK offers a choice of the following standard items:

1. Ten colors: red, blue, white, black, yellow, green, brown, gray violet, yellow/green.
2. Eleven lengths: 7.5/15/25/30/45/50/60/75/100/150/200 cm
3. Six cable cross sections: 0.17/0.25/0.5/1.0/1.5/2.5 mm
4. Three insulation types: PVC coating, double insulation, silico (for operating temperatures up to 300° C, 570° F).

In addition to the standard products in our Engineering Bulletin No. 8 a significant part of our business is in the design and construction o custom connectors to meet customer specifications.

LK425-Z 4 mm Stackable Safety Plug with Retractible Sleeve

Load 7.5A Multilam-Plug/Stackable

4 mm Plug with Solder Lug

3 mm Female Threaded Plug

Universal Laboratory Socket

Without Insulation Press-in

Insulated Press-in

Test Leads

INTERLOK leads are available with MC-® multilam bands or tub plugs, four different insulator styles, and four diameters (1, 2, 2. and 4 mm). Some types are "stackable" to minimize wiring spac requriements. INTERLOK safety plugs and sockets are completel touch proof and meet UL and OSHA standards for shock resistance Test lead component parts are also sold separately.

Plugs

MC-® multilam band plugs may be ordered in a number of differen standard configurations. All plugs are solid brass, gold plated. Tw diameters (2 or 4 mm), three pull-out forces (.45, .75 and 1.6 kg numerous thread lengths and diameters, and plugs with solder lug are available. For printed circuit boards and "sandwich" construc tions, INTERLOK offers miniature (0.8 to 2 mm dia.) pin plugs. selection of short circuit plugs is also available.

Custom plug design is an INTERLOK specialty.

Sockets

INTERLOK sockets are solid brass with either gold or silver plating They are available with or without MC-® multilam bands and can b used with conventional plugs. 2 mm and 4 mm sockets can be ordere in several styles including press-in types with or without insulatio or sockets with fixing nuts and specially pressed on threaded stee sleeves. A 4 mm double socket is also available. Miniature socket (0.7 to 2 mm dia.) are equipped with MC-® multilam bands and com in several lengths and styles.

Relay Sockets

INTERLOK
ONE OF THE **PURDY** GROUP OF COMPANIES

770 AIRPORT BOULEVARD • BURLINGAME, CA 94010 • (415) 348-5625 • TWX 910-374-2353

Relay Sockets - Series F

F010

F022

F010
10 poles, without ground contact, solder contacts

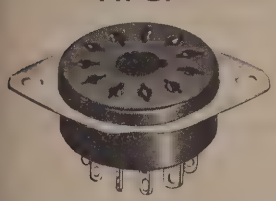
F022
22 poles, without earth contact, solder contacts

Technical Data for F010 and F022

Insulated body:	Melamin resin FS Type 150
Rating of contact springs:	250 V, 5 A
Contacts:	spring bronze CuSn 6.5 μ tin plated. 0.1 μ gold-plated available

Relay Sockets - Series 11P

11PGF



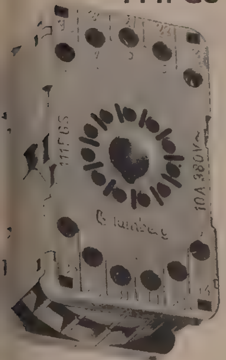
11PGR19

11PGF
11 pole socket with metal flange, fork springs tin-plated, body from molding compound 31.5, contacts for wiring.

11PGR19
11 pole socket without flange, fork springs tin-plated, body from Noryl SE 1, contacts for p.c., .748" (19 mm) diameter.

Relay Sockets - International Standard - Series 108PGS, 8 Poles
Series 111PGS, 11 Poles

111PGS

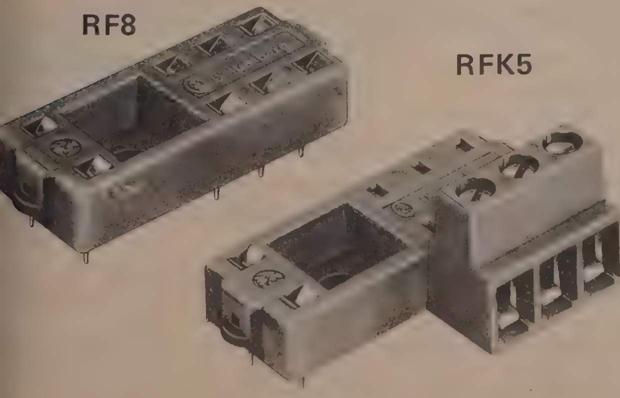


- Wire size: 12-22 AWG
- Self-opening elevator clamp with cover protecting against mis-connections
- Captive screws
- Functional test even with relay being plugged in
- Space for adhesive labels on the socket
- Central mounting by screws M4 or M5
- Additional mounting on the sides with 2 screws M3 and hexagon nut M3 DIN 934

Technical Data

Body:	NORYL
Contacts:	CuZn 37, pre-nickeled and 5 microns tin-plated
Nominal power:	10 A
Nominal voltage:	380 VAC
Test voltage:	⩾ 3.5 KV eff.
Creep resistance:	KC 300
Protection:	IP20
Creep & air distances:	to VDE 0110 group C/250 V

Relay Sockets - Series RF



RF8

RFK5

RF8
Relay socket for p.c. relays, contact pitch 5 mm, applicable for relays with up to 2 change-overs. All contacts lead to the p.c. board and insure air- and creep distances of 4 mm minimum. This new socket divides both signal circuit and power circuit of a p.c. board relay. The coil connections lead to the p.c. board, while the contacts for one change-over can directly be connected with the consumer by means of the integrated terminal blocks.

RFK5
Switching of 16 A with 220 Volts a.c. or 4000 VA is possible without problems even under the rule of VDE0110, group C, 250 V (air- and creep distance). Interferences of the remaining electronic circuit are avoided even with switching of high power. Separate screw terminals as well as wide p.c. leads are unnecessary and save space on the p.c. board in this respect. Change of relays for service reasons is extremely simple.

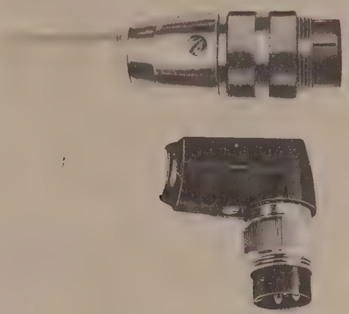
Circular Locking Connectors, Waterproof Connectors & Pin Assemblies (Headers)

INTERLOK
ONE OF THE **PURDY** GROUP OF COMPANIE

770 AIRPORT BOULEVARD • BURLINGAME, CA 94010 • (415) 348-5625 • TWX 910-374-235

Circular Locking Connectors - Series S



Technical Data

Solder termination contacts tin plated.

Rated voltage:	5 A
Contact resistance:	< 5 mΩ
Insulation resistance:	$> 10^{12}$ Ω (after 4 days at -20° C an 80% relative humidity
Cable outlet:	.196" (5 mm) diameter, 3 to 8 pol
Finish:	Dull or black chrome

Male and Female Sockets Available

Waterproof Connectors - Series R

This connecting system with screw locking device prote against dust and water pressure. Applications are in hum oil and industrial dust environments.

Technical Data

A) Male/female plug and chassis plug

Body:	Thermoplastic polyurethane-Elasto mere
Chassis plug housing:	aluminum, black eloxal coating
Contacts:	CuZn, pre-nickeled, 5 microns tin-plated
Locking nut:	aluminum, black eloxal coating
Range of temp.:	-40° C to +90° C
Air & creep distances:	according to VDE 0110, group C/250 V
Test voltage:	2 and 3 poles - 2500 V 4 and 5 poles - 1500 V
Nominal power:	.13 A
Nominal voltage:	250 V
Insulation resistance:	$> 10^9$ Ω
Protection:	according to IP68

B) Cable

Indulation:	high quality PVC

Pin Assemblies (Headers) - Series M - .100 (2.54 mm) Centers

Technical Data

Pin assembly:	polyamid, glass fibre-reinforced
Contacts:	CuZn 37, pre-nickeled, 5 micron t plated or 0.8 micron gold plated
Spacing:	.100" (2.54 mm)
Rating:	5 A
Contact resistance:	approximately 10 mΩ
Nominal voltage:	220 V
Test voltage:	> 2000 V (without P.C.B.)

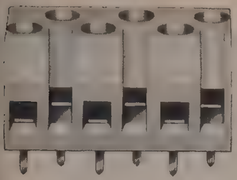
70 AIRPORT BOULEVARD • BURLINGAME, CA 94010 • (415) 348-5625 • TWX 910-374-2353

KR

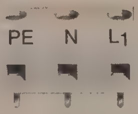


his type has been de-
igned to offer the user
reater power handling ca-
abilities than the stan-
lard KRE type. Air/creep-
ge distance: 5 mm min.
Vorking voltage: 380 V
VDE0110 insulation group
'O"). Breakdown voltage:
KV (without p.c.b.).

KRE

This standard version allows ADD-ON capability without loss of pitch spacing. Air/creepage distance: 4 mm min. Working voltage: 250 V (VDE0110 insulation group "O"). Breakdown voltage: 3 KV with-p.c.b.).

KREN3



Power block terminal (live: neutral ground). Available without symbols. Spacing .393" (10 mm). Air/creepage distance: 5 mm min. Working voltage: 380 V (VDE0110 insulation group "O"). Breakdown voltage: 3 KV (without p.c.b.).

KRD8

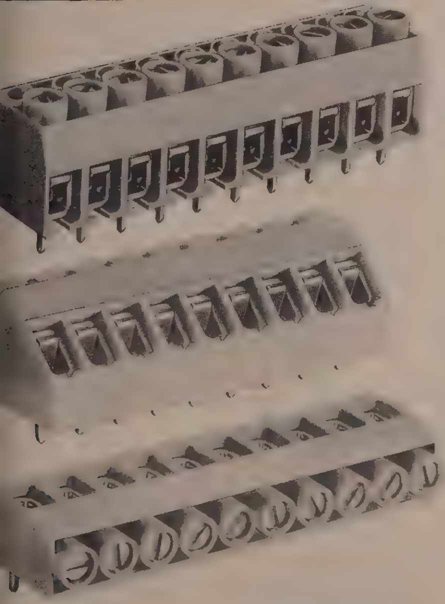
Air/creepage distance: 4 mm minimum. Working voltage: 250 V (VDE0110 insulation group "O"). Breakdown voltage: 3 KV (without p.c.b.).

echnical Data KR, KRE, KREN3, KRD8

he general construction of the terminal block is as follows:

ody molding:	Noryl SE100
ontacts:	Brass. Solder tag spill: Brass 5 μ culmo tinned. 2.6 mm metric capture screw. Solder tag integral part of terminal jaws.
pacing:	.196" (5 mm)

umerical coding of terminals available.



KRES

Upright version with holes for 2 mm diameter test points. Spacing is .196" (5 mm).

KRESW

45° angle version. Spacing is .196" (5 mm) or .393" (10 mm).

KRESL

90° angle version. Spacing:is .196" (5 mm) or .393" (10 mm).

echnical Data KRES, KRESW, KRESL

hese terminal blocks can be added one beside the other without loss of pitch spacing. Each contact has a wire protec-
ion which insures a clean and safe connection. The terminal blocks can be printed with numbers.

ody:	Polyamid 6/6 UL94V-O flammability classification, 105° C, green
lamp:	CuZn, pre-nickeled and 5 microns tin plated
Vire protection:	CuSn6, pre-nickeled and 5 microns tin plated

Wire diameter:	12 to 22 AWG
Screw:	steel, galvanized and yellow chromated.
Rating:	15 amperes, 250 volts
Air distance:	4 mm minimum, VDE 0110
Creep distance:	3 mm minimum, VDE 0110
Test voltage:	3 KV, 60 seconds

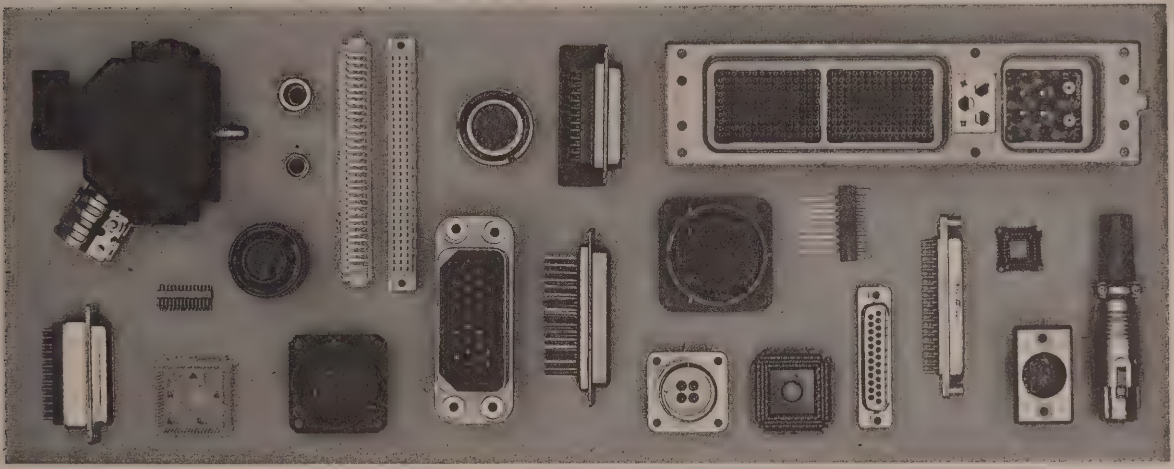
Connector Selection Guide



THE CANNON COMMITMENT

RESPONSE & DELIVERY

CANNON ITT
The Global Connection

INTRODUCTION

It's almost impossible to find electrical or electronic equipment anywhere in the world that doesn't involve the use of one or more ITT Cannon products. Our connectors are in place within electronic systems ranging from computers to cable television, telecommunications to transportation, vending machines to nuclear reactors, deep space to deep sea, in military aircraft to commercial aircraft.

This guide lists some of the more popular connector configurations, both standard and special and is designed to help you select the proper connector series and the appropriate catalog from which to specify for your requirements.

To use this guide simply determine the type of connector configuration you wish to use and identify your market application requirement. The Table of Contents lists the product by product configuration or special applications. A brief description and catalog reference, contact data, and broad application uses are shown so that you may better select the catalog (or catalogs) which you would like. We have also included a North American and European Military Specification/Cannon Product Cross Reference List and a Commercial Market Product Cross Reference List for your use. For catalog data please write to ITT Cannon, 10550 Talbert Avenue, P.O. Box 8040, Fountain Valley, California 92728-8040, telephone 714/964-8366. Or, contact your nearest ITT Cannon Sales Office or Distributor shown at the end of this selection guide.

COMMERCIAL MARKET/CANNON PRODUCT CROSS REFERENCE LIST

Shown below are six of the more common Commercial market places where ITT Cannon products can be found. We have listed those products within each market place and indicated where you may find product literature by showing the appropriate page number. Where a product is not included in the Connector Selection Guide, but shown in the market place, please consult the factory or contact your nearest ITT Cannon Sales Office or Distributor for technical information.

ITT CANNON CIRCULAR CONNECTORS

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
CA BAYONET — rugged, bayonet connector series Bayonet Coupling Designed in accordance with European spec VG 95 234, interchangeable but not intermateable with MIL-C-5015; for use in heavy military equipment. **VG CATALOG**	**1-61 CONTACTS** Contact/Wire Size 16 12 8 4 0 CRIMP OR SOLDER TERMINATION	• Military Radios • Radar Systems • Heavy Military Equipment • Power Supplies • Communications and Ground Test Equipment • Earth Moving Equipment • Backstage Lighting Equipment • Mass Transit	Standard Circular Connectors with Bayonet Coupling ITT CANNON
CA-BVS — rugged, water-proof connectors Bayonet Coupling Designed for the stringent requirements for mining equipment; contact arrangements to MIL-C-5015, VG 95 234; 360° HF shielding available. **GS-1E CATALOG**	**1-61 CONTACTS** Contact/Wire Size 16 12 8 4 0 CRIMP TERMINATION	• Underground Mining Installations • Heavy Duty Equipment	Waterproof Connectors CA-BVS ITT CANNON
CA-COM/CA-COM-B standard circular connectors Threaded Coupling Bayonet Coupling CA-COM — threaded coupling CA-COM-B — bayonet coupling General purpose for commercial marketplace; interchangeable with corresponding MIL-C-5015 and VG 95234 types. ■ **CC CATALOG**	**2-48 CONTACTS** Contact/Wire Size 16 12 SOLDER OR CRIMP TERMINATION	• Industrial Machinery and Equipment	Circular Standard Connectors CA-COM and CA-COM-B ITT CANNON
CVA — standard circular MIL-C-83723 (Series II) Threaded Coupling High performance, mates with MIL-C-5015 thread coupled connectors. Environmental and fluid resistant, rear release crimp snap-in contacts. ☐ **CVA/MIL-C-83723 CATALOG**	**1-48 CONTACTS** Contact/Wire Size 16 12 8 4 0 CRIMP TERMINATION	• Commercial/Military Aerospace • Test Equipment • Ground Support Equipment • Communications Equipment • Guidance Controls • Surface/Naval Vehicles • Black Box Instrumentation	CVA M83723 (Series 2) Circular Connectors CANNON ITT
CGE — high power connectors Bayonet Coupling Used to transmit high current at low voltage; meets mechanical requirements of VG 95234; operating temperature range −55 °C to +125 °C. ■ **HS CATALOG**	**1 CONTACT** Contact/Wire Size H2 H15 H5 H24 H9 Coax. contacts available CRIMP OR THREADED BOLT TERMINATION	• Heavy Vehicles Military/Commercial • Tanks • Any High Amperage Requirement	High Power Connectors CGE ITT CANNON
FIREWALL CONNECTORS Threaded Coupling MS-K — 350°F (177°C), meets MIL-C-5015 fireproof test, crimp contacts CA-KE — 350°F (177°C), moisture-resistant, for sealable wires, meets MIL-C-5015 fireproof test or 350°F (177°C) continuous FRF/FVF/FRA/FVA — firewall connector with front release crimp snap-in contacts; moisture sealed, exceeds MIL-C-5015 fireproof requirements; 400°F (204°C) continuous ■ **HEC CATALOG**	**1-47 CONTACTS** Contact/Wire Size 16 12 8 4 0 CRIMP TERMINATION	• Provides protection against extreme high temperatures, emergency fire retardant conditions, moisture, atmospheric conditions, resistant to fuels, cleaning agents, coolants, hydraulic fluids • Nuclear-Radiation Resistant • Aircraft Firewall	cannon connectors for hostile environments

☐ Environmental version only ■ Environmental versions available, consult factory

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

ITT CANNON — CIRCULAR CONNECTORS

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
HIGH TEMPERATURE connectors CA-HR — +371°F (+700°C), nuclear-radiation resistant Threaded Coupling	**1-73 CONTACTS** Contact/Wire Size 16 12 8 4 0 CRIMP OR WELD TERMINATIONS	- Provides protection against extreme high temperatures, emergency fire retardant conditions, moisture, atmospheric conditions, resistant to fuels, cleaning agents, coolants, hydraulic fluids - Nuclear-Radiation Resistant - Aircraft Firewall	GEOPHYSICAL SERIES — hermaphroditic connectors Threaded Coupling Connectors designed for seismic applications in hostile environments. **HEC CATALOG**	**122, 176, 216 CONTACTS** Contact/Wire Size 20 18 SOLDER TERMINATION	- Oil Exploration	

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
HIGH TEMPERATURE connectors HTMF — qualified to MIL-C-83723 Series III Class K and Class G. Temperature range from −85°F to +392°F (−65°C to +200°C). Meets U.S., NATO and British Govmnt. specifications Threaded Coupling **HTMF CATALOG**	**3-55 CONTACTS** Contact/Wire Size 12 16 20 Thermocouple contacts available CRIMP TERMINATION	- High Temperature Engines	High Temperature Miniature Connectors

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
K — standard lightweight, rugged general purpose K — with special Acme thread coupling nut with internal threads RK — reverse coupling unit with external threads SK — "BEEP" telephone connectors Quick Coupling Acme Threads **K CATALOG**	**2-110 CONTACTS** Contact/Wire Size 20 16 14 10 8 6 4 Coax. contacts available SOLDER TERMINATION	- Aircraft Radios/Cameras - Instrument Panels - Black Boxes/"U" Boxes - TV Cameras - Transmitters - Communications and Radar Interconnects - CRT/Data Terminals - Automotive Instrument Sensors	
DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
KFS — standard circular, MIL-C-28840 KFS — front release contacts, high impact shock resistance for use with Navy Shipboard cable. Threaded Coupling ☐ **28840 CATALOG**	**7-155 CONTACTS** Contact/Wire Size 20 CRIMP TERMINATION	- Navy Shipboard Cable - RFI/EMI and Hermetic - Filter	
DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
KJL/KJ/KJA — Series I, II and III subminiature high density, qualified to MIL-C-38999 Bayonet Coupling/ Threaded Coupling KLJ Series I (Scoop Proof), KJ Series II (Low Profile). High performance, high density, lightweight, compact, environment-resistant connectors; rear release of crimp snap-in contacts; bayonet coupling. KJA Series III Scoop Proof self-locking threaded coupling for EMI/EMP shielding capability. ☐ **KJL/KJ CATALOG** **KJA CATALOG**	**3-128 CONTACTS** Contact/Wire Size 22M 22D 22 20 16 12 CRIMP TERMINATION	- Black Boxes - Electronic Instrumentation - Test Equipment - Ground Support Radar Systems - Space Shuttle - Guidance Controls - Military Spacecraft/Satellite Programs - Military/Commercial Aircraft - Military Missiles

ITT CANNON CIRCULAR CONNECTORS

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
MS/CV 345*— MIL-C-5015G (NAVY) environmental, standard circular, crimp versions Threaded Coupling The latest military design, high performance 5015 connectors with crimp removable contacts. Fully intermateable with existing MIL-C-5015 and threaded MIL-C-83723 (USAF) Series II connectors. ■ **MS/CV CATALOG**	**1-48 CONTACTS** Contact/Wire Size 16 12 8 4 0 CRIMP TERMINATION	● Mass Transit Systems ● Military Space Programs ● Black Box Instrumentation ● Test Equipment ● Radar Systems ● Power Circuits ● Ground Support Equipment	
DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
PV — miniature circular MIL-C-83723 (Series 1) MIL-26482 (Series 2) Bayonet Coupling Intermateable with MIL-C-26482 Series 1 bayonet coupled connectors. High performance, environmentally sealed; fluid resistant; rear release crimp snap-in contacts; eight shell sizes and 25 contact arrangements. □ **PV CATALOG**	**3-61 CONTACTS** Contact/Wire Size 20 16 12 CRIMP TERMINATION	● Missile On-Board Electronics Systems ● Transportation Electronics ● Military Armored Vehicles Electronics ● CAB, Engine, Power Applications ● Space Shuttle	
DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
PVW — miniature circular connectors  Bayonet Coupling Lightweight version of PV Series, mates with M26482 and M83723 Series 1; temperature range −55 °C to +175 °C. □ **PVW CATALOG**	**3-61 CONTACTS** Contact/Wire Size 20 16 12 CRIMP TERMINATION	● Missiles ● Aerospace Programs ● Armored Vehicles ● Black Box ● Airbus/SST Concorde ● Military Aircraft	PVX — miniature circular connectors Bayonet Coupling Same as PV Series except with 4 additional polarization positions (total 9 possibilities); temperature range −65 °C to +200 °C. □ **PVX CATALOG**			
DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
SRC/SRCB/SRCN — miniature circular, rugged, lightweight, general-purpose connectors SRC — machined contacts (threaded coupling) SRCB — SRC with bayonet coupling SRCN — with stamped contacts (threaded coupling) Threaded Coupling **SRC CATALOG**	**3-24 CONTACTS** Contact/Wire Size 20 16 SOLDER OR CRIMP TERMINATION	● Measurement and Test Equipment ● Communications Systems ● Medical Equipment ● "Mini-cam" TV ● Video Tape Recorders	SRC SRCN SRCB

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
W SERIES — waterproof connectors For extreme underwater geophysical applications, uses MIL-C-5015 contact arrangements, Acme thread coupling. **HEC CATALOG**	**1-48 CONTACTS** Contact/Wire Size 16 12 8 4 0 Coax. contacts available SOLDER TERMINATION	● Underwater Geophysical Exploration ● Underground Drilling Equipment ● Moisture-Resistant Outdoor Requirements	cannon connectors for hostile environments

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
WFS — standard circular, designed to MIL-C-5015G-340* WFS — front release contacts, for use in commercial/industrial, military, mass transit, retrofit programs. **WFS CATALOG**	**7-104 CONTACTS** Contact/Wire Size 16-16 16-22 CRIMP TERMINATION	● Navy Shipboard Cable ● Mass Transportation ● Heavy Equipment ● Space Programs	
□ Environmental version only ■ Environmental versions available, consult factory

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

ITT CANNON

FILTER CONNECTORS

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
DPXJ Rack/panel filter connectors in single, two, three or four gang shells interchangeable with standard DPX, DPXMA, DPXME and meets requirements of ARINC 404. Provide optimum attenuation of RFI/EMI. **FDPXJ CATALOG**	**CONTACTS** Contact/Wire Size 22 20 16 Coax. contacts available SOLDER TERMINATION Consult factory for availability of crimp filter contacts	● Electronic Countermeasures Equipment ● Communications Equipment ● Encoder/Decoder Equipment ● Radar Guidance Systems ● Instrumentation ● Navigational Equipment ● Deep Space Applications ● Military Aircraft ● Commercial Aircraft	D*J Rectangular subminiature filter connectors intermateable with standard D subminiature and MIL-24308 types. Optimum RFI/EMI attenuation provided. **FDJ CATALOG**	**CONTACTS** Contact/Wire Size 20 Coax. contacts available SOLDER TERMINATION Consult factory for availability of crimp filter contacts		DJ CANNON ITT
PVJ Bayonet Coupling Miniature circular filter connectors provide optimum attenuation of RFI/EMI. PJV equivalents to MIL-C-26482 and MIL-C-83723 types. Also available in hermetic. **FPVJ CATALOG**	**CONTACTS** Contact/Wire Size 20 16 SOLDER TERMINATION Consult factory for availability of crimp filter contacts		KJJ/KJJL Bayonet Coupling KJJ (low profile)/KJJL (scoop proof) miniature circular filter connectors combine functions of standard connector and a feed-thru filter into one complete package. Meet applicable portions of MIL-C-38999 Series I, II and III. Provides optimum RFI/EMI attenuation. Also available in hermetic. **FKJJ CATALOG**	**CONTACTS** Contact/Wire Size 22D 20 16 SOLDER TERMINATION Consult factory for availability of cirmp filter contacts		KJJL KJJ CANNON ITT

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
TKJ A transverse monolith filter design incorporated into the KJJ (M38999) connector family. Threaded Coupling	**CONTACTS** Contact/Wire Size 22D 22M 22 20 16 12	● Missiles ● Military Communications ● Military Weapons System ● Radar Ground Control Equipment	KJJ MIL-C-38999

EMI/RFI PRODUCTS

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
SHIELDED D subminiature Available in kits or individual connectors to suit your EMI/RFI equipment requirements. Assures equipment compliance with FCC Docket 20780.	**CONTACTS** Contact/Wire Size 20 SOLDER OR CRIMP TERMINATION	● Computers ● Electronic Games ● Telecommunications ● Medical Electronics ● Computer Peripherals ● Black Box ● Business Machines ● Compact Packaging Requirements	TRANSVERSE MONOLITH D subminiature  Significantly reduces EMI/RFI emissions, assuring equipment compliance with FCC Docket 20780.	20 SOLDER POT, STRAIGHT AND RIGHT ANGLE PC, WIRE WRAPPABLE

ITT CANNON HERMETIC CONNECTORS

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
GS — standard circular MIL-C-5015 Threaded Coupling TBFH — through bulkhead fitting BFH — bulkhead fitting GS — glass seated	**1-54 CONTACTS** Contact/Wire Size 16 4 12 0 8 EYELET OR SOLDER POT TERMINATION	- Medical Equipment - Relays - Tachometers - Directional Finders - Aircraft Instrumentation - Spacecraft/Satellite Systems - Fuel Tanks - Sensors - Nuclear Instrumentation - Transmitters - TV Cameras - Aircraft Ground Support Equipment - Rapid Transit - Recreational Vehicles - Automotive Test Equipment - Shipboard Instrumentation - Communication Systems - Submersible Vehicles - Electronic Countermeasures - Glove Boxes - Construction and Oil Field Equipment - Automotive Transmissions - Mining Equipment	
***KH — standard circular, lightweight general purpose, quick disconnect** Quick Coupling KH — Acme threaded coupling RKH — Reverse type coupling nut	**2-57 CONTACTS** Contact/Wire Size 20 10 16 6 14 EYELET OR SOLDER POT TERMINATION		
KPT/PVA — miniature circular MIL-C-26482 (Series I and Series II) Bayonet Coupling Connector for broad-base commercial, military, and industrial applications ranging from general purpose to space environments.	**2-61 CONTACTS** Contact/Wire Size 20 16 12 EYELET OR SOLDER POT TERMINATION		
KJLY/KJY — miniature circular MIL-C-38999 (Series I and Series II) Bayonet Coupling Lightweight, scoop-proof/low-profile, environment-resistant, engineered for high density circuitry applications.	**3-128 CONTACTS** Contact/Wire Size 22 20 16 SOLDER OR CRIMP TERMINATION		
MC/KH — subminiature circular, general purpose Acme Threads Quick disconnect with Acme threads used for instrumental, machine tools, automotive, recreational vehicles and many military guidance and instrument applications.	**3-50 CONTACTS** Contact/Wire Size 20 16 12 SOLDER TERMINATION		
HYDROSPACE connectors — designed to withstand stringent environments encountered by submarines and other undersea vehicles MIL-C-24217 — hermetic seal capability of withstanding pressures up to 10,000 psi. MIL-C-22249 — features receptacles with feed through pin-pin contacts mated to low pressure (internal) plug and high pressure (hydrostatic) plug. MIL-C-22539 — similar to MIL-C-24217 connectors, accommodates different contact arrangements.	**3-208 CONTACTS** Contact/Wire Size 20 8 16 4 12 0 SOLDER, SET SCREW CRIMP TERMINATION		
D Subminiature for general military/aerospace application, qualified to MIL-C-24308 D*H — standard D subminiature D*TBH — through bulkhead **HCC CATALOG**	**9-50 CONTACTS** Contact/Wire Size 20 EYELET OR SOLDER POT TERMINATION (D*H) PIN-PIN (D*TBH)		

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
HIGH TEMPERATURE connectors HRM +315° (+600°F), nuclear radiation-resistant miniature circular connector Threaded Coupling **HEC CATALOG**	**1-73 CONTACTS** Contact/Wire Size 16 4 12 0 8 CRIMP OR WELD TERMINATIONS	- Temperature Sensing Detection Devices - Radiation- and Temperature-Resistant Environmental Applications

ITT CANNON PRINTED CIRCUIT/INPUT-OUTPUT

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
ADAPTA-CON CONNECTORS  Low-force receptacle interconnections for P.C. and I/O applications, custom made to any size or configuration. **ACBP CATALOG**	UBS UP TO 130 CONTACTS UBC UP TO 86 CONTACTS Contact/Wire Size 18 thru 28 SOLDER, CRIMP TERMINATION	● PC Board Interconnections ● Computer Peripheral Equipment ● Automatic Test Equipment	DL CONNECTORS Low mating force, high performance, cam-actuated spring contacts on .100″ centers. I/O, cord-to-cord, cord-to-panel applications. **DL CATALOG**	UP TO 2496 CONTACTS Contact/Wire Size 18 thru 30 CRIMP OR WIRE-WRAPPING TERMINATION	● Computer Main Frames ● Computer Peripherals ● Communications Systems ● Ground Support Systems ● Guidance/Control Systems	
ITT Cannon offers a broad range of edgecard (printed circuit) connectors. Available are modular printed circuit connectors accommodating from 2 to 200 contacts in gold, silver or tin plating. Contact spacing ranges from .100 inches to .200 inches. Commercial, military specification and DIN types are also available in a variety of mounting styles. The following generally describes several of ITT Cannon's direct and indirect discrete and backpanel types. Condensed technical data is provided in a selector chart below.

DESCRIPTION

PC CONNECTORS DIRECT (ONE PIECE)

Series	Number of Contacts	Contact Arrangement	Current Rating	Termination Styles
G03	5 to 89 10 to 178	Single read-out Dual read-out	3 A max.	Eyelet, Solder Tails, Wrap Posts
G05	2 to 100 4 to 200	Single read-out Dual read-out	4.5 A max.	Eyelet, Solder Tails, Wrap Posts
PB21	44, 56, 60, 68, 72, 80, 86, 88, 100	Dual read-out	3 A max.	Solder Tails, Wrap Posts
G08 (unshrouded)	8-70 (even increments, double row) 2-35 (single row)	Dual read-out	3 A max.	Solder Tails, Wrap Posts

PC CONNECTORS INDIRECT (TWO PIECE)

Series	Number of Contacts	Contact Arrangement	Current Rating	Termination Styles	
				Male Connector	Female Connector
G06 (DIN)	32, 64, 96	Two rows Three rows	2 A max.	Solder Tails, Straight and 90°	Solder Tails, Wrap Posts
G60 (Reverse DIN)	64, 96	Two rows Three rows	2 A max.	Solder Tails, Wrap Posts	Solder Tails, Straight and 90°
G06 (IDC)	64	Two rows Three rows	3 A max.	—	IDC Termination
G612* Compliant Pin	96	Three rows	2 A max.	Press-fit Wrap Posts	Solder Tails 90°
G60* Compliant Pin Press-fit	96	Three rows	2 A max.	Press-fit Wrap Posts	—
PB18	Modular Blocks, 2 rows of 10	Dual read-out	3 A ma.	Consult Factory	Solder Tails
PB23	Modular Blocks, 2 rows of 10	Dual read-out	3 A ma.	Consult Factory	Solder Tails
LIPS	Up to 150	Consult Factory	1 A max.	Consult Factory	Solder Tails
PICL	30, 40, 50, 60	Four rows	0.5 A	Solder Tails, Straight and 90°	Solder Tails, Straight and 90°

*G612 compliant pins are ordered separately.
G60 connectors are ordered with compliant pins installed.

IC SOCKETS

Series	Number of Contacts	Contact Arrangement	Current Rating	Termination Styles	
				Male Connector	Female Connector
DICF	14, 16, 18, 22, 24, 28, 40, 42	Dual-read-out	3 A max.	—	Solder Tails, Wrap Posts (14/16 contacts only)
DICA	14, 16, 18, 22, 24, 28, 40, 42	Two rows	1 A max.	—	Solder Tails

APPLICATIONS

- Missile Instrumentation Equipment
- Radar Early Warning Systems
- Dual Readout PC Applications
- Videotape Recorders
- Television Equipment
- Stereo Equipment
- Air Conditioners
- Computer/Micro Computer Equipment
- Automobile Dashboards
- Office Equipment
- Medical Equipment
- Tape Recorders
- Commercial/Industrial Electronic Equipment
- Computer Periphery
- Measuring Instruments
- Communications Equipment
- High Density PC Board Applications

ITT CANNON SPECIAL APPLICATIONS

DESCRIPTION	CONTACT DATA	APPLICATIONS	CATALOG
AUDIO/ELECTRONIC CONNECTORS Used on microphones, audio/video, amplifiers, test instrumentation, computers and other low level circuit applications. **AUD CATALOG**	**2-8 CONTACTS** Contact/Wire Size 10 14 16 Coax. contacts available SOLDER OR CRIMP TERMINATION	• Microphones • Video Tape Recorders • Amplifiers • Medical Electronics • Computers • Audio/Video Systems	
LEADLESS CHIP CARRIER PACKAGING Chip carrier sockets and pin frames designed to accept (JEDEC A, B and C) leadless chip carriers with PC boards. Pin patterns of .050″ × .100″ and .100″ × .100″. **LLCC CATALOG**	**68-196 CONTACTS** SOLDER (FLOW, DIP) WAVE	• Microprocessors • Digital Telephone Switching Equipment	FIBER OPTIC CONNECTORS FODC — Low cost fiber optic device connectors for PCB fiber optic applications. **FODC CATALOG**	**Single Channel** (simplex) CRIMP TERMINATION	• Office Equipment • Computers • Local area network	
FIBER OPTIC CONNECTORS  Multi-channel tactical communications connectors for fiber optics. **FOMC CATALOG**	2, 4, 8 Channels Epoxy, grind and polish of fiber Cable and cable strength member is crimp	• Tactical Radio C3 Systems • Ground Support Equipment • Avionics and Instrumentation • Flight Simulators • Communications	
SURE SEAL® CONNECTORS High performance, low cost environmentally sealed connectors with rugged multiple moisture seals. Meets automotive/industrial standards including vibration, shock, temp. cycling, salt water spray and immersion, petroleum derivitives, and industrial gases. ☐ **SS CATALOG**	**1-10 CONTACTS** Contact/Wire Size #14 AWG #16 AWG #18 AWG CRIMP TERMINATION WITH OR WITHOUT INSULATION SUPPORT	• Missile Disconnect • Trucks • Off-Road Vehicles • Farm Machinery • Process Control Systems • Automotive/Mobile Units • Household Appliances • Solar Energy • Telephone Communication Lines	VE CONNECTORS — heavy duty automotive /transportation General purpose connectors for industrial marketplace; quick harness termination; environmentally sealed. Super Ceasar™ contact assembly retention. ☐ **VE CATALOG**	**12-37 CONTACTS** Contact/Wire Size 16 12 8 4 Power and Signal Contacts CRIMP TERMINATION	• Digital Electronic Systems • Off-Road Vehicles • Engines • Generators • Transportation Electronics • Farm Machines • CAB, Signal and Chassis Power Systems	
There are many other special products manufactured by ITT Cannon. For additional information please contact any of the offices listed on the following pages.

STANDARD BANANA PLUGS/JACKS

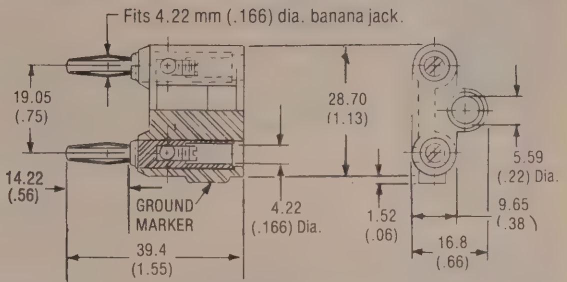
General specifications listed below apply to items using banana plugs in this catalog unless otherwise specified.

FEATURES

- One piece beryllium copper heat-treated spring for maximum long life.
- Rounded spring design results in maximum contact area.
- Stackup feature allows multiple connections at the same electrical point.

SPECIFICATIONS

- Fits standard 4.22 mm (.166) dia. banana jacks.
- Spring, one piece heat-treated beryllium copper, berylco 25 per QQ-C-533.
- Plug body, brass per QQ-B-626, alloy 360.
- Nickel plated per QQ-N-290, Class 2, .00508/.00762 mm (.0002/.0003) thick, unless specified.
- Contact resistance less than 0.001 ohm per banana plug.
- 5000 WVDC, 15 Amps. cont., 0.8 pF to 10 MHz



SPECIALS:
Most of the banana acccessories are available in high temperature plastic suitable for environmental chambers or medical applications. We will be glad to quote.

SOLDERLESS STACKUP BANANA PLUG

Wire firmly held in place with internal setscrew, eliminating soldering. Assembly of test leads simplified.
UPPER: Banana jack, 4.22 mm (.166) dia.; brass, nickel plated.
LOWER: Banana plug. Spring, one piece heat-treated beryllium copper, berylco 25 per QQ-C-533. Fits standard 4.22 mm (.166) dia. banana jack.
INSULATION: ABS, +50°C. (+122°F.) Max.

SERIES-PARALLEL ISOLATION PLUGS

These plugs enable you to build unlimited combinations of series-parallel networks e.g., voltage dividers, attenuator, etc.

Upper cross holes spaced 19.05 mm (.750) on centers from lower cross holes to allow connection of double banana plugs. Double banana plugs may be plugged in from both sides.

FEATURES:

- Fits 4.22 mm (.166) dia. banana jacks.
- Spring, one piece heat-treated beryllium copper, berylco 25 per QQ-C-533.
- Plug bodies and jacks, brass, nickel plated per QQ-N-290 class 2.
- Tough thermoplastic molded to banana jacks and plug bodies.
- Insulation: ABS, +50°C (+122°F.) Max.

ITT POMONA ELECTRONICS

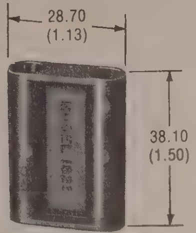
STANDARD BANANA JACKS/BINDING POSTS

DOUBLE BANANA PLUG SPLICE

Provides rapid method for splicing cables. Reduces necessity of storing extra long cables. Molded thermoplastic body provides protective insulation. Brass nickel plated banana jacks. 4.22 mm (.166) dia., on 19.05 mm (.750) centers.
INSULATION: Polypropylene, +55°C. (+131°F.) Max.

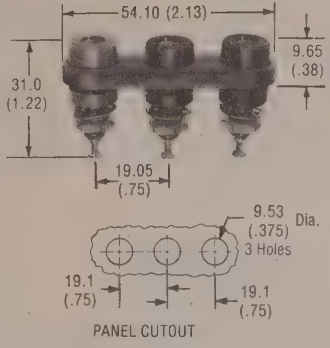


Model No.	Color
1823-0	Black
1823-2	Red

***NET 1.95**

TRIPLE BANANA JACK

- Tin plated brass bodies, per MIL-T-10727.
- Closed entry receptacle, 4.22 mm (.166) dia.
- Mounts in panels from 1.60 mm (.063) to 9.53 mm (.375) thick.
- One red, one black and one green jack.
- Choice of black or red mounting base.
- Nickel plated lockwashers and hex nuts.
- Rated 2500 WVDC 15 amps cont. +115°C (+239°F.) Max.

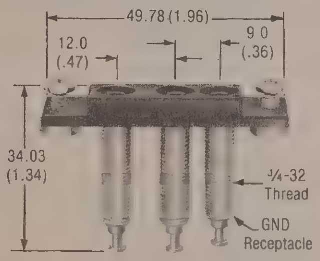


Model No.	Mtg. Base Color
4601-0	Black
4601-2	Red

(unassembled) ***NET 2.75**

EXTRA DEEP TRIPLE BANANA JACK

- Initial connection made with ground receptacle.
- Accepts 20.32 mm (.800) long banana plugs.
- Supplied with (2) 6-32 hex nuts and screws, unassembled.
- Tin plated brass bodies, per MIL-T-10727.
- Molded in Lexan* polycarbonate.
- Rated 2500 WVDC 15 amps cont. +115°C. (+239°F.) Max.



Model No.	Color
4163-0	Black

***NET 3.95**

STANDARD BINDING POST

Accepts standard banana plug. Thin line design for high-density packaging. Binding post body and captive thumb nut, brass. Available gold plated or tin plated. Lexan* Polycarbonate insulation. 8-32 hex nut and lockwasher included. 2.54 mm (.100) dia. cross hole is perpendicular with flat on insulator. Mounts in panels 1.59 mm (.062) to 6.35 mm (.250) thick.
RATINGS: 2500 W VDC 15 amps cont. +115°C. (+239°F.) Max.

ITT POMONA ELECTRONICS

COMPONENT MOUNTING ISOLATION PLUGS

SPLIT-TERMINAL ISOLATION PLUGS

Create passive and active networks, voltage dividers, isolation networks or attenuators with the split-terminal isolation plugs described below.

Bright tin plated solder turret terminals provide permanent, reliable noise-free connections for component mounting.

Tough thermoplastic material molded to plug body and connectors insures maximum strength, moisture resistance and excellent insulative properties.

TYPICAL APPLICATION

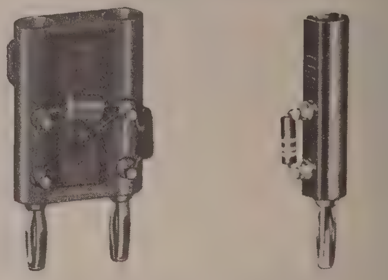

PHOTO REDUCED TO TWO-THIRDS SIZE

MODEL MDP-X SHOWN

MODEL 1390 SHOWN

SPECIFICATIONS FOR MDP-X, 1390, 1837, 1468, 1469, 1910:

- Fits standard 4.22 mm (.166) dia. banana jack.
- Spring, one piece heat-treated beryllium copper, berylco 25 per QQ-C-533.
- Plug body, brass per QQ-B-626, alloy 360.
- Nickel plated per QQ-N-290, class 2.
- Contact resistance less than 0.001 Ohms per banana plug.
- Insulation: Polypropylene unless noted, +55°C. (+131°F.) Max.

DOUBLE BANANA PLUG FOUR TERMINAL ISOLATION

Provides four terminal isolation. Top stackup receptacles isolated from lower plugs. Ideal for insertion of matching networks in laboratory VTVM's, signal generators, etc. Bright tin plated solder turret terminals for permanent noise-free connections.
UPPER: Double banana jacks 4.22 mm (.166) dia., on 19.05 mm (.750) centers.

CONNECTOR TEST ADAPTERS

CONNECTOR TEST ADAPTERS

An ideal test adapter for the rapid testing of the hard-to-get-at contacts of multi-pin MS type connectors such as miniature circular, standard circular and rack and panel. Excellent for testing of continuity, voltage and signal on individual contacts. Test adapter available in pin and socket contact sizes 22, 20, 16 and 12.

- Gold plated contacts.
- Flexible tip prevents damage to connector contacts if test adapter is accidentally bent.
- Flexible tip allows testing of adjacent contacts.
- Fully insulated to prevent accidental shorting.
- Accepts standard banana plug.
- Model 4690 also fits .635 mm (.025) square pins

UPPER: Banana jack, 4.22 mm (.166) dia., brass, nickel plated.
LOWER: "MS" style contact, gold plated, see tab block.
INSULATION: Polyvinyl chloride (PVC), +50°C. (+122°F.) Max.

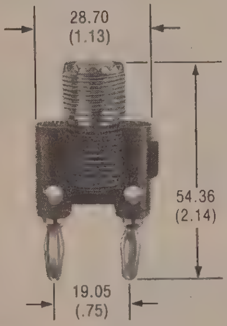
Permits UHF male to be used with equipment having banana jacks.
UPPER: UHF female.
LOWER: Double banana plug, on 19.05 mm (.750) centers. Cross holes 4.22 mm (.166) dia. in body provide side stackup connections. Nickel plated per QQ-N-290.
INSULATION: ABS, black, +50°C. (+122°F.) Max.

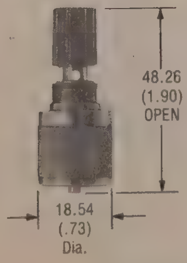


Model No. 1707

***NET 14.80**

BINDING POST TO UHF MALE

Permits single banana plug to be used with equipment having a UHF female. Adds flexibility to your oscilloscope.
UPPER: Insulation: Polycarbonate, +115°C. (+239°F.) Max. Binding post with 4.22 mm (.166) dia. banana jack. Nickel plated per QQ-N-290.
COLOR: Red.
LOWER: UHF male.

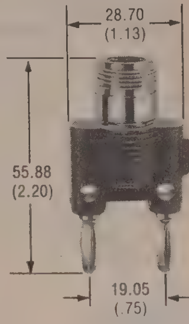


Model No. 1698

***NET 16.95**

TYPE "N" FEMALE TO DOUBLE BANANA PLUG

Permits Type "N" male to be used with equipment having banana jacks. Ideal for connecting R.F. equipment to conventional test equipment.
UPPER: Type "N" female.
LOWER: Double banana plug, on 19.05 mm (.750) centers. Cross holes 4.22 mm (.166) dia. in body provide side stackup connections. Nickel plated per QQ-N-290.
INSULATION: ABS, black, +50°C. (122°F.) Max.

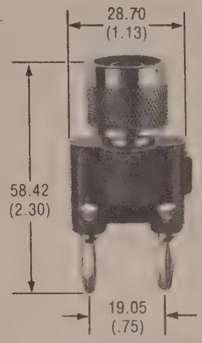


Model No. 1740

***NET 14.95**

TYPE "N" MALE TO DOUBLE BANANA PLUG

Permits Type "N" female to be used with equipment having banana jacks.
UPPER: Type "N" male
LOWER: Double banana plug on 19.05 mm (.750) centers. Cross holes 4.22 mm (.166) dia. in body provide side stackup connections. Nickel plated per QQ-N-290.
INSULATION: ABS, black, +50°C. (+122°F.) Max.

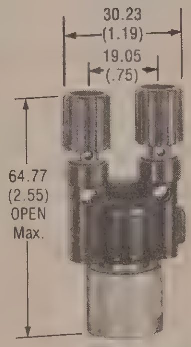


Model No. 1770

***NET 13.95**

BINDING POSTS TO TYPE "N" MALE

Permits single or double banana plugs to be used with equipment having type "N" female. Useful for rapid interconnection of components.
UPPER: Insulated polycarbonate binding posts. 1 red, 1 black, on 19.05 mm (.750) centers with 4.22 mm (.166) dia. banana jacks. Nickel plated per QQ-N-290.
CENTER: Cross holes 4.22 mm (.166) dia. in body provide side stackup connections. Insulation: ABS, black, +50°C. (+122°F.) Max.
LOWER: Type "N" male.



Model No. 1796

***NET 16.75**

BINDING POSTS TO TYPE "N" FEMALE

Permits single or double banana plugs to be used with equipment having type "N" males. Useful for rapid interconnection of components.
UPPER: Insulated polycarbonate binding posts, 1 red, 1 black, on 19.05 mm (.750) centers with 4.22 mm (.166) dia. banana jacks. Nickel plated per QQ-N-290.
CENTER: Cross holes 4.22 mm (.166) dia. in body provide side stackup connections. Insulation: ABS, black, +50°C. (+122°F.) Max.
LOWER: Type "N" female.

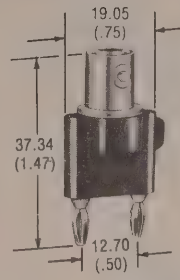
ITT POMONA ELECTRONICS

COAXIAL ADAPTERS

BNC FEMALE TO MINIATURE DOUBLE BANANA PLUG

Allows a BNC male to be used with equipment having 12.70 mm (.500) spaced miniature 2.64 mm (.104) dia. banana jacks. Excellent for adapting test equipment to standard coaxial cables.
UPPER: BNC female.
LOWER: Miniature double banana plug, brass. Spring, one piece heat-treated beryllium copper, berylco 25 per QQ-C-533. Gold plated. Insulation: ABS.
RATINGS: 500 Vrms, +50°C. (+122°F.) Max.



Model No.
3269

***NET 6.95**

MINIATURE BINDING POSTS TO BNC MALE

Converts a BNC female to miniature 12.70 mm (.500) spaced binding posts.
UPPER: Insulated miniature binding posts with 2.64 mm (.104) dia. miniature banana jacks, brass, gold plated. Insulation: Polycarbonate.
LOWER: BNC male. Insulation: ABS, black.
RATINGS: 500 Vrms, +50°C. (+122°F.) Max.

COAXIAL ACCESSORIES

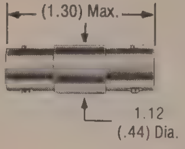
BNC FEMALE TO FEMALE

Allows the interconnection of two coaxial cables with BNC males.

FEATURES:
- Tarnish resistant.
- 50 Ohm impedance.
- Teflon* insulation.
- Gold plated beryllium copper center contacts.



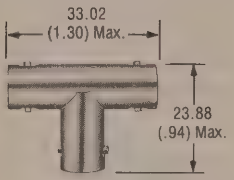
Model No.
3283

***NET 3.95**

BNC "T" — 3 FEMALES

Allows the interconnection of three coaxial cables with BNC males.

FEATURES:
- Tarnish resistant.
- 50 Ohm impedance.
- Teflon insulation.
- Gold plated beryllium copper center contacts.



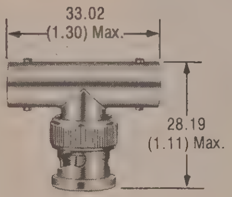
Model No.
3284

***NET 10.95**

BNC "T" — FEMALE, MALE, FEMALE

With this adapter, equipment or coaxial cables having a single BNC female are changed to two BNC Females.

FEATURES:
- Tarnish resistant.
- 50 Ohm impedance.
- Teflon insulation.
- Beryllium copper female center and male outer finger contacts.
- Gold plated female and male center contacts.



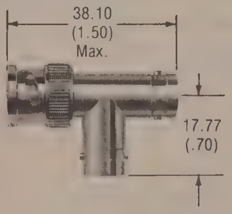
Model No.
3285

***NET 9.50**

BNC "T" — MALE, FEMALE, FEMALE

Equipment with several side-by-side BNC connectors can easily be adapted for two cables with this novel adapter.

FEATURES:
- Tarnish resistant.
- 50 ohm impedance.
- Teflon insulation.
- Beryllium copper female center and male outer finger contacts.
- Gold plated female and male center contacts.



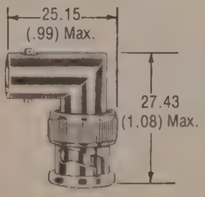
Model No.
4896

***NET 15.95**

RIGHT ANGLE BNC FEMALE TO BNC MALE

Adapts straight BNC male to right angle BNC male.

FEATURES:
- Tarnish resistant.
- 50 Ohm impedance.
- Teflon insulation.
- Beryllium copper female and male outer finger contact.
- Gold plated female and male center contacts.



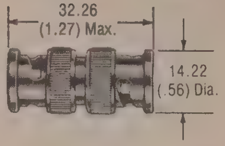
Model No.
3534

***NET 8.95**

BNC MALE TO MALE

Allows the interconnection of two coaxial cables with BNC females.

FEATURES:
- Tarnish resistant.
- 50 Ohm impedance.
- Teflon insulation.
- Beryllium copper outer finger contacts.
- Gold plated male center contacts.



Model No.

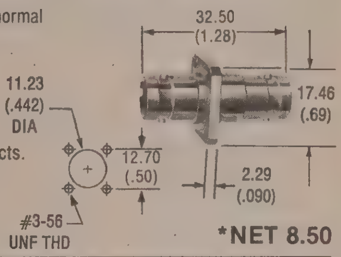
***NET 7.25**

BNC FEMALE TO FEMALE FLANGE MOUNT

Standard BNC feed through for normal applications. See panel layout.

FEATURES:
- Tarnish resistant.
- 50 ohm impedance.
- Teflon insulation.
- Gold plated beryllium copper contacts.



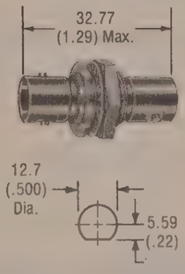
Model No.
4895

***NET 8.50**

ISOLATED GROUND BNC FEMALE TO FEMALE

Outer conductor is isolated from the panel. Excellent for feeding through panels which require a floating shield.

FEATURES:
- Tarnish resistant.
- 50 Ohm impedance.
- Teflon insulation.
- Gold plated beryllium copper center contacts.
- Mounts in panels up to 4.57 mm (.18) thick.



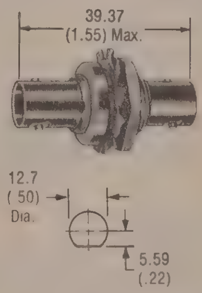
Model No.
3846

***NET 12.75**

HERMETICALLY SEALED BNC FEMALE TO FEMALE

Excellent for use with equipment which requires a hermetic seal for pressure differences.

FEATURES:
- Tarnish resistant.
- 50 Ohm impedance.
- Teflon insulation.
- Gold plated beryllium copper center contacts.
- Silicone rubber O ring.
- Mounts in panels up to 7.11 mm (.28) thick.



Model No.

PANEL/BULKHEAD RECEPTACLES

BNC FEMALE BULKHEAD RECEPTACLE

Ideal for use where space requirements between adjacent connectors are at a premium.

FEATURES:

- Tarnish resistant.
- 50 Ohm impedance.
- Teflon insulation.
- Gold plated beryllium copper center contact.
- Mounts in panels up to 3.40 mm (.13) thick.

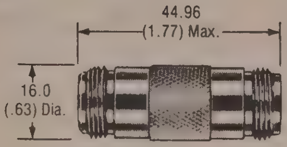
TYPE "N" ADAPTERS / ACCESSORIES

TYPE "N" FEMALE TO FEMALE

Allows the interconnection of two coaxial cables with Type "N" males.

FEATURES:

- Tarnish resistant.
- 50 Ohm impedance.
- Teflon insulation.
- Gold plated beryllium copper center contacts.



Model No. 3841

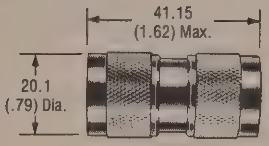
***NET 7.95**

TYPE "N" MALE TO MALE

Allows the interconnection of two coaxial cables with Type "N" females.

FEATURES:

- Tarnish resistant.
- 50 Ohm impedance.
- Teflon insulation.
- Phosphor bronze outer finger contacts.
- Gold plated male center contacts.



Model No. 3842

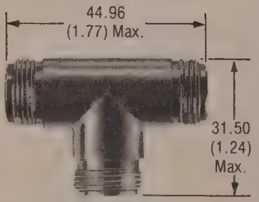
***NET 8.95**

TYPE "N" TEE — 3 FEMALES

Allows the interconnection of three coaxial cables with Type "N" males.

FEATURES:

- Tarnish resistant.
- 50 Ohm impedance.
- Teflon insulation.
- Gold plated beryllium copper center contacts.



Model No. 5089

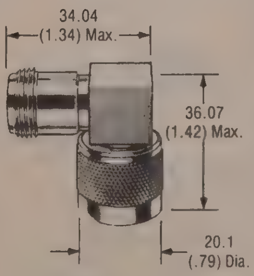
***NET 15.95**

RIGHT ANGLE TYPE "N" FEMALE TO TYPE "N" MALE

Adapts straight Type "N" male to right angle Type "N" male.

FEATURES:

- Tarnish resistant.
- 50 Ohm impedance.
- Teflon insulation.
- Phosphor bronze outer finger contact.
- Gold plated beryllium copper female and male center contact.



Model No. 3843

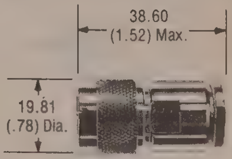
***NET 13.95**

TYPE "N" MALE CABLE PLUG

For use on cable types RG 8, 9, 11, 13, 213, 214, 216 and 225.

FEATURES:

- Tarnish resistant.
- 50 Ohm impedance.
- Teflon insulation.
- Gold plated brass center contact.



Model No. 4980

***NET 5.95**

TYPE "N" MALE CABLE PLUG

For use on cable types RG 55, 58, 141, 142, 223 and 400.

FEATURES:

- Tarnish resistant.
- 50 Ohm impedance.
- Teflon insulation.
- Gold plated brass center contact.

ITT POMONA ELECTRONICS

SMA ADAPTERS / TERMINATIONS

These SMA adapters are manufactured in accordance with MIL-A-55339. The 50 Ohm miniature series R.F. connectors are especially adaptable to microwave component applications such as couplers, dividers and mixers.

MATERIAL:

- Bodies and coupling nut: Beryllium copper per QQ-C-530, cond. HT. gold plated.
- Female contact: Beryllium copper per QQ-C-530, gold plated, cond. HT.
- Male contact: Brass per QQ-B-626, alloy 360, 1/2 hard, gold plated.
- Teflon insulation.
- Gaskets: Silicone rubber per ZZ-R-765a, Class 11A, Grade 50.

SPECIFICATIONS:

- Thread SMA Male: ¼-36 UNS-2B, SMA Female: ¼-36 UNS-2A.
- Frequency range: 0-12.4 GHz.
- Dielectric withstanding voltage: 1000 Vrms, 60 Hz at sea level.
- R.F. leakage: 90 dB min. between 2-3 GHz.
- Temperature range: −65°C. (−85°F.) to +165°C. (+329°F.) unless otherwise indicated.

ITT POMONA ELECTRONICS

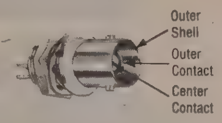
TRIAXIAL CONNECTORS

TRIAXIAL CONNECTORS

Triaxial connectors accommodate the need for low level signal patching and balanced line applications. Designed for use with single conductor, double shielded cable. These connectors feature a concentric design with center contact, outer contact and outer shell (see photo). This concentric design does not require matching of halves such as the polarized stepped insulator connectors.



MATERIAL:
- Bodies and fittings: Brass per QQ-B-626, alloy 360, ½ hard.
- Insulators: Teflon per MIL-P-19468.
- Center contacts: Female — beryllium copper per QQ-C-530 Cond. HT. Male — brass per QQ-B-626, alloy 360, ½ hard.
- Outer contacts: Beryllium copper per QQ-C-530 Cond. HT.

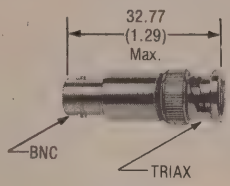
FINISH:
- Bodies and fittings: Tarnish resistant.
- Center contacts: Gold plated.
- Outer contacts: Gold plated.

RATING:
- 500 Vrms.

BNC FEMALE TO TRIAXIAL MALE

Allows the use of a BNC male on equipment having a triaxial female.

FEATURES:
- Tarnish resistant.
- Teflon insulation.
- Beryllium copper female center and male outer finger contacts.
- Gold plated female and male center contacts.



Model No.
5090

***NET 39.95**

TYPE "N" RESISTOR TERMINATED MALE PLUG

Ideal for terminating coaxial lines.

FEATURES:

- 1% 1 watt, deposited carbon resistor.
- Tarnish resistant
- Teflon insulation.
- Gold plated male center contact.
- 127 mm (5.0) bead chain with 3.56 mm (.14) dia. hole in lug.
- Resistance value marked on white nylon anti-roll sleeve.
- Nylon temperature: +102°C. (+216°F.) Max.

BNC FEED-THRU SERIES RESISTOR

Ideal for adding in series resistance to coaxial lines with BNC connectors.
1st end: Female BNC.
2nd end: Male BNC.

FEATURES:

- 1%, 2 watt, non-inductive film resistor.
- Resistance value marked on white nylon anti-roll sleeve.
- Tarnish resistant.
- Teflon insulation.
- Gold plated center contacts.
- Nylon temperature: +102°C. (+216°F.) Max.

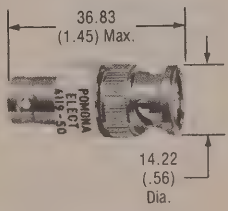
BNC FEED-THRU TERMINATION

Ideal for terminating pulse, microwave or UHF instruments in their characteristic impedance.
1st end: Female BNC.
2nd end: Male BNC.
Termination metal film resistor, deposited nichrome over ceramic core, 2W.



FEATURES:

- Resistance value marked on white nylon anti-roll sleeve.
- Tarnish resistant.
- Teflon insulation.
- Gold plated center contacts.
- Nylon temperature: +102°C. (+216°F.) Max.

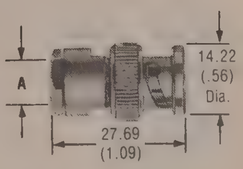
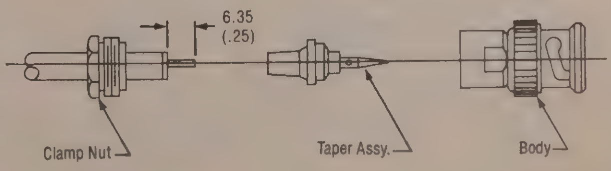
BNC MALE CABLE PLUGS FIELD SERVICEABLE

These connectors make it a snap to change or install connectors in the field. Just strip the cable end as shown in the illustration. Push the taper assembly under the braid and solder. Then thread the clamp nut into the body and you've created a fine connection.





Model No.	Fits Cable	Dim. 'A'	*Net
4997	RG58	5.59 (.22)	5.50
4998	RG59	6.60 (.26)	5.75
4999	RG174	2.79 (.11)	10.75

ITT POMONA ELECTRONICS

AUDIO CONNECTORS GENERAL INFORMATION

ITT Pomona audio connectors are rugged, quick disconnect devices designed for use in audio systems and other applications where reliability and quiet operation are the password. Three different series are provided, each with a solid, metal latching mechanism to assure positive, yet quick connect/disconnect.

For further information on these versatile connectors and other Pomona products please contact your Sales Representative as shown on the front cover of this catalog. Or, you may contact the factory direct, ITT Pomona Electronics, 1500 East Ninth Street, Pomona, California 91766; Telephone (714) 623-6751 or 623-3463.

Some of the salient features of the three series are as follows:

XLA SERIES (MODELS 5098, 5099)
- Body, same as XLR.
- Insulator, glass filled thermoplastic.
- Contact sockets stamped nickel silver.
- Contact pins silver plated copper alloy
- UL recognized materials.

XLR PROFESSIONAL SERIES (MODELS 5109-5113, 5117-5131)
- Body, satin finish, nickel plated zinc or aluminum shell.
- Resilient socket insulator for excellent low noise/vibration performance.
- Contacts, silver plated, solid machined copper alloy.
- Nickel plated steel barrel.
- Nickel silver latch and stainless steel latch spring.
- UL recognized.

XLB SERIES (MODELS 5100-5103)
- Insulator, thermoplastic (glass filled nylon).
- Internal cable clamping mechanism.
- Three contacts with separate ground lug.
- UL recognized materials.

DIE CAST SHIELDED "BLACK BOXES"

Pomona Electronics, shielded "Black Boxes" that fulfill the requirement for RF applications are manufactured in a variety of sizes.
Ideal for compact packaging (voltage dividers, isolation networks, impedance matching networks), and other varied uses.
Cover and screws included.

SPECIFICATIONS: (All Models)

- Operating temperature: −55°C. (−67°F.) to +150°C. (+302°F.)
- Working voltage: 500 V peak.
- Noise rejection: Greater than 70 dB.

(See pages 69 and 70 for accessories and replacement parts)
These photos are not to scale, for visual purposes only, see pages 57, 58, 62, 64, 65 and 66 for actual dimensions.

FEATURES:

- Shielded housing; Die cast aluminum, Alloy A380 or A384.
- Finish: Blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328.
- Cover: Aluminum 1100-H14 with clear anodized finish per MIL-A-8625.
- Completely enclosed box provides proper shielding.

ITT POMONA ELECTRONICS

SHIELDED "BLACK BOXES" — SIZE "C"

A series of larger shielded "Black Boxes."

These larger boxes are excellent for compact packaging of voltage dividers, isolation networks and many other applications.

Cover and screws included.

SPECIFICATIONS: (All Models)

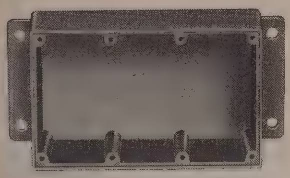
- Operating temperature: −55°C. (−67°F.) to +150°C. (+302°F.)
- Working voltage: 500 V. peak.
- Noise rejection: Greater than 70 dB.

(See pages 69 and 70 for accessories and replacement parts.)

FEATURES:

- Shielded housing: die cast aluminum, alloy A380 or A384.
- Finish: Blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328.
- Cover: Aluminum 1100-H14 with clear anodized finish per MIL-A-8625.
- Solder turret terminals for permanent noise free connection of components.
- 2 flanges for easy mounting of box.

SHIELDED "BLACK BOX"



MODEL 2901
FINISH: Blue baked enamel.
Includes 2.03 mm (.080) thick cover with part number and eight 4-40 NC-2A x .250 binding head cover screws.

MODEL 2906
FINISH: None.
Includes unmarked 2.03 mm (.080) thick cover and eight 4-40 NC-2A x .250 binding head cover screws.

EXTRUDED ALUMINUM BOX WITH CARD GUIDES, SIZE "I"

A convenient size square aluminum box for electronic component packaging. With cover, completely enclosed box provides EMI/RFI shielding.

OPERATING TEMPERATURE: −55°C. (−67°F.) to +150°C. (+302°F.) Max.
NOISE REJECTION: Greater than 70 dB.
FINISH: Blue baked enamel over phosphoric etch.
Includes top & bottom 2.03 mm (.080) thick covers and 8 4-40 NC-2A x .250 binding head cover screws.

(See top of page 67 for specifications.)

GRABBER™ TEST CLIPS

These plunger type action test clips are called Grabber™ test clips. The gold plated contact hook attaches rapidly to component leads and terminals. The specially designed tip (see illustration) slides easily on the 0.64 mm (.025) square wrapped wire terminals. The do-it-yourself Grabber™ test clips can be assembled quickly and easily by the user (see simplified instructions below) or the Grabber™ test clips can be purchased as completed patch cords that are firmly molded together to provide a strong, reliable and integral unit.

FEATURES:

- Plunger type action between thumb and two fingers.
- Comfortable finger grip operation.
- Positive connection that won't pop off.
- No sharp teeth to damage or nick wires.
- Beryllium copper conductor berylco 165 per QQ-C-533; gold plated per MIL-G-45204 Type I.
- Stainless steel spring.
- Glass-filled nylon, molded directly onto clip and wire. +102°C. (+216°F.) Max.

SIMPLIED ASSEMBLY PROCEDURE FOR DO-IT-YOURSELF GRABBER™ TEST CLIPS

1. Pull off thumb cap to expose contact connection.
2. Thread wire through thumb cap and strip 3.18 mm (.125).
3. Insert stripped end through tapered hole on contact, and solder.
   NOTE: Stripped end should be placed into the large opening of the tapered hole.
4. Slide thumb cap back onto contact.

WIRE: Except as noted, the wire used on all Grabber™ patch cords is 20 AWG, stranded 41 x 36 T.C. extra flexible polyvinyl insulation 2.21 mm (.087) O.D.

14/16 PIN DUAL IN-LINE TEST CLIP WITH ATTACHED HEADER

The Dip Clip™ with attached header is an excellent tool for plugging into 14/16 pin IC sockets to test circuits. You can either solder wires directly to the top pins of the Dip Clip™, or more convenient, you can attach the Pomona Electronics I.C. Jumper Cable 4185. Dip Clip™ insulation: Glass-filled nylon, +102°C. (+216°F.) Max.
COLOR: Red.

ITT POMONA ELECTRONICS

DIP CLIP™ IC TEST CLIPS

Pomona Electronics' DIP CLIP™ test clips are designed especially for testing Dual-In-Line I.C. Packages on high-density P.C. boards. The DIP CLIP™ has many built-in features that assure a positive electrical connection and at the same time provides hands-free testing. The DIP CLIP™ test clips with reduced thickness (across the contacts) are used for ultra-dense packaged clips located adjacent to each other at only 2.54 mm (.100) spacing.

DIP CLIP™ test clips are obtainable either with tarnish resistant nickel silver contacts or gold plated beryllium copper contacts. The gold plated beryllium copper contacts feature longer life and lower contact resistance.

FEATURES

- Solid tarnish resistant nickel silver contacts or beryllium copper contacts, gold plated per MIL-G-45204, Type II.
- Contacts 1.02 mm (.040) wide on lower end are serrated for good electrical connection.
- 0.64 mm (.025) square serrated test points on upper end will accept wire wraps on mini test clips.
- Molded barrier between each contact allows connections to be made on live boards without accidental shorting of adjacent contacts.
- Can be used as an insertion and removal tool for DIPS.
- Insulation: Glass-filled nylon, +102°C. (+216°F.) Max.

ANTISTATIC DIP REMOVERS

These DIP removers are built of a special plastic that not only has the strength to pull the most stubborn DIP, but actually prevents electrostatic buildup. The surface resistivity controls surface charges and protects even the most sensitive of electronic circuits. This excellent design also minimizes accidental bending of contacts.

FEATURES

- **MATERIAL:** Antistatic Noryl.*
- **TEMPERATURE:** Heat distortion temperature @ 265 psi greater than +93°C. (+200°F.).

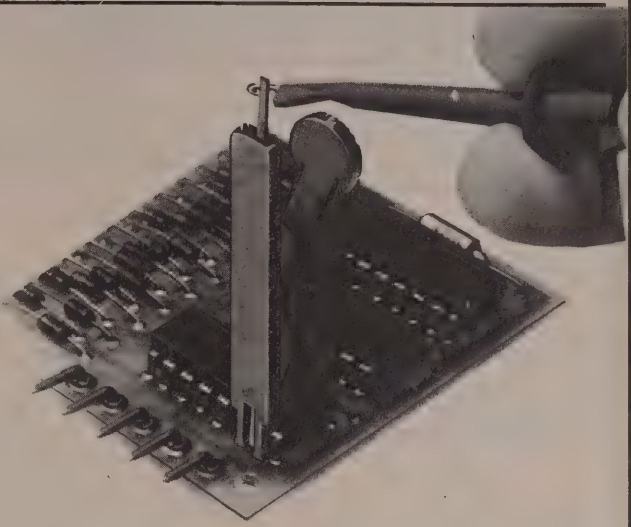
DIP GRIP™ IC TEST CLIP

DIP GRIP™ IC TEST CLIP

Pomona Electronics DIP GRIP™ test clip is designed especially for testing single contacts on Dual-In-Line Package (DIP) Integrated Circuits on 2.54 mm (.100) spacing. The DIP GRIP™ assures positive electrical contact on one leg of the DIP across its 7.62 mm (.300) width and provides hands free testing.



FEATURES

- Beryllium copper contact gold plated per MIL-G-45204.
- Contact 1.02 mm (.040) wide on lower end is serrated for good electrical connection.
- **0.64 mm (.025) square serrated test point on upper end will accept square pin receptacle patch cords such as Pomona Models: 4741, 4771, 4772, 4910, 4945, 4974, 4992, 5069 and 5070.**
- Torsion spring: Music wire per QQ-W-470A.
- Molded barrier on either side of contact allows connections to be made on live boards without accidental shorting of adjacent contacts.
- Insulation: Glass-filled nylon, +102°C. (+216°F.) Max.

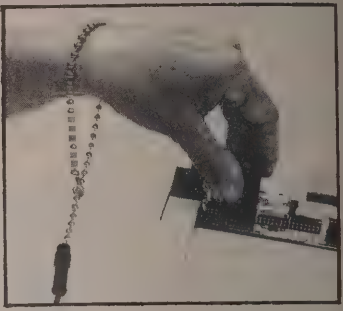
ANTISTATIC WRIST STRAP

These personnel grounding wrist straps protect even the most sensitive I.C. from accidental damage due to static electricity. The self-adjusting wrist strap (see insert) allows freedom of movement, yet is attractive and comfortable to wear. All units feature a built-in 1 megohm resistor.



FEATURES (all units):

BEAD CHAIN: Brass, nickel plated with chrome finish.
RESISTOR: Fixed carbon film, 1 megohm, 1/2 watt, 5%.
WIRE: 18 AWG, st. 65 x 36 T.C., PVC insulation, 3.66 mm (.144) O.D. or 23 AWG coil cord.
BANANA PLUG: Nickel plated brass body. Spring, one piece heat-treated beryllium copper, berylco 25 per QQ-C-533, nickel plated.

ANTISTATIC WRIST STRAP WITH ALLIGATOR CLIP

This strap allows the use of several adapters (such as the spade lug adapter, model 1614) in place of the alligator clip adapter provided.

MINIATURE TEST PROBE PATCH CORDS

These slim miniature test probes feature a sharp replaceable needle tip. The tip easily pierces varnish or plating to give a good electrical reading. The probe also has an optional replaceable tube or 0.71 mm (.028) needle tip for non-slip use over the ends of leads (See model 4574 and 4988 on page 35). This aids in the checking of components from the back side of circuit boards.

Tough thermoplastic is molded directly onto probe tip and wire lead providing a strong, reliable integral unit.

2.03 mm (.080) NEEDLE TIP: Replaceable, stainless steel. (See model 4174 page 35.)
TUBE TIP: Replaceable brass, nickel plated. (See model 4574 page 35.)
0.71 mm (.028) NEEDLE TIP: Replaceable, stainless steel. (See model 4988 page 35.)
TIP NUT: Nylon, white.
PROBE BODY: Nylon.

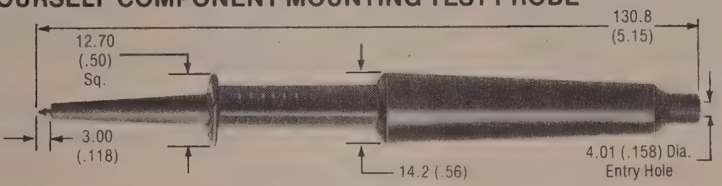
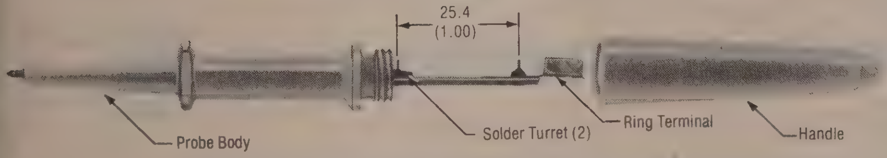
DO-IT-YOURSELF COMPONENT MOUNTING TEST PROBE





SIMPLIFIED COMPONENT INSTALLATION
- Unscrew handle from probe body.
- Thread wire through hole in handle and crimp or solder to ring terminal.
- Attach and solder component to turret terminals.
- Slip handle over component and thread handle to probe assembly.

This do-it-yourself component mounting test probe enables the user to create his own compensated probe. Discrete components, such as resistors, capacitors, filters, etc., can be soldered between the two gold plated brass solder turrets. The probe features a triangular shaped finger grip with molded finger guard and threaded handle. Nylon, +80°C. (+176°F.) Max.
PROBE PIN TIP: 2.03 mm (.080) dia., nickel plated.
RECOMMENDED WIRE SIZE: 20 to 16 AWG.

STANDARD BANANA PLUG PATCH CORDS

POMONA ELECTRONICS BANANA PLUG PATCH CORDS

Polypropylene insulation molds the plug and leads into a strong moisture resistant integral unit. Excellent for computer board and test equipment applications.

Used by leading industries in applications where extreme reliability is of prime importance.

FEATURES:

- One piece beryllium copper heat-treated spring for maximum long life.
- Rounded spring design results in maximum contact area.
- Extra flexible polyvinyl insulation used on all leads.

SPECIFICATIONS:

- Fits standard 4.22 mm (.166) dia. banana jacks.
- Spring, one piece heat-treated beryllium copper, berylco 25 per QQ-C-533.
- Plug body, brass per QQ-B-626, alloy 360.
- Banana Plug Insulation: Polypropylene, +55°C. (+131°F.) max.
- Nickel plated per QQ-N-290, Class 2.
- Contact resistance less than 0.001 Ohm per banana plug.
- Operating temperature: +55°C. (+131°F.) Max.
- Wire, 18 AWG, strand. 65 x 36 T.C., PVC insulated, 3.66 mm (.144) O.D.
- Ratings: 7 amps cont. 5000 W VDC.

STACKUP BANANA PLUG PATCH CORD

Model No.	Length	*Net
B-4 *	101.6 (4.0)	2.40

2864-60*	1524.0 (60.0)	4.90

Vertical stacking feature allows endless circuit connections and the right angle design keeps wires close to the chassis. An oversize shoulder allows easy connect and disconnect.
BANANA PLUG: Spring, one piece heat-treated beryllium copper, berylco 25, per QQ-C-533. Nickel plated. Insulation: Polypropylene, +55°C. (+131°F.) Max.

WIRE: 18 AWG, strand. 65 x 36 T.C. Extra flexible, polyvinyl insulated, 3.66 mm (.144) O.D.
RATING: 7 amps cont. 5000 W VDC.
***COLORS AVAILABLE:** -0 Black, -2 Red.

TEST LEAD HOLDER

TEST LEAD HOLDER

No need to spend time searching for a particular test lead. With these new racks, all of your patch cords and cable assemblies can be conveniently filed for instant selection — within easy reach. Holder mounts quickly on any vertical surface. Test leads are easy to store, easy to remove. Three models to choose from for different size cables.
MATERIAL: Cold rolled steel.
FINISH: Baked enamel.

ITT POMONA ELECTRONICS

# MINIATURE BANANA PLUG PATCH CORDS

Miniature patch cords for use with 2.64 mm (.104) dia. miniature banana jacks. Excellent for miniaturization of test equipment and high density packaging for patch systems.

Banana plug springs precision formed of one piece beryllium copper, heat-treated for maximum life and low contact resistance. Polypropylene molded to plug body and wire.

FEATURES:

- Fits 2.64 mm (.104) dia. miniature banana jacks. Plug body brass, per QQ-B-626, alloy 360.
- Gold plated spring, one piece heat-treated beryllium copper, berylco 25 per QQ-C-533.

SPECIFICATIONS:

- Wire: 20 AWG, strand. 41 x 36 T. C. extra flexible polyvinyl insulation 2.21 mm (.087) O.D.
- Rated: 5 amps cont. 3000 VDC.
- Operating temperature: +55°C. (+131°F.) Max.

ITT POMONA ELECTRONICS

12.70 (.500) SPACED MINIATURE DOUBLE BANANA PLUG PATCH CORDS

MOLDED MINIATURE DOUBLE BANANA PLUG PATCH CORDS ⅓ SMALLER

A miniature double banana plug on 12.70 mm (.500) centers. This patch cord enables miniaturization of test equipment and high density packaging for patch systems.

Banana plug springs precision formed of one piece beryllium copper, heat treated for maximum life and low contact resistance.

FEATURES:

- One piece beryllium copper heat treated spring for long life.
- Rounded spring design results in maximum contact area.
- GND., clearly molded on plug body and shell.
- Solder-bonded noise-free connections.

SPECIFICATIONS:

- Fits standard 2.64 mm (.104) dia. banana jacks, on 12.70 mm (.500) centers.
- Spring, one piece heat-treated beryllium copper, berylco 25 per QQ-C-533.
- Plug body brass per QQ-B-626, alloy 360.
- Gold plated.

CABLE DESCRIPTION:

Shielded coax., RG174/U polyethylene insulation, vinyl jacket, nom. cap 30.8 pf/ft., nom. imp. 50 Ohms, nom. O.D. 2.54 mm (.100). Color: Black.

***COLORS AVAILABLE:** -0 Black, -2 Red.

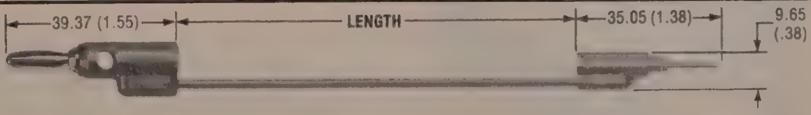
BANANA PLUG TO PIN TIP STACKUP PATCH CORD



Model No.	Length	*Net
1126-4 *	101.6 (4.0)	3.25
1126-8 *	203.2 (8.0)	3.25
1126-12*	304.8 (12.0)	3.25
1126-18*	457.2 (18.0)	3.25
1126-24*	609.6 (24.0)	3.25
1126-36*	914.4 (36.0)	3.25
1126-48*	1219.2 (48.0)	3.45
1126-60*	1524.0 (60.0)	3.65

Adapts to equipment using banana jacks and pin jacks. Banana plug and pin tip allow vertical stackup.
BANANA PLUG: Spring, one piece heat-treated beryllium copper, berylco 25 per QQ-C-533, nickel plated.
PIN TIP: 2.03 mm (.080) dia., 12.70 mm (.500) long, brass, gold plated.

TIP JACK, STACKUP: Beryllium copper, gold plated. Accepts 2.03 mm (.080) dia. pin.
WIRE: 20 AWG, strand. 41 x 36 T.C. Extra flexible polyvinyl insulation 2.21 mm (.087) O.D.
RATED: 5 amps cont., 3000 W VDC.
***COLORS AVAILABLE:** -0 Black, -2 Red.

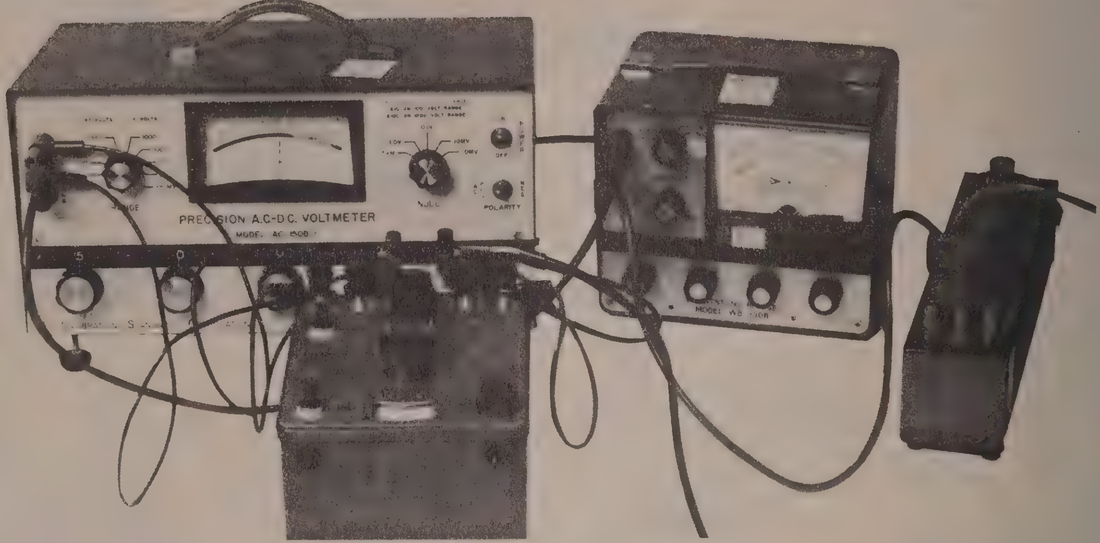
LOW THERMAL E.M.F. SPADE LUG JUMPERS



TELLURIUM COPPER LEADS FOR PRECISION MEASUREMENTS

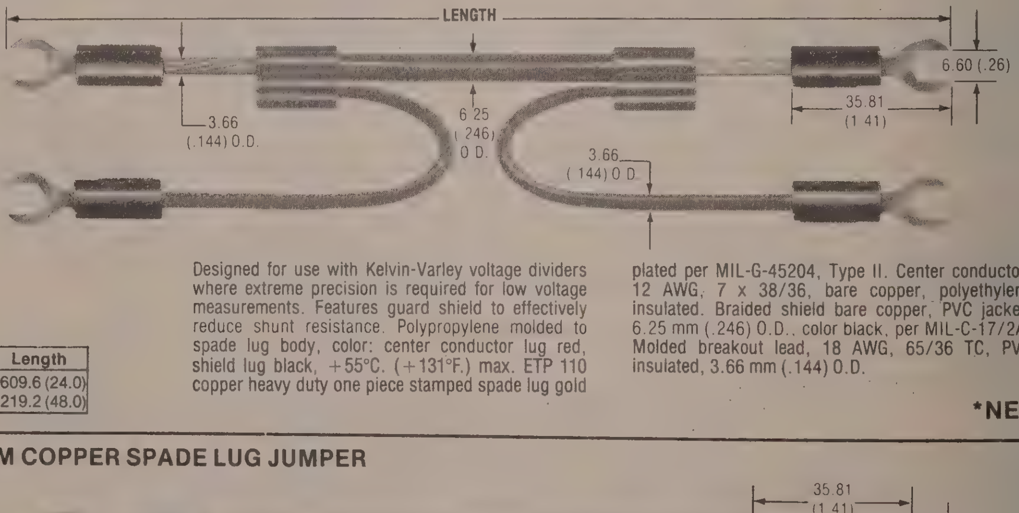
Pomona Electronics offers two products for use in measurements when thermoelectric effects are significant sources of error. Comparators designed for use with the Kelvin-Varley voltage divider and microvolt leads were tested with primary standards laboratory equipment.

Thermoelectric voltages were not detected until the most sensitive galvanometer range was used.

Thermoelectric properties—ETP 110 copper gold plated spade lugs cold-staked to multi-stranded 12 gauge copper wire minimize thermoelectric effects — an absolute necessity for low voltage, high precision measurements.

Low resistance — 12 gauge multi-stranded copper wire results in extremely low cable resistance. Spade lugs plated with 15 micro inches gold for minimum contact resistance and minimum thermal EMF when using copper binding posts (less than 0.01 $\mu V/°C$).

TELLURIUM COPPER SPADE LUGS, SHIELDED LEAD



Model No.	Length
1756-24	609.6 (24.0)
1756-48	1219.2 (48.0)

Designed for use with Kelvin-Varley voltage dividers where extreme precision is required for low voltage measurements. Features guard shield to effectively reduce shunt resistance. Polypropylene molded to spade lug body, color: center conductor lug red, shield lug black, +55°C. (+131°F.) max. ETP 110 copper heavy duty one piece stamped spade lug gold plated per MIL-G-45204, Type II. Center conductor, 12 AWG, 7 x 38/36, bare copper, polyethylene insulated. Braided shield bare copper, PVC jacket, 6.25 mm (.246) O.D., color black, per MIL-C-17/2A. Molded breakout lead, 18 AWG, 65/36 TC, PVC insulated, 3.66 mm (.144) O.D.

ITT POMONA ELECTRONICS

MOLDED BREAKOUTS

A series of "breakouts" designed to convert standard coaxial cables to test cables. By connecting proper breakout receptacle or plug to corresponding cable plug or receptacle, any standard coaxial cable becomes a test cable. All connections feature a tarnish resistant finish and tough thermoplastic insulation molded to connector and wire.

SPECIFICATIONS:

- **OPERATING TEMPERATURE:** +55°C. (+131°F.) Max.
- **WORKING VOLTAGE:** 500 V. peak.

BNC MALE TO TEST CLIPS

CONNECTOR: BNC male; gold plated brass center contact; tarnish resistant brass body.
WIRE: 20 AWG with minigator, 18 AWG with alligator clips.
TEST CLIPS: Minigator or alligator, steel, cadmium plated. Insulators, Vinyl: one black, one red.
OVERALL LENGTH: 177.8 mm (7.0)

Photo approximately one-half actual size.

MICROWAVE COAXIAL CABLE ASSEMBLIES

These coaxial cables allow testing of frequencies up to 12.4 Gigahertz. Microwave coaxial cables can also be built to your specifications on special order. Just tell us the length you want, the cable you would prefer (it can even be your special cable) and what type of connectors. We will be happy to quote prices.

CABLE CHARACTERISTICS:

CABLE: RG 174/U coaxial cable
CHARACTERISTICS:
Impedance: 50 Ohm
Cable O.D.: 2.54 mm (.100)
Loss: .45 dB/ft. at 1.0 GHz Max.
Temperature: 85°C. (185°F.) Max.

CABLE: RG 316/U coaxial cable
CHARACTERISTICS:
Impedance: 50 Ohm
Cable O.D.: 2.49 mm (.098)
Loss: .56 dB/ft. at 3 GHz Max.
Temperature: 200°C. (392°F.) Max.

CABLE: RG 142 B/U
CHARACTERISTICS:
Impedance: 50 Ohm
Cable O.D.: 4.95 mm (.195)
Loss: .67 dB/ft. at 12.4 GHz
Temperature: 200°C (392°F.) Max.

CABLE ASSEMBLIES

STRESS-RELIEVED/WEATHERPROOFED CABLE ASSEMBLIES

The following cable assemblies with molded boot feature extra-long, stress-relieved PVC molded directly onto cable jacket and connector body. The advantages are stress protection against failure from excess bending, flexing & twisting and a weatherproof seal between cable and connector.

ITT POMONA ELECTRONICS

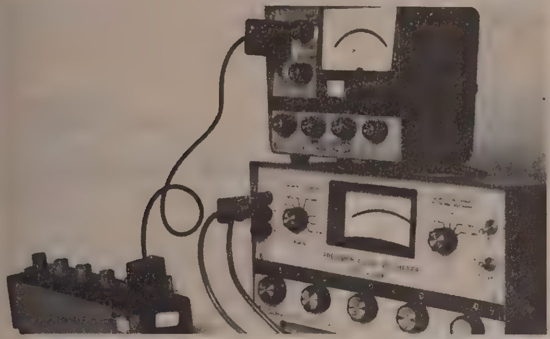
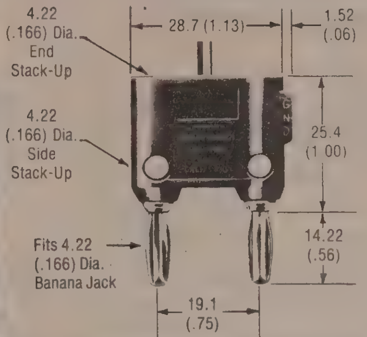
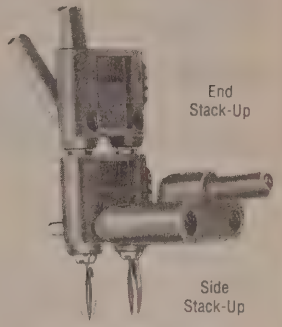
19.05 mm (.750) DOUBLE BANANA PLUG PATCH CORDS







These patch cords are indispensable for bridge transformer connection, three terminal capacitor measurements and general hookup for two wire system. Parallel connections can be made in side or end stackup. High density polyethylene thermoplastic molded to banana plug body and cable assures maximum strength, moisture resistance and excellent insulative properties.

FEATURES:

- One piece beryllium copper heat-treated spring for long life.
- Rounded spring design results in maximum contact area.
- GND., clearly molded on plug body and shell.
- Solder-bonded noise-free connections.

SPECIFICATIONS:

- Spring: one piece heat-treated beryllium copper, berylco 25 per QQ-C-533.
- Plug body; brass per QQ-B-626, alloy 360.
- Nickel plated per QQ-N-290, Class 2.

DOUBLE PLUG BOTH ENDS

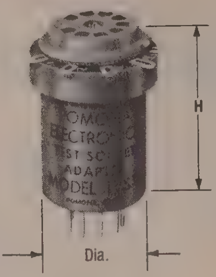
TUBE TEST SOCKET ADAPTERS & SOCKET SAVER® ADAPTERS

TEST SOCKET TUBE ADAPTERS

Ideal for making measurements of voltage, resistance, audio and video without tracing complicated circuits from the bottom of the chassis. They feature: Extended test tabs for easy use with either alligator or test prods; low loss mica-filled molded phenolic construction per MIL-M-14, MFE. Power factor less than 0.010 at 10 MHz; high insulation resistance, the I.R. exceeds 500,000 megohms at 40% R.H., at 24°C; distributed capacity, inter-element approximately 1 pico farad; high voltage operation, voltage breakdown elements exceeds 1,700 VAC or DC. Models 1779 and TV-12 molded of electrical grade black phenolic. Model TVS-8 has 2.36 mm (.093) dia. pins. All other models have 1.02 mm (.040) dia. pins.

Model No.	Type	Size H x Dia.	Pin Circle Dia.	*Net
TVS-7	7 Pin Miniature	36.07 (1.42) x 19.05 (.75)	9.53 (.375)	9.75
TVS-8	8 Pin Octal	27.94 (1.10) x 29.46 (1.16)	17.45 (.687)	13.50
TVS-9	9 Pin Miniature	35.56 (1.40) x 22.10 (.87)	11.89 (.468)	11.25
1779	9 Pin Novar	36.83 (1.45) x 30.22 (1.19)	17.45 (.687)	10.95
TVS-12	12 Pin Compactron	35.31 (1.39) x 29.72 (1.17)	19.05 (.750)	11.25



MODEL TVS-9

MODEL 1779

TALL TEST SOCKET TUBE ADAPTERS (For sockets having captive or telescoping tube shields)

- Extra height — clears shields.
- Ready access to socket connections.
- Exposed operation saves time.
- Pins 1.02 mm (.040) dia.

These adapters rise above the shield and place testing in the open. Shields or tuner covers do not have to be removed. All construction is the highest quality. Inter-element distributed capacity is approximately 1.5 pico farad. Voltage breakdown elements exceed 1800 VAC or DC.

Model No.	Type	Size H x Dia.	Pin Circle Dia.	*Net
1447	7 Pin Miniature	54.36 (2.14) x 16.51 (.65)	9.53 (.375)	8.95

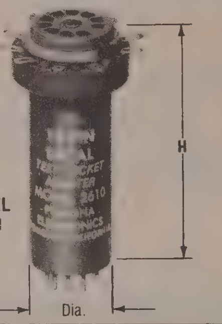
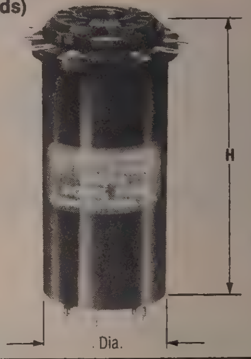
MODEL 2610





MODEL 2742

SOCKET SAVER® ADAPTERS

The Socket Saver® Adapter is designed to be installed on tube checkers and other electronic equipment to prevent wear and tear of sockets on original equipment. They are easy to install and remove. This eliminates the necessity of replacing and rewiring sockets on original equipment. Built of quality materials. Beryllium copper long life contacts to give maximum service. Models 1847 and 1849 are miniaturized for use in applications where vertical height is restricted.

BREADBOARD SOCKETS
TEST SOCKET ADAPTERS

SURFACE MOUNTED BREADBOARD SOCKETS

Surface mounted breadboard sockets are ideal for experimental circuit design, portable and enclosed units, plug-in and packaged assemblies. They feature: An insulated base to prevent connections from shorting to chassis; elimination of double chassis design; circuits may be wired in an enclosed unit; base connections are numbered for easy identification; grade A phosphor bronze spring contacts; standard center to center mounting holes. For ease of installation the 7 and 9 pin miniatures may be mounted either in the center or on the sides, the 8 pin octal is mounted on the sides; small mounting holes permits the reuse of experimental chassis.

HOOKUP (PATCH CORD) WIRE

This quality wire is used to make up the patch cords throughout the catalog. It is available for purchase in 152.4 meter (500 foot) reels. These wires are ideal for do-it-yourself test leads or point-to-point electrical connections.

18 AWG WIRE

This is the same quality wire that Pomona uses on their 18 AWG patch cords.

SPECIFICATIONS:
STRANDING: 65 x 36 tinned copper.
O.D.: 3.66 mm (.144).
JACKET: PVC.
TEMP. RANGE: −20°C. (−68°F.) to +105°C. (+221°F.).
RATED: 15 amps, max 5000 W VDC. max.

Model No.	Color
4418-0	Black
4418-2	Red

(Std. Pkg. 500′ Reel) ***NET 140.00**

20 AWG WIRE

This is the same quality wire that Pomona uses on their 20 AWG patch cords.

SPECIFICATIONS:
STRANDING: 41 x 36 tinned copper.
O.D.: 2.21 mm (.087).
JACKET: PVC.
TEMP. RANGE: −20°C. (−68°F.) to +105°C. (+221°F.).
RATED: 12 amps. max 3000 W VDC max.

Model No.	Color
4420-0	Black
4420-2	Red

(Std. Pkg. 500′ Reel) ***NET 115.00**

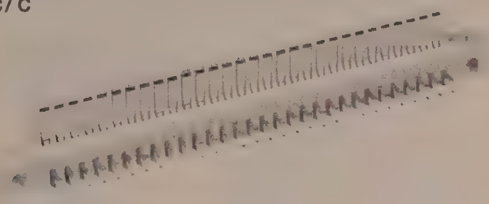
RIGHT ANGLE PLUG/PR SERIES

.100 c/c



'Pluggem' Right Angle Plug Connector mates with RC and RF Series KEL-AM receptacles. It is available with either dip solder or wire wrap .025 sq. terminals. Slot may be molded in plug to accommodate polarizing key.

HOW TO ORDER:

PR 30 - 65 01 - 15 - 19 (EXAMPLE)

- Series — PR
- No. of contacts per row — 30
- Terminal type — 65
  - 61 = Dip solder
  - 65 = Wire wrap .560 Lg.
- Contact plating — 01
- MTG style, right angle — 15
- Add to catalog number only if polarizing slot is required. Omit if no slot is required. (See table below) — 19

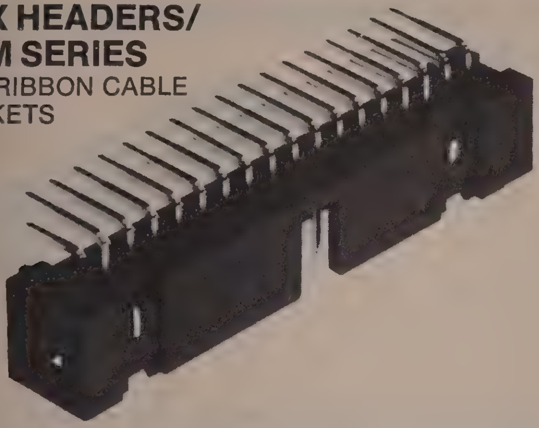
BOX HEADERS/ BHM SERIES

FOR RIBBON CABLE SOCKETS



These box headers accept KEL-AM SFM series ribbon cable sockets and meet the requirements of MIL-C-83503. These headers accept the same polarizing keys as KEL-AM HFM series headers. These headers are basically identical to the HFM series except they have no ejector latches and are smaller in size. To disengage the socket A "pull tab" on the socket is recommended. See page 5.

HOW TO ORDER:

BHM 20 - 61 41 (EXAMPLE)

Box header series — BHM
Total No. of contacts — 20
61 = Right angle terminals
41 = Straight terminals
Plating
41 - Straight tail
01 - Right angle

FEATURES

- Seven sizes, BHM — ten sizes, HFM.
- PBT (Polyester) body, color black.
- Phos. bronze contacts.
- Plating: gold over Ni (straight tails have bright tin terminals).
- Meets MIL-C-83503.
- Shrouded contacts.
- Occupies min. "real estate."

RIBBON CABLE SOCKETS/ SFM SERIES

These connectors are per MIL-C-83503.
These headers and sockets provide a low cost reliable means to connect ribbon cable to printed circuit boards. The socket accepts .025 sq. pins on .100 x .100 pattern and is provided with or without a cable strain relief. If it is to be mated to a BHM series header a pull tab to disengage the socket is recommended. See below.

HOW TO ORDER:

SFM 34 - 28 41 - 0 P (EXAMPLE)

Socket — SFM
Total No. of contacts — 34
#28 AWG IDC contacts — 28
Plating Gold over nickel on nose, tin on terminals — 41
Omit if with strain relief 0 = No strain relief — 0
With pull tab — P

SPECIFICATIONS

- 10 sizes — 10 - 14 - 16 - 20 - 26 - 30 - 34 - 40 - 50 - 60
- Socket accepts 28 AWG stranded wire
- Current capacity = 1 Amp
- Contact resistance = 16 mΩ max.
- Insulation resistance = 500 VDC 1000 MΩ max.
- Insulator material = PBT G.R.
- Dielectric withstanding = 800 VAC
- Contact material = header, brass-socket, BECU

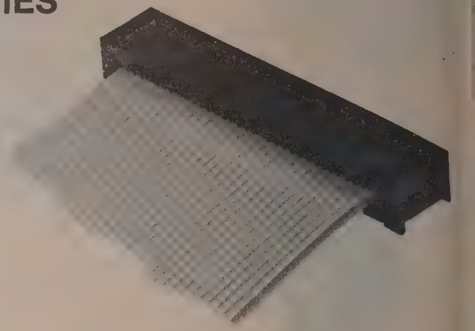
TRANSITION CONNECTOR/ 6100 SERIES



These transition connectors provide a low cost simple way to terminate 28 AWG ribbon cable to a PC board. Where disconnect capability is not required. The ribbon cable is terminated to the connector in the same way as the SFC-PF-RF-RFM series using standard tooling.

HOW TO ORDER:

6100 - XXX - 602 (EXAMPLE)

Series — 6100
No. of contacts — XXX

FEATURES

- (11) Sizes
- Insulator body & cover, black PBT (polyester)
- Contact tails formed on each end to grip board holes & prevent lifting during wave soldering
- Contacts = phosphor bronze
- Contact plating = 10-6 Au on IDC forks and bright tin on tails

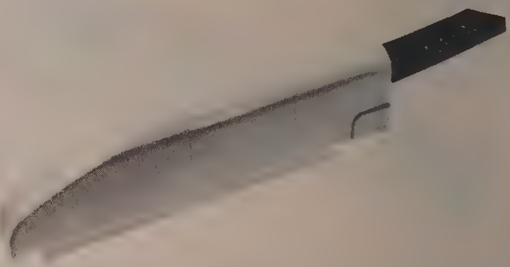
CABLE HOODS/CH SERIES



These cable hoods (or backshells) fit standard KEL-AM edge board receptacles series RC, RD and RE and also the PS series plugs, with mounting ears. When terminating discrete wires to eyelet terminals these hoods provide a streamlined means to protect the wire connection and a cable clamp to prevent cable strains being transmitted to the terminals.

Large clamp accepts up to (100) #24 AWG wires or (76) #22 AWG wires or (40) #20 AWG wires. Smaller (shorter) length hoods come supplied with smaller cable opening. See views C-C below.

NOTE: May be ordered using short form catalog number such as: CH25-F, which is CH25-4H-3.075 F.

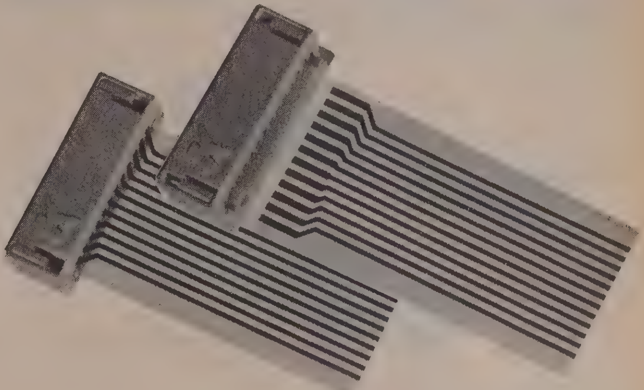
MEMBRANE SWITCH CONNECTOR/ MSC SERIES PATENT PENDING



This unique one piece—no mating connector required, connector is designed to accept soft or hard circuitry of membrane switch pigtails. The circuits may be "up" or "down". The simple two piece insulator has zero insertion force. Contacts are opened or closed on the circuits by sliding the top cover backward or forward. This connector is also excellent for use with flexible circuitry or flat conductor cables.

HOW TO ORDER:

MSC 08 - 6114 (EXAMPLE)

Series — MSC
No. of contacts — 08
R/A D.S. terminals — 61
Plating — 14

FEATURES

- Zero insertion force
- Positive retention bosses
- Occupies small area
- Low cost
- Simple to install
- Tin plated contacts
- Polyester insulator
- Solder bath retention terminals

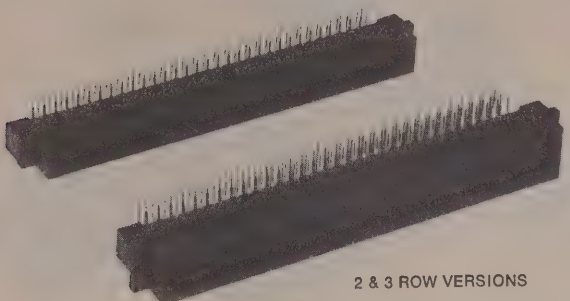
DIN CONNECTORS/STANDARD, PIN CONTACTS/ DIN STANDARD SERIES



2 & 3 ROW VERSIONS

FEATURES

- Meets requirement of DIN 41612 & IEC 130/14
- Insulator = PBT, glass reinforced, 94 V-O
- Contacts = copper alloy
- Plating = gold ^{OV} Ni contact area, tin on terminals
- Current rating = 2 Amps/contact
- Contact resistance = 20 mΩ max.
- Withstanding voltage = 1000 VAC/ 1 min.
- Insulation resistance = 10^6 MΩ min. @ 500 VDC
- Total insertion/withdrawal force

	64	96
Insertion	6.13 KG max.	9.18 Max.
Withdrawal	1.22 KG min.	1.94 min.

- Contact retention — 2.04 KG min.
- Temperature range, operating −55° to +85°C

BATTERY HOLDERS BATTERY CLIPS

KEYSTONE

SEND FOR COMPLETE CATALOG

ALL STEEL BATTERY HOLDERS

Wide acceptance for Military and commercial use. Spring tension assures constant pressure and low resistance. Holds up to 4 cells in sturdy insulating tube. Retainer Clips available to lock battery securely.

Material Specifications:

Clips: Corrosion Resistant. Carbon Steel, SAE 1065 to MIL Spec. 17919. Heat treated to spring temper, nickel plated

Contacts: Stainless steel, per MIL-S-18170, comp. 304.

Washers: Moisture Proof Resin Impregnated Fibre.

Base. Ribbed for additional support, Stainless Steel.

Ideal for NI-CAD and Alkaline Cells.

2 Mounting holes for ease in mounting.

NO. 208

A low cost clip used with non-metallic bases.

Features: Single eyelet mount — non-rotating tab. Recessed Contact holds Battery Contact firmly.

Material: Spring Temper Steel and Nickel Plated.

BATTERY HOLDERS, STRAPS AND CLIPS

ALUMINUM & STEEL BATTERY HOLDERS WITH PRINTED CIRCUIT LUGS

- ELIMINATE WIRING
- LABOR SAVING
- AVAILABLE FROM STOCK

Your choice of single or multiple holders with printed circuit lugs attached. With the popularity of printed circuitry we have standardized our most popular holders with the P.C. Lugs.

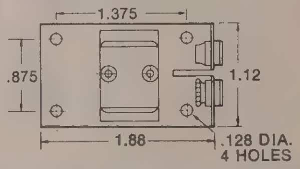
"9" VOLT SNAP-IN BATTERY HOLDER

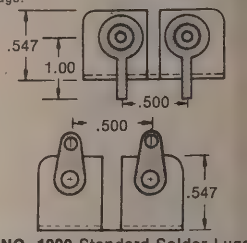
For use with any standard "9" volt battery. Battery snaps in place to insure positive contact. Ideal where severe shoc and vibration are encountered. Available with standard solder lugs or printed circuit lugs.

Material:
Frame — Aluminum
Solder Lugs — Brass Hot Tin
Contacts & Clip — Steel Nickel Plate
Insulation — Resin Impregnated Fibre

NO. 1290

NO. 1291





NO. 1290 Standard Solder Lugs
NO. 1291 Printed Circuit Lugs

PRINTED CIRCUIT SNAP-ONS ("9" VOLT)

MOUNT DIRECTLY TO PRINTED CIRCUIT BOARD

P.C. Male/Female for any standard "9" Volt Battery. Cut costs by eliminating wiring. Compact Space Saver.

Material: Frame — Steel, Tin Plate
Contacts — Steel Nickel Plate

TRANSISTOR SOCKETS PLUG-IN HOUSINGS

KEYSTONE

SEND FOR COMPLETE CATALOG

MOLDED TRANSISTOR SOCKETS FOR TO-3 CASE

NE-PIECE ALL MOLDED TRANSISTOR SOCKETS

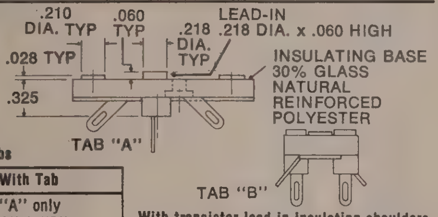
ated 5 amps DC continuous and 15 amps DC intermittent

ll molded TO-3 Transistor socket features an all-in-one mounting plate and solder tabs, oviding complete electrical isolation of the solder tab connections, choice of single or al solder tabs.

aterial: Insulating base glass filled reinforced polyester — 94V-0 rating.

ontacts: Phosphor bronze tin plate.

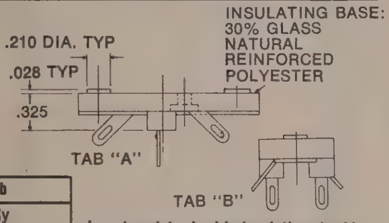
tg. Bracket: Brass cadmium plate.



hoice of Single or Dual Tabs

No.	With Tab
4513	"A" only
4514	"A" & "B"

With transistor lead-in insulating shoulders



hoice of Single or Dual Tabs

No.	With Tab
4515	"A" only
4516	"A" & "B"

Less transistor lead-in insulating shoulder

PLUG-IN HOUSING

olded Housings: Suited for packing relays, logic packages, networks & miniature circuitry.

overs: Durable, lightweight, withstands vibration & rough usage.

eaders: Variety of molded materials & good chemical resistance.

aterial Characteristics:

olystyrene: For general purpose use where high impact strength s not required and temperature would not exceed 170°F.

exan: 3 times the impact strength of Polystyrene and excellent lectrical properties, use wherever temperatures of 210°F exist.

ylon: Impact strength slightly less than Butyrate but recomended for use where temperatures are as high as 300°F.

POWER TRANSISTOR SOCKETS

Achieve better electrical performance and mechanical sturdiness by using these low cost, compact, rugged sockets. Avoids soldering directly to the semiconductor. Sockets are easier and faster to mount with the least amount of hardware required. Metal parts of the socket are corrosion resistant, and cadmium plated for better solderability which meets EIA Solderability Spec RS178A.

Spring brass contacts provide positive contact immediately upon insertion. Hard steel collector plates with 6-20 threaded formings at each end engage screws and hold securely with maximum torque of 9 pounds. Various boss heights on the precision molded nylon tops eliminates the need of loose bushings.

Printed Circuit Lugs Available on Special Order.

Material Specifications:

Collector Plate: Cadmium plate steel.

Contacts: .012 thick Brass Cadmium plated.

Materials: Molded nylon plates per MIL-P-20693A. Phenolic PBE Grade Natural Color.

Modifications Available: Variety of stock parts permits fast delivery on special requirements. Use our engineering service.

• SPACE SAVER • LABOR SAVING • EASIER SERVICING • SIMPLER MOUNTING • FROM STOCK IMMEDIATELY • GREATER FLEXIBILITY • TIME SAVING • BETTER THERMAL EFFICIENCY • UNIFORM • AVAILABLE FROM STOCK

SOCKETS IN A WIDE SELECTION FOR THE POPULAR TO-3 AND TO-66 CASES

SOCKETS FOR TO-3 CASE VARIOUS MOLDED BOSS HEIGHTS

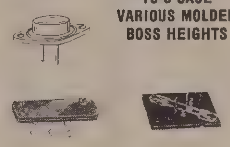
MOLDED NYLON TOP PLATE — PHENOLIC BASE
The socket is held underneath the chassis and the semiconductor is inserted into the contacts of the socket holding the assembly in position. The 6-20 screws engage the formed holes in the collector plate and complete the mounting.

No.	A Dim.
4603	.030
4602	.045
4601	.090

PRINTED CIRCUIT SOCKET FOR TO-3

MOLDED NYLON TOP PLATE — PHENOLIC BASE
Easily assembles onto printed circuit board. Eliminates wiring. Stops on P.C. terminal permits assembly of transistor to socket. Can be screwed down tightly to heat sink.

NO. 4600



SOCKETS FOR TO-3 CASE VARIOUS MOLDED BOSS HEIGHTS

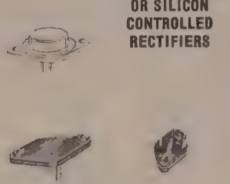
MOLDED NYLON TOP PLATE — PHENOLIC BASE
Pre-assembling the socket to the chassis by eyelets or rivets permits the installation of the semiconductor at a later stage in the assembly.

No.	A Dim.
4607	.030
4608	.045
4609	.060
4610	.090
4618	.125

FOR TO-3 CASE ALL PHENOLIC SOCKET

PHENOLIC TOP AND BASE — These sockets are eyeletted or rivited to the chassis and use external bushings to insulate the screws in the final mounting. The semiconductor may be installed at the last stage of the assembly.

NO. 4606



FOR TO-66 CASE OR SILICON CONTROLLED RECTIFIERS

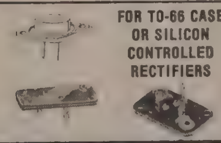
MOLDED NYLON TOP PLATE — PHENOLIC BASE
The socket is held underneath the chassis and the semiconductor is inserted into the contacts of the socket holding the assembly in position. The 6-20 screws engage the formed holes in the collector plate and complete the mounting. Printed Circuit Lugs Available on special order.

No.	A Dim.
4611	.030
4612	.045
4613	.060
4614	.090

FOR TO-66 CASE OR SILICON CONTROLLED RECTIFIERS

PHENOLIC TOP & BASE — Printed Circuit Lugs Available on special order. Pre-assembling the socket to the chassis by eyelets or rivets permits the installation of the semiconductor at a later stage in the assembly.

NO. 4615



FOR TO-66 CASE OR SILICON CONTROLLED RECTIFIERS

MOLDED NYLON TOP PLATE — PHENOLIC BASE
These sockets are pre-assembled to the chassis by either eyelets or rivets. Has .080 High Boss and eliminates the need of washers or bushings.

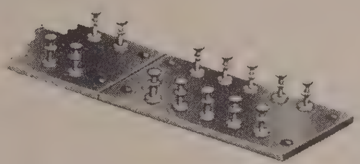
TURRET TERMINAL BOARDS-SCREW BINDING POST STRIPS

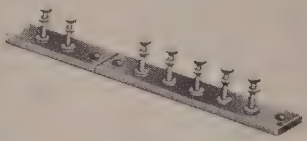
SCORED TURRET TERMINAL BOARDS

Standardized Turret Terminal Boards — Available from Stock

Terminals: QQ-626, comp. 22, ½ hard, Hot Dip Solder finish: MIL-F-14072 Type 221.
Material: Your choice of either PBE or GEE Phenolic.

PBE: Paper base electrical, MIL-P-3115C, Temp. 250°F max. Type XXXP.
GEE: Glass Epoxy, MIL-P-18177, Temp. 300°F max. Type G-10.





TURRET TERMINAL BOARDS
3/8″ SPACING AND SCORED

3/32″ Thick Phenolic — Choice of 4 Types of Terminals.
Overall Length of Board 13⅛″, Five 2⅝″ Sections.
Five sections **SCORED** for easy **separation.** Mounting holes in each section.

SCREW BINDING POST STRIPS

Your Choice of Glass Epoxy or Fiberglass Materials.

Material Specifications

Fiberglass: Reinforced Polyester NEMA Grade GPO-3. Rated for 300°F (155°C).
GEE: Glass Epoxy, MIL-P-18177 temp., 300°F. Max. Type G-10.
Terminal: Standard Strip: 6-32 tapped brass - cadmium plated
Heavy Duty: 8-32 tapped brass - hot tin dipped

BRASS, ALUMINUM & NYLON — TAPPED & CLEAR HOLE

All practical sizes and types. Complete inventory of most frequently used sizes.

- Choice of 8 different kits
- Labeled for easy identification
- Clear Plastic drawers

¼" O.D. Round (Threaded) Standoff
Brass Nickel Plated
Assortment of 1500 pcs.
In ¼", ⅜", ½", ¾" and 1" lengths.
With thread sizes of 4-40, 6-32 and 8-32.
100 pcs. of each size complete with cabinet.
KIT NO. STR-15

¼" HEX (Threaded) Standoff
Brass Cadmium Plated
Assortment of 1500 pcs.
In ¼", ⅜", ½", ¾" and 1" lengths.
With thread sizes of 4-40, 6-32 and 8-32.
100 pcs. of each size complete with cabinet.
KIT NO. STH-14

¼" O.D. Round (Threaded) Standoff
Aluminum Iridite Finish
Assortment of 1500 pcs.
In ¼", ⅜", ½", ¾" and 1" lengths.
With thread sizes of 4-40, 6-32 and 8-32.
100 pcs. of each size complete with cabinet.
KIT NO. STR-35

¼" HEX (Threaded) Standoff
Aluminum Iridite Finish
Assortment of 1500 pcs.
In ¼", ⅜", ½", ¾" and 1" lengths.
With thread sizes of 4-40, 6-32 and 8-32.
100 pcs. of each size complete with cabinet.
KIT NO. STH-22

¼" O.D. Round (Clear) Spacer
Brass Nickel Plated
Assortment of 1500 pcs.
In ¼", ⅜", ½", ¾" and 1" lengths.
With clearance holes for #4, #6 and #8.
100 pcs. of each size complete with cabinet.
KIT NO. SPR-13.

¼" HEX Male/Female Standoffs
Brass Nickel Plated
Assortment of 750 pcs.
In ½", ¾", 1", 1¼", and 1½" lengths.
With thread sizes of 4-40, 6-32 and 8-32.
50 pcs. of each size complete with cabinet.
KIT NO. STH-19

¼" O.D. Round (Clear) Spacer
Aluminum Iridite Finish
Assortment of 1500 pcs.
In ¼", ⅜", ½", ¾" and 1" lengths.
With clearance holes for #4, #6 and #8.
100 pcs. of each size complete with cabinet.
KIT NO. SPR-34

¼" Round (Clear) Spacer
Nylon 6/6
Assortment of 1500 pcs.
In ¼", ⅜", ½", ¾" and 1" lengths.
With clearance holes for #4, #6 and #8.
100 pcs. of each size complete with cabinet.
KIT NO. SPR-8

TERMINAL STRIPS (Standard & Miniature)

These bakelite strips will neatly support resistors, capacitors, etc., in circuit wiring. Cadmium plated steel lugs and brackets. Bakelite XP 1/16 thick. **STANDARD** strips are .375 wide on .375 centers with .140 diameter mounting holes on bracket. **MINIATURE** strips are .312 wide on .250 centers with .096 diameter mounting holes on bracket. In addition to the strips shown, we manufacture many other varieties in any configuration and materials required. Send samples or sketch for prompt quotation.

SEMICONDUCTOR MOUNTING KITS- FUSE MOUNTS

KEYSTONE
SEND FOR COMPLETE CATALOG

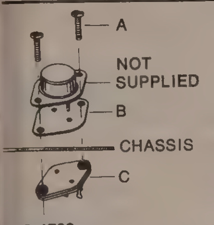
• EASIER MOUNTING TO CHASSIS • BETTER THERMAL EFFICIENCY

Avoids soldering directly to the semiconductor. Purchase the complete kit consisting of socket, mica insulator and all hardware included in one package.

MATERIAL SPECIFICATIONS:
Nylon: 101 MIL-P-20693A.
Phenolic: XP grade Federal L-P-509 Type 1, Form S.
Socket Contacts: Brass, QQ 626 Comp 22, Cadmium Plated QQ-P-416 Type 2.
Screws: Steel, type B, 4-40 or 6-20 as required.
Collector Plate: Steel .030 thick, Cadmium Plated.
COMPLETE KITS OR INDIVIDUAL HARDWARE

ORDERING INFORMATION: Individual parts are sold in not less than 100 pieces of an item. Complete kits are ordered by specifying the complete mounting kit catalog number.

SOCKET MOUNTING FOR TO-3 CASE



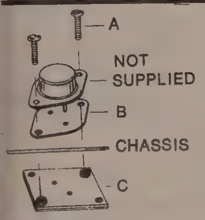
NO.4732

The socket and transistor are assembled without previous attachment to the chassis. Contacts are spaced .430 apart and accept the pins of the semiconductor easily and hold securely. Bosses on top plate are .045 high.

Item	No.	Description	Quantity
A	4706	6-20 Screws	2
B	4651	Mica Insulator	1
C	4602	Diamond Shaped Socket	1

Complete Mounting Kit (includes all of the above) **No. 4732**

SOCKET MOUNTING FOR TO-3 CASE



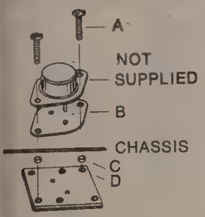
NO. 4734

An all phenolic socket that is pre-assembled to the chassis by eyelets or rivets. Spacing of brass contacts .430 Centers.

Item	No.	Description	Quantity
A	4706	6-20 Screws	2
B	4651	Mica Insulator	1
C	4684	Nylon Bushings	4
D	4606	Square Phenolic Socket	1

Complete Mounting Kit (includes all of the above) **No. 4734**

SOCKET MOUNTING TO-66 CASE



NO. 4738

All phenolic socket assembled with contacts on .200 centers sturdily constructed for heavy duty usage, pre-assembled to the chassis by eyelets or rivets.

Item	No.	Description	Quantity
A	4706	6-20 Screws	2
B	4666	Mica Insulator	1
C	4684	Spacers	4
D	4615	Socket	1

Complete Mounting Kit (includes all of the above) **No. 4738**

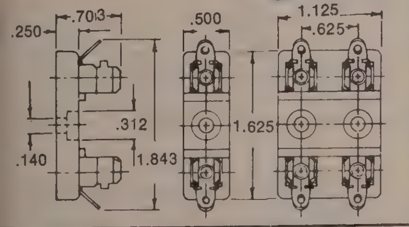
MOLDED FUSE MOUNTINGS FOR 3 AG FUSES

UL APPROVED MATERIALS — LOW CONTACT RESISTANCE
LOW COST — FLAME RETARDANT — FROM STOCK

A new improved Fuse Holder for the popular 3 AG fuse. Molded with barriers to prevent flashover and withstand breakdown at 1080 RMS at 60 Hz for 1 minute and 3000 V. DC for 1 minute.

NO. 3523

NO. 3524



MATERIAL SPECIFICATIONS: Clips stamped from Brass alloy type CDA 260 and Bright Dip Plated.

MOLDED PLASTIC is mineral filled flame retardant Alkyd, UL rated 94V-0 and conforms to the 180 seconds arc tracking test spec per ASTM 495-D.

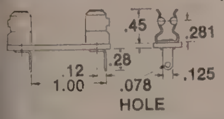
STANDARD STOCK: Blocks are assembled with our #3535 fuse clip, Bright Dip Plated. Black plastic base.

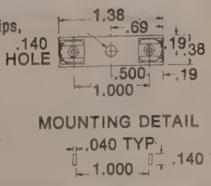
MODIFICATIONS: We will substitute any clips of your choice assembled to these bases. Quotations will be promptly rendered.

CONTACT RESISTANCE: Will not exceed 50m ohms before and after being in atmosphere of 100% R.H. at 65 deg. Centigrade for 48 hours, then air dried for 1 hour.

FUSE STRIP FOR 3 AG FUSES

MATERIAL: .062 GPO-3
PLATING: Terminals, Tinned Clips, Tinned





MOUNTING DETAIL

NO. 3526

COMPLETE KITS OR INDIVIDUAL HARDWARE

Provides all necessary hardware and insulators required to securely mount semiconductor to chassis. Purchase the complete kit consisting of all hardware included in one package. Choice of individual items available in 100 piece packages.

Item	No.	Description	Quan.
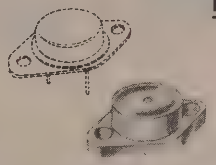
A	4656	Mica Insulator	1
B	4702	Shoulder Washer	1
C	4703	Metal Washer	1
D	4704	Solder Terminal	1
E	4705	10-32 Nut	1

For Complete Kit — Specify **No. 4727**

MOLDED NYLON COVERS

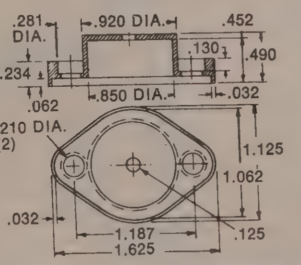


These low cost molded Nylon type 66 covers easily mount over and insulate the transistor. Will withstand temperatures to approx. 300 deg F.

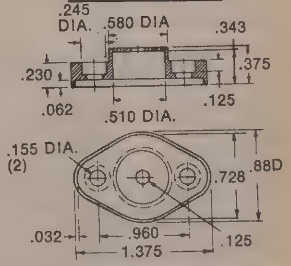
For **TO-3** Specify **NO. 4632** (no eyelets)
With **Eyelets** Specify **NO. 4634** (.140 ID)

For **TO-66** Specify **NO. 4633** (no eyelets)
With **Eyelets** Specify **NO. 4635** (.130 ID)

FOR TO-3 CASES



FOR TO-66 CASES



FUSE CLIPS FOR 3 AG FUSES

It is less costly to assemble clips of this type as an integral part of your circuit board if fuse in circuit is required. They are rugged, and inexpensive.

• LOW CONTACT RESISTANCE • PERFORMANCE TESTED • .020 BRASS • RATING: 15 AMPS

(A) METAL-CLAD TIP JACK (MILITARY TYPE)

ACCEPTS .080″ TIP (WITH CLOSED ENTRY CONTACT)

No.	Color
6012	WHITE
6013	RED
6014	BLACK
6015	GREEN
6016	YELLOW
6017	BLUE

Recessed closed etnry contact. Current rating: 5 amps. Peak voltage: 8000 volts. Meets MS-16108 Rev. F of MIL-STD-242A and MIL-C-39024/10. Capacitance to metal panel 3.8 pF. Supplied complete with hardware.

MATERIAL SPECIFICATIONS:

BODY: Molded Nylon MIL-20693A.

SHELL & NUT: Brass QQ-B-626; Nickel Plate QQ-N-290.

CONTACT: Beryllium Copper Per QQ-C-533.
Gold Plate MIL-G-45204.

(B) METAL-CLAD TIP JACK (STANDARD)

No.	Color
6024	WHITE
6025	RED
6026	BLACK
6027	GREEN
6028	YELLOW
6029	BLUE

Current rating: 10 amps. Peak voltage: 7000 volts. Capacitance to metal panel 3.8 pF. Supplied with nut.

MATERIAL SPECIFICATIONS:

BODY: Molded Nylon MIL-20693A.

SHELL: Brass Nickel Plated.

CONTACT: Phosphor Bronze Silver Plated.

(C) FULLY-INSULATED STANDARD TIP JACK

ACCEPTS .080″ TIP

No.	Color
6018	WHITE
6019	RED
6020	BLACK
6021	GREEN
6022	YELLOW
6023	BLUE

Low contact resistance. Formed phosphor bronze contact with solder hole for ease in attaching wire. Current rating 10 amps. Peak voltage 9000 volts. Capacitance to metal panel 3.8 pF. Supplied with nut.

MATERIAL SPECIFICATIONS:

BODY: Molded Nylon MIL-20693A.

CONTACT: Phosphor Bronze Cadmium Plated.

(D) FULLY-INSULATED DELUXE TIP JACK

ACCEPTS .080″ TIP (WITH CLOSED ENTRY CONTACT)

No.	Color

6052	GREEN
6053	BLUE

Accepts .080″ tip plug in either end. Can be spaced side by side on .160″ centers minimum. Two common terminals. Current rating: 5 amps. Breakdown voltage: 3000 volts D.C. Capacitance 1.0 pF.

CONTACT: Beryllium Copper Silver Plated.

BODY: Nylon per ML-P-20693A

(H) UNIVERSAL HORIZONTAL P.C. TEST JACK

ACCEPTS .080″ TIP

No.	Color
6054	WHITE
6055	RED
6056	BLACK
6057	YELLOW
6058	GREEN
6059	BLUE

Accepts .080″ tip plug in either end, or from top or bottom. Two common terminals. Current rating: 5 amps. Breakdown voltage: 3000 volts D.C. Capacitance 1.0 pF. Mounts on .400″ centers in .052″ holes. Side by side mounting on .160″ centers.

CONTACT: Beryllium Copper Silver Plated.

BODY: Nylon per ML-P-20693A

(J) LOW PROFILE HORIZONTAL P.C. TEST JACK

ACCEPTS .080″ TIP

Side by side mounting. Closed entry design will not accept tips larger than .084″, and will accept probes of .074″ minimum diameter. Mounts on .400″ centers in .052″ holes. Current rating: 5 amps. W.V.A.C. 1500 volts max. Contact resistance 0.01 ohms maximum.

MATERIAL SPECIFICATIONS:

CONTACT: Beryllium Copper, Silver or Gold Plated.

BODY: Nylon per ML-P-20693A

MOLDING MATERIALS AVAILABLE

The table below is compiled from various sources and is presented to facilitate comparison between the various materials. Values given are average and are not to be considered as absolute values.

Material	Description
General purpose phenolic	An economical material with good appearance, good electrical properties and well-balanced physical properties (94V-0).
Cellulose filled phenolic (CFG)	An economical material with good appearance, good electrical properties and well-balanced physical properties.
Mica filled phenolic (MFE)	Recommended for applications requiring low power factor, low loss, high resistivity and low water absorption. Comparatively fragile.
Diallyl phthalate mineral filled (MDG)	Provides dependable performance under adverse temperature and humidity conditions. Excellent electrical characteristics. Low impact strength.
Glass fiber filled phenolic (MFE)	Has the superior electrical properties of mica-filled phenolic (Type MFE) in addition to high strength and heat resistance.
Melmine mineral filled (MME)	Excellent dielectric properties with high arc and flame resistance. Excellent for airborne electronic equipment.
Alkyd glass fiber filled (MAI-60)	For applications requiring high strength and good electrical properties. After prolonged exposure to high humidity, there is a reduction of insulation resistance.
Diallyl phthalate long glass fiber filled (GDI-30F)	Good strength characteristics combined with physical stability and good electrical properties. Retains high insulation resistance after prolonged exposure to humidity. GDI-30F is flame-resistant and self-extinguishing.
Diallyl phthalate short glass fiber filled (SDGF)	Has good electrical properties of GDI-30F in addition to moldability, especially in thin-walled and/or deep section.

Kulka®

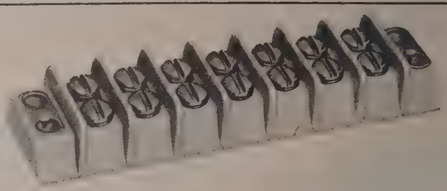
MILITARY & NAVY CLASS TERMINAL BOARDS

MILITARY CLASS: CLOSED BACK



These military boards feature molded-in terminals in an improved Kulka design for greater strength and flexibility. The mounting holes are covered with molded-in reinforcement straddle plates. The boards can be supplied with Sems or other types of special screws. They come in 3 sizes, Class 37TB through Class 39TB.

MIL-T-55164 Class No.	Current Rating Amps.	**Dielectric With standing Voltage (Test) Volts RMS	Maximum No. of Terminals	Type of Terminal	Terminal Screw Size	Commercial Equivalent, Interchangeable with Standard Kulka Series

NOTES:

Molded material is MAI-60 or SDG-F in accordance with MIL-M-14.

*Description:
SR = single row DR = double row DRL = double row linked
SRTC = single row through connection

[2] Application sets are as follows:
Set A – These terminal boards are intended for use in equipment where the effect of a short circuit is limited to the terminal board and where normal operation powers up to 50 watts are involved.
Set B – These terminal boards are intended for use where secondary short circuit protection in the form of fuses, circuit breakers and other parts are provided in the circuit, and where normal operating power does not exceed 2000 watts per terminal.
Set C – These terminal boards are for power applications in excess of 2000 watts (per terminal) but still protected by secondary devices in the circuit which can safely interrupt resultant short circuit currents.

[3] The stud connector for these terminal boards is considered part of the stud and is required, unless otherwise specified. With the stud connector removed, the terminal board will provide twice the number of connection points and allow for an additional wire per terminal; however, the application set will be reduced as shown.

[4] The designation plate shall be supplied with the terminal board unless otherwise specified.

Kulka® HI-LO™; WIRE WRAP; MARKER & INSULATOR STRIPS; 17C CATALOG

HI-LO™ 0987 SERIES HIGH VOLTAGE-LOW PROFILE TERMINAL BLOCKS

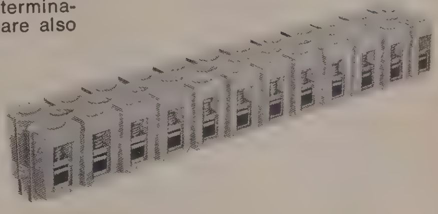
Kulka's new Hi-Lo™ terminal blocks are ideal for both light and heavy duty applications such as control cabinets, data processing equipment, etc. Made of break-resistant, flame retardant thermoplastic these blocks accommodate up to a number 8 AWG wire. The standard termination contact is a tubular clamp but feed-thru wire wraps, solder tabs and PC pins are also available. They are recognized by UL, and approved by CSA & VDE.

ELECTRICAL RATING:
Rated voltage — 600 VOLTS
Current rating — 50 AMPS

HARDWARE:
Screws — steel, nickel plated
Terminal Contacts — copper alloy, nickel plated
Feed-thru Contacts — copper alloy, electro tin plated

WIRE SIZES:
Will accommodate wire sizes thru AWG #8

MOLDED MATERIAL:
94V-0 thermoplastic



WIRE WRAP TERMINAL BOARDS

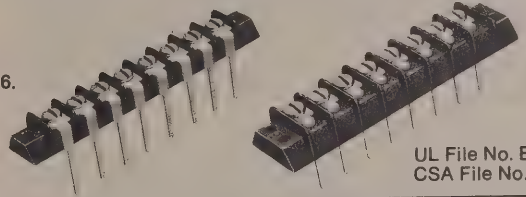
UL File #E47811; CSA File #21356

ELECTRICAL RATING:
Rated Voltage — 2500 VOLTS RMS*
Current rating — 15 AMPS

HARDWARE:
Screws – brass, nickel plated
Terminals – brass, electro-tin

WIRE SIZE:
Wire wrap — AWG #26 to 20
Under screw — AWG #22 to 16.

MOLDED MATERIAL:
General purpose phenolic.
599 Series available in MAI-60, CFG and GDI-30F.



UL File No. E47811
CSA File No. 21356

MARKER & INSULATOR STRIPS

Marker and Insulator strips are available for Kulka's 409 thru 1699 SERIES Terminal Boards. These include double & single row, single row insulated turret and single & double row wide "Z". Drawings for these different types and the various printing styles offered are shown on pages 2 and 3. Marker strip dimensions are listed in Tables I and II.

Dimensions for insulator strips, which are narrower (see dimension "N" in Table II) and do not afford a marking surface, are the same as marker strips except for dimension "D".

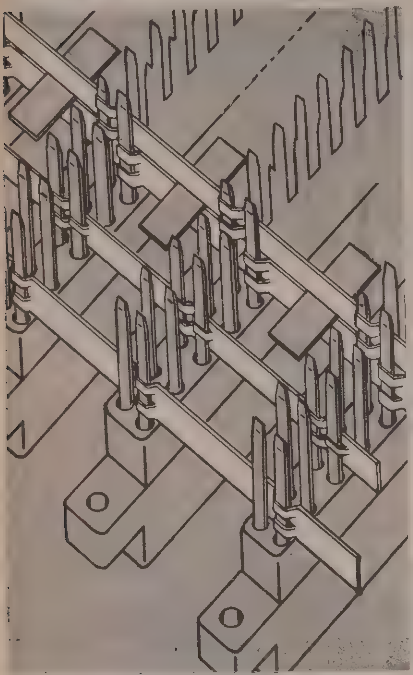
Pin Bar® means:



- Thousands of "hi-rel" solderless bussing connections per hour at a fraction the cost of your present busing method.
- Fast, simple, "foolproof" connections that lower production costs — eliminate continuity checks.
- Low uniform contact resistance that will electrically enhance any circuit — especially frequency applications.
- Efficient back panel design (greater pin exposure, increased discrete wiring area and easier checkout).
- A "spec" performance electrical component produced to your exact requirements.

solderless bus bar for common connections

SPECIFICATIONS

Terminal Spacing and Length: Selectable.

Spacing Tolerance: ±0.010″ between terminals — ±0.020/foot cumulative.

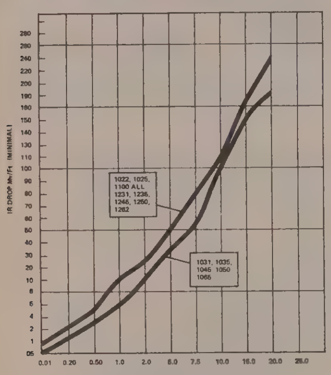
Material: 1000, 1200 Series: Beryllium Copper Alloy #172 per QQ-C-533.
1100 Series: Beryllium Copper Alloy #175 per QQ-C-533.

Standard Finishes:
Tin: Electro-tin plate, fused, per MIL-T-10727, Type I, 0.0003″ thickness.
Gold: Gold plate per MIL-G-45204, Type II, 0.000050″ minimum thickness over nickel plate per QQ-N290, 0.000050″ minimum thickness.

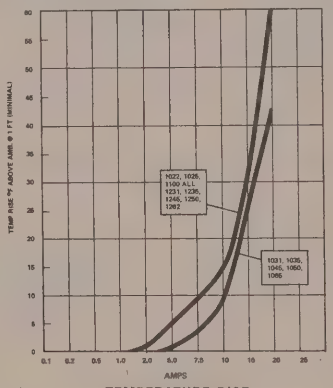
Options: Insulation, special finishes, unique end configurations.

Insertion: Manual or semi-automatic insertion equipment available.

PERFORMANCE DATA



IR DROP



TEMPERATURE RISE

The following performance data meets or exceeds MIL-STD-202 "D" (Full Report Available).

Thermal Shock: Method 107, Condition A.

Mechanical Shock:
Method 213, Condition H.

Vibration: Method 201.

Corrosion Resistance: Method 101, Condition B 48 Hour Exposure Salt Spray.

Contact Voltage Drop:
0.533 millivolts maximum per amp.

Gas Tight Contact: 10 minutes of 1:1 hydrochloric/nitric acid followed by 10 minutes of ammonium sulfide fumes.

DESIRED PIN BAR CONFIGURATION

Alternate Pins (Series 1000 & 1200)		Connector Pin Size	Adjacent Pins (Series 1100)
	1022	.022″ x .036″	1122
	1025	.025″ x .025″	1125

LEMO Electronic Connectors

The following 10 pages represent an overview of LEMO's product line. For more details, complete catalogs and information on local representatives, please contact LEMO U.S.A. at (707) 578-8811.

RELIABILITY: Positive locking mechanism and gold plated contacts assure consistent signal transmission to 1.5 GHz.

Quick-Lok mechanism assures secure contact by audible click when lock is engaged. Color coding is available too.

SPACE SAVINGS: Only finger clearance needed to engage and disengage connectors. No need to twist or turn locking ring.

RUGGEDNESS: Connector components are precision machined. Locking mechanism is totally protected by outer shell, virtually eliminating accidental disconnections and damage to locking mechanism, cables and contacts.

SPEED: Connectors engage and disengage simply and quickly by pushing and pulling axially on the outer shell of the plug.

AESTHETIC-FUNCTIONAL DESIGN: Outer shell and back nut finished with matte chrome plating. Contacts are gold plated. LEMO connectors will complement any front panel application.

The LEMO Choices

LEMO manufactures a complete line of high quality connectors specifically engineered and designed for a wide variety of applications.

STANDARD S SERIES: LEMO's Standard S Series has the widest choice of shell sizes. Proper connection is assured by hermaphroditic insulator and contact configuration.

Range of contact configuration: Single contact; coaxial; triaxial; multiple contact; mixed (coaxial and multiple or high voltage and multiple); and high voltage versions.
Range of cable outer diameter: .059″ to 1.188″/1.5mm to 30.2mm.
Range of contacts: 1 to 106.
S Series is also available in sealed version for special applications.

B SERIES: LEMO's B Series offers greater ruggedness, greater contact density, keying pattern for contact exclusivity, all male pins in plug; all female contacts in receptacle; choice of crimp or solder contacts and color-coded bend reliefs.

Range of contact configuration: Multiple and mixed (coaxial and multiple or high voltage multiple).
Range of cable outer diameter: .083″ to .986″/2.1mm to 25.3mm.
Range of contacts: 2 to 64.

SPECIAL COAXIAL SERIES: LEMO has developed a wide range of coaxial connectors to meet most applications.

01-MINAX Series: LEMO's smallest coaxial connector accommodates cable sizes RG.196A/U, RG.178B/U and RG.174A/U.
00-NIM (Nuclear Instrumentation Module) - CAMAC (Computer Automated Measurement and Control) Series: Designed for cables RG.174A/U, RG.188A/U and RG.316/U.
OA-Telecommunications Series: Designed with contacts to accommodate telecommunications requirements in mind. These accommodate cables RG.58C/U, RG.174A/U.
Other Coaxial Connectors are available in Standard S Series to accommodate cables up to .874″/22.2mm.

TRIAXIAL SERIES: LEMO's triaxial series is used mainly for video camera applications. LEMO has a number of standard connectors in this series and is in the forefront of developing new ones to meet clients' needs.

COMPACT 2C SERIES: LEMO's 2C Series is specially designed for applications where space is critical. It features shorter length shells and contacts.

Range of contact configuration: Multi contact only.
Range of cable outer diameter: .106″ to .314″/2.7mm to 8.1mm.
Range of contacts: 2 to 14.

ENVIRONMENTAL E SERIES: LEMO's E Series is dust and splash down water resistant. Proper connection is assured by hermaphroditic mating.

Range of contact configuration: Single contact, coaxial, triaxial, multiple and mixed (coaxial and multiple or high voltage and multiple).
Range of cable outer diameter: .047″ to 1.070″/1.2mm to 27.2mm.
Range of contacts: 1 to 106.

THERMOCOUPLE SERIES: LEMO's Thermocouple connectors are designed to assure continuous and accurate monitoring of hostile environments where extreme surface or ambient temperatures, gases or liquids must be controlled.

HIGH VOLTAGE SERIES: Originally developed for CERN nuclear facility in Switzerland, LEMO's High Voltage Series is designed for applications where there is a constant non-fluctuating flow of electricity and where power can be cut prior to connecting and disconnecting connector.

Range of contact configuration: Single contact only.
Range of cable: AWG 18 and 12/1.2mm and 2.5mm.

RP, RPL SERIES: This Series is specially designed for use on Printed Circuit Boards.

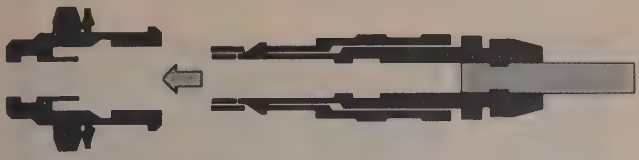
SPECIAL ORDERS: LEMO welcomes the opportunity to consider development of connectors to meet your requirements. Many of our present connectors were created through client requests.

SALES AND SERVICE
LEMO connectors are manufactured in Switzerland. North American inventory and sales headquarters are in Santa Rosa, California. Sales and service are available through a network of representatives or directly from LEMO U.S.A., in Santa Rosa, California.

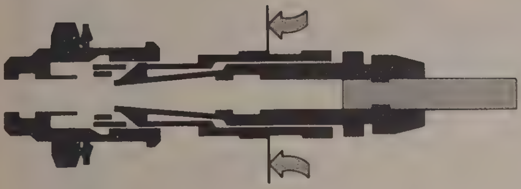
LEMO USA INC

P.O. Box 11006, Santa Rosa, CA 95406
(707) 578-8811, Telex 340-933 (LEMO USA SARO)

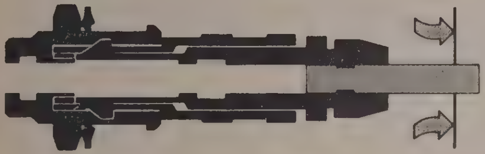
Quality Construction



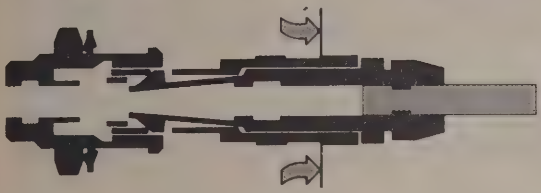
Connection is made simply by pushing plug directly into receptacle. An audible click is heard assuring lock is engaged.



The self-latching system assures the connector to be mated by simply pushing the plug axially into the receptacle.



Connection remains intact resisting stresses of pulling on the cable and any other component part except the outer shell.



When required, the connection is disengaged by a single straight axial pull on the outer shell.

rd = 100 erg absorbed in a 1 g of material = 10^{-5} Ws/g

OPTIONS:

Materials: LEMO can provide alternate compatible materials (stainless steel, aluminum, etc.)

Surface treatment: Custom finishes such as black, green chrome plating and anodizing can be supplied.

Insulator materials: Other insulator materials to meet specific needs can be supplied.

Before specifying special features, please contact your local representative or LEMO U.S.A. Inc. for more information on how we can meet your specific requirements.

Special Application—Series 01 MINAX

SUB-MINIATURE COAXIAL 01 SERIES

MINAX (Sub-Miniature Coaxial) 01 series 50 Ohms

The MINAX is LEMO's smallest connector uniquely designed for applications where space is extremely limited. The materials and precision engineering assure excellent connections.

Mechanical Properties:
Coupling: Quick connect/disconnect self-locking snap-latch.
Shells: Brass, plated .000120 gold over .000240 nickel.
Contact: Phosphor bronze, plated .000120 gold over .000020 chromium over .000120 nickel.
Operating Temperature: −60°C to +120°C
Insulator: Nylatron
Panel Thickness: 1/16″ nominal.

Electrical Properties:
Impedance: 50 ohms ± 4%
VSWR: 1.045:1 @ 1 GHz; 1.14:1 @ 10 GHz
Insulator Resistance: $\geqslant 7 \times 10^{12}$ ohms
Contact Resistance: $\leqslant 3 \times 10^{-3}$ ohms
Test Voltage: 1200 VDC
Operating Voltage: 500 VDC
Operating Current: 3 amps
For use with subminiature cables (.100″ max. O.D.) such as RG.196A/U, RG.178B/U, RG.174A/U.
Do not mate with standard series units.
Crimping tool PS01S0030B0000 can be supplied.

How to order:
Please specify cable to be used and connector configuration from those shown below.

Receptacles—Plugs—NIM-CAMAC

MINIATURE COAXIAL SERIES

NIM-CAMAC (Miniature Coaxial) 00 Series, 50 Ohms

This series is designed to meet the specifications of CD/N549 Norm

Mechanical Properties:
Outer Shell: Brass 59A
Insulator: Teflon
Contacts: Brass with high modulus of elasticity. Low and constant resistance. With copper flash, 3 microns nickel, 1.5 microns gold
Working Temperature: −250°C + 260°C (−410°F + 500°F)

Electrical Properties:
Impedance: 50 ohms ± 2%
Frequency: over 1 GHz
Max. Wave Resistance: 1 to 1.2 GHz
Contact Resistance: <8mΩ
Insulator Resistance: >10^{12}Ω
Working Voltage: 1000 Vdc
Test Voltage: 3000 Vdc

Recommended Cables: RG.174A/U, RG.188A/U, RG.316/U, RG.58C/U, RG.178B/U, RG.187A/U, RG.196A/U.

Collet Sizes Available:

MM. 1.5	1.7	2.2	2.7	2.9	3.1 MM.	5.2
In. .059	.066	.086	.106	.114	.122 In.	.204

Options: Alternative compatible insulators can be supplied. Before specifying other materials please contact your representative or LEMO for information.

Cable bend reliefs can be supplied for crimped type cables as follows:
FOOS195N for cables up to 2.7mm (.106″) O.D.
FOOS196N for cables up to 3.1mm (.122″) O.D.
FOOS197N for cables up to 3.5mm (.138″) O.D.

Part numbers are for black strain reliefs. If other colors are required, please replace suffix "N" by proper color code.

PROCEDURE FOR DETERMINING TEST VOLTAGES AND WORKING VOLTAGES FOR LEMO CONNECTORS:

Test Voltage: Test voltages are determined by taking an average of the point at which arcing occurred and reducing it by ⅓.
Working Voltage: Working voltages are determined by taking test voltages and reducing them further by ⅔.

LEMO guarantees the proper functioning of the connector at working voltages.

Although this may appear quite conservative, it is in keeping with LEMO's insistence on assuring proper functioning and maintenance of high-quality standards.

PROCEDURE FOR DETERMINING TEST VOLTAGES AND WORKING VOLTAGES FOR LEMO CONNECTORS:

Test Voltage: Test voltages are determined by taking an average of the point at which arcing occurred and reducing it by ⅓.

Working Voltage: Working voltages are determined by taking test voltages and reducing them further by ⅔.

LEMO guarantees the proper functioning of the connector at working voltages.

Although this may appear quite conservative, it is in keeping with LEMO's insistence on assuring proper functioning and maintenance of high-quality standards.

Specifications are based on Teflon insulators. For other insulators contact LEMO.

LEMO USA INC

P.O. Box 11006, Santa Rosa, CA 95406
(707) 578-8811, Telex 340-933 (LEMO USA SARO)

Special Applications

VIDEO TRIAX 4A (American) SERIES

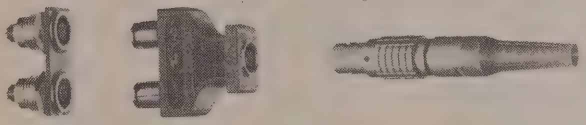
Technical Characteristics:
Nominal impedance: 75 ohms
Operating frequency: 2.5 GHz
VSWR: 1.01 + 0.076f[GHz]
Insertion loss: <0.4 dB
Contact resistance: center contacts <3mμ
internal ground <1mμ
Breakdown voltage: center contact/internal ground: 4KVrms
internal/external ground: 9.5kVrms
Operating temperatures: −50°C + 260°C (−58°F + 500°F)
Connector retention force, engaged: min. 28N
Cable retention force: min. 500N

Recommended cables: Triax Felten & Guillaume Part No. 127657 and 127664
Triax BIW Part No. 10069-C-G20 and 10070-C-G14
Triax Belden types 9232, 8233, 9267 and 8232

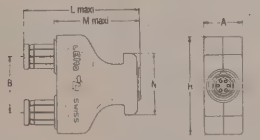
STEREO CONNECTOR SYSTEM

The LEMO stereo connector system consists of two receptacles, one double plastic panel washer, one bridge plug with or without monitoring output and one plug. The connector system may be either of the 3 pole type (303) or the 6 pole type (306).

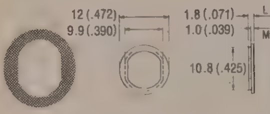
The double plastic panel washer, the bridge plug and the strain relief of the plug are available in nine colors. Color coding washers and strain reliefs match the colored bridge plug shells.



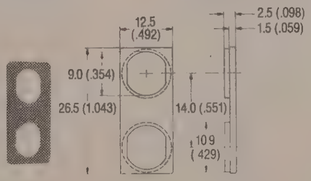
Bridge Plug: CAVF = Bridge plug with two non-latching plugs
CAVR = Bridge plug with two non-latching plugs and one monitoring receptacle for straight plug (test point)



RA 0.269-☐ ROUND INSULATING WASHER
(specify color)



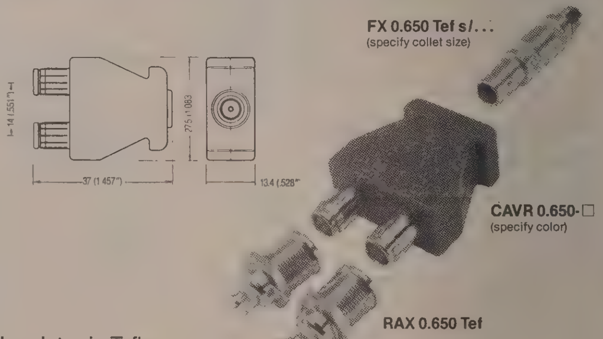
CAVR0B294-☐ RECTANGULAR INSULATING WASHER
(specify color)



CAVR 0.650 AND CAVR 0.651 TRIAXIAL BRIDGE PLUGS

CAVR 0.650 is - ☐ bridge plug with test point as shown
CAVR 0.651 is - ☐ bridge plug without test point.

These units are particularly suited for audio mixer or patching panel applications. LEMO's self-latching system is used between the FX 0.650 plugs and the RAX 0.650 receptacles as well as between the FX 0.650 and the CAVR 0.650 bridge plugs. LEMO's self-latching system is not used between the CAVR 0.650/CAVR 0.651 and the RAX 0.650 receptacles since the spring type contacts of the bridge plugs require a strong pulling strength.



Insulator is Teflon.
Wave resistance is 50 Ω.
Insulator resistance is 5 • 10^6 MΩ.
Contacts are made of BZ4 gold plated.
Shells of bridge plugs can be supplied in black, red, yellow, blue and white.

Sz.	No. of Cntcs.	Bridge Plug Part Number (*)	Working Voltage DC	Curr. Amps	Respective Receptacles	Monitoring Plug (**)	Double Panel Washer (*)	Strain Relief (*)/(**)

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire guage

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction code
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C

CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DC direct curent
DIL dual in-line
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E

EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EPROM electrically programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LSI large scale integration
LVDT linear velocity displacement transformer

M

MATV master antenna television
μF microforad
MHz megahertz
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NIM nuclear instrumentation module
NOR not OR

O

OEM original equipment manufacturer
OR a logical operator

P

pF picofarad
PC printed circuit
PCB printed circuit board
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PPI plan position indicator
PROM programmable read only memory
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

YIG yttrium iron garnet

THE SOURCE.

Nobody offers you more in mass termination - more connectors, more concepts, more cable, more tooling, more proven reliability - than 3M.

What's in your head right now? Point-to-point interconnects? Designing for circuit density? Reducing interconnection costs? Improving reliability? Today there are so many interconnect options available to the engineer that selection is often as complicated as the design process itself.

3M is The Source for solutions: Scotchflex® Brand mass termination systems. 3M pioneered the development of the insulation displacement concept. We were the first to make it available to electronic designers for industry-wide application.

Scotchflex cable and connectors represent the industry standard for insulation displacement systems. Quality is one reason: 3M's wide range of precision spaced cables and computer-designed connectors give you optimum long term electrical and mechanical characteristics. (Another reason: the industry has put more Scotchflex mass termination products to work than any other brand.)

You get benefits from the technological leader that you can't get anywhere else. For example, technical back-up from 3M sales and laboratory experts. They can help solve difficult interconnect problems with existing products, or help create special products to fit your needs.

With today's critical production parameters, availability counts. A nationwide network of Scotchflex distributors, backed up by additional inventory in regional locations makes product available to you when you need it. Most of our distributors can also supply you with custom jumper assemblies in prototype or full production quantities.

Nobody offers you more in mass termination than 3M–THE SOURCE.

A hefty promise. But we can prove it, every time you put your mind to work on making reliable interconnections.

All the product data you'll need for mass termination is in our 80-page Scotchflex catalog—a valuable design resource. It's yours free. Ask your 3M Scotchflex distributor, or write Electronic Products Division/3M, Building 225-1N, 3M Center, St. Paul, MN 55144.

"Scotchflex" is a registered trademark of 3M Co.

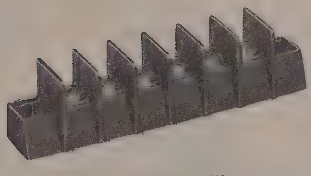
MAGNUM®

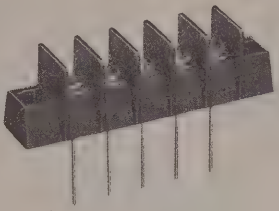
SINGLE ROW TERMINAL STRIPS—3/8 CENTERS

SERIES A2000 & LP2000

STANDARD DELIVERY 3 WEEKS



A202106-NL



A207105-NL

NEW
LOW PROFILE

LP201205-NL

SERIES A2000 single row strips have connections on 3/8 in. centers, with mount or barrier ends, flat or insulator bases, and feed-thru terminals (straight hand wire, straight or right angle PC, wire-wrapping or quick connect). Strips can also be specified with non feed-thru bases (either open or closed type).

NEW SERIES LP2000 "Low Profile" single row strips have low silhouette barriers for compatibility with miniature and subminiature solid state circuitry for "tight" packaging situations. Other features are the same as Series A2000.

No. 6-32 screws are standard top hardware for both series; screws accept AWG 12 & smaller wiring and .312 wide rings and spade terminals. A wide variety of top and bottom hardware . . . and covers, marker strips, legends, colored strips are available . . . most from standard dies.

DIMENSIONS & RATINGS

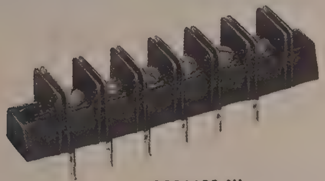
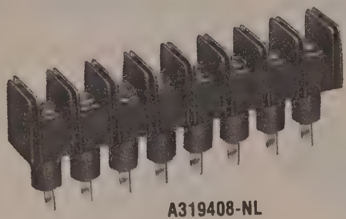
SINGLE ROW TERMINAL STRIPS— 7/16 CENTERS

SERIES A3000 & LP3000

STANDARD DELIVERY 2 WEEKS



A301106-NL



A319408-NL

NEW
LOW PROFILE

LP301205-NL

SERIES A3000 single row strip terminations are spaced on 9/16 in. centers and offer higher rating than Series A2000. Choice of features include mount or barrier ends, flat or insulator bases, and bottom terminals (straight hand wire, straight or right angle PC, wire-wrapping or quick connects). Strips can be specified with non feed-thru bases (either open or closed type).

NEW SERIES LP3000 "Low Profile" single row strips have low silhouette barriers for "tight" electrical/electronic packages with a full 7/16 in. centers for high performance.

No. 6-32 screws are standard top hardware for both series; screws accept AWG 12 & smaller wiring and .312 wide rings and spade terminals. A wide variety of top and bottom hardware . . . and covers, marker strips, legends, colored strips are available.

LITHIUM BATTERY HOLDERS

Also for NiCad, Carbon, Carbon-Zinc and Alkaline Cells

Lithium Batteries have gained wide usage for IC Memory Back-Up Systems due to long-lasting stable performance with low power consumption. A limitation in application has now been overcome with the introduction of MPD's printed circuit board mounted coin and horizontal battery holders. The need for permanent mounting of the cell by use of solder tabs is now eliminated.

SPECIFICATIONS: Holder material—Self-extinguishing thermoplastic Polyester, VALOX® 420 SEO • Contacts—302 spring temper stainless steel, nickel plated • Flammability rating—UL94 V-0 • Dielectric strength—560 volts/mil at 25°C for 5 sec. • Color—Black • Temperature range— -55°C to +140°C • Resistance to solvents—Xylene; ethyl, butyl, methyl & propyl alcohol; ethyl acetate; heptane; toluene.

APPLICATIONS: • CMOS, Microprocessors & Microcomputer hold-memory • Electronic communications devices • Telecommunication equipment • Time clock back up.

Connector and Cable Division

Microdot Connector Group

The Connector and Cable Division of Microdot Connector Group has a longstanding worldwide reputation as a respected supplier of a broad array of electronic/electromechanical connecting devices and specialty cable. The Connector and Cable Division charter encompasses the engineering and manufacture of high-reliability MIL-Spec and commercial electronic/electromechanical connectors, specialty electronic cable and cable assemblies, and metal backpanels and plastic/metal headers. Products range from simple, low-cost wire-to-wire connectors, to highly sophisticated interconnect systems for electronic equipment. The Connector and Cable Division consists of the following manufacturing facilities.

MALCO

D-subminiature Connectors
D-Subminiature
376 Series

Complies with most industry interface standards such as EIA-RS-232C, EIA-RS-449 and IEEE Project 802. Available in all standard contact configurations including 9, 15, 25, 37 and 50 pin positions.

- Complete line of mounting and latching hardware types.
- Unique single-piece metal back shell hardware provides maximum EMI/RFI isolation.
- Application tooling available for both high and low volume cable assembly production.
- Compatible with AMP's HDP-20 Series

For additional information contact MALCO Montgomeryville, (215) 699-5373.

Microminiature D Connectors
(Meets Mil-C-83513)

Microminiature D Connectors (MCK series - metal shell and MCD Series - plastic shell) utilize a precision #24 AWG patented low force (5oz. max) twist pin reducing individual contact insertion forces by 33%, while maintaining all previous mechanical, electrical and environmental standards.

- 8 different insert arrangements – 9, 15, 21, 25, 31, 37, 51 and 100 contacts on .050 inch centerlines.
- Meets MIL-C-83513 requirements.

For additional information contact MALCO South Pasadena, (818) 799-9171.

DIN Connectors
302 through 309 Series

Provide increased contact density and high reliability. 8 product lines including box and box contact versions of 96 and 64 position DIN PCB connectors, reverse DIN configurations, DIN modules with 21 contacts, grid spacing of .100 x .100 inches, or post and box versions with .200 x .200 inches grid spacing.

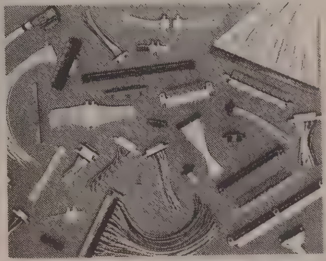
- Meets following specifications:
- MIL-C-55302
- IEC 130-14
- DIN 41612
- VG 95324
- British Telecom PO 222

For additional information contact MALCO Montgomeryville, (215) 699-5373.

Rectangular Connectors

High density microminiature connectors featuring Malco's patented Twist Pin high reliability contact system. Provides perfect contact alignment with low engaging forces. Includes plastic and metal shell "D" connectors, plastic and metal shell two piece edgeboard connectors and strip connectors.

- Twist pins provide 7 points of contact no discontinuity in excess of 1 micro second and have a 3 amp rating.
- Contacts on .050 centers.
- Wire range #30 AWG and #24 AWG.
- Insert arrangements available from 9 pin to 400 pin.



For additional information contact MALCO South Pasadena, (818) 799-9171.

Telephone Module Plug
375 Series

Meets both FCC and REA specifications and has the latest design improvements, including a superior strain relief. Modular plugs available in 4, 6 and 8 circuit configurations for a host of telephone, computer or other key electronics applications.

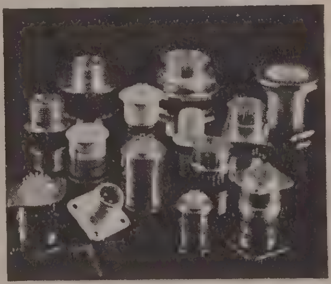
- Shielded computer versions.
- Readily terminated to either stranded or tinsel cables.
- Available off-the-shelf in sub assembly form to minimize total applied cost.
- Contacts selectively gold plated for maximum economy and reliability.
- State-of-the-art application equipment is available for small & large volumes.

For additional information contact MALCO Montgomeryville, (215) 699-5373.

Mil Qualified
Circular Hermetic Receptacles

Circular hermetically sealed environmental connectors are designed and fabricated to specialized military and commercial specifications and drawings. Primarily utilized in military/aerospace applications subjected to severe environmental conditions such as heat, humidity, vibration and shock.

- Military specifications include Mil-C-5015, Mil-C-25955, Mil-C-26482, Mil-C-26500, Mil-C-38999, Mil-C-83723, Mil-C-81703.
- Mounting styles include bulkhead mount, square flange, round flange, and weld mount.



For additional information contact Connector Industries Of America, (513) 733-3680.

Circular Connectors

Malco's proprietary line of high density, precision circular connectors represents the only modular multi-pin available in the industry today. Miniature 50-ohm, 75-ohm and 95 ohm coax contacts.

- Wire sizes 22 through 12 guage.
- Rear removable/insertable configuration – permits pre-termination of wires.
- Unsealed, environmentally sealed, or hermetically sealed.
- High density contact spacings as close as .065 centers.

For additional information contact MALCO South Pasadena, (818) 799-9171.

Coaxial Connectors - Microminiature

One of the best known, accepted lines of miniature and ultra miniature coax connectors in the industry, Malco lines include Standard, Golden Crimp™ Series, and Lepra/Con™ Series.

Each series offers straight and angle plugs, cabled jacks, bulkhead receptacles and adapters. A line of hermetic coax connectors is also available.

Standard Line

- Fits 50-95 ohm miniature cables.
- Threaded, "quick-connect", or slide-on coupling.
- Solder assembled center contact.
- Center contact gold plated; other metal parts silver plated.

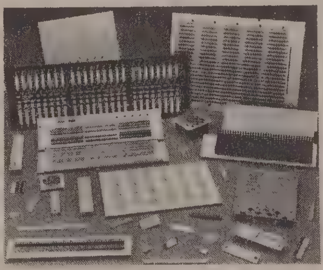
Golden Crimp™ Series

- Rapid crimp assembly.
- Housing, nut, and contact gold plated.
- Operating temperature to 200°C.

Lepra/Con™ Series

- Ultra-Miniature Size.
- Fits 50 Ohm Miniature Cables.
- Threaded or Slide-On Coupling.
- Rapid Crimp Assembly (Straight Plugs and Jacks).
- Housing, Nut, and Contact Gold Plated.
- Operating Temperature to 200°C.

For additional information contact MALCO South Pasadena, (818) 799-9171.



Back Panel Assemblies and Headers Meets Mil-C-28754)

Malco, the originator of the metal back plane technology produces aluminum metal plates for both card edge and metal to metal contact interfaces. Using a slide and tuning fork system, known as the wrappost assembly system panel, thousands of electrical terminations can be mounted on a single WASP plate, featuring 6 amp contacts with .045 inch square wire wrapposts on 0.200″ centers.

- High density up to 300 contacts per square inch with each contact positioned to permit use with automatic wire wrapping machines.
- Malco offers a complete line of extruded, metal and molded headers.
- Extruded headers series 440 & 441 provide reliable interconnection between the back plane and printed circuit board, selective plating, increased rigidity and maximum utilization of space.

For additional information contact MALCO Montgomeryville, (215) 699-5373.

Wire and Cable

Malco offers a broad line of high-performance cables for a diverse range of applications.

These include microminiature coaxial cables, "Mini-Noise" cables, high temperature cables, and high speed data lines, including the increasingly popular Local Area Network cables.

Product offerings include:

- Microminiature coaxes, triaxes, twinaxes, etc.
- "Mini-Noise" cables reduce or eliminate the noise generated when the cables are flexed.
- Military type coax, twinax, and triaxial cables using PVC, polyethylene, nylon and flurocarbon materials.
- Foamed dielectrics including, FEP, polyethylene, and polypropylene.
- A wide range of cables classified by Underwriters Laboratory for fire and smoke characteristics (in accordance with Section 725-2(b) of the National Electric Code) for conduit-free installations in ducts and plenums.

For additional information contact MALCO South Pasadena, (818) 799-9171.

METUCHEN CAPACITORS INC.

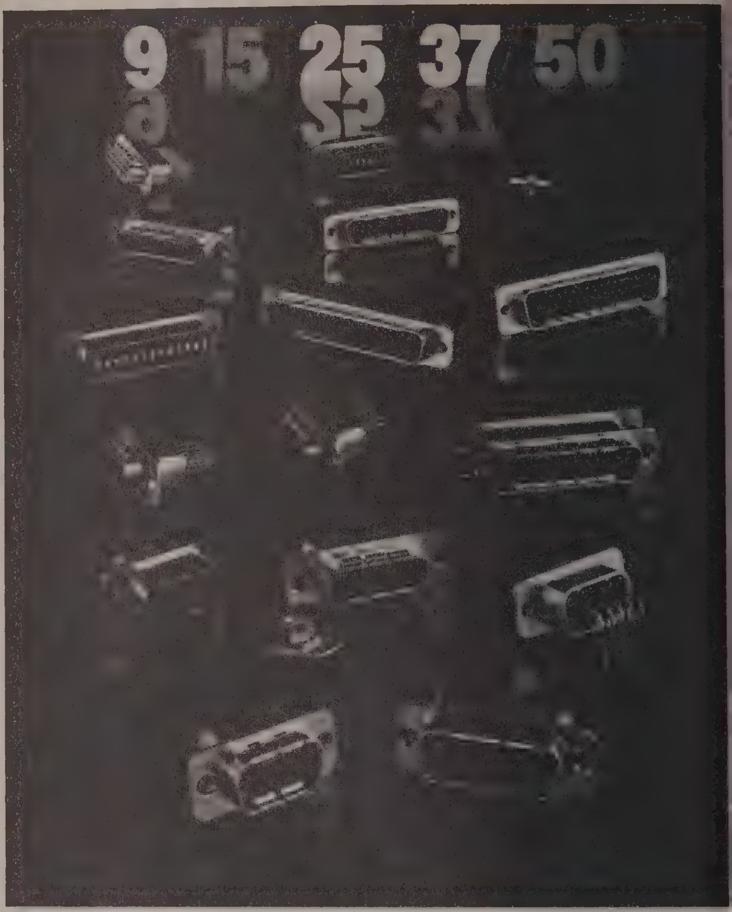
EMI Filtered D Subminiature Connectors

PRODUCT BENEFITS

- Provides optimum positioning of interference control at interconnect interface.
- Provides maximum volumetric efficiency.
- Design is based on proprietary ceramic technology of proven reliability and RF performance.
- Connectors mount in existing chassis hole pattern.
- A cost effective solution to electromagnetic compatibility (EMC).
- Provides a wide range of filter performance options.
- Adaptor styles provide for ease of retrofitting existing equipment.
- Testing 100% for key parameters ensures quality levels.
- Designed to provide compatibility with EIA RS-232 and RS-449.

M.C.I. has the world's largest inventory of filtered D-Subminiature connectors. These connectors are manufactured by the leader of the industry . . . Spectrum Control, Inc. Spectrum Control's Filtered D Subminiature connectors are designed to provide a cost effective method of complying with FCC Part 15, Sub Part J, VDE and MIL STD 461 A/B regulations. The filters are feed-thru capacitors and pi sections.

Our in-house stock includes all five shell sizes, 9, 15, 25, 37 and 50 position connectors in pin contacts (plugs), socket contacts (receptacles) and in the very versatile pin/socket adaptors. The four standard electrical configurations along with their performance values follows:



EMI FILTER PERFORMANCE

Filter Designation	*Filter Circuits	Capacitance		3 dB Max Cut-Off Frequency (MHz)	Dielectric W'Standing Voltage	Contact Rating	Contact Resist.	DC Working Voltage	Minimum Insertion Loss — Decibels (dB)							
		Value	Tolerance					−55°C to +125°C	5 MHz	10 MHz	20 MHz	50 MHz	100 MHz	200 MHz	500 MHz	1 GHz
A	Pi	310 pF	±20%	17	300V	5A	.010 Ω Max.	100V	—	—	—	5	10	18	39	52
C	Pi	1000 pF	+100 −0%	3.2	300V	5A	.010 Ω Max.	100V	—	5	9	15	25	43	65	70

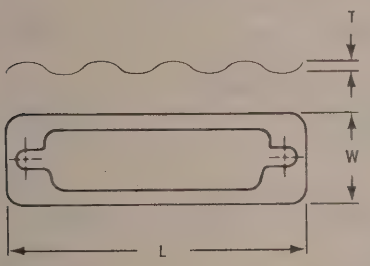
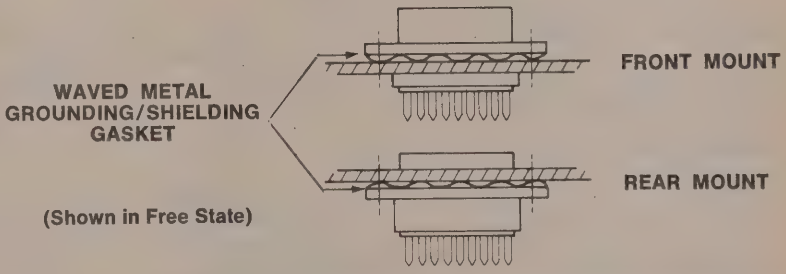
* When Rear Mounting Pin (Plug) Connector use Front Mounting Panel Cutout.

Mounting Considerations
Waved Metal Gaskets...For Complete EMI Protection

Proper mounting of any EMI filter — including the EMI filtered D Subminiature — is critical to the achievement of electromagnetic compatibility. The mounting surface for grounding the connector must be free from paint or any other insulating material. The sketches below indicate the use of one of Spectrum's EMI gaskets to fill any tolerance gaps and adjust for irregularities in the flatness of the mounting surface.





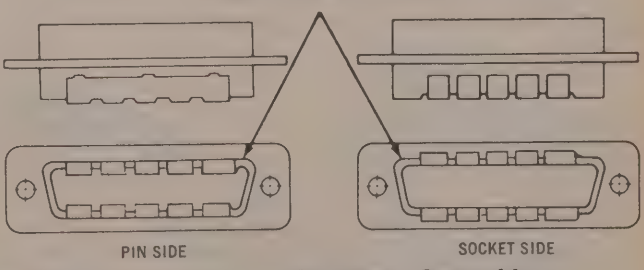
(Shown in Free State)

Shell Size	Mounting Configuration	L	W	T Free State	T Compressed	Spectrum Control Part No.
25	Front - Socket	2.088 (53,04)	.600 (15,24)	.030 (0,76)	.005 (0,13)	572019-00102-70
	Rear - Pin					
	Rear - Socket	2.088 (53,04)	.600 (15,24)	.030 (0,76)	.005 (0,13)	572019-00107-70

Spectrum EMI Filtered D Subminiature...Unique

Spectrum D subminiature connectors feature a unique ground plane to effectively block bulkhead leakage of EMI. The design also provides line to line isolation separation to limit cross talk (line to line mutual coupling) to an absolute minimum. Another, and a most important feature, is the coaxial spring contact that provides proper electrical grounding when mating one connector to another connector.

R. F. GROUNDING SPRING CONTACT*



* Provided on all shell sizes — all termination styles Patent Pending.

MICRO-GATOR CLIP
(Smallest Insulated Clip Ever Made)

U.S. Patent No. 2,762,028 Trademark Reg.

The alligator clip with the microscopic tip! This is the alligator clip you now can use where no other clip will do . . . on printed circuits, in tight spots and on tiny terminals too crowded for anything but its microscopic tip. Including separate skin-tight insulator the tip is no bigger than the head of a pin! Yet the Micro-gator has ample thumb grip, and plenty of bite to stand up straight on the smallest terminals. Ample 7/32″ jaw spread. 1 3/32″ long. Solder connection. Skin-tight flexible vinyl insulator (sold separately) has "lip-action" tip slot so that jaws stay covered whether open or closed.

Micro-Gator

Micro-Gator with Insulator

No. 34 — Steel, cadmium plated
No. 34-C — Solid Copper
No. 36 — Insulator for 34 and 34-C

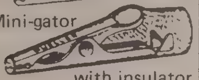
MINI-GATOR CLIP

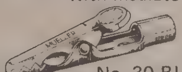
U.S. Patent No. 3,321,736 Trademark Reg.

Indispensable for testing or incorporation into miniaturized equipment. New design features rivet hinge for greater strength, full-meshing teeth to grip finest wires. Skin-tight flexible Vinyl insulator (sold separately) covers completely — has slotted "lip action" tip. Clip weighs 1/20th oz. has tiny 11/64″ O.D. nose, but ample 3/16″ jaw spread 1 3/32″ long. Crimping ears. Solder connection. Surprisingly strong bite penetrates corrosion and coatings.

Mini-gator

Mini-gator with insulator





No. 30-BL

No. 30-TBO

No. 30 — Steel, cadmium plated
No. 30-C — Solid Copper
No. 30-BL — Steel, cadmium plated with rolled barrel tail section; 1-1/4″ long
No. 30-TBO — Steel, cadmium plated with 6-32 thread steel barrel, 1-1/4″ long
No. 32 — insulator for 30, 30-C, 30-BL, 30-TBO

"60 SERIES" ALLIGATOR CLIPS

U.S. Patent No. 3,321,736

No. 60 — CONVENTIONAL TYPE

New slim design with full-meshing teeth. Convenient, round thumb grip, barrel connection for banana plug. Equipped with small soldering lip. Strong spring with a hard bite. Cadmium plated. 2″ long.

No. 60-S — SCREW CONNECTION

Eliminates necessity for soldering. Otherwise same as No. 60.

No. 60-CS — COPPER ALLIGATOR CLIP

Solid copper version of No. 60-S. Screw connection. 2″ long. 10 per box.

No. 60-NS — ALLIGATOR NEEDLE CLIP

Like No. 60-S, but with insulation piercing needle in one jaw. Screw connection. 2″ long. 10 per box.

No. 60PR-2 — SPECIAL BARREL FOR TEST PROD OR PHONE TIP

Barrel crimped to provide friction fit on standard test prod or phone tip. Holds prod on test, frees hand for other work.

No. 60-U — SPECIAL U-SHAPED BARREL

U-Shaped barrel allows for greater variety in wire sizes and mechanical use. Steel, cadmium plated, 2″ long

No. 60-TBO — THREADED STEEL BARREL

Tail section of clip has a threaded steel barrel to allow connection to any 8-32 threaded male test prod or screw. Steel, cadmium plated, 2-11/32″ long.

No. 60-HS — STEEL ALLIGATOR CLIP WITH INSULATED HANDLE

Same as No. 60-S except equipped with red and black insulating sleeves on end. Very convenient for distinguishing leads. Has screw connection also. Cadmium plated. 2 11/32″ long. Shipped half red, half black.

No. 60-CHS — COPPER ALLIGATOR CLIP, INSULATED HANDLE

Solid copper version of No. 60-HS. Screw connection. Shipped with half red, half black insulating sleeves. 10 per box.

No. 62 FLEXIBLE VINYL INSULATOR

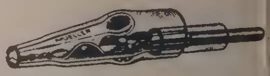
Red and black insulators for Alligator Clips 60, 60-S, 60-CS, 60PR-2, 60-NS, 60-U.

COMPLETELY INSULATED ALLIGATOR CLIPS

Patent Pending

No. 63 or 63-C Clip

Sold only as a unit, with factory-applied insulators.



Completely insulated right down to the nose. Fliexible 2-piece skin-type vinyl insulator of high dielectric strength, with "lip action" slotted tip that permits opening of clip without exposing metal. Insulator nose is only 13/64″ O.D. The tight fitting sheath preserves all the slimness of the Alligator Clip, still giving compete protection against shorts in even the tightest spots. Screw connecion easily made by slipping insulator forward. 2 1/8″ long.

No. 63 — INSULATED ALLIGATOR CLIP (STEEL)

Composed of Mueller No. 60-S Alligator Clip steel, cadmium plated, screw connection, complete with 2-piece vinyl insulator. Shipped half with red insulators, half black. 10 per box.

No. 63-C — INSULATED ALLIGATOR CLIP (COPPER)

Composed of Mueller No. 60-CS Alligator Clip, solid copper, screw connection. Shipped half with red insulators, half black. 10 per box.

"70 SERIES" ALLIGATOR CLIPS

U.S. Patent No. 2,762,028

Features simplified design, fast connection of wire with cord strain relief ears, patented hinge construction and lower cost.

No. 70 — FOR SOLDERED CONNECTION

Steel, cadmium plated, 1 11/64″ long.

No. 70-CS — COPPER SCREW CONNECTION

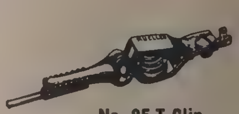
Solid copper version of No. 70-S.

No. 72 — SKIN-TIGHT INSULATOR FOR 70 SERIES ALLIGATOR CLIPS!

For the first time complete, skin-tight, one-piece insulation for a standard size Alligator Clip! Covers entire clip right down to nose. Special tip slot permits full jaw opening without exposing teeth.

CROCODILE CLIPS

No. 85 or 85-C Clip with No. 87 Insulator



No. 85-T Clip

No. 85 — A very smal clip with slender, elongated jaws for getting into tight places in radio or electrical test work. Screw connection. 2 1/8″ long.

No. 85-C — Same as No. 85, except solid copper with phosphor bronze spring, brass screw. A radio frequency, entirely non-ferrous test clip. 10 per box.

No. 85-T — Crocodile "Tip-Clip" — equipped with standard phone tip on one jaw, otherwise same as No. 85. Ideal for use as a prod for ordinary clip connections and for connections to insulated binding posts having nonremovable heads. 2 5/8″ long. 10 per box.

Use No. 87 Insulators for clips 85, 85-C and 85-T. Red and Black. Cover entire clip except nose. Protect against short and shock. Help to distinguish leads.

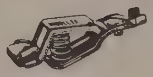
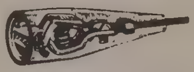
TEST CLIPS

No. 45 PEE WEE



A very small test clip for radio, ignition, meter and similar work. 1½" long. Jaw spread 5/16" Steel cadmium plated.

No. 45-C
Solid Copper R.F. Test Clip

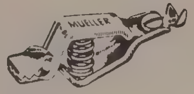


No. 45-C Clip
No. 47 Insulator

Solid copper radio frequency test clip. Phosphor bronze spring, brass screw. Will not heat up in high frequency test work, entirely nonferrous. 1½" long. 10 per box.

Use No. 47 Insulator for clips 45 and 45-C.

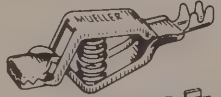
No. 48-B



A small test and battery clip for radio use and general testing purposes. 2" long. Jaw spread ½". Steel, cadmium plated. 10 per box.

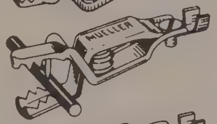
No. 48C — Solid Copper. Same as 48-B.

No. 48B-2E



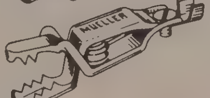
A small test and battery clip for general testing purposes. 2" ong. Jaw spread 1/2". Two rear clinching ears. Steel, cadmium plated.

No. 50-C COPPER NEEDLE CLIP



Solid copper clip with beryllium copper piercing needle in the op jaw for quick test contact through wire insulation. 6-32 brass set screw, 2-9/32" long. 10 per box.

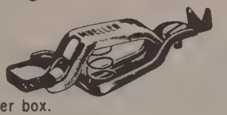
No. 51-C COPPER CLIP



Same as No. 50-C but without needle. Ideal for meter testing.

Use No. 49 Insulator for clip No.
8-B, 48-C, 48B-2E, 50-C and 51-C

No. 27

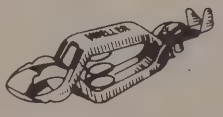


A high grade test clip with meshing teeth n three sides of jaws. For laboratory and shop test work. 2⁷⁄₁₆" long. Jaw spread ⅝". Steel, cadmium plated. 10 per box.

No. 27-C — Solid copper. Same size as No. 27. 10 per box.

Use No. 29 Insulator for clips 27 and 27-C.

No. 27-CG GEOPHONE COPPER CLIP



Highly specialized solid copper clips for use in geophysical work. Curved jaws clip onto seismograph cable rings. May be simply "yanked out" when test is completed. 10 per box
No. 27-CG has 7/32" wide jaw
No. 27-CGW has 13/32" wide jaw

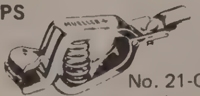
Use No. 29 Insulator for clips
7, 27-C, 27-CG and 27-CGW

LARGER SIZES OF CLIPS

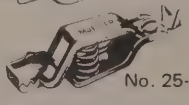
No. 24-A — 25 Amp. Steel, lead plated. 2⅞" long
No. 25 — 40 Amp. Steel, cadmium plated. 3" long
No. 25-C — 75 Amp. Solid Copper. 3" long
No. 21-A — 50 Amp. Steel, lead plated. 4" long
No. 21-C* — 100 Amp. Solid Copper. 4½" long
No. 11-A* — 100 Amp. Steel, lead plated. 6" long
No. 11-C* — 200 Amp. Solid Copper. 6" long
No. 33-C* — 300 Amp. Solid Copper. 7¾" long

All packed 10 per box.

Furnished with detachable lug connection for easy securing to large cables



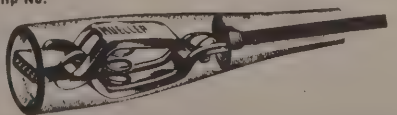
No. 21-C



No. 25-C

FLEXIBLE INSULATORS FOR CLIPS

A convenient protection against short circuit and electrical shock. Colors help to distinguish leads. Packed half red and half black to indicate polarity. Long tail prevents breakage of wire. Constructed so that clip is held in firmly. NOW AVAILABLE also in blue, white, yellow and green at 10% above regular price re insulators marked * below.



Insulator No.	For Use With Clip No.
3*	11-A, 11-C
3*	21-A, 21-C
6*	24-A, 25, 25-C
9*	27, 27-C 30-BL
2*	30, 30-C
5	33-C
36*	34, 34-C
47*	45, 45-C
49*	48-B, 48-C, 50-C, 51-C
62*	60, 60-S, 60-CS, 60PR-2, 60-NS, 60-U (also 70 Series)
72*	70, 70-S, 70-CS
87*	85, 85-C, 85-T

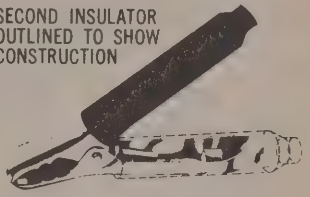
*Also available in blue, white, yellow and green.

HIPPO-CLIP

HIPPO-CLIP — For battery booster cables and fast chargers. Proved higher quality and superior design. Built-in solder strap and clinching ears for fast, sure cable connection. Supplied with vinyl handle insulators in red or black. Full 1⁹⁄₁₆" jaw spread. 6" long.

No. 41-A — Steel, bright copper plated. 100 amp

No. 41-C — Solid Copper, 300 amp



SECOND INSULATOR OUTLINED TO SHOW CONSTRUCTION

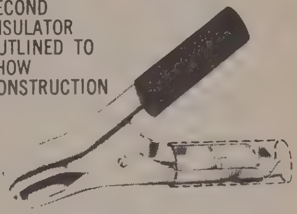
PIGMY HIPPO-CLIP

PIGMY HIPPO-CLIP — A new small plier clip for battery operated equipment and automotive test. Flat, wide handle allows positive grip. Won't "squirt away". Built-in solder strap and wire clinching ears. Supplied with vinyl handle insulators in red or black. Ample 1⅛" jaw spread. 3" long.

No. 46-A — Steel, bright copper plated, 50 amp

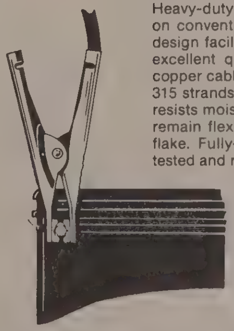
No. 46-C — Solid Copper, 75 amp

No. 46-1 — Insulator Only

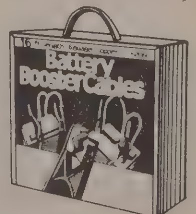


SECOND INSULATOR OUTLINED TO SHOW CONSTRUCTION

QUALITY BOOSTER CABLES FOR ALL BATTERIES



Heavy-duty Slim Jim™ cables provide a firm spring-loaded grip on conventional top terminals and newer side-terminals. Slim design facilitates working in tight areas. Slim Jim cables are of excellent quality; featuring true A.W. gauge cable. All solid copper cables are available in 6-gauge, 133 strands or 4-gauge, 315 strands (see chart). Heavy thermoplastic rubber insulation resists moisture, salt, acids, oils and grease. Tangle-free cables remain flexible at extreme temperatures and will not crack or flake. Fully-insulated vinyl-clad steel clips are independently tested and rated at 300 amps.



BATTERY BOOSTER CABLES

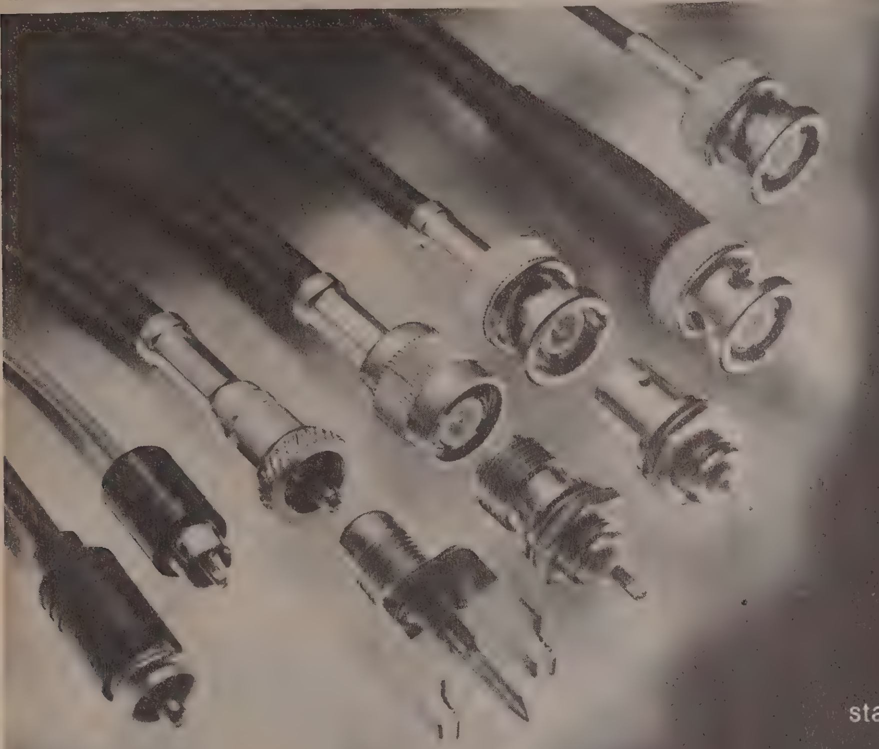
44	300	solid copper		10 clips with display header	1 box of 10 clips
PK44	300	solid copper	2 clips on card		1 box of 10 cards



National Tel•Tronics has been supplying the OEM market for 35 years. Complete tool shop and stamping facilities in Pennsylvania and Texas give us the manufacturing flexibility to produce electronic connectors and components either to standard or custom specifications. Our lines are among the most comprehensive available from any supplier in the world, providing you with a real choice of types and sizes.

GET IT TOGETHER

ANTENNA PLUGS AND JACKS
A wide selection of plugs and jacks used extensively in automobile radios, CATV, MATV and CCTV applications.

BANANA PLUGS AND JACKS
Precision manufactured in standard, miniature and dual styles. Springs are silver or nickel plated phosphor bronze. Beryllium copper springs are also available. NT•T standard plugs mate with NT•T banana jacks and binding posts.

BINDING POSTS
Molded insulated binding posts available with fluted head, hex head and multi-way in single or dual styles. Metal binding posts are brass nickel plated.

CABLE ASSEMBLIES AND TEST LEADS
These utilize NT•T manufactured connectors of the highest quality. Styles include coaxial cables with BNC or TNC connectors, threaded coaxial connectors, miniature coaxial connectors, molded dual banana plugs, phone plugs, phono plugs, alligator clips, or any combination of the above. Test leads, patch cords, and special cable assemblies to customer's specifications are also available.

FUSE HOLDERS
Both 15 amp., 250 volt cartridge types and molded fuse blocks in single or double pole styles are available. Fuse blocks may be specified with one piece quick disconnect terminals in .187, .205 and .250 wide tabs.

PHONE PLUGS AND JACKS
Designed to provide superior reliability in micro-miniature, miniature, and standard sizes. Available in two or three conductor. Jacks are available in open or closed circuits. Completely enclosed jacks are similar to standard jacks except molded in plastic.

PHONO PLUGS AND JACKS
Low cost plugs and jacks available in a variety of styles and materials. Single and multiple connections. Plugs and jacks are also available in miniature size. NT•T has the plug or jack to meet your requirements.

BINDING POST BOARDS
Phenolic boards with steel or brass lugs and screws.

INTERLOCK RECEPTACLES
Standard and polarized in flush and recessed styles. Pins facilitate feed-thru, wrap around or quick disconnect type connection.

LUGS AND BRACKETS
Complete assortment of the most widely used styles including quick disconnect types.

TERMINAL STRIPS
Miniature and standard strips on 1/4'', 3/8'' and 1/2'' centers. Lug combinations are unlimited.

NEW FROM NT•T

ALLIGATOR CLIPS
A wide selection which virtually guarantees a clip to meet your specifications. Insulators are available.

BATTERY CLIPS
Plier type and grounding wire clips designed with heavy duty spring. Supplied with or without insulator.

JUMPER TEST LEADS
Available in small, medium or large size clips: 5 amp. or 10 amp. Wires and insulators are color coded.

BNC CONNECTORS
Male and female BNC and TNC connectors are of proprietary unique unitized construction. Male parts are crimp style. All BNC and TNC connectors meet MIL spec performance.

They are manufactured for assembly to all coaxial cables including miniature styles RG174, RG178 and RG179.

COAXIAL CONNECTORS AND ADAPTERS

Quality precision connectors and adapters are available in many styles suitable for cable TV, computer, medical electronics and other applications. Special threaded and miniature types are exclusively manufactured by NT•T. Miniatures are for use where space is limited.

PC STYLE PHONO JACKS

Used in computers, video games, audio amplifiers, mobile communications, television, video cassette recorders, and many other applications.

WITH ntt

Whether you crimp it, plug it, solder it, screw it, clip it, wrap it, interlock it, bayonet it— however you make your connection, get it together with NT•T.

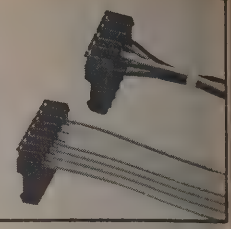
Mass Terminated Connector System

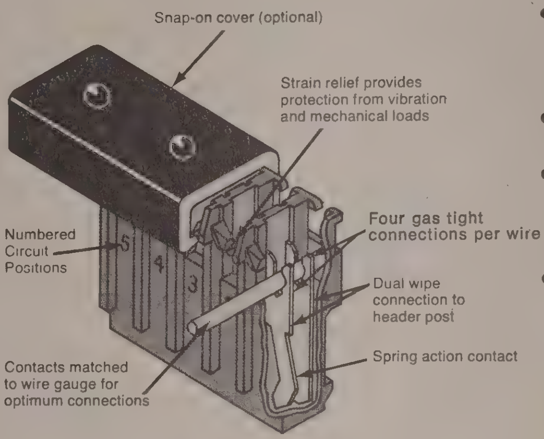
Connectors—Headers—Installation Tools

For Discrete
Wire and
Flat Cable



LOWER INSTALLED CONNECTOR COSTS

Preloaded insulation displacement contacts eliminate wire stripping, individual crimping and hand loading contacts into housings.



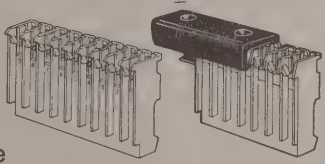
Snap-on cover (optional)
Strain relief provides protection from vibration and mechanical loads
Numbered Circuit Positions
5
4
3
Four gas tight connections per wire
Dual wipe connection to header post
Spring action contact
Contacts matched to wire gauge for optimum connections

- End and through connectors accept discrete wire, notched round conductor flat cable and pre-split ribbon cable.
- Industry intermateable and stackable end-to-end.
- Female contacts are made of special brass alloy with bright acid tin or selective gold over nickel plating.
- Housings are molded of 6/6 nylon (U.L. 94V-2) with color-coded stripes to indicate contact wire gauge.

.100″ and .156″ CENTERLINE CONNECTORS

.100″ (2.54mm) CENTERLINE CONNECTORS

- End and Through connectors offered with 2 through 28 circuit positions.
- For 22, 24, 26 and 28 AWG wire
- Available with tin or selective gold plating.



Matching covers available for all connectors.

.156″ (3.96mm) CENTERLINE CONNECTORS

- End and Through connectors offered with 2 through 24 circuit positions.
- For 18, 20, 22, 24 and 26 AWG wire.

.100″ and .156″ HEADER ASSEMBLIES

.100″ Centerline Spacing

Straight Square Posts

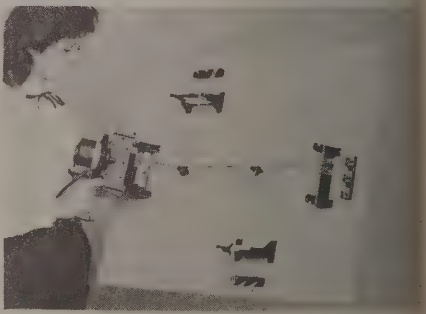
MASS TERMINATION TOOLING

For high volume discrete wire harness assembly

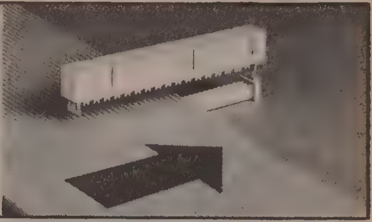
THE PPHT HARNESS SYSTEM. Economical bases are installed permanently on wiring harness boards and fixtures are easily inserted into these bases when the boards are to be used. Connectors are placed in the fixtures and the harness is fabricated by inserting wires into connectors. The tool is locked onto each fixture and then operated to reliably mass terminate all wires in each connector.



PANDUIT CORP
ELECTRONICS GROUP

DEPT. EM, 17301 RIDGELAND AVENUE, TINLEY PARK, ILLINOIS 60477
PHONE (312) 532-1800 TELEX 25-4560

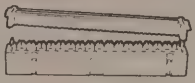
PANDUIT™ LAT-CON™
.050″ Flat Cable Connector System



A revolutionary approach to .050″ flat cable connector assembly

- Unique open-sided socket allows cable to be inserted *laterally instead of axially* to simplify assembly, reduce termination time.
- Termination press recesses cable end from edge of sockets to provide ideal recessed cable location for end termination, eliminates rejections and rework.
- Uses same socket and presses for both end or daisychain terminations.
- Makes extremely close daisychain terminations easy.
- High volume assembly equipment offers reel fed sockets on tape.

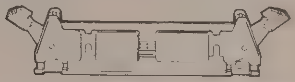
EXCLUSIVE PREASSEMBLED OPEN SIDED SOCKET



INTEGRAL METAL LOCKING CLIPS on both ends assure positive retention of cover to socket when terminated.

ONE SOCKET FOR END OR DAISYCHAIN TERMINATIONS simplifies planning and cuts parts inventory requirements.

UNIQUE LOW-PROFILE EJECTOR/LATCH for use with or without strain relief. Saves space and reduces separate parts inventory.

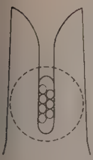


FOUR WALL HEADER protects contacts and provides for unique "Coding Wedge" system.

The LAT-CON System provides superior terminations

An end termination made by the LAT-CON System is shown below. Note that the cable end is recessed a controlled distance from the edge of the socket. This process ensures that the cable end is inserted far enough to provide good termination but recessed enough to protect the cable end. This eliminates rejects and rework and reduces the hazard of subsequent short circuits and potential damage to equipment.

MORE REASONS TO SPECIFY LAT-CON SOCKETS & HEADERS



Mass terminating insulation displacement contacts for fast, reliable, gas-tight connection with conductors.

Selective Gold Plating is STANDARD. Choose 15μ'' or 30μ'' gold plating only where it's needed (on mating surfaces) for maximum reliability at minimum cost. Wire insulation displacement slot and printed circuit board portion of header pins are tin-plated.

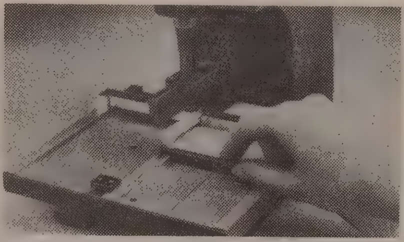
Cover recessed on both ends to permit tight cable folds in any cable entry configuration.

MIL spec keying system

Provide MIL spec polarization. Aid in correct mating of connector and header. Two key positions in 20 circuit and larger headers. Standard Package: 10 keys. Part No. 100-000-061.

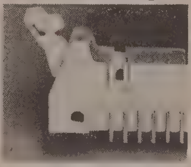
Termination presses for low to medium volume

A LAT-CON manual termination press is shown below. An open-sided socket is placed in the feed track. Then, the flat cable is located against a stop in the front of the die and moved laterally into the socket. Both the socket and cable are then slid into terminating position and the press is actuated. Typically, this takes 6 seconds or less. A pneumatic version of this press is also available.

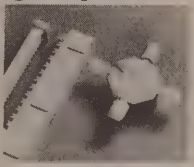


Daisychain terminations are also greatly simplified in the LAT-CON System. The cable is simply moved into the connector and the press activated. Daisychain connectors can be added even after both cable ends have been terminated and this system permits extremely close spacing of connectors on the cable (less than .1″ or 2.5 mm, wall to wall).

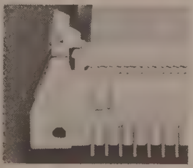
The "Coding Wedge" system



1. Break out the prescored wedge sections from the header wall.



2. Use the convenient tab to insert coding wedge into the corresponding slot in the socket wall.



3. Repeat as necessary to meet coding requirements.

For high volume applications . . .

In addition to the low to medium volume press, the LAT-CON application equipment line includes a high volume press which also features lateral cable insertion and automatic recessing of the cable ends. With this system the open-sided sockets are automatically fed into the back of the press from a reel of sockets on pressure sensitive tape. This equipment automatically ejects the terminated cable assembly and feeds another socket into the die, positioned for the next termination.

MIL-C-83503 INTERMATEABLE. LAT-CON sockets and headers meet the requirements of and are fully intermateable with all MIL-C-83503 products. Also meet DIN 41651 (draft) and BSI 9525F0023 (draft).

PANDUIT™ *HI-CON*™

Two-Piece DIN 41612 Euro-Connectors

A Complete HIGH DENSITY, HIGH RELIABILITY Connector Family

B
C
F
HALF C
D
E

- Precision engineered to meet DIN 41612 and MIL-C-55302, and IEC 130-14 specifications.
- Select 16, 32, 48, 64 or 96 contacts in DIN Types B, C, D, E, F and R. Also half B and C sizes.
- Standard and Inverse Styles available.
- Optimum contact pressure for low insertion force and maximum mating cycle capability.
- Strict tolerances eliminate need for costly boards and heavy gold plating.
- High density selective gold plating on all mating surfaces.

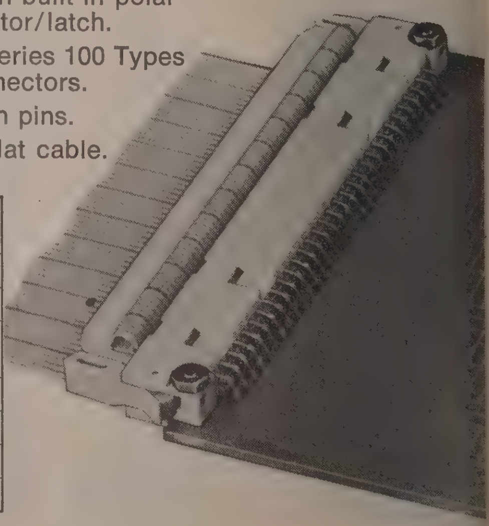
U.L. Flammability	94V-O				94V-1		HB	94V-O			

Series 120 Flat Cable Connectors

Dual row .100″ center sockets for termination of .050″ flat cable.

- Three types: B-64 contacts on .100″ x .100″ grid; C-64 contacts on .100″ x .200″ grid; Half C-32 contacts.
- Preassembled socket and cover with integral metal locking clip.
- Selective high density gold plating.
- Four-wall header with built-in polarization, optional ejector/latch.
- Intermateable with Series 100 Types B, C and Half C connectors.
- Variety of termination pins.
- Same-source .050″ flat cable.



Wire Gauge/Style	28 AWG, 7 strand, .050″ (1.27mm) Flat Cable. PVC insulated. UL style 2651
Operating Voltage	300V
Amperes @ +68°F (+20°C)	1 amp max.
Contact Material	Male—Brass Female—Beryllium Copper
Contact Resistance	≤ 15 milliohms
Housing Material	Glass Filled Polyester
Dielectric Strength	1000V
Insulation Resistance	10^{12} ohms

EEM PRODUCT SELECTION GUIDES

There are 33 Guides in this edition of EEM. See page 2 (1A•2, 1B•2, 2•2, 3•2) of each volume to locate the Product Selection Guides that pertain to your needs.

INTERNATIONAL

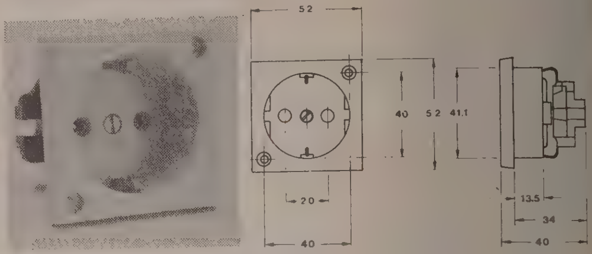
INTERNATIONAL Plugs, Sockets and Socket Strips

Plugs are also available for each of the socket standards listed below. Sockets can be used in test and burn-in racks designed for equipment that is being exported.

Contact us for a complete catalog of our line of international plugs, sockets and socket strips.

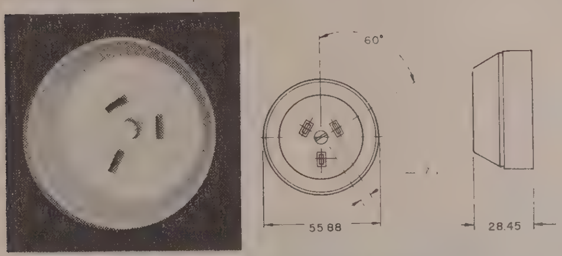
Most models stocked.

Continental European



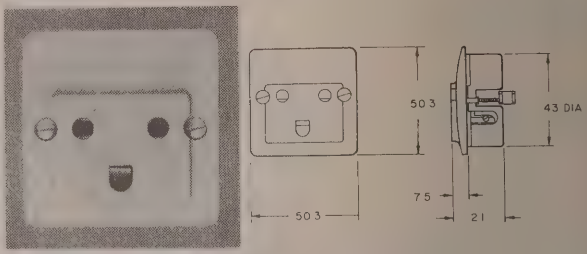
Model 88010610 (Prev. 1061): "Schuko" socket with square face plate.
Current rating: 16 amps/250 volts
Approvals: VDE, KEMA
Color: Ivory

Australian



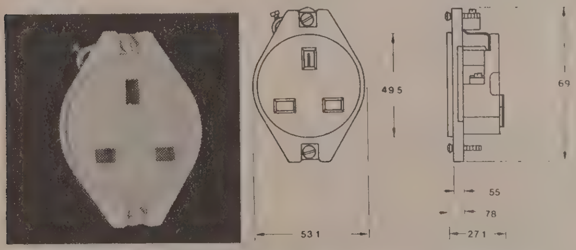
Model 88010510 (Prev. 1051): Australian socket; can be mounted directly on a panel. Also mates with New Zealand cords, although not approved by New Zealand safety agency.
Current rating: 10 amps/250 volts
Approval: EANSW
Color: White

Danish



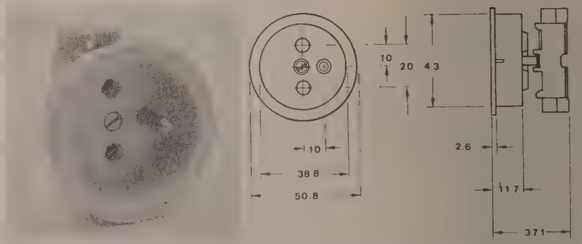
Model 88010540 (Prev. 1054): Danish socket. (Prior to January 1, 1981, Denmark used the "Schuko" German socket standard.)
Note: Although the Schuko plug (German, see our model 88010610) can be plugged into Danish socket, this presents an extreme safety hazard because the plug will not be grounded to the socket.
Current rating: 10 amps/250 volts
Approval: DEMKO
Color: Gray

British



Model 88010620 (Prev. 1062): British socket for mounting in round panel cutout conforms to BS 1363. Line and neutral contacts are shuttered to minimize the possibilities of accidental entry of an object other than the mating plug.
Current rating: 13 amps/250 volts
Color: White

French

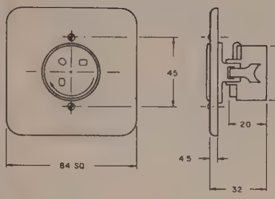


Model 88010550: French socket (mates with all PCC Continental European cords).
Current rating: 16 amps/250 volts
Color: Ivory

PANEL COMPONENTS CORPORATION P.O. Box 6626, Santa Rosa, CA 95406 • (707) 523-0600 • TX 176-747

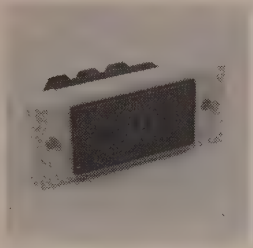
Plugs, Sockets and Socket Strips

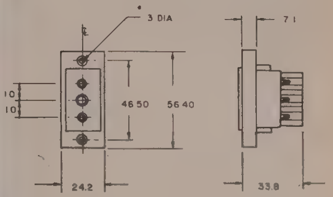
Israeli



Model 88010580: Israeli socket.
Current rating: 16A/250V
Approval: SII
Color: White

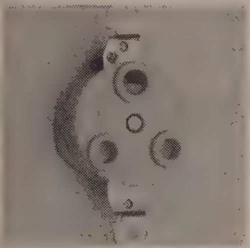
Italian

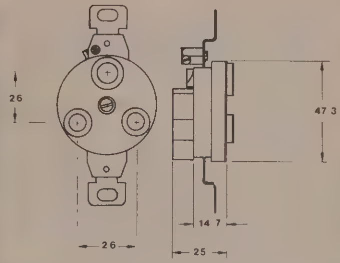




Model 88010570: Italian socket; comes with mounting bracket and hardware.
Current rating: 10A/250V (16A/250V socket also available)
Approval: IMQ
Color: Brown/Beige

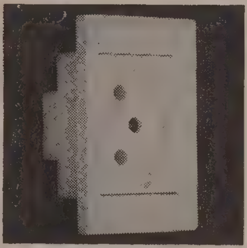
South African

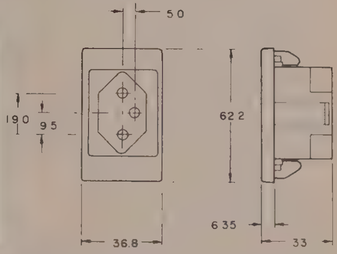




Model 88010560 (Prev. 1056): South African socket. Line and neutral contacts are shuttered to minimize the possibilities of accidental entry of an object other than mating plug. Complies with SABS 164.
Current rating: 16 amps/250 volts
Approval: SABS
Color: Ivory

Swiss





Model 88010530 (Prev. 1053): Swiss socket. It can be mounted directly on a panel, using a mounting system that does not require screws.
Currect rating: 10 amps/250 volts
Approval: SEV
Color: Ivory

Australian

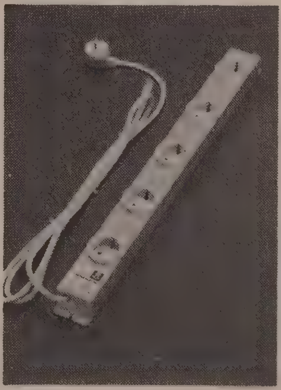
Model 85010020: Australian socket strip.
Current rating: 10A/250V
Color: White

British

Model 85010320 (Prev. 1032): British socket strip conforms to BS 1363. Each socket is shuttered to minimize the possibilities of accidental entry of an object other than the mating plug.
Note: Cord is not provided. Made of impact resistant thermoplastic.
Current rating: 13 amps/250 volts
Number of sockets: 4
Circuit protection: 13A fuse (BS 1362)
Color: Black

European Continental

"Schuko" German



Model 85023050 (Prev. 3.002.305.2): German socket strip without switch rated at 16 amps. Cable length is 2.5 meters with VDE-approved Schuko plugs.
Color: Orange
Note: Models with rocker switch or circuit breaker also available.

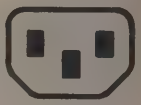
PANEL COMPONENTS CORPORATION P.O. Box 6626, Santa Rosa, CA 95406 • (707) 523-0600 • TX 176-747

INTERNATIONAL

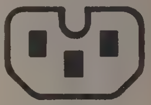
Use of a primary power connector and cordset instead of a permanently installed power supply cord makes it possible for the equipment user to easily replace a cordset if it is damaged. It also makes it very easy and economical for the equipment manufacturer to supply the correct cordset for a foreign client because cordsets with a molded IEC-320/CEE-22 primary power connector are available with virtually any of the world's power plugs installed on the other end.

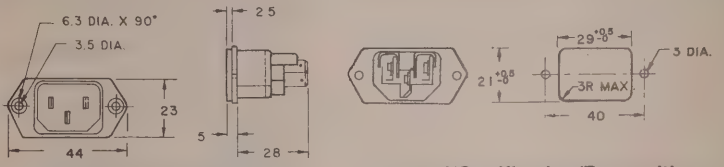
The IEC-320/CEE-22 connector is by far the most commonly used 3-wire (grounded) primary power connector in North America and Europe. It is also used in Australia and Japan as well as major developing countries.

The connector illustrated at right is the most widely used of the IEC-320/CEE-22 types. Rated for use at 65°C.



The connector at right has a polarizing key which prevents insertion of "cool" cord connector above. Rated for use at 120°C.





8843.FSG.40.60
with 6.3 × 0.8 mm (.250 × .032 inch) solder/quick disconnect tab terminals

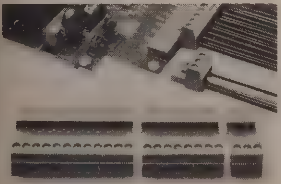
PLUG-IN



Plug-In PCB Terminal Blocks combine the patented Phoenix screw wire clamping technique with PC connector pluggability. Available in a full range from 2 through 24 positions, the MSTB line offers pluggability in both the vertical and horizontal planes. The MSTB blocks, capable of accepting from #28 to #14 AWG wires, are rated for 10 amps at 300 volts AC.

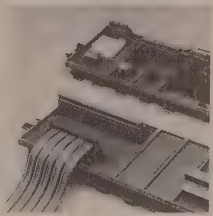
PHOENIX CONTACT

PHOENIX

Selection without equal for design flexibility

1. Modular Interface Components

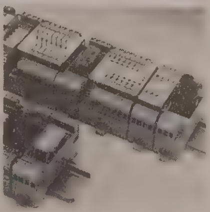


Phoenix universal modules are truly multi-purpose electronic circuit and component carriers. Mounting on all types of DIN rails, they can be used as simple octal sockets for relays or as interfaces for microprocessor outputs with solid state relays and fuses. In between these applications there are flat cable IDC interfaces, with 10 to 64 positions, subminiature connector interfaces, with 9 to 50 positions, and many other configurations. Size and variety is only limited by the designer's imagination. Special covers make the contents of these modules touch and contamination-proof. Custom designs are available.

2. Plug-in Card Blocks

The full line of Phoenix plug-in card blocks is designed to accept single or double Eurocards and is produced in accordance with DIN 41612 and DIN 41617 specifications. The SKBI block is a total system with card guides, clamping and releasing latches and receptacle sizes to accept 31, 32, 48 or 64 position Eurocards. The SKBD card edge block handles single-sided PCB's and has from 8 to 20 positions.

3. Electronic Control Systems Modules EM

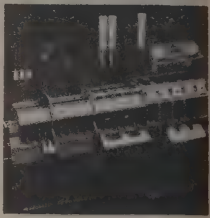


EM electronic control modules include relay, diode array, varistor, LED indicator, fuse holder and custom circuit modules. All are rail mounted, eliminating the need for many off-rail mounted components and PC boards.

4. Fuse Blocks & Component Holders

For applications that dictate using fuses, Phoenix offers a variety of fuse terminal blocks. If your design requires electronic components such as diodes, resistors, capacitors, etc., Phoenix features many configurations of terminal blocks to house these components.

5. UK. Universal Feed-Through 600V & 300V



Universal Terminal Blocks are feed-through blocks with mounting feet which allow the block to be snap mounted or removed from all DIN rail types—C, flat or mini. This versatility reduces requirement for stocking many different types of terminal blocks.

The versatility of the UK terminal block can be expanded through using the Phoenix accessory line.

6. Panel or Rail Mounted BK

BK Strip Terminal Blocks are supplied in continuous strips of 250 pieces which can be custom cut to any length, and be panel or rail mounted. With a 600 volt rating, each terminal block has two walls eliminating the need for end covers. The Phoenix open top design allows for excellent visibility of the wire connection points and easy screwdriver use.

7. Direct Mount G5

This series of compact terminal blocks can be mounted directly in a piece of equipment without additional hardware. Each has a fully enclosed polyamide 6.6 housing and requires one or two screws for mounting. Groups with any number of wiring positions can be formed by interlocking the built-in tongues and grooves.

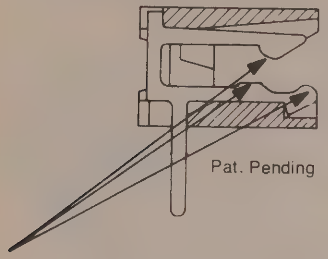
LCD CONNECTORS

Positive contact over extended periods of time at higher operating temperatures. (Replaces "obsolete" plastic contacts that may be influenced by contact pressure.)

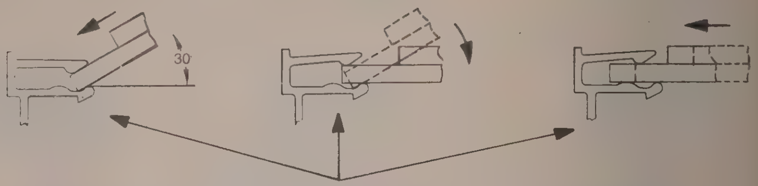
Unique Prong Type contacts provide pressure and reaction with single metal unit.

MATERIALS: Connector Body: Glass filled polycarbonate Contacts: Tin-plated Brass alloy

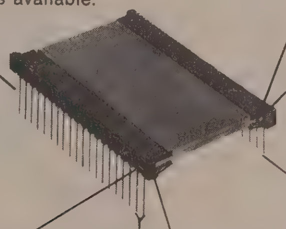
CROSS SECTION



Triple supports provide minimum plug-in pressure regardless of number of contacts. Spring mounted by rotary movement.



No injury can occur to contact surface or plating during plugging-in of display; the ultimate in contact reliability.



Up to 45 contacts available. Additional contacts available.

For LCD glass thickness of .04 through .05 ±.004. (Other thicknesses available).

LCD's do not require beveled edge on glass borders. Although LCD's are sharp, they cannot damage Power Dynamics' unique Connector Contacts.

Wide range of standard soldering pin lengths (.12, .19, .29, .41).

Molded-in contacts insure long contact life and reliability under harsh environmental conditions (as opposed to conventional type exposed contacts).

Molded shoulders insure against longitudinal movement under the most severe shock and vibration conditions. (No epoxy or bezel required for LCD retention.)

Contact pin spacing of .10.

SOCKETS...ADAPTER ASSEMBLIES... SOCKET & PINS TERMINALS

SOCKETS

All Precicontact Sockets (with the exception of the LSO Series) feature four-leaf closed entry BeCu inner contact and machined outer sleeve. Sockets are designed to accept short IC leads and to eliminate wicking.

Series SO Low Profile DIP Sockets Designed to meet MIL-S-83734. (See description on facing page.) Continuous grid spacing. Packaged for automatic insertion.

Series USO Low Profile DIP Sockets (Open Frame) Open construction provides excellent convection cooling. Designed to meet MIL-S-83734. Accommodates 8 thru 64 flat lead DIP IC's or .041/.016 to 0.51/.021 dia" round leads maintaining high retention.

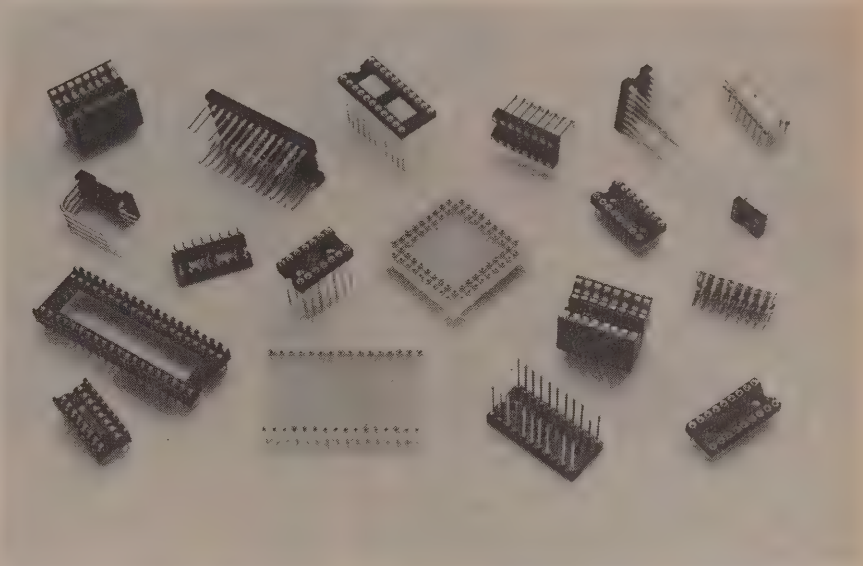
Series WW Low Profile Wire Wrap Sockets Accommodates 8 thru 40 flat lead DIP C's or 0.41/.016 to 0.51/.021 dia" round leads maintaining high retention. Designed to meet MIL-S-83734. 1, 2, or 3-level wrap.

Series UWW Low Profile Wire Wrap Sockets (Open Frame) Free-standing contacts provide excellent cooling. Accommodates same lead sizes as Series WW. Also designed to meet MIL-S-83734.

Series UH Low Profile/High Temp Machined Sockets (Open Frame) Design facilitates board cleaning and inspection. Meets the most severe environmental operating conditions. Operates at -65°C to 250°C. 6 thru 40 pins.

Series CSO Carrier Strip Disposable brass carrier provides patterns of sockets for easy group insertion into PC board. Fast assembly. Direct visibility for soldering inspection and repair.

Series L.E.D. Display Sockets 6 thru 40 socket assemblies for mounting at right angles. Allows user to group units side-by-side with consistent alignment.



Series SSO Snap-A-Part Sockets (Single) Single-in-line 32 pins with .100 spacing. Create your own part on any centers. Save PCB real estate by installing end-to-end or side-by-side.

Series DSO Snap-A-Part Sockets (Dual) Same design specs as Series SSO but dual 64 pins on .600 centers with .100 spacing.

Series LSO Low Profile Stamped Sockets (Dual Wipe) Side wipe contacts for high reliability and constant low contact resistance. Stackable end-to-end and side-to-side for high board density. Easy DIP insertion.

Series LSI Sockets Designed for socketing the new sizes of LSI dual-in-line and quad-in-line circuits with up to 64 pins on .900 centers. Low profile. Also available in wire wrap.

Pin Grid Array Sockets Off the shelf. Every known pattern and configuration from 64 thru 179 pins. Precision-machined contacts provide low insertion force and highest reliability. Inner contact accepts short lead devices. Closed-end construction. No wicking. Solder or wire wrap tails. Also custom design.

ADAPTERS

Series SA, SB, SC & SD Adapters Low profile. 8 thru 40 positions. Rigid contact-terminals for easy PCB mounting. Stackable end-to-end or side-by-side for high board density.

Series SA (Bifurcated)
Series SB (Bifurcated with flat)
Series SC (Feed thru)
Series SD (Solder cup)

CUSTOM SOCKETS

Our custom capability is as diverse as your requirements. Advise us of your special requirements and we will design to your specs efficiently and economically.

SOCKET & PIN TERMINALS

Series 3000 Wide variety of sockets and terminals in solder or wire wrap tails. High reliability sockets feature four leaf closed entry, inner contact (BeCu per QQ-C-533) and machined outer sleeve (Brass per QQ-B-626). Various styles available such as bifurcated, stitch-weld and feed-thru.

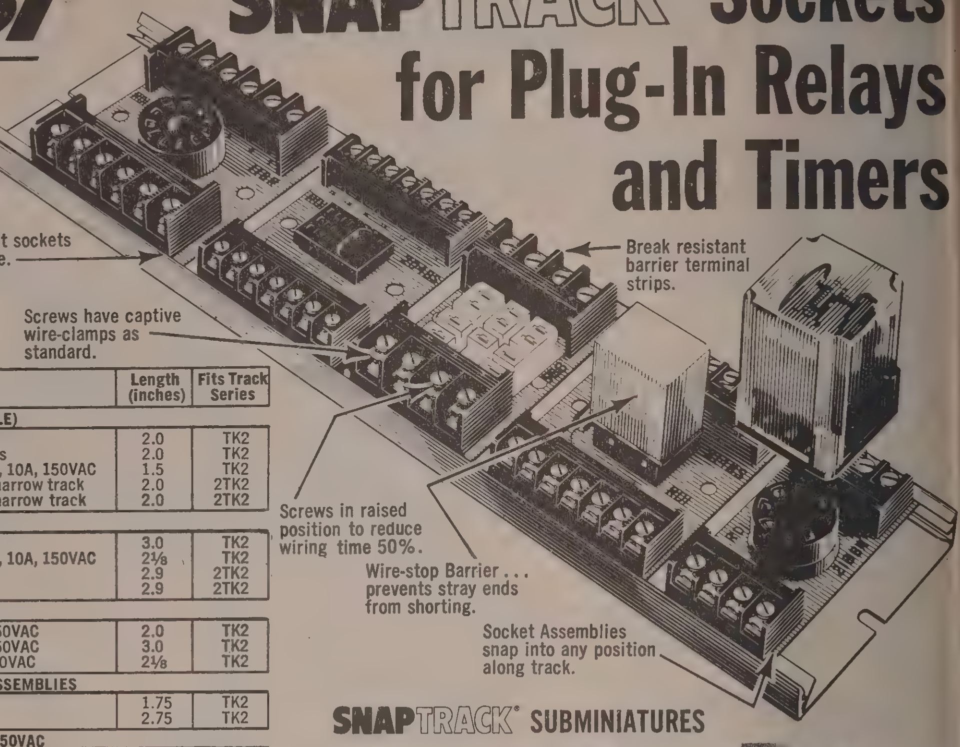
AUGAT® RDI®

Quality and Innovation

SNAPTRACK® Sockets for Plug-In Relays and Timers



PVC non-conductive track up to 48″ long. Mounts quickly.

Over 50 different sockets fit one track size.

Break resistant barrier terminal strips.

Screws have captive wire-clamps as standard.

Screws in raised position to reduce wiring time 50%.

Wire-stop Barrier . . . prevents stray ends from shorting.

Socket Assemblies snap into any position along track.

All SNAPTRACK assemblies are shipped with screws in raised position which reduces wiring time as much as 50%.

SPECIFICATIONS

BARRIER MATERIAL: Flame Retardant Nyon, U.L. 94V-0 flammability, working temperature of 105°C, black color standard. Colors on special order.

TERMINALS: Bright acid-tin plated brass.

SCREWS: Cadmium plated 6-32 steel undercut binderhead. Brass and screws with wire clamp plates available on special order.

RATING: JB6 Series: 20 Amperes, 300 Volts.
JB7 Series: 20 Amperes, 600 Volts.

WIRE RANGE: 12-22 AWG.

APPROVALS: UL recognized File No. E54800. Guide XCFR2. CSA certified, File No. LR30811, Guide 184-N-90.

TOP HARDWARE

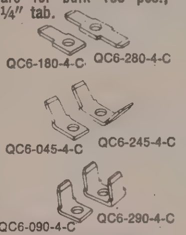
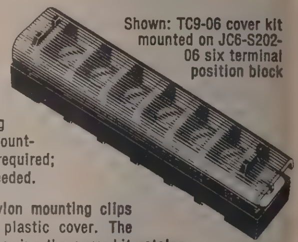
Quick connect tabs available in single and double tab, 3/16″ and 1/4″ wide. Cat. Nos. shown are for bulk 100 pcs., 1/4″ tab.



COVER KITS

Used to protect against accidental shorting of terminal screws. End mounting feet on the block are required; specify when feature is needed.



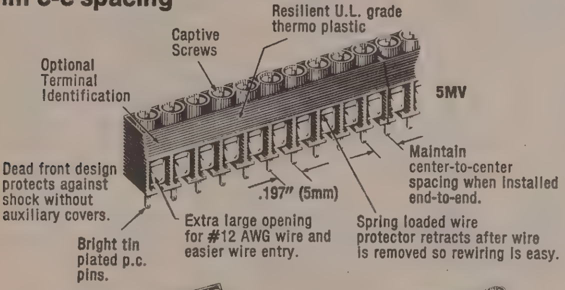
Shown: TC9-06 cover kit mounted on JC6-S202-06 six terminal position block

Cover kit includes two nylon mounting clips and the translucent PVC plastic cover. The two digit dash number following the cover kit catalog number specifies number of live terminals covered, not total number of plastic positions. Order TC9-XX for JC6 series, TC2-XX for BC6 series.

Example: TC9-04 specifies a cover kit for a terminal block with end mounting holes. Would fit JC6-P2022-04 block.

Subminiature Blocks

5mm c-c spacing



Resilient U.L. grade thermo plastic
Captive Screws
Optional Terminal Identification
5MV
Maintain center-to-center spacing when installed end-to-end.
Dead front design protects against shock without auxiliary covers.
.197″ (5mm)
Extra large opening for #12 AWG wire and easier wire entry.
Spring loaded wire protector retracts after wire is removed so rewiring is easy.
Bright tin plated p.c. pins.

GENERAL SPECIFICATIONS

Rating: 15 Amperes, 250 Volts U.L., 10A, 300V. or 15A, 150V. CSA.

Air Gap: 4mm minimum

Breakdown Voltage: 3000 Volts, Minimum

Barrier Material: Polyamid 6/6, U.L. approved, UL 94V-0, flammability classification, 105°C, green.

Terminals: Box type with spring loaded wire protector, brass, bright-tin plated.

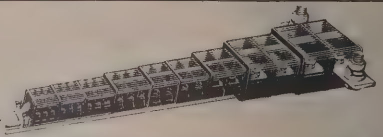
Screws: M2.5, steel, passivated zinc plated.

Wire Range: 12-22 AWG.

Approvals: Creepage and air distance designed to VDE 0110. U.L. recognized and CSA certification.

Power Blocks

rail mount, all fit one size, heavy duty track

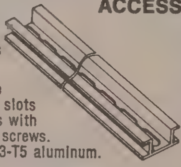


@ 600V	Description	Cat. No.
15 amps	Block, 1.38w x 1.34h x .35Th	F-15
20 amps	Block, 1.38w x 1.44h x .41Th	F-20
35 amps	Block, 1.38w x 1.44h x .47Th	F-25
45 amps	Block, 1.77w x 1.61h x .61Th	F-35
60 amps	Block, 1.77w x 1.73h x .73Th	F-60
70 amps	Block, 1.89w x 1.87h x .83Th	F-80
125 amps	Block, 2.38w x 2.09h x 1.06Th	F-125
200 amps	Block, 2.95w x 2.36h x 1.77Th	F-200
300 amps	Block, 2.95w x 2.36h x 1.77Th	F-300
400 amps	Block, 3.54w x 2.76h x 2.28Th	F-400
600 amps	Block, 7.07w x 2.76h x 2.28Th	F-600

Models F-15 thru F-125 require one end barrier per group. Aluminum track 39.37″ long is BLF-1000. Covers and marker strips available.

ACCESSORIES

MOUNTING RAIL

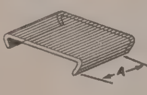


All blocks fit this one size rail.

Heavy duty gauge with pre-punched slots on .79 in. centers with clearance for #8 screws. Extruded of A6063-T5 aluminum.

Cat. No.	Length	Std. Pack
BLF-1000	1 Meter (39in.)	10
BLF-24	24 in.	10
BLF-12	12 in.	10
BLF-6	6 in.	10

PROTECTION COVERS

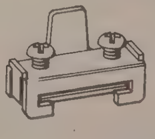


Cat. No.	For Series	"A" Dim.	Std. Pack
CF-15	F-15,-20, -25	1 meter[1]	10
CF-35	F-35 & -60	1 meter[1]	10
CF-80	F-80	1 meter[1]	10
CF-125	F-125	1 meter[1]	10
CF-200	F-200 & -300	width of block	10
CF-400	F-400 & -600	width of block	10

Clear Polycarbonate

[1] Cut to desired length.

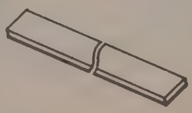
LOCKING BRACKET



Cat. No.	Std. Pack
FK-1	10

Two required per rail length.
Cold rolled steel, zinc dichromate plated.

MARKER STRIPS



Cat. No.	For Series	Std. Pack
NPF	F15,20, 25, 225 60, 80 and 125	10

White PVC, 0.8mm thick, .9 meter long. Marker strips are standard on F-200, -300, -400 and -600.

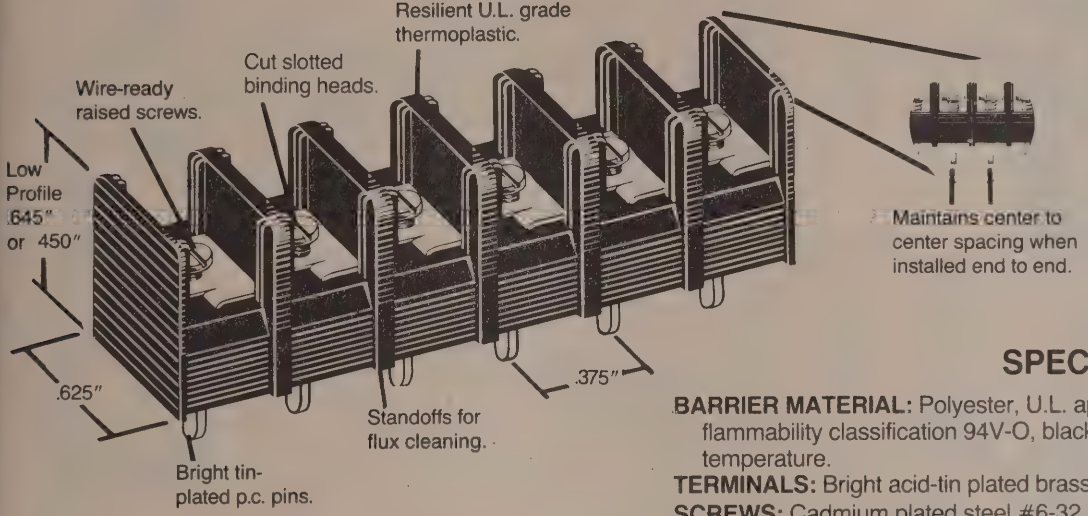
Quality and Innovation

Barrier Terminal Blocks Models LC6 and MC6



Resilient U.L. grade thermoplastic.
Cut slotted binding heads.
Wire-ready raised screws.
Low Profile .645" or .450"
.625"
.375"
Standoffs for flux cleaning.
Bright tin-plated p.c. pins.
Maintains center to center spacing when installed end to end.

Choice of two low profile barriers: .645 and .450 inches

GENERAL SPECIFICATIONS

BARRIER MATERIAL: Polyester, U.L. approved flammability classification 94V-O, black, 130°C operating temperature.

TERMINALS: Bright acid-tin plated brass.

SCREWS: Cadmium plated steel #6-32 under-cut binding head standard. Steel screws with captive wire-clamp washers. Brass screws available as an option.

RATING: LC6 Series: 20 Amperes, 300 Volts, U.L. & CSA. MC6 Series: 20 Amperes, 250 Volts, U.L. & CSA.

WIRE RANGE: 12-22 AWG.

APPROVALS: U.L. recognized, File No. E54800, Guide XCFR2. C.S.A. certified, File No. LR30811, Guide 184-N-90. VDE 0110 acceptable.

Phone 812/945-0211 Robinson Nugent, Inc., 800 East Eighth St., New Albany, Indiana 47150 U.S.A. • TWX 810-540-4082 Cable: ROBNU

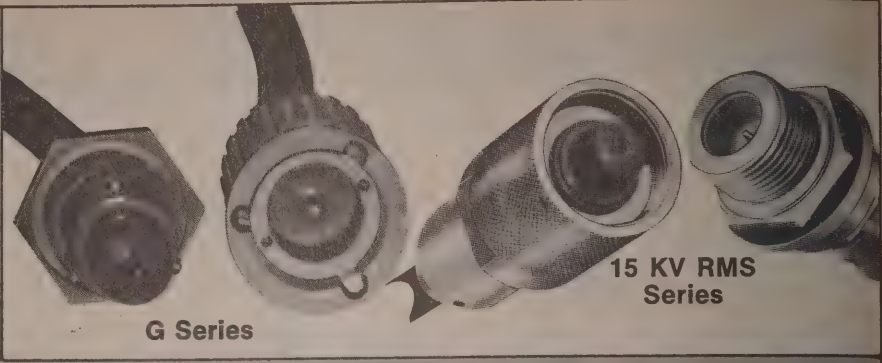
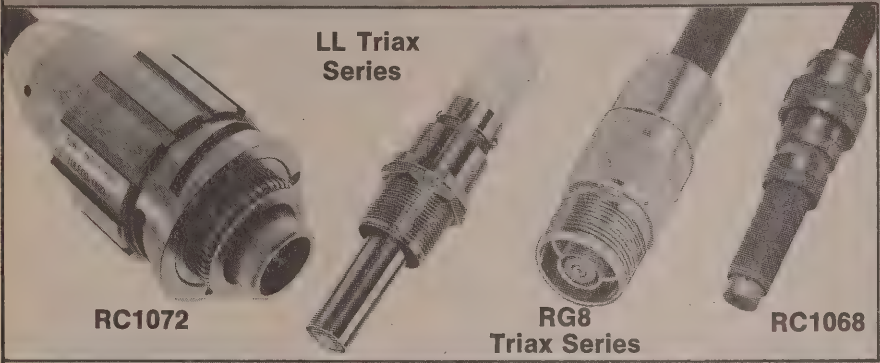
Rowe Coaxial

Connectors and Cable Assemblies

Employ high-voltage, corona-free design techniques. They are ideal for use in pulse as well as DC voltage applications, through 150 KV. A wide variety of molded-on or field assembly types are offered. Available in quick disconnect or screw couplings.



G Series
15 KV RMS Series



LL Triax Series
RC1072
RG8 Triax Series
RC1068

Rowe Triaxial

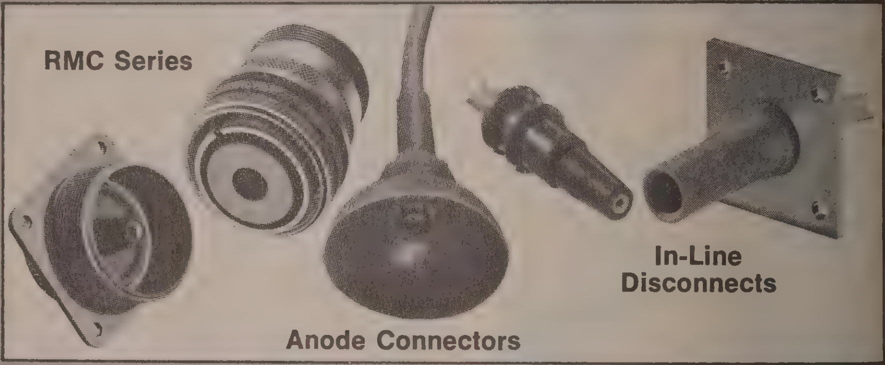
Connectors and Cable Assemblies

A full spectrum of both molded-on and field assembly types are available for a wide variety of cable types such as the triaxial version of RG-8, up through and including specialized construction for operation in excess of 100 KV.

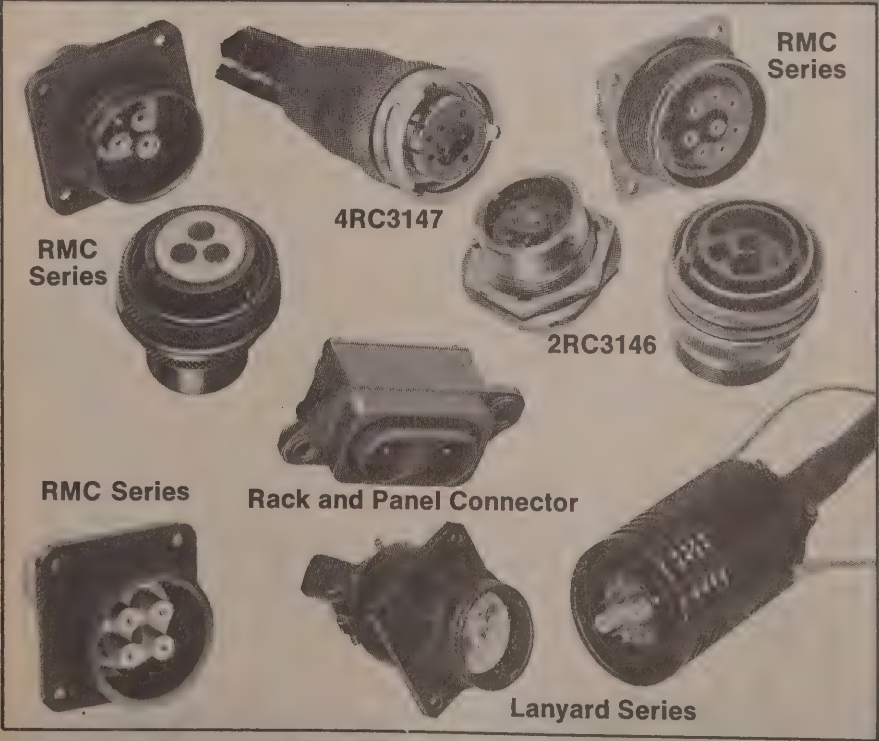
Rowe Single Contact

Connectors and Cable Assemblies

Offered is an extensive listing of single contact high-voltage assemblies, which include anode connectors, in-line disconnects and others which are used unshielded to solve your simple high-voltage interconnection problems.



RMC Series
In-Line Disconnects
Anode Connectors



RMC Series
4RC3147
RMC Series
2RC3146
RMC Series
Rack and Panel Connector
Lanyard Series

Rowe Multiple Contact

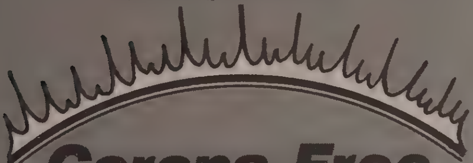
Connectors and Cable Assemblies

Offer contact arrangements from one to thirty contacts, panel receptacles, cable plugs, rack and panel combinations, in-line types and many others. Both field assemblies and molded-on types are standard in this line.

Rowe Industries has designed and developed over 700 specialized interconnections for which tooling is available.

World's Leader in High-Voltage

(through 200 KV)



Corona-Free CONNECTORS and CABLE ASSEMBLIES

ROWE INDUSTRIES

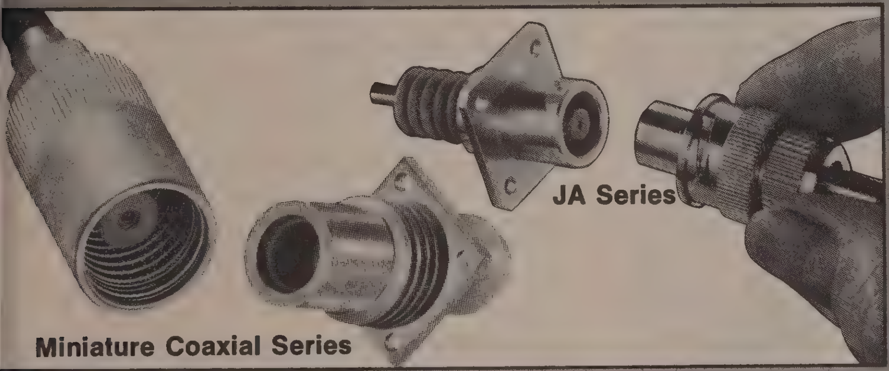
DESIGN — DEVELOPMENT — MANUFACTURING

For reliable high voltage and all temperature wire and cable, see Rowe's ad in the Wire/Cable/Harnesses Section.

FOR YOUR COMMERCIAL, INDUSTRIAL OR MILITARY DESIGN NEEDS



Rowe Miniature Coaxial

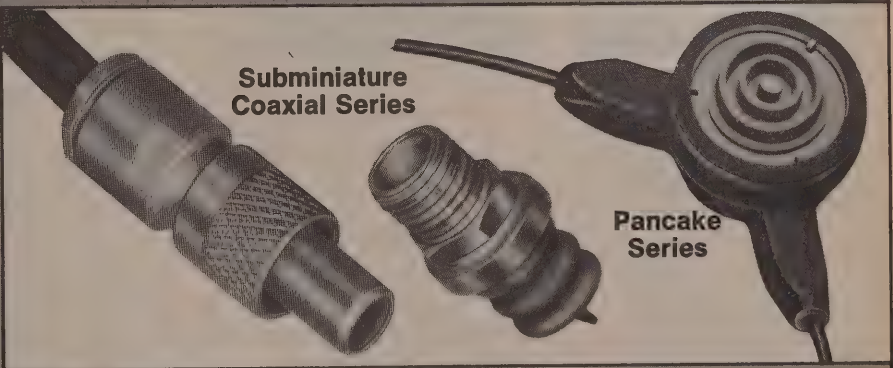
Connectors and Cable Assemblies

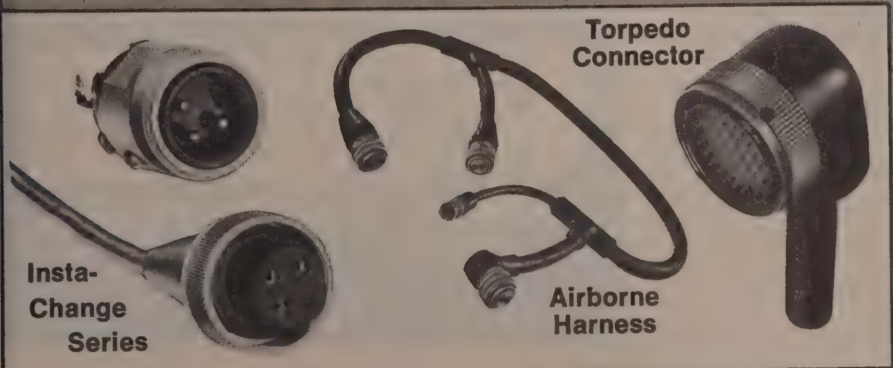
Employ the same high-voltage design techniques as the coaxial series, but are much smaller in size for use in restricted spaces. Available in quick disconnect and screw couplings (the JA Series can be adapted to such standard type cables as RG 58 and RG 59).

Rowe Subminiature Coaxial

Connectors and Cable Assemblies

Are ideally suited for use where space is at a premium. Employing the traditional Rowe high capability features, the subminiature sizes offer unusually high voltage operating capabilities, through 20 KV.





Rowe Low-Voltage, Molded-On

Connectors and Cable Assemblies

For use in severe environments. We can mold your STD connectors to cable for an environmental seal and provide a molded strain relief. Our exclusive Insta-Change series was designed for factory, mining, nuclear and oil well use.

ROWE knows Specialized Interconnections

We're specialists in complete interconnection systems and, in particular, connectors and cable assemblies for extreme environments and unique applications. In fact, we've designed and manufactured hundreds of different connectors and cable assemblies for nuclear instrumentation and control, high voltage, corona-free thru 200 KV+, underwater instrumentation, geophysical, high and low temperatures, corrosive environments, high altitude and deep space, high and low pressures and other sophisticated military and industrial systems.

Rowe engineers design and specify custom products to meet exacting requirements and Rowe craftsmen produce them to the highest quality standards. In addition, we operate one of the most complete testing facilities in the industry. Our destructive and non-destructive testing capability includes:

Electrical Testing
Dielectric strength, corona measurement, RFI/EMI and DIT-MCO computer controlled circuit testing.

Mechanical and Physical Testing
Plating verification thru microscopic analysis, shock and vibration, hydrostatic pressure and helium leak, tensile strength, contact force measurement, optical comparitor equipment, complete x-ray lab.

Environmental Testing
Altitude thru 150,000 feet, temperature, humidity, corrosive atmospheres, accelerated life combining various conditions simultaneously.

Quality Control
Rowe's quality control and inspection systems meet or exceed MIL-Q-9858, ISR-1, NRC's 10CFR50 appendix B and standards of all aerospace and industrial firms.

With so many interconnections to choose from, chances are that we've already developed the one that meets your needs. If not, we'll custom design one for you.

Life testing facilities.

High altitude pressure chamber.

RFI-EMI-EMP test chamber.

High voltage, corona and dielectric test chamber.

Humidity chamber.

DIT-MCO computerized random access testing.

X-Ray equipment.

Hydrostatic pressure testing.

Rowe Industries, Dept. 241/6100 Benore Rd, Toledo, OH 43612

Gentlemen: Please send technical literature I've checked. Thank you.

- ☐ Corona: simple techniques to eliminate it
- ☐ H.V. In-Line Disconnects and Anode Connectors thru 60 KV
- ☐ Rowe multi-contact H.V. connectors
- ☐ Sub-Miniature H.V. coax connectors thru 15 KV
- ☐ RG cable H.V. connectors (JA Series)
- ☐ Miniature Coax Connectors thru 30 KV
- ☐ Corona-free coax connectors thru 20 KV
- ☐ Corona-free high pulse coax connectors thru 40 KV
- ☐ 75 KV coax connectors (R75 Series)
- ☐ Lanyard/Umbilical Connectors
- ☐ Triaxial Connectors thru 30 KV
- ☐ Triaxial Connectors thru 55 KV
- ☐ Molded-On Interconnections
- ☐ Low-Voltage Multi-Pin Connectors (Insta-Change Series)
- ☐ High-Voltage Cable & Wire
- ☐ "All-Temp" High Temperature Wire and Cable
- ☐ SRML, SF-2, SFF-2, Aircraft & Locomotive

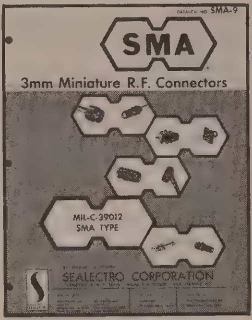
WORLD'S MOST COMPREHENSIVE CONNECTOR COMPENDIUM.

SOLDERLESS SMA
SEALECTRO SOLDERLESS SMA SEMI-RIGID CABLE CONNECTORS
SEALECTRO CORPORATION

BRAND NEW! Solderless SMA Semi-Rigid Cable Connectors. A major breakthrough in semi-rigid SMA cable connectors…fully assembled without soldering! Fast, easy assembly without expensive tooling. Meets or exceeds electrical, cable retention and torque requirements of MIL-C-39012.

HIGH FREQUENCY SLIDE-ON CONNECTORS
SMS
SIS
SMA PLUG
SEALECTRO

BRAND NEW! High Frequency Slide-On Connectors. New SMS connectors provide equally excellent VSWR up to and beyond 18 GHz with no degradation of reliability. Available in SMS, SSMS, SIS Intermediate, and SMA Slide-On Plugs.

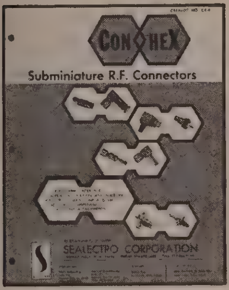


SMA-9
SMA
3mm Miniature R.F. Connectors
MIL-C-39012 SMA TYPE
SEALECTRO CORPORATION

SMA 3mm RF Connectors. Broadest line of SMA connector types in the industry. Six cable attachment methods. Semi-rigid designs available in thick or thin wall construction with low VSWR to 18 GHz, operational to 26 GHz.

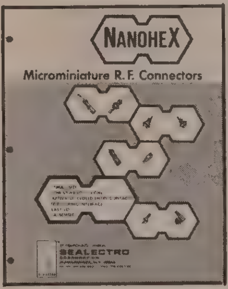
RF Microwave Coaxial Cable Assemblies

RF & Microwave Coaxial Cable Assemblies. Complete technical data on pre-assembled flexible and semi-rigid cable assemblies to your specs, 100% guaranteed mechanically and electrically!



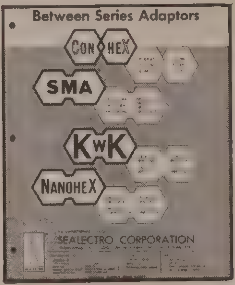
CON HEX
Subminiature R.F. Connectors
SEALECTRO CORPORATION

CONHEX Subminiature RF Connectors (SMB/SMC). Subminiature connectors for use from DC to 12.4 GHz. Screw-on, snap-on and slide-on types, with five cable attachment methods. For 50-ohm or 75-ohm impedance. Series SMB, series SMC per MIL-C-39012.



NANOHEX
Microminiature R.F. Connectors
SEALECTRO

NANOHEX Microminiature RF Connectors. Microminiature RF connectors (proposed types SSMB and SSMC) with 0.100 diameter jacks. Low VSWR from DC to 12.4 GHz. Screw-on, snap-on and slide-on mating types. Meet or exceed the requirements of MIL-C-39012.



Between Series Adaptors
CON HEX
SMA
KwK
NANOHEX
SEALECTRO CORPORATION

Between-Series Adaptors. CONHEX adaptors to SMA, GR-874, GR-900, APC-7, BNC, TNC, N. SMA adaptor to GR-874, GR-900, BNC, TNC, N, APC-7. NANOHEX adaptors to CONHEX (SMB/SMC), SMA, BNC.

QPL R.F. COAXIAL CONNECTORS
SMA SMB SMC

QPL RF Coaxial Connectors. A complete 16 page catalog of Qualified Product Listings to MIL-C-39012, Series SMA, SMB, and SMC. Defines complete envelope dimensions for all designs.

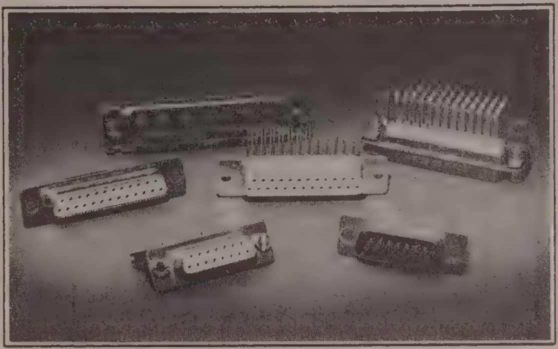
SOURIAU CONNECTORS



D SUBMINIATURE CONNECTORS

- **D• M SERIES**
  Qualified to Mil-C-24308
  Layouts from 9 to 50 contacts
  Solder, P.C., High Power and Coax contact styles
  Monobloc DAP insulator
- **S• MA SERIES**
  Qualified to Mil-C-24308
  5 layouts — 9, 15, 25, 37 and 50 contacts
  Crimp contacts, Rear-release
  Monobloc DAP insulator
- **ORIGINAL D SERIES**
  Intermateable with Mil-C-24308 connectors
  Layouts from 9 to 50 contacts
  Solder, Wirewrap, Straight P.C. and Angled P.C. contact termination
  UL94VO approved insulator material
- **FRUGAL D SERIES**
  Intermateable with Mil-C-24308 connectors
  Low cost stamped and formed contacts
  Layouts 9, 15, 25, 37 and 50
  Solder and Straight P.C. contacts
  UL94VO approved insulator material
- **NORMAN D SERIES**
  Intermateable with Mil-C-24308 connectors
  Low cost crimp version
  Semi-automatic stripper/crimper machine for termination
  Layouts from 9 to 50 contacts
  UL94VO approved insulator material
- **ACCESSORIES**
  Designed for use with all Mil-C-24308 type connectors
  Junction shells, cable clamps, potting shells and locking assemblies available
  Plastic parts are made from UL94VO approved material

851/8526 CIRCULAR CONNECTORS

- **851 SOLDER SERIES**
  Qualified to Mil-C-26482 Series 1
  Shell sizes 8-24
  MS classes E, F and P
  Additional commercial classes available
- **851 CRIMP SERIES**
  Conforms to Mil-C-26482 Series 1
  Arrangements from 3 through 61 contacts
  MS classes E, F and P
  EMI/RFI shielding capability
- **851 WIREWRAP SERIES**
  Conforms to Mil-C-26482 Series 1
  Box Mount and Jam Nut shell styles
  Two and three level contact lengths
  Shell sizes 8-24
  Arrangements from 3 through 61 contacts
- **851 STRAIGHT P.C. SERIES**
  Conforms to Mil-C-26482 Series 1
  Box Mount and Jam Nut receptacles
  Two termination lengths
  Shell sizes 8-24
  Arrangements from 2-61 contacts
- **8526 SERIES**
  Qualified to Mil-C-26482 Series 2
  High temperature rating (200°C)
  Resistant to petroleum fluids
  Shell sizes 8 through 24
  Arrangements from 3 through 61 contacts
- **83723 SERIES**
  Conforms to Mil-C-83723 Series III
  Firewall capability (250°C)
  Fluid resistant
  Contact sizes from AWG #20 through AWG #12

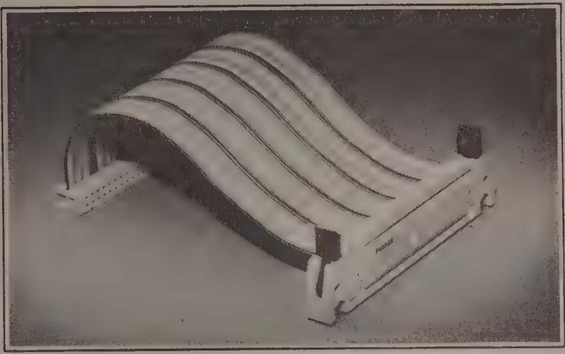
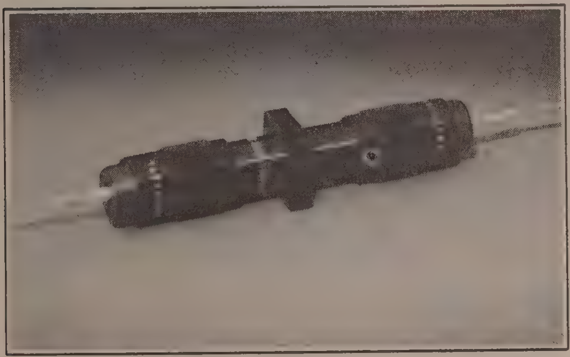
SOURIAU CONNECTORS



INSULATION DISPLACEMENT CONNECTORS

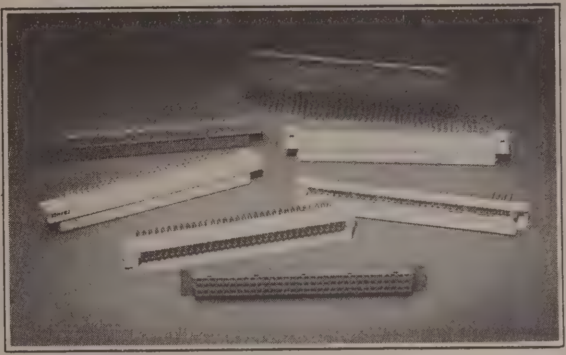
- **8613 SERIES**
  Conforms to Mil-C-83503
  Insulation Displacement termination
  Wirewrap, Straight P.C. and Angled P.C. also available
  Layout with 10, 14, 16, 20, 26, 34, 40 and 50 contacts



FIBER OPTIC CONNECTORS

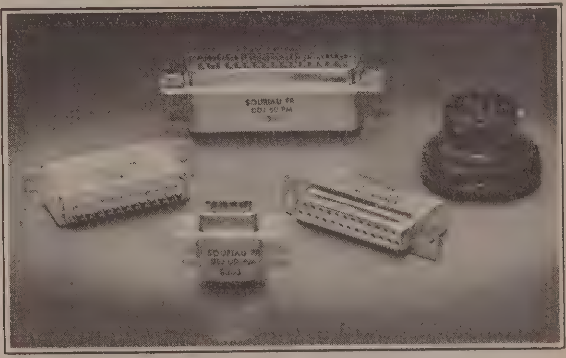
- **8016 SERIES — (PLASTIC)**
  Single channel — disconnectable connector system
  Low insertion loss (average 0.5 dB)
  3 Polarization and antirotation keys
  Replaceable spare probes
  Other configurations available

- **8005 SERIES — (FSMA TYPE)**
  Single channel connector system
  Two methods of termination (crimp/cleaving and crimp/polishing)
  Intermateable with competitive product of similar type
  Used with either 100/140μm or 200/280μm silica fibers



PRINTED CIRCUIT CONNECTORS

- **8609 SERIES**
  Qualified to DIN-41612/Mil-C-55302
  Contact layouts for 16, 32, 48, 64 and 96 terminations — .100" and .200" spacing
  Solder, Wirewrap, Straight P.C. and Angled P.C. contact styles
  Wide variety of accessory hardware
  Standard & reverse mounting
  Grounding pins and selective loading available
  Applications in computers, instrumentation control systems & telecommunications



EMI/RFI FILTER CONNECTORS

- Filtering of interferences at the input/output of electronic equipment
  Derived from standard specification Mil-C-24308
  Selection among 7 types of filters for the appropriate application
  Space savings and cost reduction as compared to discrete filters wired downstream of connector
  Filtered circular connectors also available

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

EMI FILTERED D SUBMINIATURE CONNECTORS

a cost effective way to comply with FCC, MIL-STD-461 A/B, VDE regulations

Spectrum's distributor stocked filtered connector product line is described in detail over the next few pages. All dimensions are shown in inches (metric equivalents in millimeters are in parentheses). Decimal tolerances, unless otherwise specified, are ±.015. All electrical engagement areas (plug and receptacle) are gold plated copper alloy. All terminations (printed circuit board right angle, solderless wire wrap and solder cup) are solderable. Shells are tinned aluminum. Insulators and right angle brackets are UL rated 94 V-0. Radio frequency ground contact from the connector shell to the mating connector is assured by a coaxial spring clip on the pin side of the plug, the socket side of the receptacle and both pin and socket sides of the adaptor. EMI filter types specified are either Pi-Section (Pi) or Feed-through (FT).

EMI FILTER PERFORMANCE

Filter Designation	Filter Circuits	Capacitance		3 dB Max Cut-Off Frequency (MHz)	Dielectric W'Standing Voltage	Contact Rating	Contact Resist.	Working Voltage DC	Minimum Insertion Loss — Decibels (dB)

25	56-725-001 56-725-003 56-725-005 56-725-019	A C E F	2.088 (53.04)	1.508 (38.30)	.494 (12.55)	1.852 (47.04)	.308 (7.82)	1.534 (38.96)	.329 (8.36)
37	56-735-001 56-735-003 56-735-005 56-735-008	A C E F	2.729 (69.32)	2.156 (54.76)	.494 (12.55)	2.500 (63.50)	.308 (7.82)	2.182 (55.42)	.329 (8.36)
50*	56-745-001 56-745-003 56-745-005 56-745-006	A C E F	2.635 (66.93)	2.062 (52.37)	.605 (15.37)	2.406 (61.11)	.420 (10.67)	2.079 (52.81)	.436 (11.07)

This versatile new idea fills a variety of needs. Several OEM's are using the product to avoid costly system redesign while some consumers of personal computers are using the adaptor to eliminate troublesome field 'glitches'. The adaptor also features a coaxial grounding system to insure that proper filtering is achieved.

See page 4 for performance characteristics of filter types.

*Shell size 50 has three rows of terminations, shell sizes 9 through 37 have two rows of terminations.

For Panel Cutouts see page 8.

(Shown in Free State)

Proper mounting of any EMI filter — including the EMI filtered D Subminiature — is critical to the achievement of electromagnetic compatibility. The mounting surface for grounding the connector must be free from paint or any other insulating material. The sketches above indicate the use of one of Spectrum's EMI gaskets to fill any tolerance gaps and adjust for irregularities in the flatness of the mounting surface.

Spectrum Control fabricates a full line of gasket and shielding materials for EMI purposes, as well as environmental needs. Indicate front or rear mounting by part number described above.

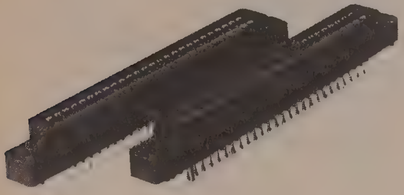
Sullins ELECTRONICS CORP. / PRINTED CIRCUIT CONNECTORS

EZ SERIES—LOW PROFILE DIP SOLDER/ EYELET



FEATURES

- Insulation Resistance: 5,000 Megohms
- Solvent Resistance: Perchloroethylene Freon 113, Freon 11, Trichloroethylene
- Rated Voltage (At sea level): 600 VDC, 800 VDC, 1800 VDC, for contact centers of .100, .125, .156, respectively
- Current Rating: 3 amperes
- Voltage Drop: 30 MV at rated current
- Contact Resistance: 10 milliohms maximum
- Operating Temperature: −65°C to +125°C For Standard Valox with Phosphor Bronze
- Board Insertion Force: 16 ozs maximum per contact pair using .062 steel test blade
- Board Withdrawal Force: 1 oz minimum per contact pair using .062 steel test blade
- Accommodates .062 PC board
- Bifurcated full bellows contacts

MATERIALS

- Insulator: Glass filled thermoplastic polyester (Blue Valox*) or polyphenylene sulfide (green Ryton*)
- Contacts: Copper alloy contacts with gold over nickel plating on contact surface; tin/lead or gold over nickel on the tail

* (Trademarks: General Electric Valox, Philips 66 Ryton)

POLARIZATION KEYS

- P/N PLA-K1 for .100 centers between contact key
- P/N PLA-K1 for .125 centers between contact key
- P/N PLM-K1 for .156 centers between contact k
- P/N PLM-K2 for .156 centers in position key

FEATURES

- Insulation Resistance: 5,000 Megohms
- Solvent Resistance: Perchloroethylene Freon 113, Freon 11, Trichloroethylene
- Rated Voltage (At set level): 600 VDC, 800 VDC, 1800 VDC, for contact centers of .100, .125, .156, respectively
- Current Rating: 3 amperes

MATERIALS

- Insulator: Glass filled thermoplastic polyester (Blue Valox)
- Contacts: Phosphor Bronze contacts with gold or tin/lead over nickel plating

* Trademark of Gardner Denver

- Voltage Drop: 30 MV at rated current
- Contact Resistance: 10 milliohms maximum
- Operating Temperature: −65°C to +125°C
- Board Insertion Force: 16 ozs maximum per contact pair using .062 steel test blade
- Board Withdrawal Force: 1 oz minimum per contact pair using .062 steel test blade
- Accommodates .062 PC board
- Bifurcated bellows contacts

POLARIZATION KEYS

- P/N PLC-K1 (Order separately) for between contact polarization

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire guage

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction code
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C

CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DC direct curent
DIL dual in-line
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E

EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EPROM electrically programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LSI large scale integration
LVDT linear velocity displacement transformer

M

MATV master antenna television
μF microforad
MHz megahertz
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NIM nuclear instrumentation module
NOR not OR

O

OEM original equipment manufacturer
OR a logical operator

P

pF picofarad
PC printed circuit
PCB printed circuit board
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PPI plan position indicator
PROM programmable read only memory
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detecto
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylen Copolymer, 250° Teflon
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

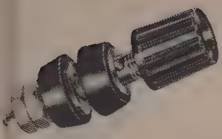
WPS word processing software

Y

YIG yttrium iron garnet

5-way® BINDING POSTS

5 WAYS TO CONNECT ● GOLD-PLATED BRASS PARTS ● RANGE OF COLORS



FLUTED NUT TYPES

Plastic parts of standard (not miniature) size types molded of Lexan polycarbonate resin; brass parts are gold-plated. Rated for 30 amperes, 1000 volts working.

HEX NUT TYPES

Rated for 30 amperes, 1000 volts working. Brass parts gold-plated; plastic parts are of nylon compounded to meet military specifications MIL-P-20693A, Type IV.

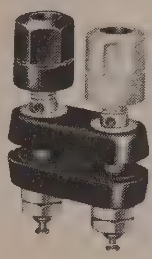
GROUNDING TYPE

For making rapid connections to ground. Made of finely machined brass nickel-plated and polished. Panel grounding collar frozen to shaft has "D" type shoulder for locking in keyed panel hole.

MINIATURE TYPES

Fluted nut design. Rated for 15 amperes, 1000 volts working. Nylon parts meet military specification MIL-P-20693A, Type IV. Limited clearances between insulated and current-carrying parts on BP21 types minimize possibility of accidental contact.

DOUBLE ASSEMBLY TYPES

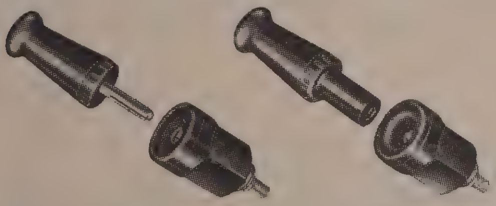


For instrument and equipment panels requiring binding posts mounted on ¾" centers. Rated for a current capacity of 30 amperes and a working voltage of 1000 volts. Brass parts are gold-plated; panel insulators in black only. Self-contained assembly makes mounting more accurate, faster and easier than two individual binding posts and gives maximum strength where connections are frequently made.

STYLE	TYPE
Fluted Nut – Standard	DF31*
Hex Nut – Standard	DF30*
Grounding – All Metal	GP30NC
Fluted Nut – Miniature	DF21*
Fluted Nut – Mini Ltd. Clear.	BP21*
DOUBLE ASSEMBLY TYPE	
Black & Red Hex Nut	DF30-2-BRC

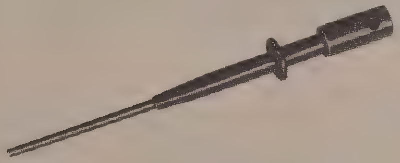
*Indicate color desired: red, white, blue, black, yellow or green.

SUPERCON®
ELECTRICAL CONNECTORS



Nylon plastic parts; gold-plated brass current-carrying parts. Wiring connections to the same plug can be either soldered or solderless. Plug cable-fastening screws permit a wide range of cable sizes. Plug grips are of a simple, two-piece threaded construction for quick assembly. All receptacle plastic parts are molded of the same color to permit more rapid and accurate circuit identification front and back of panel when installed. The 25, 50 and 100 ampere types are listed by Underwriters' Laboratories, Inc. In red, black, white, blue, green or yellow.

5-WAY™
TEST PROBES



For test connections to PC boards and other electronic components. Design allows connections by hooking onto component leads or by plugging into Superior Electric 207146-001-JB terminals or others having 0.080" diameter receptacles. For plug-in, conductor holds firmly to inside of receptacle under spring tension. When used for hook-on, probe clamps to component lead or wire wrapping pin with approximately 16 oz. force. Conductor beryllium copper tempered to spring hardness. Insulating parts durable nylon plastic capable of withstanding 250°F without deforming. Available in red, black, white, blue, green or yellow.

THE SUPERIOR ELECTRIC COMPANY

1000 Middle Street / Bristol, Connecticut 06010 / Telephone: (203) 582-9561

"Q-G" AUDIO CONNECTORS WITH COMPLETE GROUNDING PROVISIONS!

Switchcraft "Quick-Ground" connectors feature a separate "Ground-Terminal" electrically integral with connector shell. Ground continuity between mating plugs automatically accomplished through exclusive "Ground Contactors". Possible loss of insert screw is eliminated by new "Captive-Design" insert screw. Socket and pin assemblies utilize "wedge-action" to insure firm, reliable positioning in connector shell. Inserts are easily removable for wiring & soldering. High impact thermosetting plastic material insures long reliable insert assy. life. Female connectors have latch lock feature to hold connectors firmly together. Plugs and receptacle mechanically keyed for proper mating. "Q-G" (*) Series 3-, 4-, 5-, 6-, and 7-pin/contact connectors offer 4-, 5-, 6-, 7-, & 8-pin contact versatility when "Ground-Terminal" is used. Used interchangeably with Switchcraft QGP connectors (page 41): 3- and 4-contact (Amphenol 91-850 and Excellite 91-450 Series, and Cannon XLR-3, XLR-4): 5-contact (Cannon XLR-5 and Amphenol Excellite 91-450 Series).

Cord plug part no. suffix "L" indicates strain relief accepts cables from .25 in. (6.35 mm) to .328 in. (8.33 mm) dia.; other plugs accept cables up to .25 in. (6.35 mm) dia. (*) Number of insert contacts or pins must be specified to complete part number.

Part number with suffix "B" indicates cord plug with "Black-Velvet" black finish (minimizes glare and permits stable "through-connector" shielding). Suffix "D" indicates type with "FAS-DISCONNECT" detent feature. U.S. Patent 3,219,961; Canadian Patent No. 761,114 (June 13, 1967)

Specifications:

ELECTRICAL
(QG Connectors Only)

Contact Resistance: 50 milliohm max., per pole
Current Rating: 3 pole–15A; 4 pole–10 A, 5 & 6 pole–7.5 A; 7 pole–5 A.
Insulation Resistance: 1,000 megohms, min.
Dielectric Withstanding Voltage: 1,000 V (rms)
Capacitance: 2 Pf between pins and 4 Pf between pins and shell, max. (A3M & A3F)

MECHANICAL
(QG Connectors Only)

Insertion/Withdrawal Forces: 7 lb. max., 5 lb. nominal, insertion; 7 lb. max., 5 lb. nominal, withdrawal.

MATERIAL
QG Connectors

Shell: Die-cast zinc. Satin nickel finish on all shells, except a black, electrically conductive, chrome plate finish on "Black-Velvet" shells.
Insert Insulation: High-impact, molded thermo-setting plastic.
Socket Contacts: Phosphor bronze, silver plated, chromate dipped; bifurcated on 3-contact type.
Pin Contacts: Brass, silver plated, chromate dipped, Resists tarnishing, and provides excellent electrical conductivity.
Latchlock: High-strength die-cast zinc.
Latch Release: Steel, nickel plated.
Latch Detent: Formed stainless steel.
Insert Screw: Stainless steel.
Cable Relief Bushing: Neoprene.
Mounting Nut and Washer: Brass, nickel plated. (Black, electrically conductive chrome plate finish for "Black Velvet" receptacles).
Mounting Wall Plates: Cold-rolled steel, with stainless steel finish.

QGP Connectors
Shell: Die-cast zinc, non-reflective Vel-Tone finish.
Insert Insulation: High strength, reinforced thermoset plastic.
Socket Contacts: Phosphor bronze, 50 microinch gold (over 50 microinch nickel) plated.
Pin Contact: Brass, 50 microinch gold (over 50 microinch nickel) plated.
Latchlock: Die-cast zinc, non-reflective nickel finish.
Latch Release: Steel, nickel plated.
Cable Relief Bushing: Flexible gray neoprene.
Barrel: (Female connectors only) Stainless steel.
Mounting Screws: Stainless steel, passivated, non-reflective finish.
Spanner Nut: (QGP-3-28) Die-cast zinc, nickel plated.
Nut: (QGP-3-29) Brass, nickel plated.
Washer: (QGP-3-29) Steel, nickel plated.

SWITCHCRAFT® A Raytheon Company

MOLDED CABLES WITH DIN PLUGS

Switchcraft's versatile system of molded cable assemblies and mating receptacles meets the increased demand for modern, miniature connectors for a wide range of electrical/electronic applications. Connectors are DIN circular type and are fully field-proven in electronic applications. Strict requirements of FCC 20780 docket are fully addressed in offering fully shielded links.

The system comprises male and female plugs, locking and non-locking, with from 3 to 8 pins/contacts. Units are fully molded and protected with a rugged handle and advanced design cable relief. A complete range of mating receptacles is also available.

STYLE RA-374

DIN (Deutsch Industrie Norm) plugs are available as part of complete molded cable assemblies. Both male and female plugs can be specified with straight or right angle molded handles, rugged cable reliefs and polarized mating . . . and with a choice of additional valuable features, such as: "Anti-Vibration" lock ring fastening-a 30° twist locks or unlocks mating connectors; "Ground Key Rib" and "Ground Contact" engage during mating for full, through the connector shielding.

Molded cable features include improved strain relief; better match of cable diameter to plug/connector handle; greater protection from wear to cable entry point; less exposed area, better resistance to moisture contamination, dust, dirt, etc.; lower weight/size compared to non-molded assemblies; superior shielding effectiveness on all types; color of molded cables to match or complement equipment color; molded cables are 100% tested for continuity, shorts, appearance, and voltage breakdown (250 or 500 volts).

SWITCHCRAFT

A Raytheon Company

CIRCULAR DIN CONNECTORS

Designed for low level circuitry, for unlimited use in computer, commercial, industrial, consumer and military applications. Exact replacements for plugs and receptacles, used on most foreign built recorders, radios and dictation equipment. Also used extensively for computer keyboard, I/O and peripheral applications. "Switchcraft/DIN" 2 to 8 contact connectors include male and female plugs and receptacles with bright nickel-plated barrels & plastic snap-on shells. Lock-ring coupling, silver plated contact pins for low contact resistance, contact friction coupling for low mechanical interference noise, exclusive "automatic" grounding and polarization provisions. Full line of receptacles offer thru panel, PC board and surface mounting. Positioning "Ground Key-Rib" or "Ground Contact" — electrically integral with the connector shell — is provided in each plug and receptacle (except those with plastic housing or shells) to ground or shield the connector shell. Right angle PC board mount for common ground use also available.

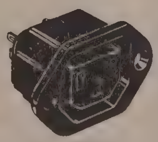
EUROPEAN AC RECEPTACLES

EAC-301
UL, CSA, VDE



EAC-305, EAC-306
UL, CSA, VDE
(CERTIFICATE OF COMPLIANCE; EAC-305 only)

EAC-303
UL, CSA, VDE

Receptacles mate with European power plugs. Choose from panel/chassis or PC mount types. U.L. and C.S.A. listed types. Rating 6 A, 250 V AC or 15 A, 250 V AC. No. EAC-301 is VDE approved; No. EAC-305 has VDE Certificate of Compliance.

Part No. EAC-301 — Grounding types, 3 pin male receptacle. 6 A, 250 V AC; U.L. C.S.A., VDE listed. Mates with Switchcraft power cords Nos. P-2392, P-2720, P-2721, P-2722, P-2725, P-2727, P-2728; Belden SPH-386; or equiv. Rear mounts in 1.201 in. (30.51 mm) x .875 in. (22.22 mm) hole or front mounts in 1.08 in. (27.43 mm) x .785 in. (19.94 mm) hole in chassis/panel with 2, #5 screws or .125 in. (3.18 mm) dia. rivets (not supplied). Longer grounding pin allows ground circuit to "make" before power circuit, and "break" after power circuit disconnects. Pins .045 in. (1.14 mm) x .157 in. (3.99 mm) and terminals: silver plated.

Part No. EAC-303 — Grounding type 3-pin male receptacle with right-angle housing and pins for PC board mtg. Ground lug (solder type) also supplied. .136 in. (3.45 mm) dia. housing holes also permit panel/chassis mount. 6 A, 250 V AC rating: U.L. & C.S.A. listed. Same rear mount as No. EAC-301. Pin terminals silver-plated brass. Mates with same cords as Nos. EAC-301.

Part No. EAC-305 — Grounding type, 3-contact female receptacle Rated: 6 A, 250 V AC: U.L. & C.S.A. listed. Front panel/chassis mount in 1.275 in. (32.39 mm) x 1.56 in. (39.62 mm) hole with 2, #5 screws or .125 in. (3.18 mm) rivets (not supplied). Mates with Switchcraft power cords Parts Nos. P-2721, P-2725; Belden SPH-388: or equiv. Contacts/terminals: brass.

No. EAC-306 — Similar to EAC-305, except 15 A, 250 V AC rating U.L. & C.S.A. listed.

SWITCHCRAFT®

A Raytheon Company

Littel-Jax PHONE JACKS

Quality phone jacks that mate with standard .25 in. (6.35 mm) or .21 in. (5.33 mm) phone plugs. Notched insulating washers mechanically interlock springs and solder lugs. "V" bend in tip spring firmly holds mating plug. Minimum space requirements. Mounts in single .375 in. (9.52 mm) hole, panels up to .156 in. (3.96 mm) thick, except L-11 and L-12A in panels up to .25 in. (6.35 mm) thick. PC-12A; std. .25 in. (6.35 mm) dia. bushing.

Littel-Jax PHONE JACKS with QUICK CONNECT TERMINALS. Littel-Jax jacks, Nos. FA-11 & FAL-11 with quick connect terminals accept AMP FASTON* 205 Series receptacles. Mounts in .375 in. (9.52 mm) dia. holes on 1.375 in. (34.92 mm) centers (min.) Locknut and washer supplied. *Trademark of AMP INC.

NOTE: [1] Mating Plugs — PJ-055B, M642/4-1; PJ-055R, M642/4-2; PJ-055M, 642/4-3.

THREE CONDUCTOR TYPES

Part No.	Schematic No.	Typical Mating Plug	MIL-Type	Description
12B	IV	267	—	Double open circuit
C-12B	IV	480 (PJ-068, M642/5-1)	MIL Type JJ-033, Part No. M641/5-1	—
L-12B	IV	267	—	.375 in. (9.52 mm) lg. bushing
S-12B	IV	480 (PJ-068, M642/5-1)	—	.21 in. (5.33 mm) I.D. bushing
13B	VII	267	—	Tip shunt
S-13B	VII	480 (PJ-068, M642/5-1)	—	.21 in. (5.33 mm) I.D. bushing
14B	XII	267	—	Double closed circuit

Tini-Jax MINIATURE PHONE JACKS

41

Miniature 2-cond. phone jacks, approximately 1/3 the size of Littel-Jax jack, otherwise similar in construction. Mounts in .25 in. (6.35 mm) dia. hole; panels up to .125 in. (3.18 mm) thick. No. 43A has unique spring design requiring a pear-shaped tip, such as on Switchcraft Tini-Plug No. 750.

Part No.	Schematic No.	Typical Mating Plug	Cond.
41	I	750	2
42A	III	750	2
43A	Note 1	750	2

NOTE: [1] Special transfer circuit. When inserted, plug tip contacts "make" tip spring. Further insertion allows tip to short "make" tip spring and tip spring together. Full insertion opens tip short circuit.

Micro-Jax SUBMINIATURE PHONE JACKS

TR-2A

Miniaturized jack has 2-cond. single closed circuit. See Schematic Circuit III. Silver plated, special tempered nickel silver springs. Internally keyed nylon insulation interlocks springs and solder lugs to eliminate shorts. Fits .190 in. (4.83 mm) dia. hole in panels to .094 in. (2.39 mm) thick. Only 1/25th the size of standard phone jacks. Mates with Micro-Plug plug. Series 850, 880.
Switchcraft Part No. TR-2A

SWITCHCRAFT®

A Raytheon Company

Hi-D Jax ENCLOSED PHONE JACKS

Series 110: Smaller, compact phone jacks mate with std. .25 in. (6.35 mm) phone plugs. Molded body protects integral silver-plated springs. Low contact resistance; low electrical leakage and low capacity between springs. Mounts on .625 in. (15.88 mm) center in single .375 in. (9.52 mm) hole in panels up to .156 in. (3.96 mm) thick, depth behind panel 1.094 in. (27.79 mm). All jacks with "M" prefix designed and adjusted to mate with telephone and MIL-std. plugs. Jacks with PC terms, mount to single, double-sided and multilayer boards up to .094 in. (2.39 mm) thick. Standoff shoulders; mounting hardware supplied.

Series RN-110: Right angle jack, saves mounting space on PC boards for commercial and telephone/MIL applications. Available in 2- and 3-cond. types with or without shunt circuits; all mate with .25 in. (6.35 mm) dia. COMMERCIAL or TELEPHONE/MIL plug finger configurations. Right angle jack permits tip of mating plug to be inserted parallel with PC board. Can be mtd. on PC boards, combined PC board and panel/chassis, or panel/chassis only. Jack bushing mounts through .375 in. (9.52 mm) dia. hole in panels or chassis up to .141 in. (3.58 mm) thick. Mtg. centers .625 in. (15.88 mm) min. Washer & locknut supplied.

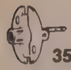
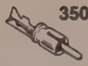
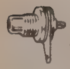
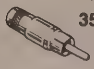
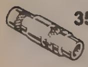
A Raytheon Company

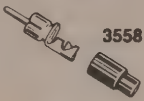


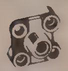


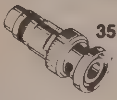












PHONO JACKS AND PLUGS

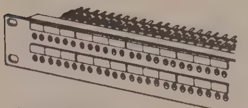
Low cost 2-cond. jacks and plugs for record players, FM-AM tuners, tape recorders, test equipment, etc. 3501MC has .375 in. (9.52 mm) O.D. shell and cable clamp. 3501FP for front panel mount in .25 in. (6.35 mm) hole in panels up to .125 in. (3.18 mm) thick. 3501FR for rear panel mount in .375 in. (9.52 mm) hole in panels up to .203 in. (5.16 mm) thick. 3502 has unique cable clamp with .406 in. (10.31 mm) O.D. shielded removable handle. 3503 extension jack has shielded removable handle .406 in. (10.31 mm) O.D. with cable clamp.

Series 3558 are phono plugs with cable clamp and "snap-on" color-coded plastic handles in red, black and white.

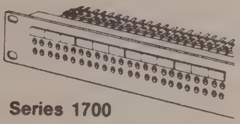
Series 3511, 4 Leaf Clover Jax, molded phono Jack with dual contact surfaces for low shunt resistance. Open and closed circuit types. Mates with all Switchcraft phono plugs.

Part No.	Description
3501F	Phono jack
3501M	Plug, less cable clamp
3501MC	Plug with cable clamp
3501FP	—
3501FR	Phono jack
3502	Plug
3503	Extension Plug
3558-1	Plug, red handle
3558-2	Plug, black handle
3558-5	Plug, white handle
3511	Phono jack, open circuit
3511A	Phono jack, open circuit grounded
3512	Phono jack, closed circuit
3512A	Phono jack, closed circuit grounded
3513	Phono Jack-to-BNC Connector Adapter

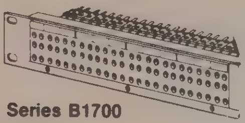
SERIES TT "tini-telephone" JACK PANELS



Series 1600



Series 1700



Series B1700

Series 1600 double row panel: 96 "TT-Jax" jacks, aluminum panel & four, molded plastic inserts (24 jacks each).

Series 1700 double row panel: 48 "TT-Twin-Jax" jacks, aluminum panel & two molded plastic inserts (24 twin jacks each).

Series B1700: Similar to Series 1700 exc. mounts 48 "Tri-Jax" jacks on two inserts.

Panels provide up to 104 jacks in area 1.75 in. (44.45 mm) x 19 in. (482.6 mm) or 156 jacks in area 2.625 in. (66.68 mm) x 19 in. (482.6 mm) in standard panels. Black anodized, extruded aluminum construction with extra wide flange for rigidity.

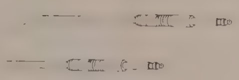
All series have "Kwik-Change" designation strips consisting of clear plastic snap-on cover & reusable plastic marking strip. U.S. Pat. No. 3,597,867.

Part No.	Number of Jacks	Panel Inserts
1600	96[1], single	TT-505 (24 holes) (24 Jacks) or TT-506 (blank)
1632A	96, TT-32A	
1634B	96, TT-34B	
1700	48[1], twin	TT-507 (48 holes) (24 Jacks) or TT-508 (blank)
1789	48, TT-89	
B1700	48[1], "Tri-Jax"	TT-511 (72 holes) (24 Jacks)
B1795	48, TT-95 "Tri-Jax"	

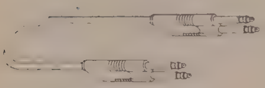
NOTE: [1] Supplied less jacks.

TT-PLUG MINIATURE TELEPHONE PATCH CORDS AND "TT" Twin Plug PATCH CORDS

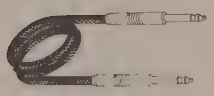
Series TT-100



Series TT-120



Series TT-160



Series TT-740

Series TT-860

TT-Patch Cord cords mate with "Unijax" jacks; "TT-Jax" jacks, Series TT-30, WTT-30, TT-600; Nos. TT-89 & WTT-89 "TT Twin-Jax" jacks; & Nos. TT-95 & WTT-95 "Tri-Jax" jacks. TT-Patch Cord cords with twin plugs mate with "TT Twin-Jax" jacks and single "TT-Jax" jacks spaced on .312 in. (7.92 mm) centers.

Patch cords are available in 2 styles:

- 2-cond. and 3-cond. single and twin plugs, molded on a shielded, grey plastic jacketed cable.
- 2-cond. and 3-cond. attachable single and twin plugs with a shielded, black woven nylon jacketed patch cond.

Part No.	Length, ft. (m)	Cond.	Description
TT-102	1 (.305)	2	Single cond. shielded cable with 2-cond. phone plug molded at each end. (Single plugs)
TT-104	2 (.610)		
TT-108	5 (1.524)		
TT-121	0.5 (.152)	3	2-cond. shielded cable with 3-cond. phone plugs molded at each end. (Single plugs)
TT-122	1 (.305)		
TT-124	2 (.610)		
TT-126	3 (.914)		
TT-127	4 (1.219)		
TT-128	5 (1.524)		
TT-164	2 (.610)	5	4-cond. shielded cable with 5-cond. twin plug molded (each end). Sleeve circuits common. Tip circuits wired tip-to-tip: ring circuits, ring-to-ring. (Twin plug)
TT-166	3 (.914)		
TT-167	4 (1.219)		
TT-168	5 (1.524)		
TT-742	1 (.305)	3	2-cond. shielded cord with TT-253 phone plug attached at each end. Shield is grounded to sleeve of each plug; 2 cond. are wired tip-to-tip and ring-to-ring. (Single plugs)
TT-744	2 (.610)		
TT-746	3 (.914)		
TT-747	4 (1.219)		
TT-749	6 (1.829)		
TT-869	6 (1.829)	5	4-cond. shielded (5-circuit) cord with a TT-263 twin phone plug attached at each end. Plug sleeves at both ends connected in common through shield. Tips and rings wired to corresponding plug fingers at both ends. (Twin plugs)

Switchcraft, Inc., 5555 N. Elston Ave., Chicago, IL 60630 Tel. (312) 792-2700 TWX 910-221-5199

SWITCHCRAFT A Raytheon Company

"Tini-D Jax" MINIATURE ENCLOSED PHONE JACKS

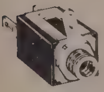
PC-142A

Small, completely enclosed 2-cond. molded phone jack. Phenolic housing protects bifurcated beryllium copper springs from bending during mounting. Mounts on .375 in. (9.52 mm) centers in .25 in. (6.35 mm) dia. hole in panels up to .125 in. (3.18 mm) thick. Depth behind panel .625 in. (15.88 mm).

Part No.	Description	Schematic No.	Typical Mating Plug
142A	Bushing mount	III	750
PC-142A	PC board mount[1]		

NOTE: [1] Threaded bushing for conventional mounting and special spring terminals that "snap-in" PC boards up to .125 in. (3.18 mm) thick.

"Micro-D Jax" SUBMINIATURE ENCLOSED PHONE JACK

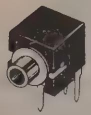


MDSL-2A

MDSL-2A-RA

MDPC-2A

"Super-small," shunted, fully enclosed jack — only .312 in. (7.92 mm) x .344 in. (8.74 mm) x .688 in. (17.48 mm). 1-piece molded body locks all internal parts in place. Mates with Switchcraft Micro-Plug phone plugs. PC terminals have standoff shoulders. Nos. MDSL-2A & MDSL-2A-RA have #10-48 threaded bushing; mounting washer & locknut supplied.

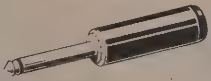


MDPC-2A-RA

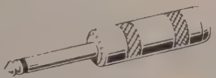
Part No.	Schematic No.	Typical Mating Plug	Cond.	Terminals	Mounting In. (mm)
MDSL-2A	III	850, 851	2	Solder lug	Mounts thru .203 (5.16) hole, in panels up to .063 (1.6) thick. Singly or in rows on .350 (8.89) min. centers. Adjacent sleeves touch when mtd. on .315 (8.00) centers.
MDPC-2A	III	850, 851	2	PC	Mounts singly or in rows on .315 (8.00) min. centers or .350 (8.89) min. centers
MDSL-2A-RA	III	850, 851	2	Solder lug	Same as Part No. MDSL-2A except right angle solder lug terms. for min. space. Behind panel clearance .382 (9.70)
MDPC-2A-RA	III	850, 851	2	PC	Same as Part No. MDPC-2A except right angle PC terms. Above PC board clearance .345 (8.76)

Littel-Plug PHONE PLUGS

Phone plugs fit std. .25 in. (6.35 mm) phone jacks. Solder terminal plugs have built-in cable clamp. Shielded metal handles are nickel-plated brass or durable molded plastic: 1.688 in. (42.88 mm) long x .5 in. (12.7 mm) dia. Max. cable dia.: 2.97 in. (7.54 mm).



No. 250



No. 280

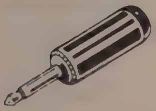
THREE CONDUCTOR

260	Screw terminals, black handle.	12B
S-260	Screw terminals, black handle, .206 in. (5.23 mm) dia. sleeve & tip.	S-12B
267	Combination cable clamp & solder lugs, black handle.	12B
269	Same as 267 except red handle.	12B
290	Screw terminals, shielded handle.	12B
297	Same as 267 except shielded handle.	12B

TWO CONDUCTOR

Part No.	Description	Typical Mating Littel-Jax Jacks
240	Screw terminals, black handle.	11
C-240	Screw terminals with integral cord clamp, black handle.	11
245	Screw terminals, red handle.	11
C-245	Same as C-240 except red handle.	11
250	Solder lugs, black handle.	11
255	Solder lugs, red handle	11
270	Screw terminals, shielded handle.	11
C-270	Same as C-240 except shielded handle.	11
280	Solder lugs, shielded handle.	11
288	Special shielded type. Wide insulator between tip-sleeve; use in 3-cond. jack to perform a 2-cond. function without shorting.	11
S-250	Solder lugs, black handle, .206 in. (5.23 mm) dia. sleeve and tip.	S-11
S-280	Same as S-250 except shielded handle.	S-11

Tini-Plug MINIATURE PHONE PLUGS

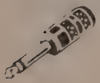


2-cond. phone plugs for use with Tini-Jax jacks. 1/3 size of std. phone plugs. Overall length 1.609 in. (40.87 mm). Handles: plastic or nickel-plated brass. Max. cable dia.: .218 in. (5.54 mm).

Part No.[1]	Part No.[2]	Handle
740	750	Black
745	755	Red
770	780	Shielded

NOTES: [1] Screw terminals. [2] Solder terminals.

Micro-Plug SUBMINIATURE PHONE PLUGS



Subminiature 2-cond. phone plugs, only 1.106 in. (25.81 mm) long; .25 in. (6.35 mm) O.D., .097 in. (2.46 mm) dia. sleeve. Screw-on anodized aluminum handles. Accommodates cables up to .125 in. (3.18 mm) dia. Integral cable clamps mates with Switchcraft TR-2A and MDSL-2A.

Part No.	Description
850	Black Handle
855	Red Handle
880	Natural Handle

Switchcraft, Inc., 5555 N. Elston Ave., Chicago, IL 60630 Tel. (312) 792-2700 TWX 910-221-5199

SYMBEX

IDC INTERCONNECT SYSTEMS

The only flat cable/connector systems with molded-in quality, reliability and convenience...Cable and contacts are integrally molded into the connector body to form a one-piece interconnect system.

Ulti•Mate-D™ D-Sub Min Cable Assemblies

for RS-232, RS-449, RS-442A, RS-443A, and other EMC applications.

Symbex designed the Ulti•Mate-D series from scratch, rather than retrofit a dated connector style to comply with recent emission control requirements. The result is a series of EMC-D Assemblies tested to exceed RS-232 and RS-449 standards and FCC Docket 20780, Part 15, Subpart J specifications.

Standard Features:

- All styles available in 9, 15, 25, and 37 position sizes
- All industry standard dimensions
- Male and Female types
- Selective gold or non-gold contacts
- Cable lengths and wiring patterns to your specifications
- High Normal Force retention
- Screw/nut retention systems, optional
- 100% factory tested

Three Styles:

SPS — Special Purpose Shielded — 60 dB rating exceeds FCC requirements	**GPS** — General Purpose Shielded — 30 dB rating meets RS-232 and RS-449 standards	**GPU** — General Purpose Unshielded for use in non-critical environments
	Connector Specs	
• Metal Shrouds and Backshells • Terminated drain wire (optional) • Terminated cable braid • Unique spring clips	• Metal Shrouds and Backshells • Terminated Drain wire • Unique spring clips	• Plastic Backshells • Metal Shrouds
	Shielding

ZEBRA® CONNECTORS FOR LIQUID CRYSTAL DISPLAYS

SERIES 1000/2000

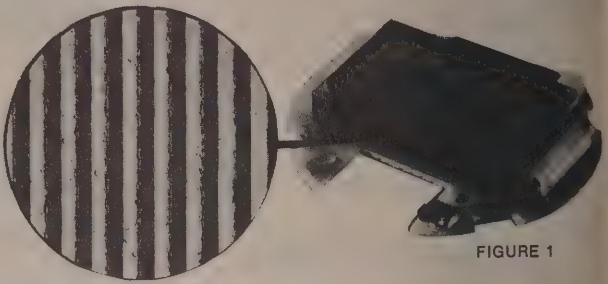

FIGURE 1

SERIES 1000

Series 1000 ZEBRA® Connectors have alternating parallel layers of conductive carbon-filled and non-conductive silicone rubber. They make reliable connections by being deflected between contacting surfaces. Series 1000 ZEBRA Connectors are used for connecting any LCD from small displays for watches to large area displays for instruments. Table A shows the different types of Series 1000 ZEBRA Connectors available.

SERIES 2000

Series 2000 ZEBRA® Connector for connecting liquid crystal displays has alternating parallel layers of carbon filled conductive and opaque white non-conductive rubber. Connection is established by deflecting the Series 2000 ZEBRA Connector between the liquid crystal display and the printed circuit board. The Series 2000 ZEBRA connector is manufactured to specifications and tolerances required for reliable connection to LCD and PC Board contacts. Table E shows the different 2000 Series ZEBRA Connectors available.

DESCRIPTION

	LCD Contact Spacing Center-to-Center*	PITCH: Sum of the Thickness of an Adjacent Conductive and Non-Conductive Layer		Conductive Layer per inch	Individual Conductive and Insulating Layer Thickness		Available Lengths
Series	Minimum	Nominal	Maximum	Minimum	Minimum	Maximum	
1006	0.030 in. 0.75 mm	0.010 in. 0.25 mm	0.014 in. 0.35 mm	100	0.002 in. 0.05 mm	0.008 in. 0.20 mm	8.00 in. 203 mm
1002	0.010 in. 0.25 mm	0.004 in. 0.10 mm	0.006 in. 0.15 mm	240	0.001 in. 0.025 mm	0.004 in. 0.10 mm	1.00 in. 25.4 mm

* This space will assure at least one conductive layer between opposing contacting pads, and at least one insulating layer between adjacent pads.

TABLE A

	LCD Contact Spacing Center-to-Center*	PITCH: Sum of the Thickness of an Adjacent Conductive and Non-Conductive Layer		Conductive Layer per inch	Individual Conductor and Insulating Layer Thickness		Available Lengths
Series	Minimum	Nominal	Maximum	Minimum	Minimum	Maximum	
2002	0.015 in. 0.38 mm	0.005 in. 0.125 mm	0.007 in. 0.175 mm	200	0.001 in. 0.025 mm	0.005 in. 0.125 mm	2.000 in. 25.40 mm
2004	0.020 in. 0.50 mm	0.008 in. 0.20 mm	0.010 in. 0.25 mm	125	0.002 in. 0.05 mm	0.006 in. 0.15 mm	3.000 in. 50.80 mm

TABLE E

Series 1000/2000 Zebra Connectors	Temperature Range		Current Carrying Capacity 0.035″ x 0.035″ pad	Resistance Between Layers
	Minimum	Maximum		
All Series 1000/2000 ZEBRAS	−55°F −50°C	260°F 125°C	0.050 amps	10^{12} ohms

TABLE B

TECKNIT 129 DERMODY STREET / CRANFORD, NJ 07016 / (201) 272-5500

ZEBRA® CONFIGURATIONS

Figure 2 shows the three dimensions of the Series 1000 ZEBRA® Connector. When ordering, the three dimensions should be specified within the limits shown in Table C.

For best overall performance, Series 1000 ZEBRA Connectors must be ordered and used with a ratio of H/W equal to or greater than 1.5 The specifications apply to a ratio of H/W equal to or greater than 1.0. ZEBRA Connector Series 1002 is available up to 1″/25.4mm long; ZEBRA Series 1006 is available up to 8″/203mm long.

SERIES 2000 ZEBRA® CONNECTOR GEOMETRY

Figure 2 also shows the three dimensions of the Series 2000 ZEBRA Connector. When ordering, the three dimensions should be specified within the limits shown in Table F.

For best overall performance Series 2000 ZEBRA Connectors should be ordered and used with a ratio of H/W equal to or greater than 1.5. The specifications apply to a ratio of H/W equal to or greater than 1.0.

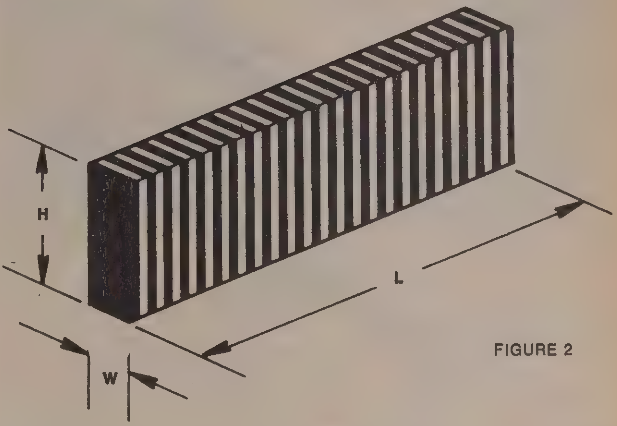

FIGURE 2

The Series 2002 ZEBRA Connector is used for high density connections that require 200 conductive layers per inch (up to 2″ long).

The Series 2004 ZEBRA Connector is used for all connections that require 125 conductive layers per inch (up to 3″ long).

For sizes not included within the above size ranges, consult factory.
TABLE F

TECKNIT® *a TWP company*

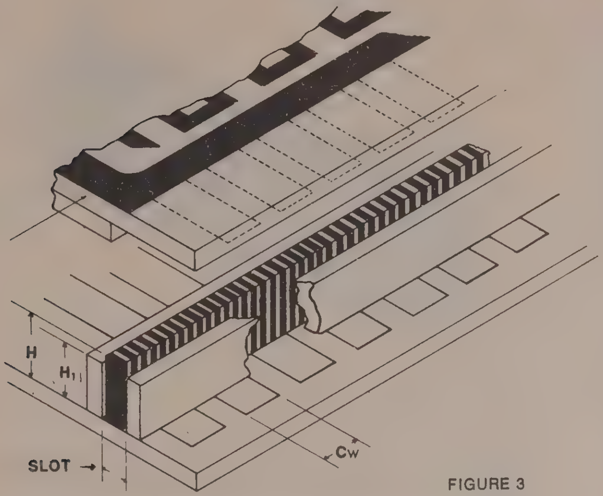

FIGURE 3

METRIC:

$R = \frac{30 \times h}{C_W \times W}$ where H, C_W and W are in cm

For $C_W = 0.035''/0.089\text{cm}$

$R = \frac{30 \times 0.152}{0.089 \times 0.0762} = 672$ ohms

FORCE DEFLECTION

Series 2000 ZEBRA® Connectors should be deflected 5% to 25% of H. To calculate F - Force for deflection, use the following formula:

F = 9 DWL = lbs. (Metric F = 0.56 DWL = kgs)

Where: $D = \frac{H-H_1}{H} \times 100\%$ (Deflection in percent)

H = Height of ZEBRA Connector in inches/cm
H_1 = Deflected height of ZEBRA Connector in inches/cm
L = Length of ZEBRA in inches/cm
W = Width of ZEBRA in inches/cm

Example:
For typical digital watch LCD, the ZEBRA Connector would have the following configurations:

H = 0.060″/0.152cm
W = 0.030/0.0762cm
L = 0.550″/1.397cm
For D = 10%
F = 9DWL
F = 9(10) (0.030) (0.550) = 1.49 lbs.
Also F = 0.63 x 10 x 0.0782 x 1.397 = 0.67 kgs

SERIES 1000 / ZEBRA INSULATING BARRIER

Description	Insulating Barrier

Insulating Barrier Width (B) in.*	0.002 ±0.001
(B) mm	0.050 ±0.025

* The tolerance of W_1 will be equal to the sum of the tolerances of W (see Tables C and B)

TABLE D

EXAMPLE:

For typical digital watch LCD, the ZEBRA® Connector would have the following configurations:

H = 0.060″/0.152cm
W = 0.030″/0.0762cm
L = 0.550″/1.397cm
For D = 10%
F = 8DWL = lbs.
F = 8(10) (0.030) (0.550) = 1.32 lbs.
F = 0.56 x 10 x 0.0762cm x 1.397cm = 0.596 kgs

NOMINAL RESISTANCE CALCULATION

To calculate the resistance of the Series 1000 ZEBRA® Connector use the following formula:

$R = \frac{12 \times H}{C_W \times W}$ = ohms

Where: C_W = Contact pad width in inches
H = ZEBRA height in inches
W = ZEBRA width in inches

INSULATING BARRIER

Series 1000 ZEBRA Connectors are available with insulating barriers on one or two sides. Properties of insulating barriers are shown in Table D.

Series 2000 ZEBRA Connectors are available with insulating barriers on one or two sides. Properties of insulating barriers are shown in Table G.

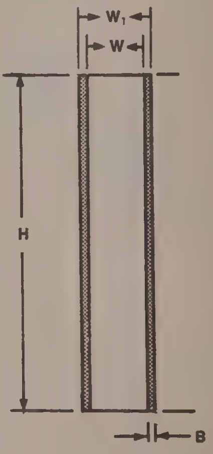

FIGURE 4

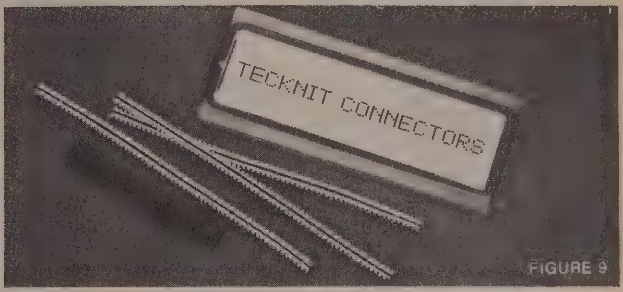
SERIES 2000 / ZEBRA INSULATING BARRIER

Description	Insulating Barrier
Color (one only)	Yellow Green Blue Red Orange White (standard)
Hardness, Durometer A	30
Dielectric Strength volts/mil.	500
Resistance, ohms	10^{12}
Insulating Barrier Width (B) in.*	0.002 ±0.001
(B) mm	0.050 ±0.025

* The tolerance of W_1 will be equal to the sum of the tolerances of W +B for single sided and W +2 x B for double sided.

TABLE G

TECKNIT® *a TWP company*



SELF-SUPPORTING CONNECTOR

The Self-Supporting Ribbed ZEBRA® Connector is a standard 1006 ZEBRA connector element supported by a soft, non-conductive silicone rubber on two sides. The silicone rubber creates a larger width that eliminates need for a holder, and yet the force required for deflection is very low. Only 1.0 to 2.0 lbs. force per linear inch is required for proper contact.

The Self-Supporting Ribbed ZEBRA Connector has 0.020"/ 0.508mm wide ZEBRA Connector element and is available in three different width to accommodate LCD's with glass lip overhang of 0.060"/1.52mm minimum.

For best overall performance the Self-Supporting Ribbed ZEBRA Connector should be used with a ratio of H/W equal to 1.25 or less.

It is used to connect LCD's to printed circuit boards and eliminates bowing of the printed circuit board due to the low force required to make contact.

Connecting Element	1006 ZEBRA
LCD Contact Spacing, Center-to-Center, in./mm minimum	0.030/0.762
Nominal Resistance, ohms	8000 H ohms

TABLE H

STANDARD SELF-SUPPORTING ZEBRA SIZES

Contact factory for special tolerances or custom sizes to 8.0 in./203mm not listed. This connector will allow one conductive layer between opposing contacts of 0.030"/0.762mm minimum center-to-center.

TABLE I

ZEBRA® CONNECTORS FOR DOT MATRIX LCD

Many LCD dot matrix displays have contact pads on the underside of the front plane facing the PC board and on top of the back plane facing away from the PC board. Connection to the front plane is made by sandwiching the self-supporting ZEBRA® Connector between the display and PC board. The ZEBRA STEP is used to connect the leads on the back plane, at level 1, with the PC board, at level 2, See Figure 14.

Dot matrix LCD's have been used successfully in electronic instruments and electronic toys and games. (For design information consult TECKNIT® Design Guide DG01-0001.)

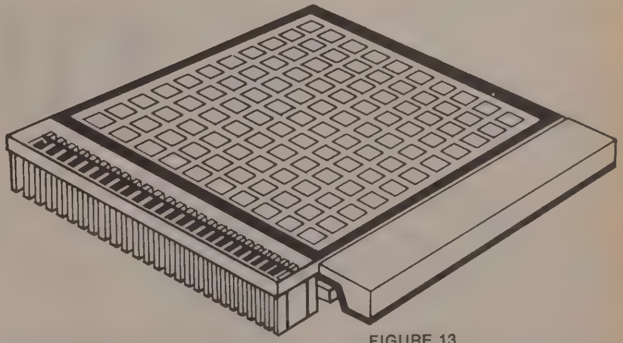

FIGURE 13

ZEBRA STEP CONFIGURATION

The ZEBRA STEP is made from a Series 1006 ZEBRA Connector, consisting of alternating parallel layers of conductive and non-conductive silicone rubber. It is formed into a step configuration and backed with an insulating pad of silicone rubber.

The ZEBRA STEP connector is available in standard size to accommodate a 2"/50.8mm x 2"/50.8mm dot matrix LCD. It is used with center-to-center contact pad spacing of 0.030"/ 0.762mm. For non-standard sizes, which are also available, please contact the TECKNIT Sales Department.

EEM PRODUCT SELECTION GUIDES

There are 33 Guides in this edition of EEM. See page 2 (1A•2, 1B•2, 2•2, 3•2) of each volume to locate the Product Selection Guides that pertain to your needs.

SHORT FORM CATALOG

- **Ansley® IDC Cable & Connectors**
- **Ansley® IC Sockets**
- **Flexstrip® Jumpers & Flexpac™ Assemblies**

For more than 20 years, Thomas & Betts Corporation has been developing interconnection products to meet your most complex challenges: computers and peripherals, test and instrumentation, broadcast and telecommunications, consumer electronics, automotive, military/aerospace, and industrial control applications.

And we've pioneered such innovative concepts as the mass-terminated 50-position "D" connector..."soft-tear" ground plane cable...stacked DIP and VLSI sockets...and our high-flex family of Flexstrip® jumpers and Flexpac™ cable-connector assemblies. All designed to realize the dual goal of today's electronic explorers: lower installed cost, and higher density packaging with greater reliability.

Check the following pages for solutions to your interconnection needs. Then contact Customer Service, Thomas & Betts Corporation, Electronics Group, 920 Route 202, Raritan, N.J. 08869, (201) 469-4000; or call your local authorized Distributor.

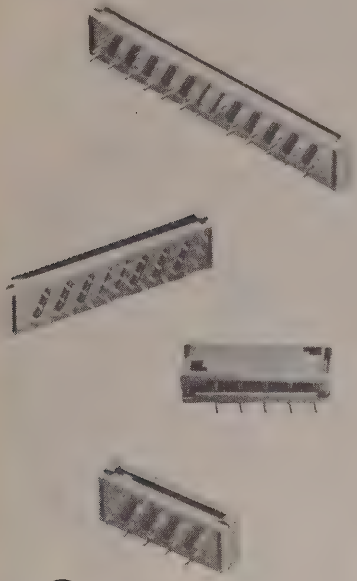
ANSLEY® CONNECTORS

ANSLEY® STANDARD PCB SOLDER TRANSITION CONNECTORS



DESCRIPTION/ APPLICATION

Ansley® PCB Solder Transition Connectors provide fast, permanent termination of flat cable to printed circuit boards. The PCB connector can be soldered either after crimping to the cable, or on the board (flow soldered) prior to crimping the cable.

Tail Lengths		
For 1.57 (.062) Thick PCB's	For 3.17 (.125) Thick PCB's	No. of Pos.

DESIGN CHARACTERISTICS

- 11 contact sizes - 10-60 positions
- Available in solder tail lengths for 1.57mm (.062″) or 3.18mm (.125″) board thicknesses
- One-piece connector design with mechanical side latches
- PCB connectors are soldered for permanent flat cable termination to printed circuit board
- Ridges in connector top align with Ansley® flat cable

DIMENSIONS ARE SHOWN IN MM (INCHES)

ANSLEY® SLIMLINE PCB SOLDER TRANSITION CONNECTORS

DESCRIPTION/ APPLICATION

Narrower in width than Standard Solder Transition Connectors, Ansley® Slimline PCB Solder Transition Connectors provide fast, permanent termination of flat cable to printed circuit boards. The PCB Connector can be soldered either after crimping to the cable, or on the board (flow soldered) prior to crimping to the cable.

ANSLEY® CONNECTORS

ANSLEY® FEMALE SOCKET TRANSITION CONNECTORS, STANDARD

DESCRIPTION/ APPLICATION

The Ansley® Female Socket Transition Connector is designed to mate with a wide variety of Ansley Male Headers in PC board applications which require repeated connection and disconnection. The connectors provide fast, high-integrity mass termination of all types of Ansley flat cable, simplifying and improving the quality of electronic interconnection.

ANSLEY® FEMALE SOCKET TRANSITION CONNECTORS, MIL-C-83503/7 QUALIFIED

DESCRIPTION/ APPLICATION

The MIL-approved Female Socket Transition Connector is designed to mate with Ansley® MIL-approved Male Headers in PC board applications which require repeated connection and disconnection. The connectors provide fast, high-integrity mass termination of all types of Ansley® flat cable, simplifying and improving the quality of electronic interconnection.

DESIGN CHARACTERISTICS

- Strain reliefs available for all Ansley® Female Socket Transition Connector sizes - 6-64 positions
- Strain relief provides protection for cable termination; recommended for applications requiring repeated insertion and extraction cycles
- Extractor handles available for 16-64 positions only
- Extractor handle provides strain relief for the cable during disconnect cycles; recommended in applications where the female connector is hidden from view
- Polarizing plug provides alternate means of polarization; it is inserted into the appropriate connector contact cavity at the required position, and the corresponding pin on the mating header is clipped off
- Retainer clips are designed to prevent accidental connector removal or separation during handling or vibration

ANSLEY® CONNECTORS

ANSLEY® PCB MALE HEADERS, LOW PROFILE

DESCRIPTION/ APPLICATION

The Ansley® Low Profile PCB Male Header is designed to provide stability, reliability, convenience and positive polarization when mated with an Ansley® Female Socket Transition Connector, in PC board applications which require repeated connection and disconnection. Optional mounting provision secures header to PC board or panel.

DESIGN CHARACTERISTICS

- Center polarization slot mates with center polarization tab on Ansley® Female Socket Transition Connectors
- 30 microinches (minimum) gold plating in contact mating area
- Fully-shrouded (four-walled) header, for maximum protection of .635mm (.025") square mating pins
- Ansley® low-profile headers are also available in ejector/retainer versions. Add suffix "E" for headers with ears to accommodate female socket without strain relief; add suffix "ES" for header with ears to accommodate female socket with strain reliefs.

ANSLEY® PCB MALE HEADERS WITH LOCK & EJECT OPTION

DESCRIPTION/ APPLICATION

The Ansley® PCB Male Header is designed to provide stability, reliability, convenience and positive polarization when mated with an Ansley® Female Socket Transition Connector, in PC board applications which require repeated connection and disconnection. Optional retainer-ejector ears easily disengage the header and female socket, eliminating stress in the cable contact termination area and solder joint area during a disconnect cycle.

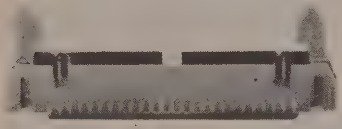
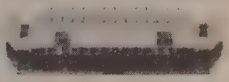
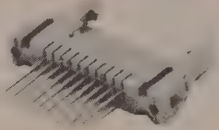
ANSLEY® CONNECTORS

ANSLEY® PCB MALE HEADERS, MIL-COMPATIBLE POLARIZATION, WITH LOCK & EJECT OPTION







DESCRIPTION/ APPLICATION

The Ansley® MIL-Compatible PCB Male Header is designed to provide stability, reliability, convenience and positive polarization when mated with an Ansley® Female Socket Transition Connector, in PC board applications which require repeated connection and disconnection, and MIL-compatible polarization. The retainer-ejector ears easily disengage the header and female socket, eliminating stress in the cable contact termination area and solder joint area during a disconnect cycle.

DESIGN CHARACTERISTICS

- Compatible with all MIL-C-83503 socket and header systems
- 30 microinches (minimum) gold plating in contact mating area
- Ten contact sizes - 10-64 positions
- Fully-shrouded (four-walled) header, for maximum protection of .635mm (.025") square mating pins
- Center polarization slot mates with center polarization tab on Ansley® Female Socket Transition Connectors

DIMENSIONS ARE SHOWN IN MM (INCHES)

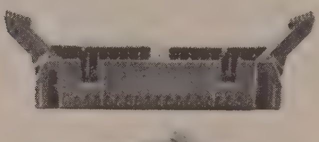
ANSLEY® PCB MALE HEADERS, MIL-C-83503/24/25 QUALIFIED



DESCRIPTION/ APPLICATION

The Ansley® MIL-approved PCB Male Header is designed to provide stability, reliability, convenience and positive polarization when mated with an Ansley® MIL-approved Female Socket Transition Connector, in PC board applications which require repeated connection and disconnection. The retainer-ejector ears easily disengage the header and female socket, eliminating stress in the cable contact termination area and solder joint area during a disconnect cycle.

DESIGN CHARACTERISTICS

- Approved to MIL-C-83503/24 and MIL-C-83503/25
- Permanent, molded-in polarization keys
- Long, retainer-ejector ears to accommodate socket with strain relief
- 50 microinches (minimum) gold plating in contact mating area
- Permanent part number identification stamped on each connector
- MIL-specified packaging and labeling
- Ten contact sizes - 10-64 positions
- Fully-shrouded (four-walled) header, for maximum protection of .635mm (.025") square mating pins

ANSLEY® CONNECTORS

ANSLEY® VERTICAL EJECTOR HEADERS

DESCRIPTION/ APPLICATION

The Ansley® Vertical Ejector Header connects with standard Female Socket Transition Connectors in PC board applications requiring repeated disconnect/reconnect cycles. While retaining all the advantages of conventional ejector header designs, it maximizes PC board real estate. Unlike conventional designs where the ejector ear swing radius is out at the ends, the swing radius of the Vertical Ejector Headers is up at the side. This permits headers to be butted end to end with no wasted board space.

DESIGN CHARACTERISTICS

- Eleven contact sizes - 10-60 positions
- Right angle and straight solder tail versions, for either 1.57mm (.062″) or 3.18mm (.125″) thick boards
- Available with large or small retainer-ejector ears to accommodate terminated female socket connectors with or without installed strain reliefs, respectively

DIMENSIONS ARE SHOWN IN $\frac{\text{MM}}{\text{(INCHES)}}$

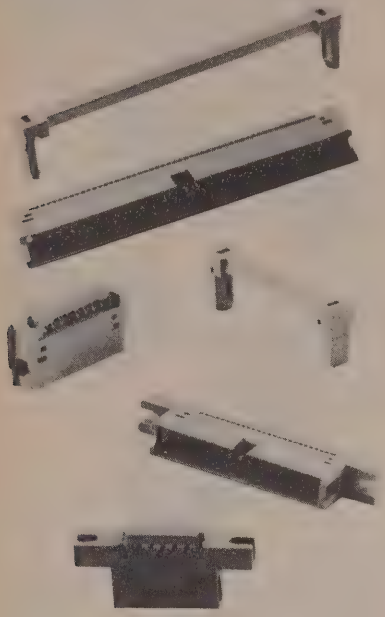
ANSLEY® CONNECTORS

ANSLEY® MALE CONNECTORS



DESCRIPTION/ APPLICATION

Ansley® Male Connectors are designed to mate with Female Socket Transition Connectors. Used primarily for in-line cable splice and "T" tap applications, they are available with optional mounting ears for I/O applications.

DESIGN CHARACTERISTICS

- Eleven contact sizes - 10-60 positions
- Box shape assures polarization and protects mating pins
- Available without mounting ears for in-line cable splice applications
- Available with mounting ears for I/O applications
- Strain relief available for Male Connector without mounting ears
- One-piece connector design with mechanical side latches
- Ridges in connector top align with Ansley® flat cable

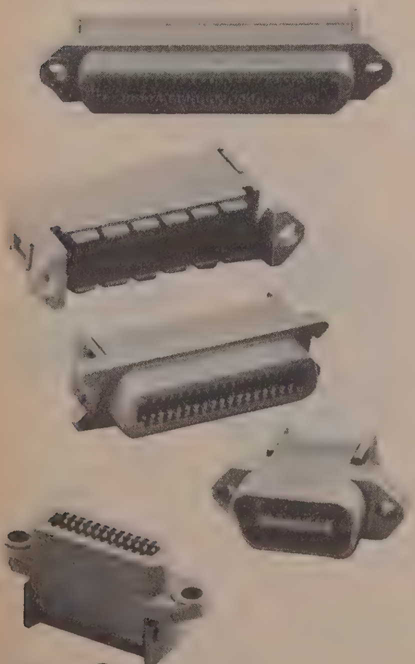
ANSLEY® RIBBON CONNECTORS



DESCRIPTION/ APPLICATION

Ansley® Ribbon Connectors are designed primarily for I/O applications. They provide maximum installation versatility by maintaining I/O compatability with all industry standard Ribbon Connectors while mass terminating to Ansley® flat cable.

DESIGN CHARACTERISTICS

- Insulation displacing contacts on 1.27mm (.050") centers
- I/O mating ribbon contacts on industry standard 2.16mm (.085") centers
- Compatible with other Ansley® mass termination connectors utilizing 1.27mm (.050") pitch cable
- Backshell strain reliefs available for use with standard ear Ribbon Connectors terminated to Jacketed Flat Cable
- One-piece connector design with mechanical side latches
- Ridges in connector top align with Ansley® flat cable

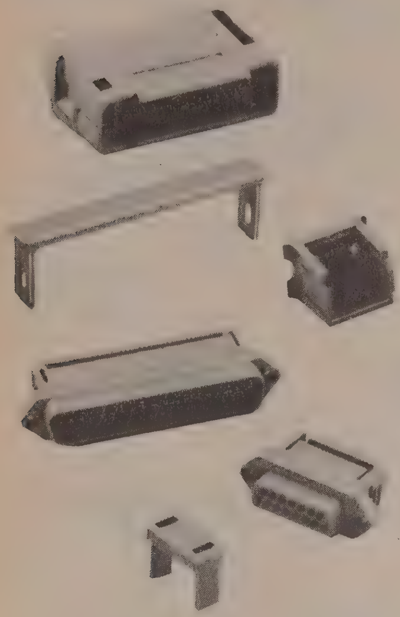
ANSLEY® "D" CONNECTORS, PLASTIC



DESCRIPTION/ APPLICATION

Ansley® Plastic "D" Connectors are used in panel-mounted I/O applications, providing mass termination IDC convenience and integrity while maintaining compatibility with all industry standard "D" connectors. Backshell strain reliefs and a full complement of mounting hardware accessories are available for this series.

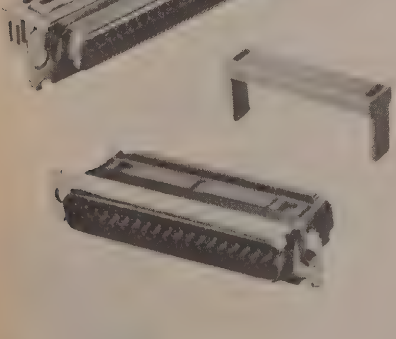
DESIGN CHARACTERISTICS

- Available in 9, 15, 25, 37 and 50 position configurations
- Pin connector and socket connector versions
- Backshell strain relief in straight and right angle styles
- SPREAD PITCH™ contact design enables mass termination to 1.27mm (.050") pitch flat cable while maintaining I/O compatibility with 2.77mm (.109") industry standard "D" Connectors
- One-piece connector design with mechanical side latches
- Ridges in connector top align with Ansley® flat cable

ANSLEY® "D" CONNECTORS, METAL SHELL



DESCRIPTION/ APPLICATION

Ansley® Metal Shell "D" Connectors have been designed to aid in electronic system EMI/RFI suppression, as mandated by recent FCC directives. Used in panel-mounted I/O applications, they provide the same mass termination benefits as Ansley® plastic "D" Connectors, and terminate to all types of Ansley® flat cable - including shielded, jacketed shielded and ground plane cable for spurious signal suppression in intercabinet applications. Backshell strain reliefs and a full complement of mounting hardware accessories are available for this series.

ANSLEY® CONNECTORS

ANSLEY® DIP SOCKET CONNECTORS & HEADERS

DESCRIPTION/ APPLICATION

The Ansley® DIP Socket Connector Series is designed to provide reliability for pluggable dual in-line packaging. Mating headers and sockets prevent damage to DIP pins during repeated insertion and extraction cycles - the mating pins are completely enclosed in plastic. ,

DESIGN CHARACTERISTICS

- Available in 14 or 16 positions
- Mating Socket Connectors and Headers enclose DIP pins
- Headers include retainer clip
- Compatible with .64mm (.025") square posts on either a 2.54mm x 5.08mm (.100" x .200") or a 2.54mm x 7.62mm (.100" x .300") grid
- One-piece connector design with mechanical side latches
- Ridges in connector top align with Ansley® flat cable

DIP SOCKET CONNECTORS

ANSLEY® REMOTE DIP SOCKET CONNECTORS

DESCRIPTION/ APPLICATION

Ansley® Remote DIP Socket Connectors expand packaging flexibility, allowing DIP switches, displays, semiconductors and other dual in-line pin devices to be mounted on an exterior panel (or other accessible location) and connected to their corresponding PC board by flat cable.

DESIGN CHARACTERISTICS

- Available in 14 and 16 pin versions with or without mounting ears
- Snap-in shroud for sockets mounted through a 3.125mm (.125") thick panel available
- Shim available for placement between connector and inner panel surface, for a panel of lesser thickness
- Snap-on strain relief clamps available
- One-piece connector housing is designed for DIP packages with .2mm x .4mm (.008" x .016") leads
- One-piece connector design with mechanical side latches
- Ridges in connector top align with Ansley® flat cable

ANSLEY® CONNECTORS

ANSLEY® STANDARD DIP PLUGS

DESCRIPTION/ APPLICATION

Ansley® Standard DIP Plug Connectors are primarily used as a disconnectable interface to DIP sockets.

DESIGN CHARACTERISTICS

- Available in 14 and 16 pin versions to mate with DIP sockets for disconnect applications on 2.54mm x 7.62mm (.100" x .300") grids
- Heavy duty contacts optional
- One-piece connector design with mechanical side latches
- Ridges in connector top align with Ansley® flat cable

DIP PLUGS

Catalog Number	No. of Pos.

ANSLEY® LOW PROFILE DIP PLUGS

DESCRIPTION/ APPLICATION

Ansley® Low Profile DIP Plug Connectors are primarily used as a disconnectable interface to DIP sockets. Dip plugs with heavy duty contacts are used in disconnect applications with DIP sockets. DIP Plugs with tin plated contacts provide a permanent flat cable transition to printed circuit boards.

DESIGN CHARACTERISTICS

- Low profile design
- Available in 9 contact sizes - 8-48 - in both heavy duty and tin plated versions
- One-piece connector design with mechanical side latches
- Strain relief available for 24 and 40 position configurations
- Ridges in connector top align with Ansley® flat cable

ANSLEY® CABLE

ANSLEY® FLAT CABLE

DESCRIPTION

Ansley® flat cable is designed to mass terminate to all types of Ansley® connectors without wire stripping or soldering. The flexible, symmetrical cable is extruded, not laminated, in order to maintain exacting 1.27mm (.050″) pitch tolerances from conductor to conductor. Connectors can be terminated to flat cable in up or down confiurations or 180° from each other.

APPLICATIONS

STANDARD

Primarily designed for intra-cabinet wiring applications.

HIGH FLEX LIFE

For applications requiring upwards of 50 million flex cycles. Ideal for moving printer heads.

COLOR CODED

Designed for easy individual conductor identification in interconnect applications requiring multiple individual terminations.

JACKETED

Suited to external interconnection of electronic equipment; exhibits consistent low crosstalk characteristics required for high speed data processing equipment.

JACKETED SHIELDED

Designed primarily for use with D-connectors, Ribbon connectors and Male connectors. Aids in EMI/RFI suppression per FCC Docket 20780.

GROUND PLANE

Soft-Tear Design, combined with notching and trimming tools, greatly simplifies removal of insulation and ground plane. No grinding necessary.

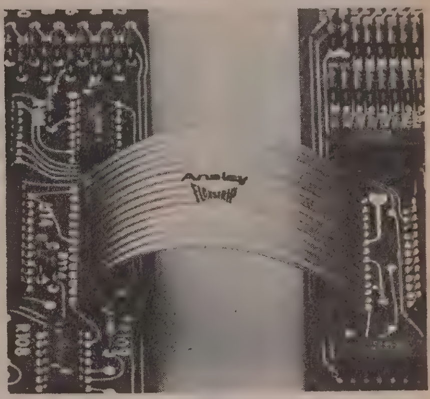
FLEXSTRIP® JUMPERS FLEXPAC™ ASSEMBLIES

FLEXSTRIP® JUMPERS



DESCRIPTION/ APPLICATION

FLEXSTRIP® Jumpers are multiple conductor board-to-board interconnection devices, preplated and ready-to-use — without wire stripping, cutting to length or solder preparation. They provide a convenient, reliable alternative to conventional point-to-point wiring in high density PC board interconnection applications.

DESIGN CHARACTERISTICS

- Round conductors rolled flat for high flex life
- Round-to-flat "transition zone" permits flexing stress to be distributed evenly throughout flat conductor area
- One-piece construction
- Choice of 4 insulations for high volume commercial use as well as military/aerospace applications
- Uniform pin spacings to accommodate PCB hole patterns
- Available in 4 standard pin configurations, 6 standard pitch dimensions

SYSTEM OPTIONS

When pluggability is required, use Flexstrip® Header & Socket — a reliable, low-profile 2-piece system for high-vibration applications. Connectorized portion of cable serves as pull-tab/locking device on mating, board-mountable socket. ALSO AVAILABLE: Flexstrip® Sockets, and continuous strips of socket contacts.

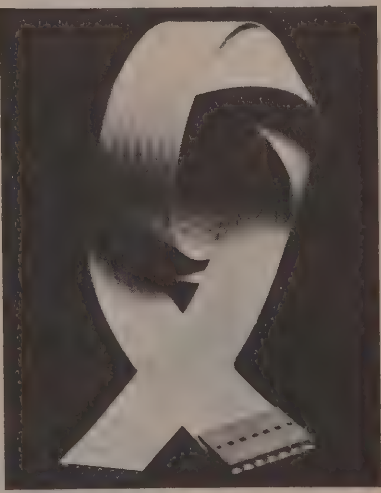
FLEXPAC™ SYSTEM FLAT CONDUCTOR CABLE ASSEMBLIES



DESCRIPTION/ APPLICATION

The Flexpac™ System represents a low-profile, high-performance interconnect technology offering versatile solutions for printer/plotter designs, dense PC board stacking, retractile (or "moving") assemblies, and a host of other high-flex applications. Additional system benefits are intermateability with industry-standard MTIDC connectors, and off-the-shelf availability in a wide variety of customized, pre-packaged configurations.

Now you can specify card edge, male and female connectors (single or double row) as well as discrete solder pins terminated to your choice of flat conductor cable, Flexstrip® jumpers (see above), flexible circuits, membrane keyboard/keypad traces — virtually any flat conductor medium. No. of positions: Single row male or female (2-32); double row male or female (4-64); card edge (4-64).

ANSLEY® VLSI SOCKETS

ANSLEY® PIN GRID ARRAY ZERO-INSERTION-FORCE CONNECTOR

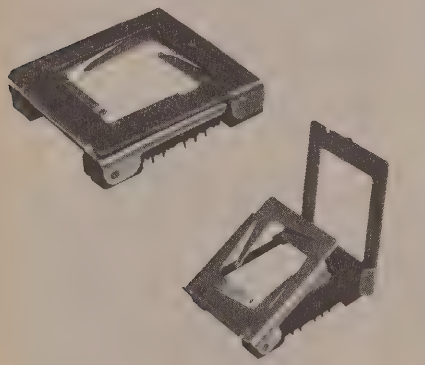
DESCRIPTION/ APPLICATION

The Ansley® Pin Grid Array ZIF Connector is designed to interconnect a wide variety of large terminal count LSI and VLSI semiconductor devices (in pin grid array packages) to printed wiring boards. Applications range from 64 to 400 I/O. Incorporating zero insertion force (ZIF) design, it facilitates insertion and removal of large terminal count devices without board or pin damage, and simplifies field servicing.

DESIGN CHARACTERISTICS

- Eleven array sizes - 10 x 10 through 20 x 20
- Various pin populations available; e.g. 132 pins in a 14 x 14 array
- Mates with .018″ ± .002″ diameter pins on a standard .100″ x .100″ grid
- ZIF design for low insertion/extraction force
- Selectively plated beryllium copper contacts (dual redundant design)
- Contacts individually replaceable without detaching connector
- Cam operated (contacts normally closed with cam in stress free condition)
- Standard screw slot actuator; alternate actuators (e.g. hex socket, lever) available
- Low profile
- Solder tail or surface mount contacts for printed wiring board interface
- Low inductance
- Positive connector orientation keys; package polarization feature optional
- Housing made of glass-filled thermoset material (operating temperature range 0° to 125°C); optional high temperature materials available

ANSLEY® LEADLESS CHIP CARRIER SOCKET



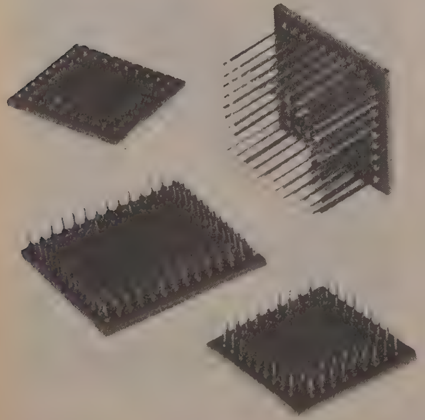
DESCRIPTION/ APPLICATION

This state-of-the-art series of Ansley® Leadless Chip Carrier sockets provides for high-performance interconnection of microprocessors, gate arrays, as well as high-density semiconductor custom logic devices. It has been designed to accept JEDEC-standard leadless Type A packages with .050″ or .025″ centerlines.

DESIGN CHARACTERISTICS

- Initial standard terminal counts: 68 I/O (.050″) and 132 I/O (.025″)
- Solder tail or surface mount contacts for printed wiring board interface
- Latching mechanism require no tools
- Mechanical retention features allow for automatic insertion
- Operation temperature range suitable for commercial and burn-in applications
- Connector may be probed with chip carrier in place
- Minimum .020″ standoff for ease of cleaning and visual inspection
- Low profile design
- Gold-plated beryllium copper contacts
- Contact force: 75 grams, min.
- Insulator body rated U.L. 94 V-O
- Provisions for integral decoupling capacitors

ANSLEY® PIN GRID ARRAY SCREW MACHINE SOCKET



DESCRIPTION/ DESIGN CHARACTERISTICS

- Three standard sizes (10 x 10, 11 x 11 & 14 x 14), seven standard grid patterns (64 - 132 leads) - in both solder and wrap post tail versions; other sizes available
- Low profile - 4.19mm (.165″) max. height off board
- Precision-machined sleeves for smooth entry, high reliability
- 4-beam inner contact
- Accepts 0.46mm (.018″ ± .002″) round pins with low insertion force and optimum normal force - can be used in "sacrificial" interface carrier
- Standard .100″ pin spacing; mountable on every side without grid position loss
- Pin No. 1 polarity identification

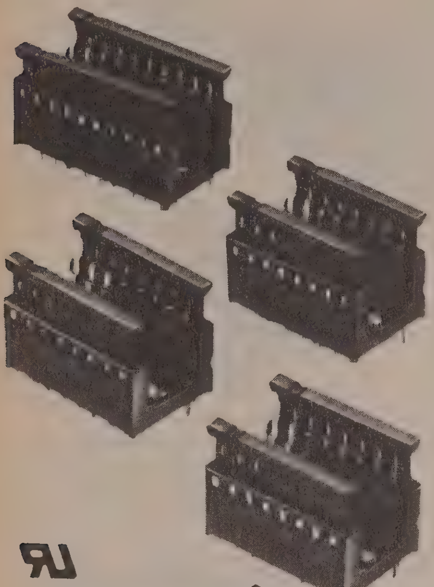
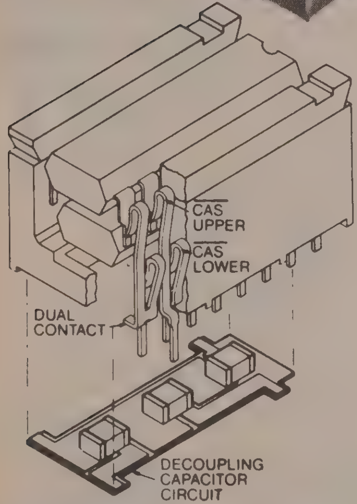
ANSLEY® DIP SOCKETS

ANSLEY® STACKED DIP SOCKETS





- Doubles IC Packaging Density
- 16, 18, 20, 24, 28 Position
- For Memory ICs/Logic & Support Devices
- Integral Decoupling Capacitor Circuits (optional)

The evolution of microcomputer electronics in the last decade has been a paradox: as functional complexity has increased, size has dramatically decreased. Every day, designers are facing the challenge of fitting more circuits and more microprocessor power into smaller and tighter compact electronic devices.

In anwser to the "packaging density" dilemma, T & B introduces an innovative idea: the Stacked DIP Socket. It lets you stack two memory, logic or support devices, one above the other, virtually doubling your IC packaging capacity while leaving more board real estate for other components.

Stacked DIP Sockets are easy to install and easy to load. They offer improved high-integrity electronic performance. And they lower system costs, when compared to mounting an equal number of ICs in individual sockets.

In memory array applications, an integral decoupling capacitor circuit — up to three chip capacitors — can be added to lower power supply noise. The space saving circuit takes up no additional board space, and has approximately half the power-ground loop lead inductance of sockets using discrete decoupling capacitors. This results in a 2 to 1 improvement in noise suppression compared to standard sockets and discrete capacitors.

NOTE: It is suggested that the factory be consulted for specific details regarding the installation and use of Stacked DIP Sockets.

CUSTOM CONFIGURATIONS

Although the choice of Stacked DIP Sockets described here will satisfy most standard design requirements, custom Stacked DIP Sockets can be manufactured to suit special needs in quantity orders. Customization can include special sizes to meet unique board requirements, different pin positions for RAS and CAS or chip enable contacts, data-in and data-out ports, capacitor pin assignments, etc. For custom requirements, please contact factory.

DESIGN FLEXIBILITY

Stacked DIP Sockets are available in a broad choice of configurations to accommodate most common IC packages and design requirements. Sockets are available in 16, 18, 20, 24 and 28 positions, for either parallel memory packages or electrically isolated logic and support devices. The sockets accommodate devices in standard ceramic or plastic packages.

SUPPORTIVE TECHNICAL DATA

Catalog numbers with a "Letter Suffix" indicate sockets with built-in decoupling capacitors to further increase packaging density. Indicated here are the "Pin Assignments" for Stacked DIP Sockets employing such decoupling capacitor circuits (0.1 μf):

ANSLEY® DIP SOCKETS

LOW PROFILE DIP SOCKETS WITH DECOUPLING CAPACITORS

- 0.1 μf capacitor chips mounted on Kapton® substrate directly beneath DIP socket
- Accepts .28 mm x .46 mm (.011" x .018") rectangular and .40 mm (.016") to .53 mm (.021") diameter round IC leads, in lengths from 2.54 mm (.100") to 3.94 mm (.155")
- End-to-end and side-to-side stackable on .100" spacing without pin position loss

Catalog No.* (Solder Tail)	No. Leads	Capacitor Circuit

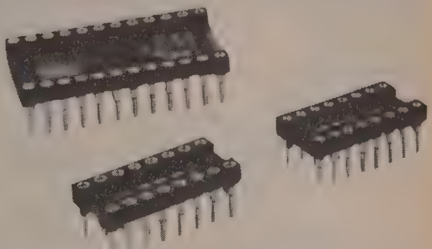
* S6 denotes solder tail.

For 1-, 2- or 3-level wrap post tail, substitute W1, W2 or W3, respectively. Add "G" for gold plating, "T" for tin plating.



LOW PROFILE OPEN FRAME DIP SOCKETS WITH SOLDER TAILS

- Open frame construction, with reinforcing "X" supports in .100" x .600" and .100" x .900" sockets
- End-to-end, and side-to-side stackable on .100" spacing without pin position loss
- Polarity notch for identification and auto-insertion applications
